Miss T. Noland And Rev. A. Wallis Wed

Colorful Ceremony At Holy Trinity Church

An interesting wedding was held in Holy Trinity Church, Tofield, on Monday afternoon, when Miss Thelma Lois Noland, daughter of Mr. and Mrs. J. M. Noland of Tofield, was married to Rev. Albert Wallis, rector of Holy Trinity Church. The ceremony was performed by Rt. Rev. A. Burgett D.D., Bishop of Edmonton, assisted by Ven. Archdeacon F. C. Cornish.

The church was beautifully decorated for the occasion, the chancel rail being massed with flowers. The bride, who was given in marriage by her cousin, Mr. George Noland of Edmonton, wore an exquisite gown of white lace. Her veil of embroidered Brussels net was caught to her head by a wreath of orange blossoms and fell gracefully to the end of her train. Her flowers were a shower bouquet of ophelia roses.

Mrs. J. W. Chapman, matron of honor, wore a lovely gown of blue flowered chiffon with hat of same shade and carried a sheaf of pink glads. Miss Luella Hill, cousin of the bride, was the bridesmaid and was attractively gowned in peach taffeta with hat of the same shade and sand accessories. Her bouquet was of mauve and orange sweet peas. The bride's mother wore a suit of navy blue silk with matching accessories and a corsage of red carnations. Mr. J. W. Chapman attended the groom.

Mrs. D. G. McCarthy played Lohengrin's wedding march as the bridal procession entered the church.

The surpliced choir sang a suitable number during the signing of the register.

Following the ceremony, an informal reception was held at the home of Mr. and Mrs. D. G. McCarthy. The bride and groom, together with the bride's mother received the guests, and the members of the Women's Auxiliary served tea.

In a few well chosen and appropriate words Archdeacon Cornish proposed the toast to the bride, and it was suitably replied to by the bridegroom. The toast to the bridesmaid was proposed by Mr. D. G. McCarthy and it was fittingly replied to by Mr. J. W. Chapman.

Rev. and Mrs. Albert Wallis later left by motor for Vancouver and other Pacific coast cities.

LOCAL AND PERSONAL

Miss Audrey Jobb left for her school at Drumheller on Friday last.

Mr. and Mrs. Gordon Jobb of Daysland spent the week end at the Jobb home.

Miss Redig spent the week end in Viking.

Mrs. Calvert, Mrs. W. E. Seale, Loret Ross and Hilda Nemeland motored to High River over the week end to visit with Mrs. R. H. Brodersen, nee Alma Bethel.

Miss Marjory Stewart and Ruth Wingrove were in Tofield on Monday.

Miss Hilda Nemeland is on her holidays.

Miss Myrtle Bethel left for her school in Sedgewick on Sunday.

Among those that visited the city last week are: Mrs. Hammond, Mrs. Malcolm, Mrs. Taylor, Mrs. Abbott, Mrs. Jobb, Mr. and Mrs. Stan Yakabuska, Thelma Jobb and Anne Lindsay.

Mr. Glover's sister and brother, Mr. and Mrs. Alf Glover of Lethbridge and Mrs. Lowe of Drumheller, visited at the Glover home on Sunday.

Mr. and Mrs. Frank Ball and family of Edmonton visited at the Walker home on Monday.

Miss Lois Thompson spent the week end at her home here.

A miscellaneous shower, sponsored by the Tofield W. A. in honor of Miss Thelma Noland, bride elect, was held at the home of Mrs. A. B. Clutterham on Thursday of last week. There were 31 W. A. members and friends present and a very pleasant evening was spent. The bride elect was presented with a large number of beautiful and useful gifts. A splendid lunch was served by the hostess assisted by some of the junior W. A. girls.

Mrs. J. Noland who has been a resident of Tofield for many years left on Monday for Edmonton, where she will stay a few days, after which she will leave for the Pacific coast to reside. Mr. Noland left some time ago and is located upon a small fruit farm there. During the week several farewell gatherings were held in Mrs. Noland's honor, details of which are not at hand, but her departure will cause regret among the ladies of town and district as she was very well known and liked. Of a gracious though retiring disposition, she made many lasting friends who wish her many years of happiness in her new home.

MRS. J. W. COOKSON'S LEGHORNS LEADING FOR WEEK AND LEADING FOR SEASON

For a number of years past, sixteen to be exact, an Alberta Egg Laying Contest has been conducted at the Dominion Experimental Farm, Lethbridge. Pens of pure-bred birds of the different breeds are housed and taken care of and the egg production carefully recorded and tabulated. This year there are twenty-four pens registered and the report for the 43rd week is just to hand. In the tabulating of points, not only are the actual number of eggs laid taken into consideration, but their weight also, extra points being given for eggs over a stipulated weight.

It will be pleasing to residents of this district to know, that in the report just issued, Mrs. J. W. Cookson's pen of White Leghorns was the leading pen of the 24 pens there, with a total of 64.9 points for 57 eggs laid. For the same week the next highest was a pen of Barred Rocks with 49 eggs and 53.2 points to their credit. Mrs. Cookson's birds were not only highest for the week but are also leading the entire contest which has but a few more weeks to run. During the 43 weeks the contest has been running, Mrs. Cookson's pen has laid 1863 eggs and received 2010.3 points. The next highest for the 43 weeks, also a pen of White Leghorns laid 1766 eggs for which they received 1968.4 points. Congratulations.

FOR SALE.—Used binder parts for McCormick, Massey-Harris, and Frost & Wood Binders. Also Binder canvasses.—M. C. HAMMOND, Tofield.

TO RENT:—Six roomed house in Tofield. Well built and warm, hardwood floors, good well. Soft water cistern in basement. Furnace heated, gas and electricity. Possession October 1st.—Apply Mrs. F. M. Webb, Tofield. Phone 42.

AMISK CREEK

School reopened on Tuesday with Miss Doris Glassner as teacher. She will make her home with Mrs. C. Erickson while here.

Several from this district attended the confirmation service held at Holden last Sunday. Among those of this district who were confirmed are Myrtle and Marion, twins of Mr. and Mrs. F. A. Moen; Lilly Haugen; Frank Johnsrud and Jacob Pederson from Ingram school and Glen Hillerud from Solberg school. Rev. Bjelde officiated.

Mr. and Mrs. P. O. Flaaten and Sigurd Snortheim were guests at the P. B. Anderson home one sunday recently. They attended the evening service in the Bardo church conducted by Rev. J. Hansen.

We are glad to report that Alice Berg who has been quite ill with the flu is recovering nicely.

Rev. J. Hansen of Montana gave a very inspiring address at the Young People's meeting in our church last Sunday evening. Professor C. Ronning also spoke on behalf of the Camrose Lutheran College. The meeting was very well attended.

Mr. and Mrs. I. C. Olson and family, with friends and relatives spent Sunday picnicking at Elk Island Park.

Ruby Berg of Edmonton spent Sunday and Monday with her parents here, returning to the city on Monday evening.

Erling Sand of Elk Point is assisting with the work at P. Flaatens.

Mr. E. Berg of Camrose was a visitor at the Annebo home last Sunday.

Mr. and Mrs. C. Erickson visited at the J. Holte home, south of Round Hill last Sunday. Mrs. Holte is Mrs. Erickson's sister. Mr. Holte is tending the elevator and station there.

Lilly Berg, Mrs. E. A. Moen and Mr. R. O. Berg motored to the city last Friday. While there Lilly Berg wrote an exam, and Mrs. Moen visited with her mother and Mrs. E. Anderson. We regret to report that Mrs. E. Anderson is very ill.

Mr. and Mrs. H. Hillerud motored to the city last Friday to visit with Beulah who is still at the General hospital. She had her tonsils removed on Saturday.

SCHOOL OPENING AND SCHOOL FAIR POSTPONED

Following a recommendation by the local medical officer of health, the town school board met on Saturday evening and decided to postpone the opening of school until Monday, September 9th, owing to there being a number of suspected cases of infantile paralysis in the district.

The school fair, which was to have been held on Saturday, September 7, has been postponed. It will most likely be held at a later date when the judges can make it convenient to come.

LINDBROOK

To celebrate the 10th wedding anniversary of Mr. and Mrs. F. A. Evans, a happy gathering was held at the home of Mr. and Mrs. Jas. Bracegirdle at Lindbrook, on the recent holiday. Guests present were Mr. and Mrs. Clipston, Mrs. W. Arkwright, Mrs. T. Lissimore, Miss Gladys Lissimore and Mr. J. Whittle, all of Wainwright; Mr. J. Harkness of Wetaskiwin, Mr. and Mrs. E. W. Hooper, Jimmie Hooper and Pete Holland of Lindbrook; and Mrs. J. L. Gerow of Edmonton. The successful party ended in the wee sma' hours of the morning with all present very correct and all wishing the guests of honor a long happy and successful union.

The Lepine family have been entertaining visitors this week from various and scattered places. Mrs. Frank Fontaine and daughter from St. Paul, Alta., and Misses Marie Louise and Lucille Boyle from Marquette, Michigan, U. S. A.

Mary Louise, say that sounds like Mt. St. Eloi, eh boys. Kind of a familiar sound to it.

Mr. and Mrs. Bradley and daughter Rene and Mr. H. Williams visited here from Edmonton on Sunday.

Congratulations to Mr. and Mrs.

Reduction in Grain Storage Rate in Alberta Pool Elevators

Announcement is made that a storage rate of 1/45 of a cent a bushel per day will apply on grain stored in all Alberta Pool elevators, effective from August 31, 1935 for the ensuing license year. The present rate, which has prevailed for many years, is 1/30 of a cent a bushel a day.

The Alberta Pool elevators is making this voluntary reduction as a temporary measure in reducing cost to grain growers during the present recognized emergency in the marketing of grain.

The proposed reduction will affect 435 Pool elevators in this province as well as four terminals operated by the Alberta Pool on the Pacific Coast.

WILL THERE BE WAR?—

The great world war sent the price of wheat up to $2.50 per bushel and the aftermath of the same disastrous event sent the price of the same product down to 30c per bushel. No person wants war, not even the western agriculturalist, who perhaps, temporarily at least, may profit thereby. This generation at least knows that any form of prosperity obtained in that way is dearly bought.

At the present moment rumours of war are rife and while the cause of possible conflict is confined to two nations, Italy and Ethiopia, war, like disease, has the habit of spreading, and no man can say with assurance what the ultimate outcome will be should war commence.

Ever since Mussolini marshalled the black shirts and marched to Rome some years ago, Italy has in some form or other had a front page position in the daily newspapers of the world. Not so Ethiopia, also known as Abyssinia. This country, despite its three thousand years of history, was practically unknown, at least to the casual reader.

The area of Abyssinia is about 350,000 square miles and lies in the east central portion of Africa. It is an inland country and is a vast plateau intersected by deeply running rivers. The inhabitants call it Ithiopia, the name Abyssinia meaning "mixed" on account of the varied nature of its peoples. It has a history running back 3000 years during which first one ruler would obtain control and then another, until recent times when the present emperor Haile Selassie, which means "power of the Trinity" was crowned the King of Kings of Ethiopia. This inland country is apparently coveted by Italy, who, seeking new territory for her ever expanding population looks upon this as a plum awaiting picking. Haile Selassie, the emperor, however, has different ideas and freely announces his army will defend the country to the last man. In addition to desiring the territory for its own sake, Italy has a score of forty years standing to settle. In 1896 fourteen thousand Italian and native troops crossed the border of northern Abyssinia and advanced against 100,000 tribesmen at Adawa. The Italian forces were crushingly defeated, having some six thousand slaughtered and two thousand captured. Italy apparently has not forgotten. Last year a clash of minor proportions took place between Italian and Abyssinian troops, which has been the cause of much argument, but the very latest interpretation of this clash, only published Tuesday of this week, is that neither side were to blame.

Other European nations, particularly Great Britain and France, are interested in Ethiopia, and apparently, while not desiring the territory for themselves, are not particularly anxious to see Italy obtain complete control. On Wednesday of this week the League of Nations meet, of which Abyssinia is a member, and to which Haile Selassie has appealed for a settlement of the dispute. Ironically enough, Abyssinia became a member of the League of Nations at the invitation of Italy. The problem is a crucial test for the League and to-day (Wednesday) the eyes of the world are upon Geneva. One phase of the potential war problem is that Italy is planning to do no more than other European nations have done in the past, namely, conquering a backward people and establishing a standard of modern civilization. Bernard Shaw, famous author and playwright takes this view, but no one believes that raising the standard of backward peoples is done for a purely philanthropic purpose. Moreover, however backward the general standard of life may be in Abysinnia, Emperor Haile Selassie is not so backward. On the contrary, the latest development shows him to be pretty smart. Only a few days ago, the emperor deeded to, what was first announced as British-American interests and later asserted to be 100 per cent American interests, half of his empire for a term of seventy-five years. The part deeded contains the oil and other mineral wealth of the country, so if these agreements are allowed to stand, and Italy makes war upon Abyssinia it will be a hollow shell Italy will be fighting for. The agreement is said to have been put through by F. M. Rickett, a British promoter, for American interests. As the American Congress recently passed an Act proclaiming strict neutrality in the event of an European war, it will be interesting to see what effect upon the course of international events this agreement between Emperor Haile Selassie and Mr. Rickett will have.

Britain and other European nations have left no stone unturned to prevent the potential conflict. Anthony Eden, British peace envoy, has held conferences with European powers with the sole idea of averting hostilities. His task at Geneva this week is an extremely delicate and difficult one and rank pessimism pervades the camp of the peace promoters.

Another and equally interesting phase of the situation is the predicament Premier Mussolini will find himself in if he does not go to war. For many weeks it was believed that Italy was running a bluff because financially she was in no position to go to war. This position was well enough taken until the more keener observers pointed out that the very reason many people believed Italy would or could not make war upon Ethiopia, was the chief reason she desided to do so. Faced with internal troubles, much unemployment and finding it hard to obtain foreign credit, a foreign war would make an ideal shield to cover present difficulties at home. It would attract public attention, stir national patriotism and should the war be won increase the prestige of Italy's leader.

The chances of Italy winning a war against single handed Ethiopia are good, but they are not so good as to be a sure thing. The nature of the country is all in favor of the Ethiopian army. On the sun scorched plains the Italian soldiers will find the going hard and it is almost sure to develop into a guerrilla type of warfare, namely few pitched battles but a constant harassing of the invading troops by comparitively small bands. This type of fighting can last a long time and for the invading forces, cost a great deal of money. The Ethiopians' greatest fear is aircraft.

Phillip Snowden who possesses an exceedingly keen mind sees in the possible conflict the seeds of another world war, while others still more fearsome see a possibility, should the Ethiopians prove victorious, of a general black against white uprising in Africa.

It is to be hoped that by some means or other, the League of Nations will find a way to avert this conflict, and by doing so, gain power and prestige to be used in the future to bring about a more peaceful attitude among the nations of Europe, for real peace creates confidence and mutual confidence will bring about prosperity.

BOILS

According to Mark Twain, the best place to have a boil is on the other fellow, a remark which will be appreciated by those who have suffered the pain and inconvenience of a boil which more often than not, seems to select a most inopportune location.

Boils are caused by germs, which, penetrating the skin, set up inflammation that goes on to the development of pus, the typical of what we know as a boil. These germs are constantly present on the skin and it is only under certain conditions that they seem able to penetrate the skin and do harm.

Those who are tired physically or mentally, those who over indulge in [illegible] foods, who take but little [illegible] and who are constipated [illegible] are the individuals upon [illegible] boils most frequently appear.

Boils occur more frequently in winter than in summer because winter [illegible] fewer fresh fruits and [illegible] vegetables and less exercise [illegible] the skin is likely to be [illegible]

When we say that boils are caused by germs, it is simply another way of stating that boils are contagious. It follows that clean hands and above all, clean finger nails will help guard against trouble, for if there are [illegible] to be dirty, they are [illegible] likely to carry germs with the dirt to the skin they touch.

Boils usually occur in crops. The [illegible] which allowed the first one to develop, makes it easy for others to follow. Unless proper care is used in the treatment of the first boil, the germs may spread to another point and so, a second or third boil comes along.

It is dangerous to squeeze a boil. Nature sets up a wall which holds the infection at this one place. A squeeze may break this defensive wall and so scatter the germs, leading to a serious, if not fatal abscess. Poultices which soften the tissues and provide the heat and moisture which favour the growth of germs are, for these reasons, not to be used.

A boil is an infection and should be dealt with properly so as to remove the infection. If a second boil appears there should be no delay in securing medical care so that the [illegible] causes may be investigated and the treatment decided upon.

From what has been said it will be evident that prevention lies in a healthy body,—the product of good food, regular elimination, together with [illegible] of body and underclothing. Spread is controlled by [illegible] by careless home treatment.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

From January to June, 1935, Canada exported 6,103,144 pounds of [illegible], 5,702,061 pounds of which went to the United Kingdom; 228,460 pounds to British West Africa; 52,966 pounds to British West Indies; 11,680 pounds to Belgium, [illegible] pounds to other foreign countries.

STACKING BEFORE THRESHING

(Experimental Farms Note)

A late spring followed by heavy rains has produced a rank growth of straw and a crop which is much later in maturing than usual. Late harvests coupled with big yields of straw result in threshing operations starting much later and lasting much longer than usual. It usually happens that such a combination of circumstances results in an unusually large amount of damage to grain which has to stand too long in the stook before it is threshed. In addition it frequently happens that winter sets in before the threshing of such a late maturing crop is completed.

Stack threshing has always been considered a sound farming practice for the man operating a small farm and depending on an itinerant threshing machine, as it eliminates the risk of the crop being damaged by weathering or being left in the stook all winter.

The farmer may save a little on time and labour by threshing from the stook but will often lose more than he will gain as a result of depreciation in the commercial grade of his grain. It has been shown that losses due to the lowering of the commercial grade resulting from weathering in the stook frequently exceed the cost of stacking. It has also been shown that very little additional cost is involved when the grain is stacked before threshing as compared with threshing from the stook.

Stacked grain is safe from further injury due to climatic conditions. It goes through a natural process of sweating in the stack and as a result, threshes more easily and gives a bright, clean sample of threshed grain that may be stored in a bin of any size with assurance that it will keep in good condition.

While stacking improves the colour and quality of threshed grain or any of the cereals, it is of particular benefit to barley intended for the malting trade where colour is reflected in the quality of the product produced.

The farmer operating in the park belt of the Prairie Provinces would be well advised to ensure his late maturing crop against damage due to weathering in the stook by stacking as soon as possible after harvest.

Canada, the United Kingdom, France, Germany and Austria are leading world importers of fruit. Canada does not require to import apples, but the average annual imports of other fruits into Canada from 1928—32 included 74,000 tons of bananas; 73,000 tons of oranges; 20,000 tons of dried grapes; 12,000 tons of lemons; 11,000 tons of grapes, and 5,000 tons of pears.

A useful export outlet for Canadian dressed poultry has been opened up in the British West Indies, 100 boxes having gone forward during the first week of August.

Richardson Denounces False 40c Wheat Production Cost Figures Attributed To Him

Deliberate Attempt Made to Mislead Public Concerning James Richardson's Evidence Before Wheat Board Committee

ADVOCATES PROFITABLE PRICE TO FARMER

Certain farm agitators and propagandists have been attempting for some years to inflame the public mind against the Grain Trade and those associated with it. The methods have been to issue unfair propaganda and to place a false and unfounded interpretation upon the words and actions of those whose views differ from their own. A glaring example of the sort of misrepresentation referred to is cited below, and must meet with the strong disapproval of fair minded farmers in Western Canada.

Mr. James A. Richardson, President of James Richardson and Sons Limited, on June 21st and June 24th, 1935, appeared at Ottawa before a Special Committee of the House of Commons hearing representations in connection with the Canadian Wheat Board Bill.

Following presentation to the Committee of his statement covering various phases of the Canadian Grain Trade, Mr. Richardson was examined by the Prime Minister, the Right Honourable R. B. Bennett. In the course of this questioning a discussion took place concerning the cost of producing wheat in Western Canada. The evidence and examination of Mr. Richardson required some hours and occupied 85 printed pages of evidence containing more than 45,000 words. The excerpt from the verbatim report of the proceedings dealing with the discussion on cost of producing wheat reads as follows:

Right Honourable R. B. Bennett—"Now, Mr. Richardson, how much do you think the farmer should be paid for his wheat in order to break even. You have had a large experience in all branches of the business, how much should he have, not to make a profit, but just to break even?"

James A. Richardson—"Well, I have heard farmers say if they had a fair crop of wheat and got 40 cents on the farm they could get by; they would not be making any money, but they could get by alright."

Mr. Bennett—"Forty cents on the farm?"

Mr. Richardson—"Yes."

Mr. Bennett—"In Alberta that would mean what price on the market for No. 1 Northern—you mean No. 1 or No. 2 at forty cents?"

Mr. Richardson—"Well, I would say the No. 1."

Mr. Bennett—"No. 1 at forty cents on the farm?"

Mr. Richardson—"I suppose forty cents would apply in connection with all that he had."

Mr. Bennett—"I see what you mean. Now, Mr. Richardson, that being so, what would the price be on the market for that sort of wheat; how much would you have to allow for freight?"

Mr. Richardson—"Well, 15 cents a bushel would be high, it would be a top freight."

Mr. Bennett—"That is the top freight isn't it?"

Mr. Richardson—"Yes, sir, 12 cents average freight."

Mr. Bennett—"So that to the people in the country it should be 55 cents; you think that would be a satisfactory figure for the farmer?"

Mr. Richardson—"No, sir, I do not; I want to see the farmer get just as high a price as we could sell his wheat for in the world's markets. I am not satisfied to indicate any price, other than the best price we can possibly get for him."

Mr. Bennett—"You see, what has been suggested by one of the witnesses is that the government through a board should establish a minimum price and if wheat went below that price it should be subject to subsidy or assistance. The Chairman of your own grain exchange submitted practically that proposal. The board would have to arrive at a minimum price, and if the price established by supply and demand in the markets of the world went below that figure there should be some provision made by which the farmer would receive the difference. That is why I wanted to get from you some idea as to minimum price?"

Mr. Richardson—"If you appoint the board, Mr. Chairman, in the fall of the year once the crop of the northern hemisphere is assured and we have the information on which to form a little more intelligent idea I would be glad to give my views, and I am sure everyone else in the grain trade will, as to what we would think that price ought to be. I certainly would not attempt to do it now before knowing what the crop of the northern hemisphere is going to be."

Mr. Bennett—"I thought probably that was in your mind and that was the reason I asked you what you regarded as a reasonable price to the farmer for his crop, just to produce it leaving out for the moment the question of profit, and that you say is 40 cents?"

Mr. Richardson—"I do not say anything, except that I have been told by good farm people who know the business."

Mr. Bennett—"You have had something to do with farms, havn't you?"

Mr. Richardson—"Yes."

Mr. Bennett—"My information is that you have operated farms?"

Mr. Richardson—"Yes, sir."

Mr. Bennett—"Did you ever produce any wheat at 40 cents a bushel?"

Mr. Richardson—"Well, I am a coarse grain grower myself. I could tell you more about what it costs to feed hogs and steers."

Mr. Bennett—"But you have your own wheat?"

Mr. Richardson—"I could not tell you what it costs to grow it, but I am sure it was a big price."

Mr. Bennett—"Would it be more than 40 cents?"

Mr. Richardson—"I could not tell you what it is, because I have never calculated it."

Mr. Bennett—"I see."

Mr. Richardson—"I am sure that if I took interest on the money invested in my farm and everything else into consideration the figure would be high."

It will readily be seen that a price of 40 cents per bushel, plus freight, bringing the price to 55 cents per bushel was neither advocated nor stated as a fair price by Mr. Richardson. He advocated that the Government should take steps to regain and extend the market for Canadian wheat, and that governmental assistance be extended to farmers under existing conditions and prevailing world prices.

By extracting a single sentence from more than 45,000 words dealing with Mr. Richardson's evidence, an attempt has been made, by those who are not concerned in placing the truth before the farmers, to make it appear that Mr. Richardson was advocating a price of 40 cents per bushel for wheat to the farmers of Western Canada. It will be clear from the foregoing evidence that Mr. Richardson did not in any sense advocate 40 cent wheat. Nevertheless deliberately misleading information was issued by the Alberta Wheat Pool in their Weekly Budget of News to the Weekly Newspapers of Alberta in an attempt to mislead the farmers into believing that Mr. Richardson considered 40 cents as being a price basis which our Canadian farmers should be prepared to accept for their wheat.

Similar misleading reports have appeared in newspaper organs published by Pool grain handling organizations and misleading statements to the same effect have been circulated and repeated throughout the countryside.

The Wheat Board Bill as originally introduced in Parliament made no provision for a guaranteed minimum price to the farmer. The producer was to get an initial payment and a participation certificate similar to the method followed under the Wheat Board of 1919. Mr. Richardson advocated that the farmer be given a guaranteed fixed minimum price. The bill was subsequently amended by the committee to provide for this proposed fixed minimum price to the farmer. In the course of his evidence dealing with the need of assisting in obtaining a fair price for the producer, Mr. Richardson said:

"If our Government wants to give our farmers financial assistance under existing conditions (and I would certainly like to see them do it), then there are several ways that this can be done. I consider it is possible to assure our producer a guaranteed fixed price, but still to permit an open market, so that if our market declined below the fixed price the farmer would get a certificate from the elevator company entitling him to collect the difference between the fixed price and what his wheat actually realized. The farmer might, on the other hand, if thought advisable be paid a direct subsidy. It is a government problem as to how this matter may best be met, but it must be accepted as a fact, that the foreign buyer will continue to buy wherever he can buy the most with his money, and that he will take full advantage of depreciated currencies in certain parts of the world, and it is quite futile to try and induce him to subsidize citizens of other countries.

"I would rather like to see the farmer assured of a fixed minimum price, that would give him some protection against depreciated currencies of the southern hemisphere, and a board with authority to use stabilizing influences in the market, if they thought it were necessary, and to feed out our surplus wheat as and when the market would take it, and try to allow the trade the largest possible freedom, and to act as a stabilizing factor, as an insurance and safety factor; to operate largely in that way would depend, of course, a good deal on good judgment being employed."

These persons who have sought to place Mr. Richardson in a wrong light in the minds of the farmers of Western Canada had available to them the above statement. Yet they apparently sought to mislead the farmers whom they are paid to serve. It is difficult to catch up with misrepresentation and falsehoods.

Mr. Richardson feels that in addition to production costs, farming industry, like other forms of business, should reap a fair margin of profit.

Mr. Richardson has spent his entire working life-time in the grain business. The firm of which he is now the active head commenced handling grain of Canadian farmers in 1857. For 78 years it has served the grain producers of Canada, and it will continue so doing in the same fair and efficient manner that has characterized all its dealings.

Restoration of wheat prices to a profitable level to the producer and the sale of Canadian wheat, rather than its storage in the bins of Canada, are the end to which Mr. Richardson has worked and will continue to work. Mr. Richardson, operating in the handling and exporting end of the Canadian grain business, has the interests of the Canadian farmer much more to heart than those who have caused loss of markets for Canadian wheat and who now seek to bury their folly by spreading false and malicious statements concerning the grain trade and those engaged in the grain business in the hope of causing elimination of sound competition.

In view of the quotations of the exact words used by Mr. Richardson before the Committee, we believe we can rely upon every fair minded farmer to condemn the untrue statements that have been made and the unfair inferences that have been drawn.—JAMES RICHARDSON & SONS LIMITED—Advt.

The Poor Man's University

* * *

ALL OF US would be poorer if there were no advertisements in our newspapers—poorer in pocket, mind, comfort, culture.

Advertisements have been called the "Poor Man's University," for they are wonderful teachers—wonderful mirrors of the world's scientific and cultural development.

The advertisements keep us informed about what is being accomplished by the world's best engineers, chemists, research workers and technicians, in every field of human endeavor—in the realms of radio, motor-car and tire manufacturing, food preparation, domestic and personal hygiene, building materials and construction, and agricultural economy, home casements and beautification.

If there were no advertisements in our newspapers and magazines, we'd all slip back—back to the levels of life of 50 and 100 years ago. We'd read less, move about less, lower our standards of living, be content with poorer machines, eat coarser food and wear coarser clothing, live in unattractive homes, do a vast amount of distasteful labor, wear ill-fitting shoes, see ugliness everywhere, have more illness, meet with more accidents, have more toothaches; and our stores would be dull places indeed.

Read what the advertisers in this paper have to offer, to be informed is to be profited.

THE MERCURY

ALBERTA CROP REPORT NO. 7

Issued by the Department of Agriculture, Government of the Province of Alberta, Edmonton, August 31, 1935

Harvesting operations are well under way in southern and central Alberta, and will be fairly general throughout the central part of the province as far north as Edmonton district within a week, but there will be very little cutting done in these districts for another week. Generally speaking, operations have commenced from a week to two weeks later than normal. In the south the weather has been ideal for harvesting but in the central and northern districts there has been further rain and cool weather which has interfered with the ripening process and retarded harvesting.

In spite of a number of rather disappointing factors, the Province will harvest a crop of wheat approximating in total that of last year. The department, however, is adhering to its practice of making no definite estimate of the provincial yield until harvesting is advanced to the stage where more substantial information is available. It is extremely difficult also to make any definite estimate of damage from hail and frost until threshing returns begin to come in.

With respect to frost, that which occurred on the nights of August 18 and 19 affected crops in varying degree in the districts west of Nanton and High River, and west of the C. & E. Line to Edmonton, westward, north-westward and north from Edmonton for nearly 100 miles, eastward and northeastward from Edmonton to the border, and south-eastward to the Camrose-Hardisty line and the Stettler-Coronation line of the C.P.R. The variation in degree was from 2 to 10 degrees throughout these districts. The Grande Prairie and Peace River districts also experienced frost which damaged crops in certain localities. The damage has been heavy to late crops, particularly oats and barley, while the wheat crop has undoubtedly suffered in both yield and grade.

Damage From Hail

Despite rather alarming reports as to a very large acreage in the Province having been wiped out by hail, which were permitted publication some weeks ago, the survey made by the Department reveals that, so far as it is possible at the present stage to determine, the losses from this cause do not appear to have been much greater than normal. Estimates of damage published by acreage totals alone, without percentage of loss being quoted, can give no fair or accurate picture of the situation, in view of the great variation in losses over any one storm area, generally anywhere from five to 100 per cent.

The total acreage affected by hail in the Province will not likely be found to be much greater than 250,000 acres, but it is extremely difficult to establish an average percentage of loss over such an acreage owing to wide variations.

Damage by drouth in the south was not quite so widespread as in the past few seasons. The areas chiefly affected were a considerable strip of territory north and south of Lethbridge, and to the south-west and west of that city, and a fairly large area along the eastern border of the Province from north of Medicine Hat to the Coronation line. In these areas the yields are light. Damage from hoppers has been comparatively light.

Aside from the areas mentioned, the south appears to be harvesting a very good crop in both quality and yield. In Central Alberta those districts not too severely affected by frost will yield well, and some quite high returns are expected from a number of localities. In the Peace River territory a heavy crop has been in prospect, but there has been some damage by heavy rains as well as frost, and the ripening process has been considerably retarded.

General indications are that there will be a fairly large supply of feed, but this is governed partly by the extent to which frost has damaged crops. Some of the districts usually depended on for heavy crops have been adversely affected by drought in the south and floods in the north, but there is a fairly good crop of natural hay in many districts, and in a few of the districts previously affected by drought, more feed of various kinds has been produced than for the past two or three seasons. Alfalfa produced a good yield in the first cutting, but somewhat lighter on the second cutting. Sugar beets in the irrigated districts are expected to produce an average crop. Progress is being made on the new sugar beet factory at Picture Butte on the Lethbridge-Northern project.

The honey flow is now completed in the Province and while the number of bee colonies is greatly increased, the total honey production will be considerably less than last year owing to the considerable amount of cold weather.

Dairy production has greatly improved during the summer months, but is still below the record figure of last season.

AT LEAST ONE STATE PROSPEROUS—IN BORNEO

Winnipeg, Man., September 2nd.—There is a state in the Southern Pacific, Sarawak, which has been ruled by a British Rajah since 1841 the Brooke family. The territory consists of some 50,000 square miles along the northwest coast of Borneo. Trade is thriving in Sarawak, exports which consist principally of rubber, pepper, coal and miscellaneous native products such as sago, jelutong, damar, copra, rattans, etc., increasing by approximately 50 per cent in 1934 over the year previous, according to the Industrial Department of the Canadian National Railways. Imports increased 23 per cent for the same period. Singapore is the main trading port for Sarawak.

BARGAIN FARES TO THE EAST

Winnipeg, Man., September 2nd.—Autumn proving a popular travel time, the Canadian National Railways has announced another series of bargain fares to Eastern Canada, between September 21 and October 4. The fares will be in effect from all stations in Western Canada, Victoria, Vancouver and east up to and including Port Arthur and Armstrong, to all stations in Eastern Canada—Sudbury, Cochrane and east. Tickets will be good going any time between September 21 and October 4 inclusive and provide a generous limit for the return movement of 45 days in addition to the date of sale.

Three classes of accommodation will be provided for these excursions—approximately one cent a mile in each direction good in coaches only, with a slightly higher fare good in tourist and standard sleepers upon payment of the regular berth fare. Stopovers within the limit of the ticket will be permitted at all stations Port Arthur, Armstrong and east.

With these excursions taking place at an attractive time of the year, it is anticipated that these low fare rates will prove most attractive to those wishing to visit Eastern Canada.

CREAM DESSERTS

Cream desserts, with their attractive appearance, delicious flavor and smooth texture, are undoubtedly among the most popular to serve as the final course for lunch or dinner. When entertaining, the thoughtful hostess invariably serves either a chilled or frozen cream dessert for she knows that it will be enjoyed by even the most fastidious guest, and no one will dispute the fact that cream desserts of all kinds are looked upon as real treats no matter how often they are served at the family table.

The following recipes have been selected from the publication "Cream Desserts" prepared by the Milk Utilization Service, Dominion Department of Agriculture:—

Bavarian Cream

1 tablespoon granulated gelatine.
1-4 cup of cold water
1-2 cup of sugar
2 egg yolks.
1 cup hot milk.
2 egg whites
1 cup whipping cream.
1 teaspoon vanilla.
Pinch of salt.

Soak gelatine in cold water. Beat egg yolks and combine with sugar and salt. Gradually add the hot milk and cook in top of double boiler, stirring constantly until mixture thickens. Add gelatine. Cool, and when mixture is partially set, fold in stiffly beaten egg whites, whipped cream, and vanilla. Pour into a mould or pile in sherbert glasses. Garnish with fresh fruits in season.

Moulded Fruit Cream

1 tablespoon granulated gelatine.
1-4 cup of cold water.
1 cup fruit juice.
1-2 cup sugar.
1 cup canned fruit, diced.
2 tablespoons lemon juice
1 cup whipping cream.

Soak gelatine in cold water. Dissolve gelatine and sugar in hot fruit juice. Cool. When mixture is partially set, add lemon juice and diced fruit. Fold in whipped cream, mould and chill.

Note:—Canned pineapple, peaches, cherries, strawberries or a combination of fruits may be used.

Pompadour Rice

1 1-2 cups [illegible] rice
3 tablespoons fruit sugar
1 teaspoon vanilla
1 cup whipping cream
Pinch of salt

Combine [illegible] sugar, salt and vanilla. [illegible] Serve with [illegible] thick [illegible]

Peach Mousse

1 teaspoon gelatine
2 tablespoons cold water
1 cup milk
1-2 cup fruit sugar
Pinch of salt
1 tablespoon [illegible]
1 cup whipping cream
1 cup peach pulp

Soak gelatine in cold water. Heat milk and dissolve gelatine in it. Add sugar and salt. Cool. Add lemon juice, and when mixture is partially set, fold in cream, stiffly whipped, and peach pulp. Place in trays of mechanical refrigerator and freeze, or put in a mould, cover with buttered paper and [illegible] and pack in ice [illegible] parts ice to one part salt. Let stand four to six hours.

THE WHEAT SITUATION IN THE ARGENTINE

Conditions in the wheat area of Argentina up to July 31st are described in a report from the Canadian representative in Buenos Aires which was issued by the Dominion Bureau of Statistics on August 17th. At the time the report was written the Canadian observer said the prolonged drouth had caused heavy curtailment of acreage over most of the wheat growing sections of the country. [illegible] elsewhere.

It is mentioned in the report that the head of the meteorological [illegible] of Cordoba said it was necessary to go back to 1875 to find conditions parallel with those prevailing in the province.

There was still time for a change of weather and a good wheat crop the Canadian observer wrote on July 31st and said: "It will [illegible] that apparently dried up wheat has a wonderful recuperative capacity if last minute rains arrive in adequate quantity." Since then rainfall has not been heavy [illegible] the conclusion is natural that conditions have grown worse in the past month.

Last year Argentina produced 2[illegible]321,000 bushels of wheat from 17,155,000 acres threshed.

Note: George Broomhall suggests that Canada should sell heavily this year of her wheat surplus because he believes Argentina had a short crop this year and will not be in a [illegible] stage a strong come back next year. He believes Argentina will export less than 90 million bushels of wheat this crop year as compared with 152 million bushels last year.—Wheat Pool Budget.

LINE ELEVATORS REDUCE STORAGE RATES ON GRAIN

Line country elevator and terminal companies have filed tariffs with the Board of Grain Commissioners providing for a reduction in storage rates from one thirtieth to one forty-fifth of one cent per bushel per day. This reduced rate became effective September 1st, 1935.

Canadian consignments of both barley and oats to the United Kingdom during the first six months of 1935 were each more than double those of the corresponding period of 1934.

The bulk of the international trade in canned fruits is in the hands of three countries, the United States, British Malaya, and Australia, but increasing quantities are being exported from Canada and South Africa.

ALBERTA BUTTER SWEEPS AWARDS

Continuing the series of successes that swept western fairs of major and majority of awards Alberta butter won the greater portion of awards at the recent Vancouver exhibition according to information reaching the provincial government dairy branch.

Butter makers of the province won the highest awards for the most [illegible] stages [illegible] of [illegible] exhibitors [illegible] aggregate [illegible] Sarepta [illegible] and the [illegible] Tofield [illegible] In the [illegible] Alberta won the first [illegible] and four thirds, a [illegible]

At the Canadian National Exhibition [illegible] medal was awarded to the Central Alberta Dairy Pool. Also for the highest scoring [illegible] pounds [illegible] time since 1925 the medal has been won by Alberta.

SAY U.S. TO BUY CANADIAN WHEAT OF BEST QUALITY

Washington, September [illegible]—Supplies of Canadian [illegible] wheat will be needed [illegible] United States this season [illegible] Monday by Secretary [illegible] Hull.

The [illegible] the fears in the [illegible] Canadian wheat would be [illegible] in this country [illegible] the U.S. department of agriculture [illegible] anticipates a considerable need for Canadian hard wheat during the coming winter and spring. He said there was no way to measure the need for Canadian wheat at present.

It was impossible to know how much American spring hard wheat [illegible] would be available for milling. But because of [illegible] it was expected there would not be sufficient American hard wheat available for requirements of millers.

Mr. Hull pointed to a suggestion that imports be halted and said his information was that Canada wanted to sell its wheat for the best possible price but laws of the United States furnished a means to protect American farmers if the case proved otherwise.

"With reference to your constituents' concern over the possibility of dumping (that is selling below the going market price) of Canadian wheat by the Canadian government under the new wheat control plan, I understand the Canadian prime minister, Mr. Bennett, made a public announcement at the time of the enactment of the plan to the effect that the Canadian government would not dump wheat [illegible] market," Mr. Hull said in a letter to Senator Burke of Nebraska.

"I understand also that Mr. McFarland [illegible] of the new wheat [illegible] the highest market [illegible] Canadian wheat [illegible] dumping [illegible] of [illegible]

[illegible] duty to equalize differences [illegible] of production [illegible] agricultural adjustment administration amendments empowering the president [illegible] adjustment program [illegible] the spread between [illegible] Canadian and American prices [illegible]

"As of August 10, he wrote, the price of No. 1 dark northern hard wheat [illegible] market at [illegible]

"The [illegible] year's [illegible] American wheat [illegible] been [illegible]

"Because [illegible] expected [illegible] American [illegible] for the [illegible] of the millers. The department of agriculture anticipates a considerable [illegible] Canadian hard wheat during the coming winter and spring. [illegible] to mention [illegible] since it is impossible [illegible] how much of the American spring hard wheat crop will be suitable for milling."

Howlers From All Sources

Contralto is a low sort of music that only ladies sing.

Dust is mud with the juice squeezed out.

The theory of exchange, as I understand it, is not very well understood.

Wells' history is a veritable milestone on the road to learning.

A mugwump is a bird that sits on the fence with its mug on one side and its wump on the other.

WILL LIST ALBERTAN'S BOON FOR S.C. "DIVIDEND" PAY

CALGARY, Sept. 3.—Premier Bennett has promised he would do everything within his power "to assist where possible" the Social Credit government of Alberta to solve its problems, William Aberhart, premier-designate and leader of the Alberta Social Credit league which [illegible] in the August 22 [illegible]

Mr. Aberhart in his farewell address at the Prophetic Bible Institute [illegible] with Mr. Bennett and the [illegible] the new provincial government should not be [illegible] with the load left by the last government.

Make Things Easier

"It was [illegible] that a [illegible] power in [illegible] the Calgary evangelist [illegible] added. He said [illegible] Mr. Bennett was anxious [illegible] easier for Alberta.

[illegible] the new government [illegible] register so that they would be in a position to receive their basic dividends when the time came. Major C. H. Douglas, British economist who founded Social Credit theories and is under contract to the Alberta government as economic adviser, probably would be in Alberta [illegible] weeks or a month, he said.

Mr. Aberhart said he hoped to examine the coal [illegible] of the provincial coal industry under Sir Montague Barlow, British coal authority, [illegible] Social Credit. Sir Montague arrived in Canada recently and is on his way to Edmonton.

TAXIMAN IS ROBBED, IS BOUND TO TREE

CALGARY, Sept. 3.—Police Tuesday hunted two taxi bandits who during the week-end robbed William Bourne, a cab driver of $5 and a watch, and left him tied to a tree, 12 miles west of here. They tied his hands and taped his mouth and eyes with adhesive tape.

Returning to Calgary, the bandits telephoned the taxi office, telling of Bourne's plight. Police were notified but before their arrival he had freed himself and after wandering around for an hour, aroused a farmer who removed the tape.

Son: "Say dad, what does it mean when the paper says some man went to a convention as a delegate-at-large?"

Dad: "It means his wife didn't go with him, son."

BANKING IDEALS THAT LIVE ON

"The value of that enterprise (the Bank of Montreal) ought not to be measured by its success as a joint-stock undertaking, by the amount of its capital or the size of its dividends, but by the security it has given to those who have trusted it, the facilities it has furnished for the exchange and the increase of commodities, and the assistance it has contributed to the development of the country."

The Bank, now well on in the second century of its life, still wishes to be measured by the considerations mentioned in the foregoing quotation from "The Centenary of the Bank of Montreal," published in 1917.

Security, facilities, assistance—these have been the objectives of the Bank since its foundation in 1817. They are the objectives today and will be in the tomorrows of Canadian life.

500,000 WATCH FUNERAL OF QUEEN

BRUSSELS, Sept. 3.—The body of Belgium's beloved Queen Astrid was borne to the royal crypt in the Church of Our Lady of Laeken Monday through streets lined with 500,000 of her sorrowing subjects.

The queen, tragically killed last week in a motor accident in Switzerland, rests beside the late King Albert and other members of the dynasty founded by Leopold I in 1831.

Its street lights and even the taxi headlights were veiled in black [illegible] from windows and building tops crepe streamers and black flags formed a sombre passageway along the whole route of the procession.

In contrast to the funeral just 18 [illegible] ago of the ill-fated King Albert [illegible] the military note was dominant [illegible] tribute to a great leader. Monday's tragic sequel was a national even more impressive tribute to a beautiful young queen.

Twenty thousand school children lined one side of the funeral route.

EARLY DECISION ON WHEAT PRICE NOT LOOKED FOR

OTTAWA, Sept. 3.—No early announcement is expected from the government as to the establishment of a fixed minimum price on wheat, [illegible] learned Monday, although [illegible] one of the tasks awaiting [illegible] by cabinet council.

It is anticipated some of those [illegible] interested in the wheat growing and trading industry may visit Ottawa to discuss the matter with the government before any action is taken.

What—No Primer?

The policeman on point duty held [illegible] hand, but the very small car did not pull up at once, coming to a standstill some distance further on, however.

Notebook in hand, the policeman [illegible] along to it.

"I say," he demanded of the driver, "didn't Santa Claus give you a book of instructions with this car when he put it in your stocking?"

School Fair to be Held Tuesday, September 24th

The annual school fair comprising schools in the Tofield district will be held at Tofield on Tuesday Sept. 24th.

This event which is an important event in the school year, will as usual include exhibits of school work, grains and grasses, flowers, vegetables, wood work, handicraft cooking livestock etc.

Judges supplied by the government will be present and the exhibits will be open to the public as soon as the judging is completed.

The annual school fair is an interesting event well worth attending.

PLUCKY LASS SAVES BROTHER FROM BULL

MACLEOD, Sept. 9.— Farmers of this district last night praised the bravery of Marie Hunt, young farm girl, who seized an enraged bull by its nose ring and pulled the animal from a viscious attack on her 12-year-old brother Percy.

The lad, who suffered a punctured [illegible], when one of the bull's horns passed between ribs, and other injuries, was progressing favorably in hospital. The bull attacked the boy as he was driving a herd of cattle to water. The animal first went for a dog and then turned on the boy.

FATE OF FIVE YEAR OLD IS NOW SOLVED

ST. NORBERT, Man., Sept. 9.—Five-year-old Jackie Pihs, lost in the woods near here since Thursday, was found alive today by searchers.

Finding of the lad was made at 12:45 p.m. C.S.T. He was unconscious and St. Vital police, who had been directing the hunt rushed him to the hospital.

It was believed he was otherwise unharmed, though apparently he had suffered from exposure, after spending more than 90 hours in the open.

The lad was found about 150 yards from the Red River and 2½ miles from the spot where he was last seen. Jackie disappeared while picking blueberries with his father.

A woman said she heard a muffled scream. After that there was no trace of the lad until today though thousands of searchers, recruited from the ranks of citizens, boy scouts and the motor machine gun brigade here, combed the wooded country.

Mr. A. P. Harrold of Lloydminster is visiting friends in town.

KETCHAMOOT

School re-opened on Monday Sept. 9th, with Miss Margaret Lindsay of Innisfree as teacher.

Miss Mabel Lawson returned to Camrose to take up her school duties at the Normal Practice school.

Mr. Howard Lee is home after his summer schedule of playing ball.

Mr. P. O. Moline and daughter Florence of Amisk Creek visited Mr. Moline's sister, Mrs. C. A. Ingram and Mr. Ingram a week ago Sunday.

Mr. Wesley Ingram of Victoria, B.C. is on a three weeks visit, visiting friends and relatives in the Ketchamoot district.

Mrs. Elsie Carlisle and little daughter, Doreen of Hay Lakes are visiting at the Carlisle homes.

Mr. and Mrs. J. H. Ingram, Mr. and Mrs. T. D. Ferguson and son Lloyd, Messrs A. F. Schultz and and Wesley Ingram were Sunday dinner guests of Mr. and Mrs. Sears.

Mr. Henry McGinitie took a truck load of neighbors blue berry picking, up and around Athabaska, two weeks ago. Berries were very plentiful and all brought home pails full.

Mrs. Wiley and her sister from Calgary visited Mrs. Wiley's daughter, Mrs. Will Ingram, one day last week.

Mrs. A. Hesler of Tofield visited a few days last week with her sister-in-law, Mrs. Frank Shupe.

A pleasant afternoon was spent on Wednesday of last week, when Mrs. A. J. Williams entertained the Ladies' Aid. After the close of the meeting, a shower was held for Mrs. Geo. Williams. Mrs. Williams was assisted by Miss Katie Loughead in opening the many useful and pretty gifts. Among those who were present were: Mrs. A. J. Williams, Mrs. Fred and Mrs. Geo. Williams, Mrs. Olson of Miquelon Lake, Mrs. Yeager, Mrs. McCowen, Mrs. A. Hesler, Mrs. Shupe and Irma, Mrs. Appleby, Mrs. C. A. Ingram, Mrs. J. H. Ingram, Mrs. Barnes, Mrs. Campbell, Mrs. Sears, Mrs. C. Coombes, Mrs. B. Cookson, The Misses Katie Loughead and Mildred Ingram.

Miss Kathleen Ingram is assisting Mrs. Olson of Amisk Creek over the harvest season.

Mr. and Mrs. T. D. Ferguson of Lakeshore entertained a few relatives to dinner on Sunday. Those present were, Mr. and Mrs. J. H. Ingram, Mrs. Brick, Mrs. Sears and Mrs. Wesley Ingram.

PAINT PRICES SHARPLY REDUCED

A sharp reduction in the price of first quality house paint to $3.95 per gallon is announced by the manufacturers of some of Canada's best-known brands of paint, the reduction to take effect immediately.

In making the announcement, the companies concerned state that the reduction is not justified by any change in market conditions or manufacturing costs. They point out, however, that during the past few years many householders have been misled by "bargain" prices into using inferior paint with results that reacted unfavourably on the whole industry. Drastic action was felt to be necessary to check a situation that seriously threatened property values all over the country.

The new low price is designed to make it easier for property owners to use first quality paint only, with resulting benefit to the property and to the property and to the community in general.

The companies announcing the reduction are Canada Paint, International Varnish, Martin-Senour, and Sherwin-Williams.

BACK FROM CONFERENCE

DODDS, Sept. 10.—Mr. and Mrs. J. Brenneman of Dodds, Milton Martin of Oregon and Mr. Milo Stutzman pastor of Salem Mennonite church here have returned from attending the Mennonite biennial general conference of Canada and the United States held in Kitchener, Ont.

IDAHOANS OVER 65 PAID $30 MONTHLY

BOISE, IDAHO, Sept. 11.—Five thousand Idahoans over the age of 65 years will each receive a $30 monthly pension, Governor Ross announced Wednesday, when the federal social security measure is placed in operation within the next few weeks. Of the $30 pension, $15 will come from the federal coffers, $10 from the state and $5 from the counties.

LOCAL AND PERSONAL

The Messrs Paul Bardon and Bill Bartell who have been visiting at the Bardon home, left on Monday for their homes in Cleveland, Ohio.

Miss Edna Lindsay of Innisfree is staying with her sister Anne, and is attending school here.

Mr. Barney Kendall is on his holidays.

The Misses Marjory Stewart and Ruth Wingrove of Edmonton and Miss Charlotte Forster of Calgary, have resumed their duties at the Tofield school.

Miss Marjory Ferguson is attending school here and is staying with Mr. and Mrs. McIntyre.

Mr. Bill Chapman and Mr. Bert Lovell attended a Masonic meeting in Viking this week.

Mr. and Mrs. Eldred and family returned home on Sunday after a two weeks vacation.

Among those who visited the city this week are: Mrs. Calvert, Mrs. Malcolm, Miss P. Burnett, Miss L. Ross, Edythe Bardon, and Miss M. Redig.

Friends of Mrs. Charley Ellis of Revelstoke, B.C. will be sorry to learn of her death, which occurred on Aug. 31st. Mrs. Ellis was a former resident of Tofield.

The United Church Ladies' Aid wish to thank all those who made their tea and sale of home cooking on Sept. 7, a success.

QUINTUPLET CAULIFLOWER

This quintuplet business is spreading to the vegetable kingdom. This week, Mrs. J. W. Cookson brought to the Mercury office a cauliflower with five well shaped heads or flowers. Something of a novelty and in the light of the famous event in Ontario, of unusual interest.

However despite this cauliflower's bid for fame it went, as thousands of other cauliflowers often do, to help swell a batch of mustard pickles.

HUEY P. LONG SHOT—LATER DIES FROM WOUNDS

United States Senator Huey P. Long, known as the dictator of Louisiana, was shot on Sunday at the State capital shortly after a special meeting. In spite of every effort on the part of doctors and hospital authorities he died onTuesday as the result of the wound. The shooting was done by Dr. Carl A. Weiss Jr., a political enemy of Long, in the corridors of the State capital legislative building.

Huey P. Long has for some time been prominent as a political force in the United States. Extremely aggressive, he had a host of admirers and many political enemies. Rising from a cotton farm lad to United States senatorship and virtual dictator of his own state, he was a puzzle to political students. His enemies called him "demagogue" "madman" "destroyer of constitutional government" and his friends recognised in him a friend of the poor and oppressed.

He leaves a wife and three children.

WET WEATHER DELAYS HARVESTING—WHEAT CROP SPOTTY

The unfavorable harvesting weather of the past week has again delayed harvesting. The wheat crop this year is an unusual one. What showed signs of being a good crop earlier in the season, has developed into a hard thing to estimate. Some form of disease has attacked the wheat in various places, some fields being fairly good and others poor. The damp weather and lack of sunshine is believed to be the cause. Until the crop is threshed true results will not be known. The oat crop is fair but immediate warm weather with sunshine is needed to ripen it.

BEAVERLODGE AREA FREE FROM RUST

BEAVERLODGE, Sept. 10—Alarm had been raised in one of the choicest wheat growing sections of the Grande Prairie district lest the crop had fallen prey to the dreaded black stem rust. Fear had also been expressed that many fine wheat crops in the Bear lake neighborhood had been frozen. Several experienced growers were on the point of cutting large acreages for feed. One man offered to sell 400 acres of rank wheat for $500 and to harvest, thresh and put it in the elevator.

The value of this crop rose suddenly when Dr. W. C. Broadfoot, of the dominion laboratory of plant pathology, Edmonton accompanied by W. D. Albright of Beaverlodge, assured the anxious owners this week that not a pustule of black stem rust was in evidence on the suspected samples. There was a small amount of orange leaf rust which is of very little consequence. There was also considerable basal glume rot, a bacterial infection which causes a distinct blackening at the base of the glume, often causing black point of the seed and in severe cases darkening the crease of the grain enough to lower the grade. It is nothing new though unusually prevalent this year in Alberta, perhaps aggravated by wet weather.

In addition [illegible] disease called glume blotch which has little effect on yield or grade was found in the fields examined. Basal glume rot and glume blotch have been confused with black stem rust and with frost damage, which in the neighborhood visited was quite slight, said Dr. Broadfoot.

A fine sample of gooseberries was shown the editor the other day. They came off of the Maurice McGinitie farm. Maurice is doing considerable experimenting with fruits of different kinds and some day is likely to have a real family orchard.

RETIREMENT OF WORKERS AT SIXTY YEARS URGED BY BENNETT AS JOBLESS AID

OTTAWA, Sept. 10. Radical reconstitution of the whole basic problem of debt federal, provincial, railway, municipal and in degree, private removal from the labor market at 60 years of age of [illegible] the [illegible] to [illegible] for the [illegible] under the farmers' creditors arrangement [illegible] those [illegible] Minister [illegible]

[illegible] most [illegible] in [illegible] fully [illegible] winter [illegible] to [illegible]

[illegible] would be wasted [illegible] the [illegible] did in the United Kingdom. The great objective would be the reduction of [illegible] charges. [illegible] of [illegible] the [illegible] this [illegible] I can [illegible]

[illegible] Bennett [illegible] people of [illegible] creditors [illegible] the [illegible] Railway [illegible] the [illegible] municipalities [illegible] conversion [illegible] lower rate of interest [illegible]. There [illegible] bond [illegible] The [illegible] would co-operate [illegible] provincial [illegible] refunding operations. The [illegible] facilities of the loan [illegible] arrangement act would be extended to urban dwellers [illegible] the [illegible]

Dealing with the question of foreign debt, the premier said that those owing Great Britain could and would be met in goods and services, but favorable trade balances with other countries would be inadequate to meet Canada's obligations in the United States. Upon this fact he [illegible] appeal for wider [illegible] being provided by [illegible] saying that [illegible] United States [illegible] we cannot [illegible] States [illegible] States debts [illegible] States have more [illegible] does at the [illegible]

[illegible] expressed the [illegible] regulations [illegible] Whether or not [illegible] the facilities [illegible] Canada [illegible] the fulfil[illegible] pay [illegible] and he would [illegible] for his party [illegible] review the whole [illegible]

[illegible] the only [illegible] unemployment [illegible] express [illegible] first step to be [illegible] solution [illegible] remove from [illegible] workers [illegible] reached the age where, especially [illegible] of today, [illegible] social interest and the state [illegible] equally suggest [illegible]

How precisely this will be done [illegible] It w[illegible] provision of a [illegible] of old age [illegible] Withdrawal from the [illegible] and the provis[illegible] in the [illegible]

The proposal of widening the application of the farmers' credit arrangement act to urban dwellers [illegible] fact that the act is [illegible] adaption of the [illegible] act and those who benefit [illegible] supposed to be in a state of [illegible] arrangement.

[illegible] defending the government [illegible] the interest of [illegible] warning what may happen [illegible] of the government [illegible] Mr. Bennett expressed [illegible] idea of a minimum price [illegible] generally. An amendment [illegible] constitution would be required to give effect to this.

Debt was the "root evil in our economic system" the prime minister said and "a threat against the high standard of living we strive so hard to maintain."

The point had been reached where the debt was "wellnigh unbearable" and the time would come when the people would have to determine whether to "wait until our debt has broken us or act without further delay so that the benefits of an honorable consolidation of our obligations will serve, in equal measure, debtor and creditor alike."

Declaring that revision was necessary Mr. Bennett said it would be "unprofitable and foolish" to assume that such economic recovery would come as to balance the [illegible] the point of wealth [illegible] to heavy [illegible] aggravating [illegible] established [illegible] to pass among the [illegible]

[illegible] all [illegible] But the [illegible] the [illegible] today [illegible] debt structure.

I speak [illegible] the government [illegible] case. The government has throughout its term of office [illegible] doctrine [illegible] affairs [illegible] greater [illegible] obligations [illegible] used to grow less."

For years the government had been attempting [illegible] of great [illegible] for relief [illegible] which the government dated [illegible]

Mr. Bennett referred to the farmers' creditors arrangement act [illegible] providing a means of [illegible] keeping [illegible] It had resulted in [illegible] settlements.

The act had [illegible] should be done to relieve the farmer but it had made a "successful beginning." It remained for the government to take such other steps as would reduce the debt not only of farmers but of city dwellers as well.

"An attempt to restrict the [illegible] of a rule to a specific [illegible] might involve a basic dislocation of our whole economic structure. No one must be robbed to pay any one else. That is not an economic [illegible] because it is a fairly easy one. But it is equally unprofitable. Our task is to strive to help both, with [illegible] hardships upon either."

There is no magic in this. There was no reason in theory or practice why the act should not apply to the home owner.

"In fact, it should and shall be done. The farm is not only the farmer's home but it is his producing factory. In that sense it can be distinguished from the home of the urban dweller. But that distinction is [illegible] which forbids the extension of the principle to which I have referred.

"You understand of course that [illegible] commercial [illegible] when [illegible] can take advantage [illegible] proceedings but the ordinary householder in distress has no [illegible] if he cannot pay but [illegible] if the Mortgagee [illegible] satisfactory to the mortgagee. And I believe that [illegible] which the [illegible] will be enabled to scale [illegible] proportionate [illegible] mortgagee's interest [illegible] that the [illegible] can pay it and still re[illegible]."

A [illegible] was not good even [illegible] emergency measure. "It [illegible] the debt and leaves the creditor and debtor glaring at one another across it." It would be the [illegible] after both the debtor and creditor.

LONDON PRESS SKEPTICAL ON WHEAT MOVE

LONDON, Sept. 9.—Several morning newspapers commented upon the action of the Canadian Grain board in setting a minimum price for wheat.

The Financial Times said: "It is difficult to see how the grain marketing [illegible] can improve the unsatisfactory wheat marketing situation which is one of the most serious problems confronting the Canadian government.

"With European harvests larger than in 1934, Canada will have even greater difficulty in moving her surplus wheat problem. Current conditions [illegible] a severe test on the regained [illegible] freedom which appeared [illegible] the period of international [illegible]"

The [illegible] editor of the Daily Telegraph said: "Clearly the government has taken a bold risk, fixing the price 7½ cents higher for the new crop. Whether they have [illegible] I believe [illegible] damage is greater than [illegible] estimates have yet disclosed, time alone will show."

The Daily Mail's city editor said: "It [illegible] an indication that Canadian authorities had a favorable view of the wheat price outlook."

The News-Chronicle's city editor said: "The wheat market is bewildered by the startling move. Possibly the grain board intends to sell its wheat at a loss if necessary, but no provision was made in the act to finance such a loss. A further problem is how long the new arrangement may be expected to stand. If the Canadian government really expects to be able to sell its wheat on the world market at this price it must be banking rather heavily on the failure of the Argentine crop. This is very much a gamble."

SEA LIONS JUMP WHEN STEAM WHISTLE BLOWS

VANCOUVER, B.C., September 9. A herd of sea lions, estimated around 2,000 roaring down the rocks of an unnamed island in the Queen Charlotte group, off the Pacific Coast, into the ocean when the ship's whistle sounded was the unusual sight which greeted passengers on the "Prince Charles" of the Canadian National Steamships when on a cruise along the Pacific Coast from Vancouver a short time ago. The older animals appeared to be of tremendous size. Perhaps to cruise on the Pacific Coast is more popular than [illegible] through the Queen Charlotte Islands [illegible] logging camps, whaling stations, canneries of various kinds are [illegible] of call. Sometimes the log [illegible] old time dances when the [illegible] and passengers are invited.

Larger phases of the debt problem were first taken up [illegible] the nation [illegible] the Canadian National railway debt, provincial and [illegible] debts and debt to the [illegible] of Canada and to foreign countries.

"Now I tell you plainly that this great national debt of ours must be reduced. Although we are making [illegible] to recovery, although in [illegible] we have made, comparatively [illegible] greater mental progress in the [illegible] three years, although our [illegible] picking up our trade in[illegible] our unemployment decreases, I will not pretend that I can see real promise of permanent se[illegible] until we have lightened this awful burden of the national debts. Some municipalities had defaulted and some provinces would have defaulted but for federal aid.

SHORTAGE OF FARM HELP IS ALBERTA WOE

CALGARY, Sept. 9.— A serious shortage of harvest help in Alberta may be encountered within the next week, officials of the provincial government employment service stated here today.

Relief camps for single jobless men are practically closed and it may be necessary to send the married unemployed on civic relief in the cities of Calgary, Edmonton, Lethbridge and Drumheller to the harvest fields.

A month ago 1,300 men were at the camps but today there are less than [illegible] the majority unfit for farm work.

More than 500 married relief men in Calgary have already volunteered for [illegible] work. Married unemployed men can not take farm jobs unless they have permission of the civic [illegible] and have worked out their relief quota payments.

Wages have jumped from $1.50 per day offered two weeks ago to $2.[illegible] a day for stookers. A shortage of farm help was reported in Saskatchewan where stookers are being offered $1.50 a day.

CLASSIFIED ADVERTISING BRINGS RESULTS

ITALY GIVES WORD NOT BLUFFING WAR TALK

ROME, Sept. 9.— Official sources pointed today to Premier Mussolini's declaration, "We shall march straight on," as indication the Italian policy in its dispute with Ethopia will not waver.

The declaration was made yesterday before 30,000 Fascist youths.

The official sources said it was important that this stand should be fully appreciated since only further complications would arise from any failure abroad to comprehend that Italy is not bluffing.

They said they wanted the world to know there was nothing uncertain about Italy's stand and they expressed pessimism over the possibility of any important results being achieved at Geneva.

A government spokesman said it was erroneous to interpret the Italian military activities in Eritrea as an evidence that hostilities were imminent. It was only natural, it was explained, that troops now quartered in the colonies should move about in the course of their training exercises.

ALBERTA WHEAT MAY GO ABOVE 1933 AND 1934

Harvesting of one of the most varied crops ever cut in the west is proceeding as grain men are baffled in the making of estimates. Predictions for the Alberta wheat crop range from 110,000,000 to 120,000,000 bushels.

On August 30 the Alberta government issued a crop report which placed the crop at "approximately the same as last year" when 112,500,000 bushels was harvested as compared with the 10-year average of 130,000,000. Frost has recurred and no report is being issued this week, as some threshing returns will be awaited.

Based on reports made by agents at the first of September, the Alberta Wheat Pool issued an estimate last week of the Alberta wheat crop. The figure of 111,000,000 bushels was given as a preliminary and unofficial estimate. Pool officials would not say what change will be made as a result of September frosts.

Mrs. Luella Wood Passes Away Saturday

AMONG EARLY PIONEERS—HIGHLY ESTEEMED

The death took place at the family residence, north of Tofield, on Saturday last of Mrs. Luella Wood, 68, wife of the late Henry Wood.

Mrs. Wood, who was among the early settlers of the Tofield district was well known and highly respected throughout the district. She leaves to mourn her loss five sons and four daughters: Lloyd, John and Melville, all of Tofield, William and Arthur of Port Angeles, Washington, Maggie M., Tofield, Mrs. Horace Rollans, Viking; Ardis of Macleod, Mrs. J. Majakey, Edmonton.

The funeral was held on Monday, service taking place at the United Church, Rev. D. K. Allan officiating. He took as his text, "I have fought the good fight; I have kept the faith." Hymns sung were: "Nearer My God to Thee," "My Faith Looks Up to Thee" and an especial favorite of the departed, "[illegible] the Tie That Binds." Interment took place in the Tofield cemetery. The pallbearers were: Messrs. John Cookson; R. Phillips; J. [illegible] Wm. Abernethy, J. [illegible], T. Jones.

Luella Patton was born at Walnut Grove, Ill., U.S.A., in 1867 and had reached the age of 68 years. Forty-seven years ago she was united in marriage to Mr. Henry Wood and a few years later, in 1902, Mr. and Mrs. Wood came to Canada and settled at what was then the small settlement of Tofield. It is interesting to recall that their farm land was what is now the townsite, their place of residence being the present Glover homesite. Some years ago they moved north of town where the family home has been maintained ever since.

The floral offerings were as follows:

The Family; Grandchildren: Minnie, Mabel, Neva, Frank and Glenn; Mr. and Mrs. Jack Cookson; Mr. and Mrs. Calvert; Lorett Ross; Mr. and Mrs. M. C. Hammond; Mr. and Mrs. Stan Yakaboski; Mr. and Mrs. J. O. A. Letourneau; Mr. and Mrs. J. Johnson; Mr. and Mrs. R. Phillips, Mr. and Mrs. Graham; Mr. and Mrs. J. Macfarlane; Mr. and Mrs. F. Seale, Mrs. Geo. McConnel; Mr. [illegible] and family, Mr. and Mrs. T. Jones and family; Mr. and Mrs. [illegible] Eaton, Mrs. Logan and Bill, Edmonton; Mr. D. B. Mailer, Edmonton; Mr. and Mrs. H. K. Adams, Calgary; Mrs. G. Blake, Lethbridge; Nurses and Mrs. Turnbull, Macleod General Hospital; Mr. and Mrs. W. Blanchard Sr., Ryley, Mr. and Mrs. W. Blanchard Jr., Ryley; Lakeshore school children and teacher; Lakeshore Sunday School; Lakeshore Ladies' Aid; Ladies Auxiliary of the Lakeview Community League; Mr. and Mrs. Henderson and Jason; Mr. and Mrs. Wm. A. Mitchell; Lakeshore C.G.I.T.

G. McLaughlin, funeral director.

E. W. ROGERS

KETCHAMOOT

Born.—To Mr. and Mrs. Charley Washman, on September 10th, a daughter.

We extend our sincere sympathy to the Henry Wood family in the death of their mother.

Five little girls and one boy started on their educational careers this fall. These were, Ruby Sutton, Norma Johnson, Ella Brown, Katie Penner, Nettie Regha and Johnnie McGinitie.

There was no school on Tuesday and Wednesday owing to the illness of the teacher, Miss Lindsay.

Miss Hazel Sears returned home Saturday after a three weeks holiday visiting relatives in Victoria, B.C., she also visited Mrs. Harold Smith, nee Edna Lawson, at Vancouver.

Mr. and Mrs. John Lee and family were Sunday dinner guests of Mr. and Mrs. Chas. Ingram.

Misses Isabelle and Edith Dawe, of Guelph, Ontario, who spent the summer at Jasper, visited at the W. A. Mitchell and Henderson homes two days last week. The mother of the young ladies was formerly Miss Jennie Mitchell.

Mrs. J. Younse and son George of Edmonton were also calling on friends and relatives in our district last week.

Mrs. Davison, daughter Edith and son Billie and Mr. W. Stairs were Sunday visitors of the Sears family.

Mr. Wesley Ingram returned to his home in Victoria B.C. after a three weeks visit with friends and relatives.

Mrs. Henry MacGinitie entertained the Social Hour Club at her home Thursday afternoon of last week.

LAKESHORE

Mrs. Weatherill sen., returned last week from the coast where she visited for three weeks with friends and relatives.

Mr. and Mrs. L. H. Graham and daughters Ethel and Marie, spent the week-end at Ashmont, their former home.

The sympathy of the entire community is extended to the members of the Wood family in their bereavement, which is indeed a loss to the whole district. Although suffering from lameness and partial deafness in her later years, Mrs. Wood still took a warm personal interest in the lives of her friends and neighbors, rejoicing in their good fortune and quick with help and sympathy in trouble and sorrow. Memories of her thoughtful kindness will be treasured in the hearts of all who knew her for many years to come.

We are pleased to report that Miriam Seale who was quite ill last week is much improved.

Mr. and Mrs. Chas. Plants and son Clifford of Woodlawn were Sunday guests at the Phillips home.

Miss Evelyn Jones and her brother of Boyne Lake are guests at the Graham home.

Miss Beulah Johnston came home from Camrose last week where she was attending normal school. The school is temporarily closed owing to the infantile paralysis epidemic.

The Jas. Francis family visited at the George Francis home on Sunday.

NOTABLES VISIT TOFIELD

Sir Montague Barlow and Lady Barlow, with their secretary; A. A. Millar of the Alberta Mines Branch, R. Andrew Smith, secretary of the Board, and Mr. Armour, legislative councillor, visited Tofield on Wednesday in connection with the provincial coal mining investigation. They visited the Tofield coal mine and had dinner at the Royal Alexandra hotel where they expressed pleasure at the accommodation afforded them.

LOCAL AND PERSONAL

WIN SCHOLARSHIPS AT RYLEY FAIR

At the Ryley school fair on Thursday, Sept. 5 the girls' short course scholarship of 10 days at Vermilion agricultural school was won by Miss Doris [illegible] student of Ryley high school. The boys' short course scholarship of 10 days at Vermilion agricultural school was won by Marvin Moen, a pupil at Amisk Creek school.

The Tofield W.A. are holding a vegetable sale, tea and sale of home cooking at the Institute rooms, Saturday, September 21st.

Constable Cookson, of the R.C.M.P. of Wilkie, Sask., is spending a vacation at the home of his parents, Mr. and Mrs. Geo. Cookson of Tofield.

Members of the Cookson family are visiting Jasper, Alta., on the occasion of the wedding of Jack Cookson, son of Mr. and Mrs. Geo. Cookson. The wedding is to take place on Thursday, September 19th. Mr. Jack Cookson is a member of the Edmonton city police force.

Miss Helen McCauley, who is teaching school at Bruce was home for the week end.

Dr. and Mrs. Law spent some days in the city this week. Dr. Law is attending a convention of medical men being held there.

Mrs. Provost of Edmonton is visiting at the Allan home for a few days.

Miss V. Moore spent Thursday and Friday of last week in Edmonton.

Miss Myrtle Bell is visiting her sister, Mrs. N. Scott.

Mrs. Malcolm was a visitor to the city this week.

Mr. and Mrs. Bell visited at the N. Scott home over the week end.

Members of the Ionic Lodge, Eastern Star, Tofield, visited an Edmonton lodge last week and the Vegreville lodge on Monday night.

Dr. Messenger of Edmonton spent the week end at the Calvert home.

Mrs. Richardson returned from the east last week, where she had spent an extended holiday.

Mr. Glover, veteran telephone official, is on holidays.

Ray Coutts spent the week-end in the city.

Mr. and Mrs. Bob Fairbairn of Vegreville visited Mrs. Burnett on Sunday.

Miss Winnifred Worton spent the week in Edmonton visiting friends.

Charlie Edwards, Harry Bowick, and Wes Taylor motored to Wainwright on Sunday.

Don't forget the Annual School Fair to be held on Tuesday, September 24th.

Mr. A. P. Harrold accompanied by Gordon Flowers of Edmonton, visited here a few days last week and packed up his furniture prior to shipping it to Lloydminster.

Mrs. Letourneau sr. has rented the house owned by Mr. Harrold and formerly occupied by Rev. Wallis.

Mr. Bert Mahaffey of Winnipeg was visiting at the R. Wilson home for a few days this week.

Mrs. R. J. Perdue of Oakville, Ontario, is a visitor at the Emery home. Mrs. Perdue is a sister of the late R. E. Emery of Tofield, and at one time, her son, Nelson E. Perdue operated a repair garage in connection with the Swift and Emery business.

Miss Beryl Edwards is visiting friends in the city this week.

SHOOTING SEASON OPENED MONDAY

With the opening of shooting season, quite a number of city sportsmen were down to get an early shot at the birds both ducks and geese. Among them were included Mr. Tilley and son of the Tilley Press, Edmonton and Dr. Messenger, also of Edmonton. Fair results were obtained.

Perhaps the most notable goose hunt of recent years took place on Wednesday afternoon and Thursday morning. A party of six local hunters located and bagged twenty-odd geese on Wednesday afternoon, five of them returning to the same location early Thursday morning were successful in bagging thirty-odd more, making a total of 52 geese. This is real hunting.

TOWN COUNCIL

A regular meeting of the town council was held on Monday, September 16th at 8.00 p.m. Present were Mayor G. B. Brace, Councillors Swift, Lovell, Hammond and Taylor. The minutes of the previous meeting were read and approved. A statement of the receipts and expenditures of the town for the month of August was read and considered.

It was decided that pursuant to the provisions of the Tax Recovery Act, the annual tax sale would be held on Saturday, December 7th at 2 o'clock in the town hall.

Authority was given to the secretary to take the proceedings necessary to the cancellation of the [illegible] plan of Tofield Heights Subdivision.

Council [illegible] a resolution directed to the Board of Public Utility Commissioners, setting out the burden imposed upon the ratepayers by the present annual payments on debentures and asking that the Board assist the [illegible] in securing some relief from the owners of the debentures by way of a reduction in the interest rate payable on the debentures.

Secretary was instructed to ascertain if the government grader could be secured to scarify and grade the travelled portion of the main street.

TOWN OF TOFIELD

John, Art and Mell Wood
Mr. and Mrs. H. Rollans
Mr. and Mrs. J. Majakey

ALL MEN ARE BLIND IN MODEL VILLAGE

Belgrade, Sept. 13.—Every husband in the model village of Vetrenik, only two hours' journey from Belgrade, is blind, but their wives are among the prettiest in Jugo-Slavia and the children are happy, handsome and healthy.

The husbands are men blinded in the Great War, and the model village was founded to enable them to work on the land and become self-supporting. Each man has a cottage, with land, livestock and the necessary tools to enable him to work as a farmer with a guaranteed market for his produce.

Dr. Velyko Ramadanovich, head of King Alexander's Institute for the Blind, was responsible for the founding of the village. He and his wife, known as "father and mother" to the villagers, found the men wives by advertising for girls to come forward to help the war blinded veterans.

"We needed 30 wives," said Dr. Ramadanovich, "but we had applications from more than 60 girls. We were surprised by their good looks.

"There was no personal choice in the matter. We said to the man, 'Here is a good wife for you,' and to the girl, 'Here is your husband,' and they married forthwith.

"All the marriages turned out happily. Every marriage took place in [illegible] hotel and I gave the bride away and was best man for the bridegroom. Each bride had a gown [illegible] presented to her, and the bridegroom was presented with [illegible] for the occasion, down [illegible] for his buttonhole.

"That was seven years ago. Then the population of our village was 60. Today it is 200. Not a single child has been born blind, and only one [illegible] has died. The village is one of the most prosperous and happiest in the country.

ECONOMIC BOYCOTT OF ITALY PLANNED

Geneva, Sept. 16.—Reliable sources disclosed Monday a preliminary plan for an economic boycott against Italy in case that nation should launch an unprovoked war are being worked out among certain members of the League of Nations. The nations would pledge themselves neither to sell nor buy anything from Italy.

HAILE ACCEPTS FEW VOLUNTEERS

London, Sept. 16.—A Reuters News Agency despatch from Addis Ababa said a government statement disclosed today that 5,000 Irish, 3000 French and a number of British, Germans, Russians and Brazilians have offered their services to the army of Emperor Haile Selassie. Only a few of the volunteers were accepted.

POLICE PROBING GLENEVIS FARMER'S DEATH

Mystery death of Norman Nicholson, 55, whose body was found beneath debris of a caved in root house [illegible] farm four miles north-east of [illegible] miles northwest of Edmonton [illegible] Saturday was being [illegible] Monday by R C M P officials [illegible] that there may have been foul play.

Neighbors who went to the home [illegible] Mr. Nicholson [illegible] at [illegible] a well [illegible] marks in [illegible] home.

[illegible] immediately and [illegible] adjourned [illegible] post mortem [illegible] is being held.

Mr. Nicholson has lived in the district [illegible] years. He married [illegible] Mrs. A. Nordquist [illegible] area. He [illegible] apart from his wife.

Officers from Edmonton [illegible] to make an investigation.

Mr. Nicholson had been [illegible] for four or five days before neighbors complained to the police. As a result, Constable Thurston of Redwater made a search of the [illegible] and when he came to the [illegible] root house took spades and other tools and started to dig. He found the body badly crushed.

Neighbors said that during the search it was observed that some of the timbers apparently had been chopped recently with an axe, as though it was arranged that the cave-in should result. Due to the crushing and generally mangling of the body by the cave-in the cause of death could not be ascertained. A post mortem is being held Monday in Edmonton. The body had been covered with debris and rubbish.

While R C M P. officials and officers who are working directly on the case are "mum" on their investigation, it is believed that the crime, should it be one of murder, was a "perfect crime" which slipped. It was not until the faint blood marks were found on the floor of the kitchen that suspicion of foul play entered the scene.

Police would not say whether they suspected any particular individual.

R C M P on Tuesday morning arrested Walter Bilibroka, aged 19, and held him for questioning in the case. Bilibroka, who was working for Nicholson prior to his death, was arrested at Kalahad, 70 miles south east of Camrose, where he had [illegible] harvest work, 150 miles from his former employer's place at Glenevis, which is [illegible] northwest of Edmonton.

The young man is held to give an account of himself and has not been charged with murder as police, who are awaiting a pending inquest, have not ascertained that there was foul play in Nicholson's death.

EXPERT ADMIRES CANADA'S MINES

Montreal, Sept. 11.—Given a clear opportunity Canada, with its almost limitless undeveloped gold and other mineral deposits, could lead the world out of the depression, in the opinion of Robert Hunter, economist and sociologist from Santa Barbara, California.

Passing through Montreal enroute to California after visiting England and Holland, Mr. Hunter expressed the opinion that the Dominion remained one of the few nations capable of reaching undreamed prosperity through development of its natural resources.

Every inducement should be offered to foreign capital to come into this country and aid in developing and mining our natural resources, Mr. Hunter thought.

The guest at the small country hotel was indignant.

"Didn't I ask you to be sure to leave me some hot water?" he demanded of the maid in the morning.

"Yes, sir, you did," replied the girl, "and to make sure of it I left it for you overnight."—Toronto Globe.

CITY HUNTSMAN DROWN IN COOKING LAKE

H. McKernan, known Here, Falls While Wading After Drifting Boat

Harry McKernan, 40, owner-manager of the Capital Glass Works, Ltd. 9612 Jasper ave., was drowned in Cooking Lake Monday while on a duck-hunting trip and while his son Jack, five, looked on. The body was recovered by Kenneth Dunn, his hunting companion.

Drowning occurred shortly after noon when Mr. McKernan waded after a boat which had drifted away from shore, and it was not until about 11:00 p.m. that the body was taken back to his cottage, some miles away, that Mrs. McKernan learned of her husband's death.

Mr. McKernan was a son of the late Robert McKernan, one of Edmonton's earliest settlers, who resided in South Edmonton until his death in 1908. Mrs. Robert McKernan, mother of the accident victim, resides in Calgary and was in Tofield visiting a daughter, Mrs. Abbott.

With Mr. Dunn, Jack, and another youth, Teddy, about 12, whose last name could not be learned, Mr. McKernan left Cooking Lake cottage front in the morning to be ready for the duck season opening at noon. They pulled their boat up on a marsh, where they were having lunch when the boat drifted away.

Mr. Dunn told the widow and others that Mr. McKernan waded out after the boat, got mired in a muddy bottom and went down. He appeared once. Mr. Dunn then divested himself of his clothing and spent some time in search of his companion. Mr. McKernan apparently was dead when Mr. Dunn located the body and dragged it to shore.

He worked on the body for two hours in an attempt to restore breathing, then began a search for a farm home, and finally located one late in the afternoon. A wagon was taken back to Cooking Lake cottage front, from where it was brought to the city by Howard and McBride.

The death of Mr. McKernan, who was born in Edmonton, marked the only hunting accident in this district on duck season opening day.

Deceased's relatives in addition to his wife, mother and son, include brothers and sisters: W. J. McKernan, Edmonton; Mrs. Abbott, Tofield; T. W. McKernan, Edmonton; George McKernan, Vancouver; Mrs. George Cushing, Regina; Mrs. Frank Hickey, Calgary; Mrs. Robert Turnbull, Edmonton.

Mr. McKernan was a member of the Kiwanis club.

Mr. McKernan was well known in Tofield, as in addition to social visits here, his firm has done glass work for different merchants.

UXBRIDGE, ONT., CELEBRATES GOLDEN JUBILEE ON SEPT. 19

The editor is in receipt of a book entitled "Pioneering in the Prairie West" by W. C. Pollard, who is a brother of, Mrs. Crawford Baptist. Mr. Pollard was a former resident of the west, and homesteaded on the S.E. 12-54-19-w4, just north of Tofield in the summers of 1904-05-06. The book consists of 110 pages and also contains photographs of the west.

At time of writing we have not had time to read the entire book but after doing so will be able to comment upon it more fully.

We learn that Uxbridge celebrates its golden jubilee on Thursday, Sept. 19th, the town being incorporated September 19, 1885. Quite a number of Uxbridge's sons and daughters who are residing away from the home town will respond to the Council's invitation to return and help celebrate the town's golden anniversary.

Main Street Block Destroyed By Fire

SECOND LARGE FIRE IN SIX YEARS — FOURTH SINCE 1908

Fire doing damage estimated at between $30,000 and $40,000 razed the west side of main street, Tofield, in the early morning hours of Saturday, September 21st. Discovery of the outbreak was made at about 1:15 a.m. and before the break of day, what had been a typical small town business block, was a mass of smouldering ruins.

The fire commenced in the property owned by A. E. Calvert, used as a barber shop and pool room below, and as a residence upstairs. According to a finding made by the representative of the fire commissioner's office, the outbreak occurred in the kitchen upstairs, and is attributed to a gas lamp in the kitchen. Mr. and Mrs. Calvert were away at the time of the outbreak, the last persons on the property being Lee Burnett, who works for Mr. Calvert, and Norman Glover, who was voluntarily assisting him in cleaning up. Together they swept the floor shortly before midnight, and are positive everything downstairs was in order at that time. Lee Burnett emptied the cash register and took the money upstairs by an inside stairway but did not enter the kitchen, merely opening the door and placing the money inside. At that time there was no odor of smoke or any unusual sign.

The fire was first discovered by Mrs. Selma Johnson, who occupied the south west rooms in the Co-operative store block. She shouted to the other occupants of the block and Mr. and Mrs. Carter and the Moan family were aroused almost simultaneously. Mr. Moan rushed to the telephone and gave the alarm and Miss Burnett immediately threw in the switch which sounded the siren. From then on things moved quickly. Under the leadership of M. C. Hammond, fire chief, the chemical was rushed down to the fire, but the supply was inadequate for the size of the blaze. A few minutes delay was caused by inability to get the engine of the fire truck started. The gasolene had either leaked or evaporated out or some one had stolen it. However, for just such an occasion, a gallon was on hand, its location being known to four individuals. The gasoline has evaporated, leaked out or been stolen on previous occasions. Frantic efforts were made to confine the blaze to the source of origin, but the flames attacking the Co-op store from two points, the upstairs windows and swirling round the front and, breaking the windows, soon had the building ablaze. The Calvert loss was complete, building and contents, the amount taken out being negligible and that badly damaged. Immediately prior to the Co-op building igniting, helpers removed L. Abbott's barber shop equipment but Ed Hardy who occupied the rear of the same shop, lost considerable records, a small quantity of merchandise, desk, papers, and his favorite shot gun. The building burned with almost incredible rapidity and by 2:30 the building was practically flat. Mr. Moan managed to save the ledger, scales and cash register, but time did not permit saving much. Between 1:30 and 1:45 Mayor Brace telephoned to Edmonton and requested assistance, saying if they could get here within the hour they could possibly save some buildings. However it was necessary for the Edmonton fire brigade to obtain permission to leave the city and it was about 3.30 when they arrived, under the personal direction of Chief Dutton. They made the trip in 45 minutes which is rapid travelling. However by the time they had arrived, A. J. H. McCauley's office, the Post Office and A. A. Beirnes' drug store had burned. They assisted in hauling out safes. In the meantime, south from Calverts, McLaughlin's funeral home had burned, and the galvanized iron garage also. Willing workers had removed all the cars from the garage and the larger portion of the contents of the funeral home and service station was saved. The gasolene pumps were ruined but stood a terrific amount of punishment. Most of the things in Mr. McCauley's front office were saved but a number of articles in the rear office were lost. Among these were several bound volumes of the Tofield Standard, under the editorship of the late R. N. Whillans. A large amount of the stock of the drug store was saved but with a stock of this kind, much of it was also lost. With the short time at their disposal the wonder is that such a multitude of small articles, bottles, etc. were carried out. Dr. Law's office was stripped clean, even to the linoleum on the floor. The occupants of the Co-op block met with varied losses. The Moan family lost considerable, as also did Mr. and Mrs. Johnson, Mr. and Mrs. Carter. Mr. ——, who works at the mine farm came near being trapped, sleeping through the alarm. The building was alive with people before he awoke and made a hurried exit.

Perhaps the luckiest individual is W. C. Swift. Situated immediately north of the drug store with just the street between, his building was subjected to considerable danger. Very fortunately a slight breeze carried the heat and burning embers right between the corners of the Swift building and the T. W. Taylor building. Had the breeze been blowing from due south instead of south west it is very doubtful if the Swift building could have been saved. There was a regular shower of sparks travelling through the air to the tie posts and on as far as the McCauley residence. However, many helpers stripped the Swift front shop of auto parts etc., others wheeled out cars from the garage, while a number of boys were on the roof throw-

Wedding

JASPER, Sept. 23.—A social event of the fall season, was the wedding on Thursday evening, September 19, of Miss Isabelle Elnah Rutter, eldest daughter of Mr. and Mrs. W. W. Rutter of Jasper Park, and Mr. Jack H. Cookson, of Edmonton, son of Mr. and Mrs. George Cookson of Tofield Alberta.

The Jasper United Church was the setting for the ceremony and was perfectly decorated with cut flowers. Rev. W. Hayes, minister of the church, used a single ring service.

The bride was very lovely in heavy white satin and rose point lace, cut en train, and her embroidered tulle veil was held by orange blossoms. Her bouquet was a shower of blush ophelia roses. She entered the church to the strains of the Bridal Chorus from "Lohengrin," on the arm of her father, who gave her in marriage.

Her matron of honor, Mrs. Frank Locke, wore rust velvet costume, with silver metallic hat and slippers, and carried sweet peas in complimenting shades. The bridesmaid was Miss Mildred Rutter, in maize silk net, with silver slippers and maize picture hat. Her flowers were mauve sweet peas.

Mr. Arthur Cookson of Wilkie, Saskatchewan, attended his brother, and Mr. Frank Locke was chief usher.

Mrs. A. A. Sherriff played the wedding music and Mrs. L. Lavery sang, "Oh Promise Me." during the signing of the register.

Immediately following the ceremony, the wedding party and invited guests adjourned to the Athabasca hotel, where a reception was held in the rotunda. Mr. and Mrs. Jack Cookson, were assisted in receiving by their attendants and by their parents, Mr. and Mrs. W. W. Rutter, and Mr. and Mrs. George Cookson. Mrs. Rutter wore navy silk crepe and cut velvet with matching accessories, and a corsage of red roses. Mrs. Cookson was in new blue with pink roses.

Dinner followed the reception when covers were laid for over sixty guests. The brides' table was especially charming with pastel sweet peas, white tulle and beautifully decorated wedding cake. The Rev. Mr. Hayes toasted the bride and the bridegroom responded. Dancing followed in the rotunda until midnight.

The bridegroom's gift to his bride was a sapphire necklace, to the matron of honor, a rhinestone pendant and chain, to the bridesmaid, a rhinestone bracelet, and to the best man, a tie pin.

Mr. and Mrs. Cookson left for a motor trip to Banff, Lake Louise and other southern Alberta points. On their return they will reside in the Arlington apartments, Edmonton.

Among guests present were friends and relatives from Edson, Edmonton and Tofield, Alberta; Wilkie Sask.; Victoria, B. C., and Rainy River, Ontario.

FREAK POTATO

A potato that weighs two and one half pounds, and that evidently desired to do some travelling, was brought to the Mercury Office by Mr. Janet. By the shape of the tuber, one would imagine it desired to be in all parts of the garden at the same time. From a large central tuber other potatoes of good size branch out in all directions.

MAIN STREET BLOCK DESTROYED BY FIRE

(Continued from front page)

ing water on any burning debris falling on it.

During the height of the fire the Jobb block, occupied by J. G. Jobb and F. W. Rogers, caused some anxious moments. The glass in this building was badly cracked with the heat and had to be replaced. The stocks were undamaged. The Taylor building escaped damage. Given a little more time they were able to hang [illegible] over the windows and by keeping them [illegible] saved them.

Having [illegible] McLaughlin garage fears were held for the Central Meat Market and the Tofield Service Station. The contents of the Meat Market were removed, but the [illegible] partly [illegible]

[illegible] the service rendered by the post office staff [illegible] at 2 a.m. they were [illegible] Women's Institute building and handing [illegible] mail [illegible] The country mail [illegible] the morning.

The [illegible] loss [illegible] between $[illegible] and $[illegible]. Of this amount [illegible] was covered by insurance but in all cases the fire victims suffered some loss and in a number of cases [illegible] was quite heavy.

[illegible] fortunately there was no loss of life and no casualties.

[illegible] interest was manifested in the [illegible] of the safes. A. J. H. McCauley's fire proof safe which stood on a cement foundation came through the fire exceptionally well. When [illegible] the combination could be manipulated and the doors opened. The paper and documents inside were scorched but quite readable. His smaller safe, protected the contents, but the dial had to be cut out with an acetylene torch before it could be opened. J. E. Stinson's safe preserved the contents also. The papers are browned by heat but intact and readable.

The conflagration was in many respects a duplication of the fire which occurred in 1929 on the opposite side of the street. On this occasion the fire commenced in the butcher shop owned by C. Hobson and spread north to the end of the block. Jumping the street it ignited the building owned by F. O. Bell, completely destroying it.

Due to the blaze it was necessary for burned out business men to find [illegible] and the following is a list so that their patrons can readily locate them.

Geo. McLaughlin is located at S[illegible] warehouse, telephone 29.

A. F. [illegible] south portion of S[illegible] building on main street [illegible] yards of Royal Alexandra Hotel.

School Fair Well Attended

The annual school fair was held on Tuesday of this week and was an event worthy of the effort involved. It was an improvement over the fair of last year, both in number of exhibits and the quality.

The teachers, town and country, had a busy day, most of the work of organizing and preparing falling upon their shoulders. It [illegible] it might be wise to [illegible] of these duties to our members of the teaching staff so that they may have the odd breathing space through out the day.

Taking a look round the exhibits [illegible] was impressed with the ingenuity and imagination of the youngsters. In the [illegible] grades this was [illegible] plasticine work which ran to designs of [illegible], paper furniture was also [illegible] neatly and well made.

The art section was [illegible] consisting of color [illegible] of flowers, letter work etc. One exhibitor combined practical ideas with an artistic temperament having [illegible] ed sign, which read "Start the day right with a good breakfast." Another work of art read "[illegible] for a Nest," while still another who must be a fresh air enthusiast had a work of art with the lettering "Go Outdoors."

While the woodwork was [illegible] as numerous as last year, some excellent exhibits were shown. A well made and excellently painted plan[illegible] and caught the eye, while a miniature dresser, complete with the drawers and mirror, showed evidence of painstaking and skilful work.

The map section was good, the color work as well as detail being in evidence. The exhibits of various knots showed skill, carefulness and a taste for display.

The culinary section was exceptionally well filled, and the exhibits were of a very high order. Preserved fruit and vegetables, pies, cakes, cookies, biscuits, candy, lunch boxes, would have done credit to an adult exhibition.

The vegetables were very numer[illegible] and were of a standard that must have made judging difficult. The carrot, beet and potato sections, well arranged and bright looking.

The exhibit of poultry included chickens of all breeds, including bantams, ducks, geese and turkeys.

There were four calves exhibited, [illegible] dairy type and two beef type. [illegible] were nice looking animals and [illegible] up-op shape. Two colts, sleek and [illegible], and no doubt the pride of [illegible] were on exhibit.

[illegible] mately during the afternoon [illegible] and this possibly kept a [illegible] away from attending.

A program of sports was run off during the early afternoon and at the town hall competitions in elocution and singing took place.

[illegible] the noon hour the Board of Trade served cocoa to the country children.

A report of the prize winners will appear next week.

Town Council Special Mtg.

On Tuesday evening, at the Town Hall, a special council meeting was held to deal with matters pertaining the debentures and matters arising out of the fire. A full council including Mayor Brace, Councillors Bellamy, Chapman, Hammond, Lovell, Swift and Taylor were present.

A. B. Clutterham interviewed the council and said that he would like to rent the Women's Institute building for the winter months at least, for a post office. The library, he said, could be continued in the rear of the building. The council past a resolution whereby the building was rented to Mr. Clutterham at $12.00 per month.

B. Whyte, representing G. McLaughlin interviewed the council and said the firm would like to rent the former Pincott building to be used as a [illegible] It was intimated on [illegible] would be taken there, though it would not be exactly a funeral home. Some objections were raised it being pointed out that these [illegible] were for residential purposes only and while other businesses were established there, the owners of property had the right to enforce this restriction if they saw fit. Considerable discussion took place pro and con as to the attitude of residents. Councillor Hammond saw no cause for objection as he said there would be no noise. Later Mr. McLaughlin arrived home from Edmonton and made the same application. After considerable discussion the building was rented to him at $5.00 per month.

The secretary, J. W. Chapman, reported that on Monday he had interviewed Mr. Fream of the Utilities Board and Mr. Fream had said that the town was now in line for a recommendation from the Board to the bondholders for a reduction in interest upon the debenture debt. He said that Mr. Fream suggested that the debenture payment of $6,500.00 due October 1st be paid. He also said the Board would empower the town to borrow from the bank, should they need it, $1500.00. Mr. Fream suggested that if this payment were made the opportunity of driving a good bargain would be increased. The council passed a resolution that the debenture payment of $6500.00 due October 1st be paid.

Mr. McLaughlin asked permission to erect a temporary building in order to carry on his gas service business. Considerable discussion arose over the by-law covering the building restrictions in the block. The discussion brought forth a resolution and an amendment both of which were not seconded.

Councillor Lovell moved that Mr. McLaughlin be allowed to erect a temporary building, metal clad for eight months.

As an amendment councillor Hammond moved that the present building by-law be repealed and those desiring to build to submit plans before building.

No seconder appearing for any of these motions it was decided that the secretary interview the Fire Commissioner in Edmonton on Thursday and that a special meeting of the Council be called for Friday night.

Mr. McLaughlin then asked permission to put up a galvanized iron building at the rear of the lot. On the motion of Councillor Hammond, and seconded by Councillor Lovell, permission was given Mr. McLaughlin, or any one else, to erect such a building at the rear of the lot.

Mr. J. W. Somers, past mayor of Wetaskiwin and formerly a citizen of Tofield was present and spoke a few words to the Council.

For Him

The collector approached a parishioner and held out the box.

"I never give to missions," whispered the parishioner.

"Then take something out of the box, sir," whispered the collector. "The money is for the heathen."—Bee-Hive

LINDBROOK

Not much news here these days. It takes Tofield to feature headlines, such as disastrous fires. Too bad! Things are bad enough without that, altho of course we get our share of disasters such as frost, bloom-rot, and rotten weather and prices, so we are quite in the fashion.

Mr. and Mrs. T. Lisolmore visited the Bracegirdle family here, last week end from Wainwright.

We notice that Mr. Bracegirdle has his name painted on the roof of his store. Jimmie must be getting air-minded and probably having a few friends in the aviation service, must be letting them know his location, but its a rotten country to land in here abouts so keep the emergency kit handy. No! the idea is to see the name before you get there, you see the cars do around 60 or 70 m.p.h. on the highway.

Talking of cars and the highway, a week or so back, a car was passing Mr. Oultons farm opposite Appleby's where he raises some Canada geese which he has in wired enclosures. The driver saw these birds and in turning to look at them put his foot on the accelerator and the next thing he knew, he, his wife, and the car were upside down in the ditch. Luckily no one was hurt and neither was the car very much.

H. E. ROGERS

A REASONABLE REQUEST
Is gratitude numbered among the human virtues?
If so there should be some appreciation for the Wheat Pools in Western Canada to-day
No organization has fought harder against the strongest kind of opposition And all for the benefit of the grain growers of the west.
No organization has so courageously faced danger and even the threat of extinction
In order that the grain growers might not be sacrificed to greed and the arrogance of wealth and power.
Continuous criticism has been the lot of this farmer organization through the bitter years
In which it fought for the grain farmers.
Surely it is not asking too much to suggest that the grain farmers
Should give their patronage to Alberta Pool Elevators?
It is through deliveries of grain that this organization is kept strong and virile
Won't you do your part? Every wagon load counts
Alberta Pool Elevators

BEER is BEST
Look at it from any angle - - - BEER is bottled health. The choicest "malting quality" Barley, which is reserved for brewing good Beer, is in itself a sovereign digestive. Then too, Beer contains a powerful source of energy - - - and because of the pleasant, bitter flavor imparted by the hop, Beer is a remarkable appetite stimulator.
ALBERTA BEER—
bottled or on draught, is served at all good hotels
OR
Order a case of your favorite brand from our nearest warehouse at Edmonton.
No wonder then, that
BEER is BEST

MANIFESTO

—OF—

J. B. Holden, Federal Conservative Candidate for Vegreville Constituency

To the Electors:-
Federal Constituency of Vegreville.
Ladies and Gentlemen:-

In allowing my name to come before you as Conservative Candidate in the forthcoming Dominion Elections, I take this means of stating my reasons for so doing:-

In the recent Provincial Elections, as many of you know, I actively campaigned for the man who in my opinion was best suited to serve our interests. I refer to the then Liberal Candidate, Charles Gordon. I have no apologies to make. I believed then that my stand was right, and I have had no reason to change my mind since.

In respect to R. B. Bennett, I hold the same conviction. Since the early days during which we sat as young men together in the Provincial Legislature (he as a Conservative, and I as your Liberal representative) I have followed his career with respect and a confidence that has increased progressively during the calamitous years that have enveloped the whole world since 1929, and from which we in Canada, under the Leadership of Mr. Bennett, are now happily emerging.

As we, in this Constituency, are necessarily mainly interested in the price which we are able to obtain for the products of our farms, let me at the outset briefly review the actions of the Bennett Government in this connection and in commencing so to do, let me remind you of the condition which had developed prior to Mr. Bennett's election to office.

On June 18th, 1930 (while Mr. King was in office) the Hawley-Smoot Tariff came into effect in the United States, and immediately shut our cattle out of the U.S. markets, and you know what happened to prices. Co-incident with this, you may remember that Australian butter, eggs from China, and certain dairy products from the United States and elsewhere, were being dumped in ever increasing quantities on our Canadian Markets in some instances at least (under subsidies) at prices below those at which they were being offered in the country of origin. Much the same thing had already happened in respect to lumbering, mining and other of our Canadian industries. But let us confine ourselves to the products of the farm; in 1930 (before Bennett took office) Canada's exports of bacon dropped to less than 27 millions of pounds whereas in earlier years our average annual sales to other countries had run upwards of 200 millions of pounds. Actually, in 1930 some 5 million pounds were shipped into this country to compete with the product of our own farms in our own local Market. Actually, we had already lost, not only 87 per cent of the foreign market, but we were losing, to an extent at least, our own.

Now let us turn to wheat: during the regime of Mr. King, France raised her tariff against our wheat from eleven to 85c per bushel; Japan, from 18 to 34c per bushel, and both Germany and Italy who had theretofore admitted our grains duty free, imposed tariffs against us of 98c and 73c respectively. The same practice was followed by lesser consuming countries, and all of those named either increased their barriers against our flour or imposed new duties affecting the finished product.

Now the foregoing was the situation that developed during the regime of Mr. King. Although the full effect was yet to be felt and appreciated, prices had begun to take the plunge that was the inevitable result of the loss of these great consuming markets.

Now let me tell you what Mr. Bennett has done to stem the tide of disaster that, but for his policies, in my opinion, would have destroyed us utterly.

First, in respect to wheat, he came to the aid of the Wheat Pool which, backed by the U.F.A. Government, held as at July 31st, 1930 over 124 million bushels of your wheat. By so doing, Mr. Bennett prevented this from being dumped on the markets at prices far lower than any we have experienced. He attempted to stem the otherwise inevitable tide of crashing markets by vesting the full resources of the country in Jno. I. McFarlane, who had bought and has continued to buy your wheat at prices that have averaged some 22c per bushel above world prices. In the blackest year of the whole debacle, Mr. Bennett paid us a bonus of 5c a bushel in the face of the strongest opposition from financial and other Eastern interests.

In the attempt to regain markets that had been lost prior to his accession to office, he did cancel trade treaties negotiated by Mr. King, and insisted that such new treaties as the Nations concerned might be open to consider, be based primarily on the acceptance by them of the natural products of Canada. Great Britain came first and in return for concessions granted their manufactured products in Canada, they in turn imposed a tariff against foreign grains, cattle and hogs, and continued ours duty free. He has since negotiated new trade treaties with the principle consuming countries of Europe, and in each of these treaties the same principle has been dominant. We receive free or more favorable entry into the country concerned for certain of our natural products, and give in return, free or more favorable admission to manufactured products of theirs. This is in line with the trade policy proclaimed by Mr. Bennett before he assumed office. It is a trade policy of which you or any other producer must approve. And it is one of the reasons why I come before you now.

In respect to Debt: Let me refer to the Farmers' Creditors Arrangement Act, passed by the Bennet Government and administered here in Vegreville by Bert Fraser:-

By reason of this Act, farmers in the Vegreville District with a total debt of $1,274,100.00 had prior to June 30th, 1935, submitted their affairs to Mr. Fraser for review, and without court procedure or expense to the farmer, a reduction was effected totalling $329,097.00 and this does not include further reductions granted by the Board of Review. In other words, without legal or court expenses, deserving farmers of this district have enjoyed thus far a debt reduction of 25 per cent. It is part of Mr. Bennett's plan to enlarge the scope of this Act to include Retailers and others who find themselves in similar difficulties.

The Marketing Act, The Farm Loan Act, The House Construction Act and others designed to improve conditions of the farming and small merchant and business man, all testify to the terrific energy and sincerity of Mr. Bennett, who, we must remember, has ever since assuming office, been confronted with one world crisis following on another, and each having an inevitable and tragic effect on the domestic affairs of Canada.

The last of the plans of Mr. Bennett to which I am going to refer is Old Age Pensions. During the first year of office, he assumed on behalf of the Dominion Government, 75 per cent of the cost in this respect, and relieved the provinces of the burden formerly borne by them, proportionately. Today, realizing that in this machine age, full time employment may never again be found for all the peoples of this or any other country, he proposes, by reducing the qualifying limit to 60 or 65 years, and by increasing the pension to the extent necessary, to enable such of those workers as wish to retire to do so and thereby make room in the economic life of the country for the young men and women who otherwise may not find a place.

Referring to Social Credit: From the Public Platform or elsewhere, I have at no time criticized or adopted an unsympathetic attitude towards this movement. So far, I am not convinced that it will work. But I sincerely hope it does. And I pledge myself to this: That if elected I will use my every effort with the Federal Government to ensure that the Alberta Social Credit Government receives every opportunity to test out its plans. And let me remind you that on his recent return from Ottawa, Mr. Aberhart commented on the reasonable and sympathetic attitude of Mr. Bennett.

Again let me refer to agriculture and but to quote from a recent utterance of Henry Wise Wood, former President of the United Farmers of Alberta, in referring to the record of the Bennett Government in this connection.

"The stabilization operations which have consistently upheld wheat prices during the past four years may turn out profitably for the nation and they may not. In any event, it should be remembered that the wheat growers of Canada have received hundreds of millions of dollars they otherwise would not have received and that this money has been kept in circulation and has benefitted every legitimate industry in Canada, and it is a safe assumption that the policy has brought to Canada more money for wheat exported than would otherwise have been the case, so that regardless of whether the books may ultimately balance, Canada as a nation has benefitted tremendously.

"It is a generally recognized fact that our agricultural problem and especially our wheat problem, is one with which we cannot adequately deal in an insular national way. The only solution lies in international co-operation. It is apparent that our Government has recognized that basic fact and has taken an aggressive attitude in the promotion of International Conferences and in the fostering of international co-operation in supplying the wheat requirements of importing countries.

"The problem of debt has been a pressing one. It could not be otherwise when the prices of agricultural products have remained at such low levels. The Farmers' Creditors Arrangement Act, passed at the last session of the House of Commons, and the revision of the Farm Loans Act, are both calculated to aid in the restoration of agriculture. They have found favour in the minds of large numbers of farmers who, through such legislation, are finding refuge from bankruptcy proceedings, and who in the hour of their greatest need are finding it possible to keep their homes together.

"The principles of the Natural Products Marketing Act, which was also passed at the last session of the House of Commons, are in line with the ideas held by the organized farmers of Western Canada for many years and constitute a long step in the direction of a planned economy for agri-

"The Prime Minister is a Western man. He has gone a long way in endeavoring to aid and restore the industry of agriculture in this country."

In closing, let me suggest that a vote for any other than a Bennett Candidate, is a vote against the measures of which Mr. Wood so warmly approves.

The time is too short to permit me to cover the Constituency as I would have liked. But I will be holding meetings in all of the more central points and hope to meet you all.

Yours truly,
JIM HOLDEN.

Political Advertising.

LOCAL AND PERSONAL

We are given to understand that arrangements have been made whereby the Variety Theatre will on Saturday night be used for two political meetings. The first will be a Conservative meeting and will run from 8.30 sharp to 10:00 p.m. The second will be a social credit meeting and will commence at 10:00 p.m. The federal candidates for both parties will be on hand to give addresses and will be well supported by other speakers.

Rev. and Mrs. Wallis returned home on Thursday afternoon after a honeymoon trip spent at Pacific Coast Points.

Mr. and Mrs. Bert Swift who have been visiting friends and relatives in town for a short time left for Calgary on Wednesday.

Mr. and Mrs. Bert Calvert and Miss L. Ross visited the city on Wednesday.

Miss Margaret Lindsay, teacher at the Ketchamoot school, spent the week end with her sister Anne, here.

Mr. Ray Coutts spent the week end in the city.

Miss Mann, teacher at the McKenzie school, attended the funeral of her brother, victim of a shooting accident. Miss Jean McLeod of Tofield, is teaching in her place.

Miss Lois Thompson is spending a week at her home here.

Jack Smith, Max Rogers and Harlan Thompson left for the city where they will attend university.

Miss Marie Scott and Miss Inga Sefrud visited the city last week.

Mrs. Ellis, Jean and Raymond, of Edmonton visited Mrs. Malcolm on Sunday.

Mr. R. Blair, who has been working at the Tofield Creamery for the summer left for his home in Edmonton on Tuesday.

A number of members of the Tofield Eastern Star attended a meeting in the city on Tuesday.

Mr. and Mrs. Jack Cookson spent a few days at the George Cookson

Mr. Chapman sr. is visiting in the city.

Mr. and Mrs. Myrers of Edmonton visited at the V. Moss home.

Frank Wood, who is working at Viking visited here on Sunday.

Mr. Glover has resumed his duties after a short vacation.

Mr. Joseph Rogers, who has been visiting relatives in Grannum, Alberta, returned home last week.

On Friday evening a number of Jack Cookson's old friends gathered at his home to extend their good wishes for a happy future for Jack and his bride. A social evening was spent and a delicious lunch was served by Mrs. Cookson. After lunch the young people enjoyed dancing after which they departed, all expressing thanks to Mrs. Cookson for a pleasant evening.

Mr. and Mrs. W. L. Forman had as their guests on Sunday, the former's sister, Mrs. Walter Hilk of Luscar and Mr. and Mrs. W. N. Forman of Edmonton with other members of the family. The occasion was in celebration of Mr. Forman's birthday.

Mr. and Mrs. Everette Chevraux and little daughter of Killam spent the week end with Mr. and Mrs. Forman.

STRAWBERRIES AND CREAM OCTOBER 1st — NO FOOLIN'

In one of Grimm's fairy tales there is a story in which a cruel guardian sends her child out to pick strawberriels in the depth of winter—a seemingly impossible task. We cannot exactly call the cruel guarian's bluff, but can come fairly close to it. On October 1st, several well ripened and good sized strawberries, with an extra large one was brought to the office. They had been picked the same day from the garden of Mr. and Mrs. J. W. Chapman. Judging from the ripeness and appearance of these berries, one would hardly believe frost had occurred in the district.

CABBAGE RECORD

HALIFAX, Oct. 2.—A cabbage with seven heads—six full sized and one smaller—is on display at the Nova Scotia exhibition. Art Trask, of Coxheath, Cape Breton, the exhibitor is claiming a record of some sort.

EXPLANATION OF WHEAT BOARD OPERATIONS

Wheat growers should not confuse the operations of the Canadian Wheat Board with the stabilization operations conducted by John I. McFarland over the past few years. It will be clearly understood that there is no "peg" on prices on the Winnipeg grain Exchange this year as was the case last year. Prices may go up and down without the interference from the Wheat Board. The Board, however, stands ready to pay [illegible] price of [illegible] bushel, basis [illegible] at the terminal at any [illegible]. The board will then dispose of wheat delivered to it over the [illegible] year. When its operations [illegible] year are completed it will [illegible] any further sums realized [illegible] the sale of wheat over and [illegible] the initial payment to those who have delivered wheat to it, provided the disposal of the wheat yields additional sums. — Alberta Pool Budget

THIN DIME HIS REWARD FOR $39,000

ST. LOUIS, Oct. 2—For returning a $39,000 bank cheque he had [illegible] Woody Robinson, 16-year-old [illegible] boy, received a dime [illegible] Tuesday from David Woods of Gartswold Park. The messenger gave [illegible] dime to charity.

Destiny

[illegible] H. W. Cunningham, now [illegible] duty in Honolulu, tells a yarn [illegible] a hard-boiled [illegible] who was [illegible] a bunch of young recruits. "Don't forget that the army is just [illegible] family," he said. "And that each one of you there is the making of an unknown soldier." —American Legion Monthly

ONE EACH IN WORLD SERIES BASEBALL

The claws of the scrappy Chicago [illegible] drew first blood in the 1935 [illegible] series [illegible] day as Lonnie Warneke [illegible] shut out the [illegible] Tigers [illegible] The Cubs [illegible] four hits as he equalled [illegible] world series record with eight [illegible] Arkansas duel with [illegible] (Schoolboy) Rowe.

In the second game of the series [illegible] on Thursday, the Tigers turned the tables by beating the Cubs 8 to 3.

The linen industry of the United Kingdom is almost entirely confined to Scotland and Northern Ireland. In the opinion of members of the Scottish linen trade who have a knowledge of Canadian flax, the latter is especially suitable for the dry spun yarn produced and woven in Scotland.

ISSUE MORE CURRENCY IS STEVENS CRY

OWEN SOUND, Oct. Oct. 2.—Hon. H. H. Stevens Reconstruction Party leader, addressing a grey north audience here last night declared he would start the wheels of constructive activity moving in Canada with the aid of increased note issue.

In explaining the basis on which this would be accomplished he said, Canada holds gold to the approximate value of $90,000,000. Under the international definition of sound currency Canada is entitled to issue notes to four times the value of that gold. Also year after year, there is mined and sent out of Canada new gold. A part of this might be retained in the Dominion as a basis for further note issue.

"It is suggested I propose to turn on the printing presses and issue unlimited notes," he said. "I have never said anything of the kind."

But Canada's idlemen "who were beaten into subjection at Regina" could be put to work at fair wages, by issuing notes on a perfectly legal basis.

He was telling his aunt why the autoist was being questioned by the policeman.

"That fellow has been jumping traffic lights," he said.

"Extraordinary!" she remarked. "He doesn't look a bit like an athlete."—Nashville Tennessean.

A three-year-old who had always lived in the country was having her first glimpse of a busy bay, where many ferryboats were plying back and forth. "Oh!" cried the tot in amazement. "See all the streetcars taking their baths!

Double Header Political Meeting Held Saturday

CONSERVATIVE and SOCIAL CREDIT SHARE HALL FOR EVENING

On Saturday evening last a Conservative meeting and a Social Credit meeting was held in the Variety Theatre. The Conservatives took the hall from 8:30 to 10:00 and the Social Creditors from 10:00 unwards. Due no doubt to the busy season, neither meeting was very well attended.

Mr. E. Seale was chairman of the Conservative meeting and introduced the first speaker, Mr. T. White of Holden. Mr. White said he felt out of place in a Tory meeting, but he had known the candidate Mr. Holden for many years and held him in such high regard that when requested to speak on his behalf, he gladly assented. He urged his listeners to vote for the principles of democracy and especially to investigate the record of Mr. T. Holden.

Mr. Jos. Adair of Edmonton was the next speaker and he too, spoke very highly of Mr. Holden's past record as former member of the legislature and many times mayor of Vegreville. He said the voter was now presented with something like a crossword puzzle, but if his listeners would trace the parliamentary history of Canada since confederation, they would find that the legislation of the last Conservative government was of a high order. He was not present to say anything against anybody, but he was convinced that the Conservative government under the leadership of Mr. R. B. Bennett, had done very well in view of the great difficulties to be overcome. He felt that the immediate future of Canada could well be left in Conservative hands under Mr. Bennett's leadership. He mentioned the 5 cent wheat bonus, Farm Creditors Act, the Central Bank and concluded with the statement that the present time is one for economic searching and in matters of trade the Bennett government with enormous odds against them, had done very well for Western Canada.

Mr. Holden said he would have liked to have seen a larger meeting but he realized that this was a very busy time. He was not a hide-bound Tory, but he was a Bennett man. He had been associated with him in the Alberta legislature many years ago, and had watched his career with pleasure and pride. Mr. Bennett in the speakers opinion is all wool and TWO yards wide. Canada is a hard country to govern, the East wants one thing and the West another, so a compromise must be made. Under existing regulations the candidates are called on to appoint the deputy returning officer and while he knew Mr. Joseph Rogers was a loyal Liberal, he felt quite safe in appointing him as he knew he would get a square deal. He mentioned the Communist movement in the north part of the constituency and said the danger of communism was very real. He asked for their vote and support and urged those present to stand by Mr. Bennett, the man who stood for Canada.

The Social Credit party then took over the meeting there being but a slight change in the audience.

Mr. Edwards commenced the meeting saying that Mrs. Burnett would act as chairman, which she did. The chairman suitably introduced the speaker, the Social Credit Candidate, Mr. Hayhurst, who gave a very thoughtful and interesting address.

Mr. Hayhurst gave an analysis of Social Credit, and gave as good a Social Credit address as has been given in the Variety Theatre. He spoke of Social Credit as being based on five basic principles, taking them one by one and elaborating upon them, ending with a summary of them all. These principles, he said, were: 1, government control of money; 2, that credit be based upon the real wealth of the country; 3, the just price; 4, national dividends; 5, citizenship should be given to all with a deeper sense of leisure.

He cited the now famous statement attributed to a famous financier "Those who control the credit of a country controls its destiny." Social Credit in its present form was originated by Major Douglas, but the idea went farther back than that. In 1919, only 2 men knew of Social Credit, now 20,000,000 are interested in it. The first great principle is the control of credit. The nation itself should be boss in its own house. Credit should not be controlled by finances. The wealth of the country is goods, real estate etc., we have out lived the gold standard. Currency instead of being based on gold will be backed by goods in the new economic era. There will be no inflation or deflation except as we may produce more goods and thus become richer. Social Credit would relieve men from drudgery. Speaking of the dividend he said the principle of Social Credit must contain the national dividend. The machine and science were continually eliminating men from labor and the dividend was one form of our cultural heritage. The Just Price, he said would do away with exploitation.

At the conclusion of Mr. Hayhurst's address, the meeting closed with the National Anthem.

MR. J. B. HOLDEN
Conservative candidate for the Vegreville constituency.

Town Council

A regular meeting of the town council was held on Monday evening September 30th, there being present Mayor Brace, Councillors Chapman, Hammond, Swift, Bellamy, and Lovell. The minutes of the preceding regular meeting were read and adopted. A few accounts were ordered paid.

A Communication from the second largest holder of Town of Tofield bonds was read, expressing willingness to cooperate with other bond holders in studying the matter of the town's request for a reduction in the rate of interest on its bonds.

A letter from the Board of Public Utility Commissioners approving of the town securing a bank loan in the amount of $1500.00 was read. A By-Law was given three readings, and passed by a unanimous vote, authorising the borrowing of this sum.

A further letter from the Board was read, dealing with the matter of a resolution passed by the council at a previous meeting, asking the Board's assistance in negotiating with the bondholders for a reduction in the interest rate. The letter from the Board requested the Town to submit comprehensive information regarding the town, its assessment structure, population, etc., covering the period from the time the debentures were issued until the present. Secretary was instructed to secure this information, and if necessary secure help in doing so.

The matter of buildings, fire restrictions etc., were again considered, and the northerly half of blocks 14 and 16 were removed from the fire limits. This is the property lying to the north of the telephone office on one side of the street, and to the north of the W.I. building on the other side.

Dr. Law, who was present intimated that he would probably build an office in this area, the building to be of stucco finish with ashphalt shingles.

Council declined to take any action in removing the present restrictions from the area recently burned.

LOCAL AND PERSONAL

Mr. Moen visited the city on Sunday.

Mr. Burroughs of the Crown Lumber Company spent the week end in Stettler.

Mrs. Pettit of Alix, president of the Rebecca Assembly of Alberta, spent Tuesday and Wednesday at the Lovell home. She paid her official visit to the Ryley lodge on Tuesday.

Among those who visited the city last week are: Mrs. Jobb and Thelma, Margaret Whyte, Blake Clutterham, Mrs. Brace and Mrs. Calvert.

On Monday evening the Eastern Star Chapter pleasantly surprised Mrs. Wallis at her home. The Star presented her with a lovely gift, and at the same time took the opportunity to present Mrs. John Lee with a farewell gift. Mr. and Mrs. John Lee are leaving Friday for the city where they will make their home.

The Misses Anne and Margaret Lindsay and Winnie Warton spent Sunday at the Lindsay home in Innisfree.

Dr. and Mrs. Messenger spent the week end in town.

Miss Annie Chopra of the hotel staff visited her people in Holden last week.

Mr. and Mrs. Coatta and Doris spent the week end in the city.

Miss Marjorie James of Magrath visited Lois Thompson over the week end.

We regret to report that Mr. Broughton, teacher of grades 7 and 8, is ill with a bad attack of the flu. Miss A. Swift is taking his place at school.

Mr. Stan Grover, former employee of McLaughlin's garage, left Wednesday night for Edmonton, where we understand he has a position.

Mr. and Mrs. M. McHeffey of Edmonton visited town one day last week.

Helen Schultz is visiting Mrs. McConnell for a few days.

Dr. Law is building a new office next to the Telephone Office. The McSporan Bros. are doing the building.

Extra efficiency in the way of raising carrots seem to be the rule this year. Mr. Janet took from his garden a carrot with no less than seven well formed carrots on one stalk. If one could be sure of them all coming this way, the crop would be increased seven fold.

While Bill Roberge was bringing a truck loaded with wheat to the elevator from his farm north of town, the right hind wheel came off. The accident happened just west of the Tofield school on Thursday. Fortunately Bill was not hurt and no great amount of damage was done.

KETCHAMOOT

The hum of threshing machines is heard on all sides with ideal weather, the grain is being put through very fast and is turning out as well as expected, not very good owing to the early frost and continued wet cold weather, but we have lots to be thankful for yet. Six or more machines are running in our neighborhood, those belong to Mr. Wm. Lee, Mr. Harrison, Mr. O. Barnes, Henry McGinitie, Fred Sutton, Tom Schultz and Martin Hagen.

Mr. Ratigan sr. celebrated his [illegible] birthday at his home on Monday September 23, with the family being present. These were Mr. and Mrs. J. H. Ingram, Mr. and Mrs. Brick, and sons, Ed and Frank Ratigan and Mr. and Mrs. T. D. Ferguson.

Mr. and Mrs. Frank Shupe and daughter, who have been residing on the Ralph Barnes farm the past two years moved into the Noland house in the Landbrook district near their own farm.

Miss Edna Campbell, nurse at the University hospital visited with her parents for a few days last week.

In mentioning the little tots starting to to school this fall, we are very sorry we overlooked little Miss Doris McGinitie, making six little girls instead of five and one boy.

Miss Beatrice Daley returned to Edmonton a week ago Saturday after visiting a week with her cousin Miss Ethel Coombes. Miss Daley is attending normal in the city.

Mr. Chas. Whillans received the sad news of the death of an uncle at Biggar, Sask. Interment took place in an Edmonton cemetary.

A pleasant afternoon was spent at the C. A. Ingram home on Wednesday of last week when Mrs. Ingram entertained the Ladies' Aid. In spite of the busy time a goodly number was present. In the absence of both President and Vice-president, Mrs. McCowan and Mrs. Whillans, Mrs. Carlisle was elected to conduct the meeting. Instead of a Thanksgiving supper a [illegible] offering will be payed by the members and any one else interested in the church work will be gladly accepted. A delicious lunch was served by the hostess. Visitors present were Mr. and Mrs. Allan, Mrs. Swift, [illegible] and G. Hosler of Tofield, Mrs. M. McConnell of Lakeshore, [illegible] McMullen, Mrs. Wm. Lee, [illegible] Coombes, Mrs. Peter Lee, Mrs. J. Lee and Miss Irma Shupe.

The Misses Mildred Ingram, Beatrice Daley, Ethel Coombes and Mrs. [illegible] Ingram were guests of Miss Hazel Scott Friday afternoon of last week.

Miss [illegible] Lee has been home from Mundare the past week helping over the [illegible] period.

World Wheat Situation Improves
World's burdensome wheat surplus has practically disappeared. World's available supplies [illegible] closer to world's requirements than in [illegible] year since 1928. Rust in Canada and the U.S.A., drought in Argentina and Australia have brought about this situation [illegible] rise in price. Fear of war also is tending to increase price. Other price making factors are the amounts Russia and European countries will offer for sale. The purchasing power of the wheat importing countries as well will have an influence. In any case the situation from the viewpoint of the producer has greatly improved.
SEARLE GRAIN COMPANY, LIMITED, WINNIPEG

APPRECIATION—

By Raymond Crawford in the Canadian National Railways Magazine

A MILD controversy is now being carried on in the press regarding the day of the week on which Thanksgiving should be observed, some advocating Monday and others Thursday; but the question underlying the dispute seems to be, which day will be more advantageous as a holiday. Whether it is merely this, or more in accord with its original character as introduced by the people of the United States and adopted by us, it is at least a breathing space in the [illegible] when we can sit down and try to estimate our possessions, and the extent of the heritage into which we have come.

Taking things for granted is a common experience. Through sheer mental inertia, more often through thoughtless indifference, we seldom stop to consider what we have, the value of what we have and the long, oft painful way by which these things have become ours. A great man once said, "If the sun should appear once every two hundred years, how men would long for his coming." In the same way it requires reflection and the rare quality of imagination to estimate our wealth of body, mind and material assets, and above all the vast wealth of varied opportunity which we have in this unique land.

We can pass by, with little more than mention, our natural resources, and a climate which ministers to strong bodies, and virile mentality. As one of our Govenors-General once said, the air of this country is like champagne. In these golden October days, one is reminded of that naive and delightful writer—George Borrow. In "Lavengro" he tells of a colloquy between himself and—Jasper a gipsy—lover of the open spaces. Life is sweet, brother, said the gipsy. Do you think so? Think so! there's night and day, brother, both sweet things; sun, moon and stars, brother, all sweet things; there's likewise a wind on the heath. Life is sweet, brother, a Romany Chal would wish to live forever. In sickness, Jasper? There's the sun and the stars, brother. In blindness, Jasper? There's the wind on the heath, brother. If I could only feel that I would gladly live for ever. Commonplace though it be to most, we **could profitably remind ourselves of our climate.**

At this season our thought and speech will be concerned mainly with our material wealth, the product of field and forest, mine and factory; but there are other things which are ours and which cannot be calculated in any array of figures. The economist rarely takes them into consideration. They are our intangible assets—those things which give to tangibilities their worth and significance. We may mention a few: First of all there is our place in the great commonwealth of nations—The British Empire, the most beneficent moral force that the world has known, under whose aegis we have these two inestimable blessings, liberty and security; for, with wonderful magnanimity, the mother allows her daughters to do as they please, regarding them as adult and expecting nothing save voluntary assistance in times of crisis. **We can remind ourselves of this also.** There is another thing which will merit consideration, namely, our free institutions. From the days of long ago when a despot gritted his teeth and signed on the dotted line to this year of grace we have lived under a form of government, when increasingly, the average man had something to say regarding that government. If some would-be revolutionists—happily more vocal than numerous—could betake themselves in imagination, or better still, in person to some other and older lands, their perfervid and ignorant eloquence might receive a check; but the revolutionist has little capacity for imagination, much less for gratitude. **We might think of this aspect of our life.**

Another very important consideration, and one worthy of notice, is our geographical position. We are part of a continent far removed from scenes of possible international strife, and are on terms of amity with a peaceful and powerful neighbor, with whom we have much in common. Lately Lloyd's wagered 500 to 1 that no foe would invade the United States. We presume that Canada would fall within that estimate. The Caliban shape of war is not likely to tumble across our thresholds, with all the unspeakable and unthinkable horrors which modern warfare would bring. **We can give some thought to this.** Our economic position is one which should give reason for satisfaction. The depression has been a sore trial, but we are emerging from it, steadily, normally, without any revolutionary changes. Unemployment is decreasing, business is improving. Patience and sane perseverance will do for us all that is necessary. **This, too, can be added to our list of benefits.**

We are grateful for our heritage of mind, for our system of education which ensures even to the poorest child the chance to rise above illiteracy and ignorance in a world where two-thirds of its population can neither read nor write. We are grateful for the moral tone of our people, because Canada stands high in that quality without which no nation can hope to prosper or even endure.

He is a good man, said George Eliot, who can receive a gift well, and most of our possessions are gifts. Some, indeed, we have worked for and won by our own skill or initiative, but even here our environment was a large factor in our success; others we have inherited and enjoy in common with our fellows. We did not gain them, we did not purchase them; they came to us without money and without price. Others sowed and we reap; others labored and we benefit. And so considering this land, geographically, naturally, economically, socially, we might well consider at this time whether we haven't reason for satisfaction if not for appreciation.

JUNIOR FIELD CROP COMPETITION RESULTS

Tofield Third in Flax

Wheat championship of the province in the field crop competitions for the junior grain clubs of the province was won this year by the Drumheller club, which takes the provincial department of agriculture trophy. The cup last year was won by the St. Bride's club, in northeastern Alberta, which club came in [illegible] year. Northern Valley Club, [illegible] won third place.

[illegible] the field competition [illegible] went to the St. Bride's club, [illegible] club second and Hayter [illegible] third. The St. Bride's [illegible] cup for the second year in succession.

Barley club trophy went to the Grande Prairie Club, with Barrhead and [illegible] second and third place respectively.

[illegible] was highest in the [illegible] and Hayter led the flax [illegible] Bow Island second [illegible] third.

Results [illegible] were issued this week from the department. The plots [illegible] of five acres each of registered or certified seed, grown under the direction of the district agriculturist. Each member was required to supervise his own plot and [illegible] necessary care to keep the seed clean and free from mixing with other varieties grown on the same farm.

There are 131 clubs with a total of 1835 members. The wheat clubs are supported by the Alberta Wheat pool, the oats clubs by the United Grain Growers, and the barley clubs by the Calgary Malting Co., and the flax clubs by the Alberta Linseed Oil Company.

Some of the individual scores were unusually high this year, indicating keen interest by the club members in their work. Dmyntro Stetsko of Northern Valley club and Allan Edwards of the St. Bride's club, tied for first place in the wheat club with scores of 94. Joe McLaughlin and Michael Quinn, of St. Bride's club, topped the oats club contest with scores of 96 and 95 respectively. In the barley, Arthur Teague, of Wasatenau, and Arthur Satler, of Wood Glen, had the best plots. Wm. Murray of Huxley was high in individual potato plots, and D. George of Tofield was first in flax.

Seed fairs for the clubs will take place in November. Each member is required to prepare for exhibition one-half bushel of seed from his plot and exhibit it at the local seed fair.

CANADIAN WINS GOLD BADGE FOR PISTOL SHOOTING

ROME, Italy, October 7.—(Special Cable)—The brilliant shooting of Constable R. G. Pickrell, of the Canadian National Railways Police department, Winnipeg, brought high honor to Canada here a few days ago in the Olympic Pistol Shooting championships when he was among twenty-one who tied for first place with possibles. His performance was all the more noteworthy when it is noted that three thousand marksmen took [illegible] the competition.

The final shoot-off was a keen [illegible] to the skillful Canadian, as he was unfortunate [illegible] The shoot-off called [illegible] four seconds. Pickrell, however, [illegible] in the world [illegible]

In the Match Tirear competition which called for sixty shots at fifty metres Pickrell qualified easily with eleven points to spare and gained a handsome gold badge.

HAPPY REUNION AT WINNIPEG

WINNIPEG, Man., October 7.—"Are [illegible] my daddy [illegible] and my [illegible]" [illegible] a little girl at the Canadian National Railways station [illegible] a strange man and woman she was directed to the other day. Her answer was an embrace and tears of joy from each as they saw their child for the first time in eight years.

The parents came to Chatfield, [illegible] farm eight years ago [illegible] left their little girl, Myroslavia, with her grandmother in Tarnapol [illegible] until they had a home for [illegible] and could send the money for her [illegible]

[illegible] the Tsa family was enjoying [illegible] happy reunion another little [illegible] travelled with Myroslavia [illegible] Lithuania, stood by. [illegible] Her parents are dead [illegible] her way to Sterling, Alta., [illegible] her uncle, Nick Latuk, lives. He has sent for her and is going to [illegible] after her. But she has never [illegible] homes she will like [illegible] in Canada. She and [illegible] from Poland became [illegible] friends and were company for each other although they could not understand each other's language.

LONG DISTANCE RAILWAY EXCURSION

WINNIPEG, Man., October 7.—According to a statement issued a few days ago by Jas. B. Parker, secretary of the Canadian Passenger Association, Western Lines, the Canadian National and Canadian Pacific railways will again put into effect winter excursions. These excursions will be along somewhat similar lines to last year, and the fares will be effective both in Eastern Canada and the Pacific Coast, in addition to [illegible] points in the United States. These special fares will bear no restrictions as to sleeping car accomodation.

[illegible] limit on these tickets is [illegible] lengthy, particularly for those going overseas, and will afford an excellent opportunity to those who desire to visit their friends and travel at minimum cost.

"It is anticipated that a large number will take advantage of this opportunity," said Mr. Parker, "and the railways will do everything possible to meet the wishes of the travelling public. Full particulars of the arrangements will be advertised by the railways in due time."

B.C. WOMAN AWARDED LIFEBOAT CERTIFICATE

VANCOUVER, B.C., October 7.—One more exclusive province of the male has been invaded by the gentler sex. Mrs. Hilda Pubbrover, stewardess on the Canadian National Steamships liner, S.S. Prince Rupert, has been awarded a Lifeboat Certificate after passing the Federal government examinations in connection with the Safety of Life at Sea requirements.

Requirements call for rowing a [illegible] knowledge of its rigging and [illegible] sailing and steering the [illegible] and lowering it to the water. [illegible] ladder was negotiated by the stewardess equally as well as by the seamen. After the examinations Captain J. A. Lindsay, the examiner, commended her on her ability.

[illegible] from disgruntled the crew [illegible] in the general round of congratulations since Mrs. Pubbrover is the first woman on the west coast, and perhaps in Canada, to qualify for a certificate. She has been with Canadian National Steamships five years on the Alaska run, is the mother of two children and a highly popular and respected employee of the line.

WORLD WHEAT SURVEY

The Canadian wheat board may be said to appear to possess a potential control of world wheat trade and prices never before exercised by a government organization in times of peace. Upon its future policy the developments in world trade, and distribution of year-end stocks depend heavily.

The statement contained in the above paragraph is made in the September World Wheat Survey and Outlook, issued by the Food Research Bureau of Stanford University, California, recognized as authoritative throughout the world. The author is Mr. M. K. Bennett, advised and assisted by Joseph S. Davis and Alonzo E. Taylor.

The Survey traces events from early spring when there was a promise (or threat) of a huge world wheat crop. With dramatic suddenness the situation changed. Damage to the extent of hundreds of millions of bushels developed from the most devastating rust infestation North America has ever known, from drouth and frost in Canada, and from drouth in the Southern Hemisphere.

The Survey opines that the international wheat trade will require 560 million bushels in the current crop year (Broomhall's estimate is 540 million), that Canada will supply 270 million bushels of this requirement; and that the world wheat carryover will be down to 625 million bushels by the end of the crop year, July 31, 1936. This world carryover, if the estimate is realized, will be the smallest since 1926.

The Survey estimates Canada has 4[illegible] million bushels of wheat on hand (carryover and new crop) of which 381 is available for export. Exportation of 270 million bushels will cut the carryover to 110 million bushels (203 on August 1, 1935). It is also mentioned that United States will likely import 30 million bushels of wheat from Canada.

Taking due cognizance of the drouth in Argentina the Survey believes a crop of 140 million bushels will likely be harvested there, the smallest since 1916, and 100 millions less than last year. This would give that country an exportable surplus of only 67 million bushels. Australia's crop is tentatively estimated at 135 million bushels with 112 available for export.

Curiosities of Norway

By Sydney A. Clark in The Christian Science Monitor

Norway is strangely versatile in its appeal and one of the oddest things about the country is its extraordinary position in the world of letters and music. With a total population about the same as that of Philadelphia and having to contend with Mother Nature in a mood so stern and unsympathetic that only two and a half per cent of the soil is arable, this nation of the far north has yet managed to lift itself to a position of world importance in two great branches of art. Think of Ibsen, Bjornson, Sigrid Undset and Knut Hamsun in literature. Think of Edvard Grieg, Ole Bull, Rikard Nordraak in music. Then by way of comparison, though not intentionally invidious, see how many Hollanders, Belgians, Swiss you can name, offhand, who have achieved world fame in literature or music. These nations have two or three times the population of Norway, yet the Norwegian nation, by some strange inner urge, has far outdistanced them all.

In dramatic achievement also, Norway has gone far beyond what any outside observer would have thought possible. The "National Stage," founded in 1850 by Ole Bull and later ardently sponsored by Ibsen and by the two Bjornsons, father and son, produced a galaxy of great actors who would have won world fame had their medium been English or French instead of the Norsk tongue, which was and remains "Greek" to the world at large.

To turn to a very different aspect of Norway, it is a sheer freak of geological formation that makes this country possible at all as the home of a civilized race. I refer to the submarine "edge" which surrounds almost the whole of Norway's coast line at an average depth of about two hundred fathoms. This edge or shelf permits the warm water from the Gulf of Mexico to enjoy a monopoly in business of filling Norways fjords. It resolutely keeps out the icy polar current which runs at a greater depth trying unsuccessfully to get over the shelf and reach this fjord or that with its cruel influence. In effect Norway is thus provided with a Brobdingnagian hot-water heating system. There are some twenty vast warm baths, and dozens of minor ones, planted at suitable intervals.

Some of the fjords run inland more than a hundred miles and are extremely deep. The Sogne, for instance, is nearly a mile in depth, yet it is filled entirely with warm surface water. Six million cubic yards of heated water reach Norway's coast every second. They replenish its bath tubs making the latitudes of Baffin's Bay and the Yukon not only endurable but actually mild, even in January.

The Maelstrom of Norway, geographically speaking, is a surprise of another stripe, for it amounts to almost nothing. It is a current washing the southern tip of the Lofoden Islands so gently that even small sailboats scarcely notice it. Its chief function is to give us a laugh at Thomas Campbell, who pictured the Maelstrom as a wicked marine millrace:

where loud Lofoden
Whirls to death the roaring whale.

There exists, however, a phenomenon remotely similar to the legendary Maelstrom in that very violent tidal current called Saltstrom, whose task is to fill and empty the thirty-mile Skjerstadfjord twice daily.

In architecture Norway offers a prime curiosity in its Stavkirker or timber churches. They appear to have been built in the honor of some dragon. Yet they were built as houses of Christian worship in the Viking age which understood but dimly what the new religion meant. Some twenty of these ancient dragon churches still exist in various valleys and they are fascinating in their testimony regarding a primitive age. The worshipers must have knelt in almost total darkness while the priests sang mass in the candle-lighted choir.

In the animal kingdom Norway possess one of the most curious beasts imaginable, the little lemming, a sort of mole which occasionally becomes a national scourge. Just as there are "locust years" in parts of America, so there are "lemming years" in Norway when incredible millions of these little animals appear as if from nowhere. They march in one direction, leaving a track of desolation, for they eat every growing thing.

It often takes days for one of these dreadful armies to pass a given point but in the end the lemmings annihilate themselves for they will not swerve a hair from their chosen direction and sooner or later they inevitably encounter some fjord or lake too wide for them to swim. They plunge in with mad abandon and are drowned "to a lemming."

Many other curiosities in many fields are discoverable in Norway, which is perhaps hardly to be wondered since Norway is itself the greatest curiosity of all, a country salvaged for civilization by a kindly current and by nature's ingenious device for using it.

VERDICT OF MURDER IS INQUEST'S RESULT

LEDUC, Oct. 6.—Verdict of murder against "person or persons unknown" was returned here Friday by a coroner's jury probing the death of Nick Nykiforuk who was killed by a gunshot fired by the murderer outside his farm house on the night of September 23.

Postponed session of the inquest held Friday afternoon in the Star theatre was brief. Constable Stewart, R.C.M.P., gave evidence and Dr. E. A. Braithwaite, chief coroner sent the case to the jury.

Det. Sergt. Tom Symons and Corp. Henry Shandruck, who have been conducting the investigation, had no new evidence to offer to the inquest.

NOVEL EXPERIMENT PROMOTES MILK CONSUMPTION

Dairies in the United States have been using the new transparent straws, made of "Cellophane," in promoting the consumption of milk.

They found that they were particularly appealing to children who were generally fascinated by the sight of the milk passing through the straws and drank more as a result.

"Why don't you like dancing with George?"

"Oh, George is all right; but he won't let his right foot know what his left one is doing!"

BUTTER EXPORT STABILIZATION SCHEME

Further assistance to Canadian dairymen is the aim of Butter Export Stabilization Scheme just officially approved.

Statistics indicate that the stocks of butter in storage on September 1, 1935, were approximately 8,500,000 pounds in excess of the five-year average and as the current production is larger than last year, further increases in the surplus will be the result unless some action is taken.

The purpose of the scheme is to facilitate the export of butter to the United Kingdom, where, at the present time, it appears a favourable market exists. This action is intended to relieve the butter market in Canada and, in so doing, strengthen the price of butter fat sold in milk and cream by dairymen throughout the Dominion.

The scheme provides for the marketing or the regulation of the marketing of butter for export. Agencies may be designated through which the butter is to be marketed. Where necessary, exporters may be compensated for losses incurred through export transactions.

The scheme will be administered by a Local Board consisting of J. F. Singleton, Dairy and Cold Storage Commissioner, Dominion Department of Agriculture, who will be Chairman of the Board; L. D. Wilgress, Director, Commercial Intelligence Service, Dominion Department of Trade and Commerce, and Allan C. Fraser, Ottawa, Secretary-Manager of the National Dairy Council.

No money required!
Under our Flour Exchange System you don't need money. Just bring your wheat to our elevator and take home a load of high grade flour. It costs less.

Taking Your DOLLAR To Market

EVERY year your family, and every family of your acquaintance, spends about 70 per cent. of its income just for living, exclusive of rent—so economic experts tell us. Think what this means—seven dollars out of every ten invested in food, clothing, household utilities and all the multitude of things that keeps a family comfortable and happy.

That part of spending is readily understood. But do you realize that every manufacturer and retailer of these necessities is planning how he can get your dollar?

It's a big job to spend so much money wisely and well. It requires careful business methods to get the best possible returns from each dollar that leaves the family purse.

The clever women goes for help to the advertisements in her local paper. There she finds a directory of buying and selling. She learns about the offerings of merchants and business people. She compares values. She weighs quality and price. She takes this opportunity of judging and selecting almost everything she needs to feed, clothe, amuse, instruct and generally bring up her family.

Do you read the advertisements? You will find them willing and able to serve you in the business of purchase.

HEALTH

by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

APPENDICITIS

The appendix is the most useless and, at the same time, one of the most troublesome parts of the body. It is a slender tube, usually about three inches in length, attached to the large bowel in the lower right side of the abdomen.

Because of its size and structure, the appendix is prone to fall victim to infection by invading germs, which set up an inflamation called appendicitis. The germ may enter from the bowel, or come in the blood stream from distant parts of the body, such as infected tonsils or teeth.

The symptoms of appendicitis are usually definite. The first symtom is pain. Generally sudden and severe, it may be felt over the region of the appendix in the lower right side of the abdomen, but just as often it is in the pit of the stomach, or it may be a general abdominal pain.

A feeling of nausea, with vomiting follows the onset of pain. At this time, there is some fever. Constipation is usual, but occasionally there is a diarrhoea. The severity of the symptoms will vary.

Appendicitis occurs at all ages and in both sexes. It is rare during the first five years of life, but about one-half of all cases occur under twenty years of age.

Recovery from the first attack is the rule. Unfortunately, in some cases the appendix ruptures, the infection spreads and a fatal peritonitis develops; in others, a local abscess forms. For many, the acute attack is the beginning of a chronic condition, with acute relapses.

There is one thing everyone should know. When there is abdominal pain—stomach-ache, colic, or whatever name you call it—do nothing but send for a doctor. Such pains are always a sign of danger. NEVER, NEVER give a laxative to a person, young or old, who has a pain in the abdomen.

The doctor is never called too early. The reason why so many people die from appendicitis is because the doctor is summoned too late and the patient has been given a laxative.

If you must do something for abdominal pain, put on an ice-pack or compresses wrung out of cold water while you are waiting for the doctor, but always remain on the safe side and avoid giving laxatives.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto will be answered personally by letter.

THIRTY-THREE LIVES LOST IN ALBERTA FIRES

During the calendar year 1934, lives of 33 Albertans were claimed by fire, an increase over 1933 when the loss was 30 lives, according to the annual report of Fire Commissioner Henry Brace.

Material damage was done during the year valued at $1,177,370.08, a decrease of $236,212.40 over the previous year.

Mr. Brace reports that investigation showed that 17 of the 33 deaths recorded were due to the improper use of gas or oil in either cleaning clothes or lighting fires.

These lives lost, states Mr. Brace provide a "gruesome reminder of the necessity of caution at all times in an endeavor to prevent losses by fire."

In 1934 there were 132 stores destroyed by fire for a material loss of $201,291.94 as against 146 stores valued at $407,630 in 1933.

Garages destroyed in 1934 totalled 68 valued at $22,637.89.

Factory and warehouse losses were slightly higher than in 1933 and dwellings showed decrease.

In 1934 there were 940 dwellings destroyed with material loss valued at $417,516.24.

Mr. Brace states that school losses in country districts present a serious problem, the majority being of log or frame construction with little or no protection.

The loss of 33 schools valued at $31,482.54 in 1934 compares unfavorably with the previous year when 20 schools were destroyed with a loss of $25,000.

There were inspections of 84 towns with 165 orders for corrective measures.

Probes were conducted of 28 fires of suspicious origin.

THRIFT PLAN

"What are the prices of the seats?" inquired a young lady at the county fair.

"Front seats half a dollar, rear seats a quarter, and programs a nickel," announced the gatekeeper.

"Here's a nickel," said the young lady. "I'll sit on a program."

LOSS TO CROPS IN FROST HEAVY, SURVEY SHOWS

Frost has taken heavy toll of the crops of central and northern Alberta, causing a shrinkage in yields by one-third on wheat and one-quarter on coarse grains since the August 15 frost, according to summarized final estimates by Journal correspondents.

The average of their wheat estimates is 13 bushels, oats 28 bushels, and barley 20 bushels per acre. This is the lowest since 1929.

Through shrinkage in yield and lowering of grade, a cash loss of 45 per cent on wheat and barley has resulted, and 35 per cent on oats. Last estimates compiled by the Journal on August 10, were wheat 21, oats 40 and barley 28.

Grades run low and heavy to feed [illegible]

Seeding this year was unusually late and the fall frost came one week earlier than last year. Some of the later oats escaped serious damage and where not cut hastily for greenfeed through fear of loss filled surprisingly well. Barley suffered severe damage.

The harvest was late, cutting not becoming general until September. October opened with little threshing done, although fine weather now is favorable for continuing work.

Only 30 per cent of the wheat is threshed and 20 per cent of the coarse grains. Correspondents estimate that fully 25 per cent of the grain crop intended as a "cash crop" will not be threshed. Some of it was cut along with the coarse grains sown for greenfeed, and some will not be cut. Outturns of some grain is so poor that threshers are charging $4 to $8 per hour instead of working on a bushelage basis, and this is halting threshing of poorer crops that were cut.

Of 130 points reporting, only 20 have a feed shortage and 15 are also short on hay. Good quality seed is short at 65 points and may have to be shipped into many points by way of relief.

JASPER BEARS TO AMUSE NEW YORKERS

JASPER, Alberta, September 30.—Subsisting on a diet of apples, carrots and bread, two babies, less than a year old, travelling unescorted across the continent, left here recently aboard the eastbound Canadian National Railways train.

The babies, brown and black bear cubs, pets of summer tourists who visited Jasper Park Lodge, are enroute to Central Park zoo in New York. The youngsters are as friendly as kittens, although they appear to be a little perturbed over their change from the freedom of Jasper to the confinement of strongly built cage-crates, railway men said.

GIRLHOOD TO AGE 86 SHE ATTENDS 1 CHURCH ONLY

WINNIPEG, Oct. 7.—Eighty-six years ago a young girl bowed her head in worship when St. Andrew's Anglican church was dedicated on the banks of the Red River.

And Sunday, 86 years after, she was born not far from the same spot Mrs. Jane Falsher again bowed her head with scores of other parishioners as the church celebrated its eighty-sixth anniversary.

Mrs. Falsher—"Granny" to all the folk who know her—was born the year Queen Victoria ascended the throne. She attended the first service in the church and has been an attendant ever since then.

U.S. CLAMPS EMBARGO FOR NEUTRALITY

WASHINGTON, Oct. [illegible]—President Roosevelt issued a proclamation Sunday warning citizens of the United States that they travel on vessels of warring Italy and Ethiopia at their own risk.

This step, designed to guarantee United States neutrality, was authorized by the neutrality law. It reinforced Mr. Roosevelt's proclamation Saturday night clamping an embargo of munition shipments to Italy and Ethiopia and warning Americans that they engaged in "any" transactions with those nations at their "own risk."

Since Ethiopia has no merchant marine, the proclamation for practical purposes applies to Italy only.

His proclamation warning citizens of the country to abstain from travelling on the ships of the two countries marked an unprecedented departure from [illegible] policies of Great War days, when it insisted upon the right of a neutral's citizens and [illegible] to freedom of the seas.

WIT And WISDOM

Some Jump

An Irishman who had been in Alaska told the following story:

"I landed the boat on an island. I went ashore and when I got up to about the middle of the island I met the biggest bear I ever seen in me [illegible]

[illegible] was one tree on the island [illegible] for that tree. The bear [illegible] was a big [illegible] which was [illegible] feet from the ground and [illegible]

[illegible] listening to the story, [illegible] make it?"

The Irishman replied: "I didn't [illegible] going up but I caught [illegible] coming down."—Sport.

Turning the Tables

A man in search of a quiet holiday set out in a small sailing boat, his only equipment consisting of provisions and a wireless set. He sailed serenely for several days, until at last he sighted one of those liners which resemble small towns rather than ships. The appearance of the little boat created excitement on board the liner, which slowed down.

The captain was wondering whether it was a matter of going to the rescue when the little boat's owner moved to his transmitter and tapped out the message "Is there anything I can do for you?"—London Observer.

RAPS INTERFERENCE IN BUSINESS WORLD

Government interference in private business was rapped by A. E. Phipps of Toronto, general manager of the Imperial Bank of Canada, who arrived in Edmonton [illegible] morning from Calgary. He was accompanied by G. D. Ritchie of Winnipeg, [illegible].

"[illegible] business and finance [illegible] confused by [illegible] and government interference [illegible] Mr. Phipps "that the [illegible] naturally be [illegible] and enterprise [illegible] money are [illegible]."

[illegible] a deposition [illegible] parties [illegible] campaign [illegible] are slow [illegible] won't make [illegible] The [illegible] loans and [illegible]

[illegible] large part [illegible] accounts [illegible] make any [illegible] finances [illegible]

[illegible] come from [illegible]

[illegible] pork and [illegible] probably had [illegible] the increase [illegible]," he said. [illegible] Apparently [illegible] general improvement [illegible] the prices [illegible]

Mr. Phipps [illegible] the prairie provinces [illegible] better than a year ago [illegible] many [illegible] disappointing [illegible] The [illegible] is better [illegible] the farmers [illegible] their grain and at the same time [illegible] all have plenty of feed. There is a general tendency [illegible] until after the federal election [illegible].

The banker [illegible] offer any definite views on what will become of Canada's wheat surplus.

Mr. Phipps and Mr. Ritchie have been on an inspection trip through the prairie provinces. They leave Saturday night for Saskatoon.

LEAGUE REPORT ON AGGRESSION IS DUE TODAY

GENEVA, Oct. 5.—The League of Nations [illegible] committee early today virtually completed a report on the Italo-Ethiopian quarrel which [illegible] said, contains "a pretty clear picture" of the aggressor [illegible] name him.

After long hours of deliberation, [illegible] recessed shortly after 1:00 a.m. and with [illegible] all finished," prepared [illegible] the finishing touches.

[illegible] and Great Britain's [illegible] Anthony Eden, Minister for League Affairs, [illegible] on a strong [illegible] clearly spotlighting the facts and pointing out [illegible] was [illegible].

It was explained, however, that it was not the function of the committee [illegible] name the aggressor [illegible] the situation [illegible] of Italy and [illegible].

[illegible] nevertheless might easily [illegible] phrased as to leave little doubt as to who the committee believed was the guilty party.

Her Chance

[illegible] I have told you again and [illegible] speak when [illegible] are talking [illegible] wait until they [illegible]

[illegible] that Mammy [illegible] they never [illegible] —[illegible] Guardsman

A Poor But Happy Germany

BRADFORD RUGBY PLAYER'S IMPRESSIONS

Editor's Note: The [illegible] article taken from a Yorkshire, England, newspaper [illegible] The gentleman named [illegible] of Mrs. Malcolm of Tofield, clipping being sent by [illegible] Malcolm [illegible] the British Isles.

Mr. [illegible] Bradford [illegible] just returned from [illegible] Germany [illegible] ed fall back for Bradford [illegible]. He [illegible]

I have [illegible] four [illegible] Germany [illegible]

The first [illegible] entering Germany [illegible] of order and efficiency [illegible] apparent [illegible] The [illegible] and [illegible] admirable.

Trains [illegible] and [illegible] servants [illegible] And yet this order and efficiency does not savour of militarism or of feudalism, but [illegible] and apparently the natural order of things.

The people themselves we found all through Germany are friendly, courteous and helpful. At no time did we see or notice the slightest animosity or feeling against the English, but were met everywhere with courtesy and friendliness.

The people seem happy and contented, although they have [illegible] means very much to make [illegible]. Judged by our own standard they are far from being well off. The rate of pay is only 60 per cent of the rate ruling in our own country per hour worked, but this is not the whole difference. I was in conversation with a German in Heidelberg, a butcher by trade. He said that he was not working that week, but that he had worked 60 hours the week before. This, he went on to say, was the rule that a man should only work for a certain length of time and then stop and let somebody else work.

But the comparative poverty is not apparent to a visitor at any rate, and we saw no signs anywhere of squalor or distress. The German apparently is an adept at the art of making a little go a long way. A remarkable thing—remarkable for a foreign country—was that in all the time we spent in Germany we did not see a single beggar.

But by far the most impressive thing is the youth of Germany. The day of the fat bespectacled German boy and the balloon-like over-eating Fraulein is past. In the evenings can regularly be seen the bands of "Hitler's Youth"—strapping young men in open shirts and shorts—of the B D M (League of German Girls) come swinging into the towns from their [illegible] singing heartily and looking the picture of health and fitness. The bathing beaches and river banks are crowded with sunburned and athletic young men and sturdy bronzed Madchen.

There can be little doubt of Hitler's popularity in Germany. The Swastika is everywhere, even the boys [illegible] carrying little flags, while there is scarcely a house or shop that does not possess at least one picture or photograph of "Der Fuhrer." And indeed if the Germany of today is the result of his work and guidance the [illegible] reason to be proud of [illegible].

The feeling against the Jews is [illegible] as ever and [illegible] to be deplored [illegible] which this system [illegible] the wave amazing [illegible] in Bad [illegible] the [illegible] programmes [illegible] great masters as [illegible] to be found. We were met with the surprising reply: "[illegible]." He was a Jew [illegible] Jewish music is banned.

Anyone contemplating a trip to Germany may do so with the utmost [illegible]. The people are friendly and [illegible] the officials well-[illegible] and attentive and [illegible] excellent. The living [illegible] we stayed in Bad [illegible] a modern up-to-date hotel with every convenience and [illegible] a day—and [illegible] the petty annoyances [illegible] which [illegible] tend to mar the pleasures of foreign travel.

And what a wealth of beauty and interest Germany holds for the traveller—the stately Rhine with its burden of shipping, heavily laden barges and flashing white pleasure boats and above it towering the old castles, rich in archaeological and legendary lore; the silent and majestic grandeur of the Black Forest; the interesting and historical old towns and the quaint and colourful national costumes. All these and the sense of being at home among a friendly people combine to make a holiday in Germany enjoyable in the spending, and leave a wealth of pleasant memories.

ANNIVERSARY SERVICES

The Anniversary Services of the United Church are to be held on Sunday 20th, and Monday 21st of October.

Rev. Dr. Stanley Scott, Viking, on Monday evening will show some historical and beautiful pictures on the screen. Also there will be items of music, vocal and instrumental.

The choir is preparing suitable music for the occasion.

The [illegible] Thank Offering meeting of the Woman's Missionary Society will be held on Wednesday, Oct. 16th, at 3:00 p.m. in the United church. Mrs. Dr. Archer of Lamont [illegible] speaker on this occasion. Everybody should take advantage of the opportunity of hearing Mrs. Archer's talks on Mission work in Lamont.

QUIET ELECTION

[illegible] the present time the pending federal election campaign has been a very quiet one in this district. [illegible] the busy season [illegible]. The C.C.F. will hold a meeting [illegible] Saturday when the C.C.F. candidate will present his views [illegible] who attend. Up to Thursday night we have heard of no Liberal meeting and the election is on Monday [illegible] possible a last minute arrangement may be made.

* * * * * * * * * * *

LINDBROOK

* * * * * * * * * * *

A surprise party was sprung on Mr. and Mrs. Tucker a week ago last Saturday evening. It was staged in honor of Miss Jones' daughter of the famous Tommy) birthday. Dancing was the order of the evening and the orchestra did extra well. The break for refreshments occurred at midnight and afterwards the dance went on until the wee sma' hours. Everyone thoroughly enjoyed themselves.

A large party was given by Mr. and Mrs. Robinson at their home [illegible] last Saturday night in honor of Miss Dolly Woolake, who is home on a vacation from the MacDonald, Edmonton. The orchestra was Messrs Tiedemanns, and the M C was Mr. R. Herbert jr. The attendance was extra good, and as one put it "so was the lunch" and of course the dancing part, well, thats as you make it, but evidently they all made good for everyone seemed to enjoy themselves.

A Social Credit meeting was held at the school here last Saturday when Mr. W. Hayhurst, the S. C. candidate for the district spoke. There was not the overflow crowd present at this as others before, probably due to dances Saturday nights in town, and there doesn't seem to be the enthusiasm over the Dominion election as there was over the Provincial one.

Threshing has been going on until Tuesday's storm which will delay operations some. The least said about the threshing returns this year, the better, for they are simply disgusting.

Don't forget next Monday the 14th is the day to say who you want to represent you at Ottawa, in short it is Dominion Election Day.

Liberals Sweep Country in Federal Election

BENNETT, KING, WOODSWORTH, STEVENS ELECTED

In the federal election held on Monday a Liberal wave swept from coast to coast recording wins for Liberal candidates. Only in Alberta did the followers of Hon. McKenzie King fail to make the grade, the new Social Credit Party being victorious in 15 of the 17 ridings. Of the two the Social Credit forces failed to win, one went to the Conservatives and the other to the Liberals. The Liberal success was early apparent when results began to come in from far eastern constituencies in the Maritimes. When this success was, two hours later, repeated in Quebec and Ontario, it was a question as to how large a majority in the House Mr. King's party would have. As it turned out the majority will be the largest of any Canadian Parliament to date.

Regarding the Conservative party government formerly holding the reins, it is noteworthy that of 13 former ministers of the Bennett cabinet only four regained their seats, nine former honorable gentlemen being defeated by Liberal opponents.

Two lady members have retained their seats in the house, these being Hon. Miss McPhail, in Ontario, and Hon. Mrs. Black, of British Columbia. In the latter province five Conservative candidates obtained seats in the new house.

The Stevens Reconstruction Party went down to ignominious defeat all across Canada, only the leader, Hon. H. Stevens, being elected from quite a large slate of nominees.

The other three party leaders—Mr. King, (Lib.) in Prince Albert, Mr. Bennett, (Cons.) in Calgary, and Mr. Woodsworth, (C.C.F.) in Winnipeg, were each successful in their respective ridings.

The showing of the different parties at 3:00 p.m. Tuesday was reported as follows—

Conservative	41
Liberal,	166
C.C.F.	7
Reconstruction	1
Social Credit	17
Ind. Conservative	1
Ind. Liberal	4
U.F.A. Labor	1
Independent	1
L.P.	2
Doubtful	9
	245

In the riding in which Tofield town is situated and the territory to the north, Wm. Hayhurst, Social Credit, scored a clear cut victory over the other candidates running, being elected by a substantial majority.

The figures for Vegreville constituency are: 75 out of 119 polls, J. H. Holden (C) 715; Joseph McCallum (L) 2189; M. Luckovich, (U.F.A.-C.C.F.) 2287; Wm. Hayhurst (S.C.) 3246; M. Popovich (Com) 1257.

In the country immediately to the south and east of Tofield town J. A. Marshall scored a victory for Social Credit. 134 polls out of 180 gave the following results:— G. P. Smith, (L) 1644; W. T. Lucas, (U.F.A.-C.C.F.) 1600; J. A. Marshall (S.C.) 6536. Results from a number of polls adjacent to Tofield are printed below:

Mrs. Anderson Passed Away

LINDBROOK

The district was saddened this week with the news of the death of Mrs. E. Anderson, wife of Elmer Anderson, former C N R. foreman here. Deceased was born in 1909 in Oklahoma, U.S.A., but has resided in Alberta since girlhood. She leaves to mourn her loss, her husband, two sons, Lawrence and Stanley, and two daughters Irene and Doris; also her father and mother who reside in Bellingham, Wash., U.S.A. and three brothers all of Bellingham. Mrs. Anderson was very popular and liked by all who knew her, and in this district she will be sadly missed. She was always doing something for the children especially, no trouble was too much for her so long as it gave others pleasure, always cheery, serene and unruffled. There's too few of her kind in this world. The interment took place on Sunday Oct. 13th, at 2 p.m. at Ryley. The pallbearers were the four brothers of the husband, Messrs. Henry, Otto, Arthur and Morley Anderson, all of Ryley and Messrs. F. Kortzman and E. W. Hooper of Lindbrook. The Rev. A. Wallis conducted the ceremony, in the church which was choral, a very beautiful duet was sung by two Ryley ladies and several hymns by the people. The Rev. Wallis made a brief address and touched on deceased good nature and the esteem in which she was regarded by all.

The church was crowded, also the vestibule and outside a large crowd also had assembled. After the brief service the cortege formed up and wended its way to the cemetery just south of the town, there being between 30 and 40 autos following the hearse. At the graveside the Rev. Wallis performed the closing rites of the sad service. There were many floral tributes denoting the feeling of the deceased's numerous friends. The sympathy of us all is with the husband and father and the young family in this their sad bereavement losing a loving wife, devoted mother and the rest of us, a real good friend.

We have received word that a son had been born at Ladner, B.C. to Mr. and Mrs. A. E. Silversides, formerly our storekeeper here. Both mother and son are doing fine so we hear.

The dance at the School last Friday night was or would have been a success but the news being brought that Mrs. Anderson had passed away put the thought of dancing in the background. Several left immediately, others stayed for lunch, it being about that time, and then left. The dance which was organized we believe by Mrs. F. Kortzman and some of the younger set, was for the purpose of providing for a new set of cups etc. for social events, but it was decided to put the proceeds into a wreath for the funeral and the same was done.

The absolutely putrid weather is just about as trying as it can be just now. Threshing is at a standstill and it seems as soon as the stooks get dry, up comes another spot of either rain or snow. Its a wonder some political group hasn't advanced the claim that he has enough pull to produce good weather.

NOTICE

We wish to take this opportunity of thanking all those who helped to remove our stock during the fire.

We expect to be moved into the Jobb block by the end of the week and solicit a continuance of your patronage.

Our once cent sale will be run as usual, dates for which will be announced later.

LOCAL AND PERSONAL

* * * * * * * * * * *

Among those who visited the city last week are: Mrs. Malcolm, the Misses Anne and Margaret Lindsay, Mr. and Mrs. Bert Calvert, Mr. and Mrs. Brace, Mrs. Letourneau and Esther Jacobs.

Miss Lou Thompson who has been staying at her home for two weeks returned to the city where she will resume her course in the Capital Beauty Parlor.

We are glad to report that Mr. Broughton is improving in health.

Mr. Lee moved to the city on Sunday. Mr. and Mrs. Lee expect to make their home there.

Dr. and Mrs. Law have moved to the house recently vacated by Mr. and Mrs. John Lee.

Mrs. Archer of Lamont visited Tofield on Wednesday.

Mr. Burroughs visited the city last week.

Mr. and Mrs. H. Hicks and Edward visited relatives in Cadogan last week.

Mrs. W. Herndon has been receiving treatments from Doctor Law for blood poisoning in her hand. While in town she stayed at the H. Hicks home.

Mr. J. McDevitt of Cadomin was a town visitor this week.

Found—On main street, a car crank. Owner may have same by calling at Mercury Office.

Wedding

CORY—WHITEHEAD

A very pretty wedding took place at the home of Mr. and Mrs. H. Whitehead on Saturday evening, when their only daughter, Dorothy Edna became the bride of Mr. Richard T. Cory, only son of Mr. and Mrs. T. T. Cory. The bride, who was lovely in mauve taffeta wore a large picture hat and carried a bouquet of mauve, yellow and white chrysanthemums. She entered the drawing-room on the arm of her father. Miss Renie Fish, the bridesmaid wore apple-green triple crepe and carried pink, yellow and white 'mums. Mr. George Whitehead, brother of the bride was best man. Rev. Mr. A. B. Argue officiated. The rooms were beautifully decorated in scarlet and white flowers with greenery and potted ferns throughout. Following the ceremony a wedding supper was served to the guests assembled. Mr. Argue proposed the toast to the bride to which the groom responded fittingly. The young couple are making their home on 74 ave. and 106 st.

MR. AND MRS. JOHN LEE MOVE TO EDMONTON

This week, Tofield lost two old timers when Mr. and Mrs. John Lee left to take up residence in Edmonton. Mr. and Mrs. Lee have resided at Tofield for many years, the Lee family being pioneers in the district. While of a retiring disposition Mr. Lee nevertheless performed his share of public duty, being for many years on the Tofield School Board, many of which he acted as chairman. He was also for many years secretary of the United Church and was also a member of the Oddfellows and Masonic Orders.

A former farmer, Mr. Lee for many years conducted an implement agency and grain business. Of late he has not enjoyed very good health and for the past few months has been confined to his room. Mr. and Mrs. Lee's many friends wish them happiness in their new home.

Mrs. A. Patterson, Mrs. P. Moen and Mrs. P. O. Foster visited with Mrs E. A. Moen last Friday afternoon. [illegible] Mrs. Moen's birthday and [illegible] wished her many happy returns of the day.

Mrs E. Anderson and children, Mr. and Mrs. H. Sell, Mr. and Mrs. B. Holt, Mrs. T. Anderson [illegible]

LAKESHORE

Miss Ottewell and Miss Mann, teachers at McKenzie school were dinner guests at the Graham home on Thursday evening of last week.

Arelse Munro visited at the Phillips home on Sunday.

The bridge friends, that is Mesdames Johnston, Wood, Graham and Phillips met on Friday of last week. After the usual battle to the death Mrs Graham and Mrs. Phillips bit the dust. Mrs. Graham says [illegible] these days chasing around the [illegible]

[illegible]

FUNERAL OF MRS. ANDERSON

[illegible]

She leaves [illegible] Lawrence and Stanley [illegible] Vaughn of Bellingham, Wash. and three brothers of Bellingham, W [illegible]

Myrtle and Hazel Moller and Herta Anderson all from [illegible] were guests at the E. A. Moen home on Sunday.

HIGHWAY ACCIDENT

One Monday of this week, Reg. McCarthy while enroute home from Edmonton met with an accident which while serious enough could easily have become more so. The McCarthy truck was travelling east and near the second railway track just out of Edmonton a driver had stopped his car on the side of the road to remedy faulty lights. Reg. McCarthy did not see it until he was close and swerved to avoid hitting it. The driver of another truck travelling west saw both the parked car and the McCarthy vehicle had stopped [illegible] in passing both cars the McCarthy truck side swiped the car without lights. This swung the McCarthy car into the standing truck, the collision throwing Reg. out into the ditch. He received bad bruises and a cut face. Mrs. McCarthy and daughter Betty were travelling with Reg. and received a bad shaking up. Mrs. McCarthy was taken to the hospital for treatment for shock, returning the next day. Beyond a shaking up and minor bruises, Betty escaped injury. All three vehicles received damage, but with the exception of Reg. no one was seriously hurt.

ANNIVERSARY SERVICES

On Monday evening, Dr. Scott will give an illustrated lecture which will be interspersed with song and music. A social hour will complete the Anniversary arrangements. All cordially invited to enjoy this travelogue. Admission 25 cents.

CARD OF THANKS

We wish to thank our many friends for the beautiful floral tributes and kindness in our recent sad bereavement.

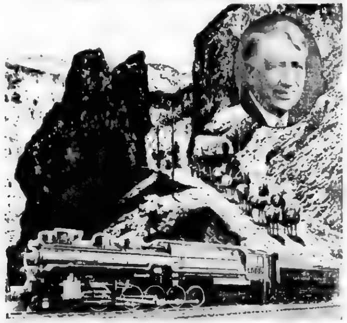
H. E. ROGERS

Tale of Heroic Achievement Marks C. P. R.'s 50th Anniversary



Craigellachie Day, November 7, next marks the fiftieth anniversary of the driving of the last spike, final completion of the Canadian Pacific line from Montreal to Vancouver and the final consummation of Canadian Confederation. Arrangements are now being made for its fitting celebration so that Canadian Pacific people and the country in general may be reminded of the part this Company has played in national development.

It is particularly fitting that the Company's jubilee year should be marked by the appearance of an important book bearing on its history and the new volume by J. Murray Gibbon, whose picture is shown above, will be the more welcome on that account. It is entitled "Steel of Empire" and apart from its special interest to Canadian Pacific people as a most complete and interesting history of their own Company, it is so comprehensive and fascinating a tale of the discovery and development of Canada that it will make a strong appeal to all who are interested in this country. It is published by the Bobbs Merrill Company in the United States and by McClelland & Stewart in Canada and appears as an extremely handsome volume. Sixteen full colour illustrations and over two hundred in black and white help carry the interest throughout aided by a series of explanatory maps. It sells at $[illegible] a copy. Despite its wide range of information and the vast amount of reading and research that clearly has gone into its making it is full of human interest and is an absorbing record of the human desires and ambitions that have become the foundation stones of Canadian nationality.

History of the Canadian Pacific as it may be, it is a fascinating and important book long before the author gets around to that great institution. The early history of transportation by trail and canoe is told with a wealth of chatty incident and in the light readable style that one would expect from this accomplished author.

Mr. Gibbon very largely ignores the commonplace history book stories of early settlement and lays before us new incidents and [illegible] neglected movements [illegible] to the exploration and [illegible] of the Canadian [illegible]. Thus, he recalls that in the time of Queen Anne the [illegible] for tea and the [illegible] for Chinese porcelain and [illegible] house decorations turned merchant eyes towards the Orient and sharpened the desire to find the North West passage. In a large sense the book is the story of the search for and the ultimate [illegible] of a new road to the Pacific. The fur trade, gold [illegible] and [illegible] the [illegible] this country as a [illegible] played their [illegible] in the development of Canada, but it was the search for the road to the "East" that drew adventurous pioneer souls forward until Canada had become a Dominion and the Canadian Pacific Railway had been built.

R.F.D. Number 14

By H. S. P. in the Christian Science Monitor

Phoenicians may have invented the alphabet, but its possibilities were never completely realized until the twentieth century. Long before letter combinations became quite the thing, those who lived on farms in the United States knew the Rural Free Delivery service of the post-office department.

A generation ago, in an age when motorcars were not dashing about the landscape, when the General Store and Post Office had not become a "Gifte Shoppe," and the comfortingly cluttered blacksmith shop a pertly modern petrol station, the man who drove the "R.F.D." route was one of the important men of the town.

He was important, not merely because he earned more money than the local minister, or school principal or storekeeper, but because he was a broad, tolerant and kindly man.

In a certain New Hampshire town, beautiful with its elm-shaded street, white picket fences, old-fashioned flower gardens, its glistening white church and school beside the village common, its cozy, thrifty farms nestling on the hill-sides and in the valleys with blue Monadnock guarding all, a certain farm lad used to watch on summer afternoons for the mailman.

As one looks across three decades, it is interesting to speculate on the cause of the delightful tenseness one enjoyed. Sam was usually right on time; he was proud of his schedule. "I like folks to know when I am due." And his schedule allowed a few moments for cheery talk at each farm. Of course, in the storms of winter or in the "mud season" of April he was late, but no one expected otherwise.

Then, too, back in those days the R.F.D. route of the town was a sort of endless chain of kindness, thanks to Sam. He was a jolly bachelor who liked to drive spanking good "roaders"—and who didn't like to have anyone mention his good deeds. He appealed to a farm boy because he was always willing to discuss any subject on a man-to-man level. And as one looks back, it is remarkable, or perhaps it isn't at all, to recall that Sam knew Dickens, Scott, Cooper, Bunyan, Eliot and Poe. And Horatio Alger.

One still thrills to the memory of the day when Sam drove into the yard and stopped by the ell steps instead of at the capacious mailbox by the roadside. He twisted the reins around the seat iron, and climbed out. From beneath the seat of his covered buggy he began to take fat, exciting looking books. "Hold your arms," he said. "Someone in this frontier town must be educated! These are way over my head but if you'll read them and explain them to me, they are yours."

It was the "Library of Universal Knowledge" in fifteen volumes. And I knew how much it had cost for a little while before the agent had spent an hour talking with Father about the books. College and university experiences have come to that farm lad, books have been bought instead of steaks and neckties until rooms overflow, and a great book is still a superlative feast, but nothing will ever compare to those fifteen volumes brought by the R.F.D. man.

A few weeks ago, one stood and watched a "bread line" in the largest city in the world. Hundreds of life's victims inched forward to receive what society gave them. But Sam ran a welfare department of his own, quietly and efficiently. Father would ask in an off-hand way, "Need any vegetables or milk, Sam?" And Sam in an off-hand way would reply, "Ought to have a bushel of potatoes and a can of milk, Frank."

For a long while it puzzled. Why did Sam need food? He earned a million a year! That was what two thousand dollars was a little while agone.

Then there was the day when Sam didn't come and didn't come. The whole family was waiting on the steps. Father had just said to Bill, the hired man who was really one of the family, "Better hitch up Dandy, and we'll go and see what happened." Even as he spoke, we saw Sam coming driving fast. And Sam turned into the yard. As he passed out the mail he said, "New family from the city has just moved into the Adams place. Nice folks, but they need help. Better take some food. Two babies."

We loaded the democrat wagon. In a twinkling furniture was set up, cupboards were filled. Bill rustled up some wood.

Yes, the "R.F.D." was—and is—a grand institution. Not only a splendid servivce of a great government, but a sort of endless chain that binds communities together, and makes the world a better place in which to live.

I look upon that man as happy, who, when there is a question of success, looks into his work for a reply, not into the market, not into opinion, not into patronage. Work is victory.—Emerson.

Splendid Showing Made by Local Creamery in Butter Competitions

PRESENT STANDING, NINTH IN ALL CANADA—FOURTH IN PROVINCE

Down, just over the brow of a hill, immediately west of town, the establishment known as the Tofield Creamery goes about its daily work without very much "fuss or feathers." Purchasing cream from the farmers and churning it into high grade butter rarely creates a "stir," even though the cream be of the [illegible] and the butter skillfully blended.

Sometimes however, a little searching digs up information, not generally known, but nevertheless praiseworthy to the small plant efficiently operated.

As intimated in these columns during the summer the Tofield Creamery has had butter on exhibition at a number of the large fairs in the Dominion, and now, with one exception, the Royal Winter Fair at Toronto which is still to be held, the results have been assembled. At Calgary, two seconds, 44 and 72 entries; Edmonton two firsts, 62 and 70 entries; Brandon, one second, 72 entries; Regina, two seconds, 78 and 60 entries; Saskatoon, two seconds; Ottawa, two seconds; Toronto, one first and two seconds; London, one first, two seconds; Vancouver two firsts, two seconds, also second prize for best average. These numerous awards have placed the local creamery ninth in all Canada and fourth in the Province of Alberta.

Credit for this fine showing is due to team work. Without good cream no creamery could make prize winning butter, and to the farmers of the district congratulations are in order; then of course comes the technical skill required to make a churning that is to compete with nearly a hundred lots made by skilled buttermakers for the same purpose. Mr. J. B. Kendall is the buttermaker and has full charge of the churning, but exhibition churnings create interest and the whole staff likes to "be around" when this work is undertaken. To the buttermaker, Mr J. B. Kendall congratulations also are due. Then there is the "general excellent tone" of the creamery, and this feature in no small way plays its part. This of course emanates from the manager, Mr W. E. Eldred who is "on his toes" all the time to ensure a high standard of efficiency for the creamery. To him congratulations are due also.

UNITED CHURCH NEWS

The Rev. Dr. Stanley Scott delivered two thoughtful and inspiring sermons on Sunday 20th in the United Church. Both services were well attended. The choir rendered anthems suitable for the occasion which gave fine atmosphere to the spirit of anniversary.

Dr. Scott also spoke to the Sunday School scholars at 3 p.m.

On the Monday the church was filled to enjoy the lantern entertainment provided on the screen. The "Movies" on Bird life and the little Scotch Piper were not only most entertaining, they were beautiful and instructive. The lantern slides on Ireland were well chosen and were greatly enjoyed by the audience. The evening's entertainment was enriched by solos from Mrs. L. Smith, Miss Gladys Dennie, and W. McCauley and a beautiful anthem by the choir. Rev. D. K. Allan presided and Mr. A. McCauley officiated at the organ.

At the close a most delightful social hour was held in the schoolroom. Mesdames Lovell and Swift with the co-operation of the other ladies provided a sweet and enjoyable lunch. So closed the Anniversary services for 1935.

On Sunday October 27th, at the evening service in Tofield, the Rev. Geo. Webber, Vancouver will be the speaker.

Thanksgiving will be the theme at Lakeshore and Ketchamoot and also at Tofield.

The Rev. D. K. Allan conducted the services at Viking on Sunday, 20th October.

The Young Peoples Union meets on Monday October 28th

Year Round Satisfaction and Service

Our busy season is, of course, during the summer months, but fall and winter months too, bring us a measure of business

We are just as anxious to obtain your cream in the fall and winter, as in other seasons of the year, and stand ready to give you Year Round Satisfaction and Service.

The Tofield Creamery

LOCAL AND PERSONAL

Miss L. Ross spent the week end visiting friends in the city.

Mr R. McLean and Mr. Priestly were in town last week taking stock at the Crown Lumber Company.

Mr and Mrs. W. Fraser and Mr Pacey of Edmonton visited Tofield on Sunday

Mr. and Mrs. Cowell and small daughter arrived in town on Saturday. Mr Cowell is transferred to the Tofield branch of the Bank of Montreal

Miss J. Good and Mr. H. Skitch were in town on Sunday renewing old acquaintances.

Among those who visited the city last week are: Mr. and Mrs. Stan Yakabuski, Miss P. Burnett, Miss Jessie Munro, Mr. Munro, Mr. and Mrs. McLaughlin, Mrs. N. Scott, Mrs. Malcolm, Mr. Ray Coatta and Mr. Earl Bowen.

Mr. Don Purcell left on Friday for Calgary, where he visited with relatives for a few days. He left Calgary and started for Grande Prairie on Monday where he has been transferred to the Bank of Montreal there.

The regular meeting of the United Church Ladies' Aid will be held at the home of Mrs. E. W. Rogers on Tuesday, October 29th, at 3 p m.

On Thursday 31st October, a Hallow'en Tea and Sale of Home Cooking will be held at the home of Mrs. George Brace, under the auspices of the United Church Ladies' Aid.

Auction Sale

ON MONDAY NOV. 4th commencing at 1:30, I will sell at farm of J. W. Morton, 1 mile east of Tofield, the dairy cows and equipment of J. W. Morton, consisting of 16 head of cows and heifers, some fresh and coming fresh. This is a good bunch of Red Poll and Holstein cows. One pure-bred Holstein heifer, 8 months old, one pure-bred Red Poll bull, one year old. The three nearest dams of the sire of this bull all on Dominion Record of Production and for 1933 and 1934 averaged over 800 pounds butter-fat with average test of 5.1, also 1 sleigh and rack, tank heater, Melotte separator, Power pulley for same, one small cook stove, cream cans etc. One aged horse, gentle single driver.

Consigned by E. McClymont — 5 head of two and three-year-old Holstein heifers, to freshen soon. One two-year-old Hereford steer, four Red Poll yearling heifers.

BEAVER LAKE COUNCIL MEET

The regular monthly meeting of the Municipal Council held at Ryley October 12th, 1935

The meeting was called to order at 8 30 with Reeve Moen present

Councillors Hillerud, Chetney, Moen, Lucas, [illegible] and Fane were present. Minutes of the previous meeting were read and adopted on [illegible] by Mr [illegible]

A letter from Mr [illegible] Inspector of Schools was read [illegible] Secty, stating that some [illegible] were required [illegible] of the [illegible] school [illegible] weather. Mr Fane agreed [illegible] the road was [illegible]

A letter was [illegible] Mr Fane which [illegible] opened by Mr [illegible] Moved by Mr Fane that we report the Sadownyk fence affair to the Department of Public Works and [illegible] take action [illegible] have the fence [illegible]

Moved [illegible] Mr Moen that we ask the [illegible] for the following [illegible] for 1936

1 [illegible] 7-4
1 2 foot bridge [illegible] 16-4
1 2 foot bridge W [illegible] 18-4
[illegible] 18-4

[illegible]

Councillor Fane reported that he had [illegible] covering [illegible] Government [illegible] in his Division.

Moved by Mr Lucas that we approve the admission of David Harris [illegible] Carried

Mr [illegible] Berzenski interviewed the [illegible] regarding the Kennedy car damage. Mr Berzenski stated his case and claimed that he was following the instructions of the Councillor and further stated that he had filled in the [illegible] and placed a sign [illegible] easily seen. The sign [illegible] may have been torn [illegible] passing there on [illegible] The Council maintained that foremen are [illegible] on the road and [illegible] case the foreman should have known enough [illegible] have raised his grader when crossing another road. Moved by Mr Lucas that we [illegible] the previous motion of August 14th, whereby Mr Berzenski was to pay one half of the car damage in the case of Mr H J Kennedy. Motion was lost 3 opp 2 for and [illegible] witheld

Arrangements were made by Mr Moen to call Mr Kubin at R 213 Vegreville and Wm Lucas at any [illegible] elevator should any emergency arise.

Moved [illegible] Mr Hillerud that the Reeve and acting Secty be empowered to borrow a further $1500 00 from the Royal Bank of Canada for [illegible] Carried

Moved [illegible] Mr Lucas that the Reeve and Secretary proceed to complete [illegible] in connection with the purchase of road machinery from the [illegible] D Adams and Richardson Road Machine Companies Carried

Moved by Mr Chetney that we [illegible] new applications for [illegible] and that they be [illegible] the Government for approval Carried

Moved by Mr Fane that we give authority to Mrs L O'Brien to sign cheques, notes and other Municipal matters as Acting Secretary and that the proper forms be signed at the bank. Carried.

Moved by Mr Moen that the next regular meeting be held No[illegible] at 2 p m Carried

Minutes of the special meeting on [illegible] were not read and are [illegible] the next special meeting

SPECIAL FARES FOR REMEMBRANCE DAY

WINNIPEG, Man October 21 — Remembrance Day, celebrated this year on Monday, November 11, [illegible] opportunity for a long week-end and the Canadian National Railways [illegible] taken advantage of the date to offer to the public of Canada a long week-end at special reduced fares.

One and ordinary first-class fare and one-quarter with a minimum charge of 30 cents for the round trip, [illegible] for travel between [illegible] Port Arthur, Armstrong, [illegible] and west also from stations in [illegible] to stations in Canada, [illegible]

Tickets will be good going from Friday [illegible] November 8, until 2 p m Monday November 11, with return limit to leave destination not later than 12 midnight, Tuesday, November 12. These tickets are limited to continuous passage, going and returning.

The long week-end thus granted should prove attractive to travellers who are desirous of visiting friends and relatives within the wide range of territory covered by this fare and one-quarter concession.

LUMBER FOR SALE—Write Barhead Hotel for truckload lots Phone 2. Barrhead, Alberta

RHUBARB FOR WINTER

(Experimental Farms Note)

Fresh, crisp, pink rhubarb can be had during the winter months if the plans are made now to grow the roots for forcing. The root system of this plant is a storehouse in which the necessary food has been stored and when given the required check and rest period will produce an abundance of leaf stalks.

First arrange for crowns that have been in a plantation for at least two years or until they are well developed. Crowns that are over four years in a plantation do not force as well as those of the younger age. In late fall or early November just before the ground freezes up, the roots should be dug all with a good ball of earth to adhere. Leave these on the surface of the ground without protection until they become frozen through. Sub zero freezing however, is not recommended. Four or six crowns of fair size will, as a rule, produce enough rhubarb for a family of three or four.

The crowns or roots being given the required period of dormancy are then brought into a dark cellar where the temperature can be maintained at 50 degrees F placed on the cellar floor and covered with soil, sand or cinders. The soil, sand or cinders hold the moisture around the roots. Another very good way is to place one large crown in a bushel hamper or box packing soil around it to hold the moisture. Where several roots or crowns are to be used they can each be placed in a hamper or box. This method is very convenient for handling where small numbers of roots are to be forced.

In commercial forcing, the roots are placed as closely together as possible, on a forcing house floor or under greenhouse benches, and soil, sand or cinders placed around them. Water is applied when required.

To give continuity of harvest the roots or crowns should be brought into the forcing cellar at intervals of two weeks apart. It usually requires around three weeks to a month for the crop to be ready for pulling. If the roots are to be used for planting out again in the following spring, it is unwise to remove more than five pullings. After the fifth pulling the crowns should be put outside and allowed to freeze up again.

For forcing purposes it is unwise to use poor quality varieties, although some growers use seedlings. To obtain an even and uniform product, Ruby, MacDonald or Victoria will be found quite satisfactory, but where large stalked rhubarb is desired the Sutton variety will be found very useful.

Results of physical and chemical studies and milling and baking tests of "bleached wheat" in Victoria, Australia indicated that, aside from lowered bushel weight and bleached appearance, the exposure of ripe grain in the spike to heavy rains followed by drying before harvest had no appreciable deleterious effect on flour yield baking quality or other characteristics.

SUPPLEMENTARY FEEDS FOR FALL PIGS

(Experimental Farms Note)

Feeding tests conducted at the Dominion Experimental Station, Lacombe, Alberta indicate clearly that, when fall pigs get no skim milk or butter-milk, some substitute must be provided if fall pig raising is to prove profitable. When milk is not available 8 pounds of tankage thoroughly mixed in each 100 pounds of grain is to be recommended. A mixed supplement, which has given good results in winter pig feeding at Lacombe, is made up of 50 per cent tankage 25 per cent linseed oil meal and 25 per cent alfalfa meal. When this mixture, fed at the rate of 8 per cent of the grain mixture, was compared with the single supplements fed at the same rate it was found that the mixture gave better results than any one supplement fed alone. Judging from the foregoing results, a mixed supplement is more apt to supply the necessary nutrients and mineral matter than a single supplement.

The ordinary home-grown hog feeds, oats and barley, while reasonably high in phosphorus, are low in calcium (lime). Although milk and tankage supply considerable mineral matter it is doubtful if they will provide sufficient calcium to ensure the skeleton development keeping pace with the accelerated body growth brought about by the use of these supplements, and unless growth of skeleton and body are properly balanced, proper utilization of feed is not possible.

Pigs grow much more rapidly than any other farm animal, with a weight about 2 pounds at birth and 200 pounds at six months. As a result they are more readily show the results of mineral deficiency. Spring pigs secure the necessary minerals largely from pastures and from eating freshly rooted soil. Minerals from these sources are not available for fall litters, fed mainly in dry lots and pens, and an adequate mineral ration should be provided.

A simple and cheap mixture, which has been used successfully for a number of years at Lacombe, consists of 76 pounds of slack coal, 20 pounds of salt, 3 pounds of ground limestone and one pound of sulphur.

The mixture is fed in boxes or in separate compartments of the self-feeder, to which the pigs have free access.

Great Britain is the world's largest single importer of fresh fruit, with a yearly average of 1,370,000 tons, as against 1,400,000 tons purchased by Germany, France, Sweden, Denmark and Norway combined.

Get Your Printed Greeting Cards at the Tofield Mercury

This year the Mercury has made arrangements to provide you with personal greeting cards at almost any price

For those who desire greeting cards of distinction and charm we have the well known Toothill line These are choice cards and run from $1.75 per dozen. Council Meeting

A regular meeting of the town council was held on Monday evening October 28th, there being present Mayor Bruce, Councillors Bellamy, Taylor, Hammond and Swift

The minutes of the previous meeting were approved, some communications were read and a number of accounts passed for payment

Mr McBratney interviewed council and asked its approval to his application for a provincial license to operate a poolroom on 3rd Ave , the premises to contain two billiard and two snooker tables. Approval was given, conditional upon it not being prejudicial to some suitable person who would acquire suitable premises on Main Street also being granted a license.

Final reading was given to a by-law authorising the council to secure a bank loan of $1500.00.

The matter of building restrictions was again brought up, and an amending by-law was brought in for first reading. Whether the by-law will be further proceeded with will have to be decided at some future regular meeting of the council

The mayor and property committee were authorised to take action in the matter of providing shelter for country teams during the winter months.

OLD TIMER DIES

The death occurred on Monday of Mr Sutton sr., of the Ketchamoot district. The deceased gentleman has been an invalid for some time. The funeral was held on Wednesday. A full report will appear next week

E. R KALLAL WINS GRAND CHAMPIONSHIP FOR YORKSHIRE BOARS

At the Edmonton Exhibition Fall Swine and Sheep Show and Sale, E. R. Kallal of Tofield on Wednesday won the Grand Championship for Yorkshire Boars with Tofield Prince 7N.

This is the second Grand Championship in this class to be won by Mr. Kallal the same honor coming to him last year. These wins combined with previous grain awards places Mr. Kallal in the front rank of expert and progressive farmers

MAGAZINE SPECIAL OFFER GOOD AGAIN THIS YEAR

We would direct the attention of Mercury readers to the advertisement on page 2 whereby three attractive magazines and the Tofield Mercury can be purchased for the low price of three dollars. Last year quite a number of our subscribers took advantage of this offer and we hope and expect a larger number this year —for it is without question a good offer.

DR. LAW BUILDS NEW OFFICE

A smart office building with ample accomodation for emergency work has been built by Dr. Law and now is in the last stages of completion. The Mercury representative looked in today but the building is hardly ready for a complete description. The building is of the cottage type, stucco walls and colored rubberoid shingles. A casual glance revealed a splendid plaster job, something not frequently seen in the west. When the building is fully completed we will give a better description.

CENTRAL CO-OP TO BUILD NEW STORE BUILDING

The disastrous fire in Tofield of a few weeks ago, having deprived the Central Co-op of their place of business, steps were immediately taken to procure new quarters. Several buildings were considered, namely, the Variety Theatre, M McCusker's building and the McBratney building. Finally it was decided to buy lots north of the telephone office and construct a new building. Work was commenced on the foundation last Wednesday and the foundation was laid before the stormy weather commenced. At present further construction is held up by weather conditions, but it is expected that as soon as the weather clears building operations will be resumed. The building will be 30X50 feet.

T McBRATNEY TO HAVE POOL ROOM ON 3RD AVENUE

Information is to hand that T. McBratney intends equipping and operating a pool room on 3rd avenue, west of the W. C. Swift property. Due to the fire the town is without a business of this kind and a western Canadian town without a pool room is rarely encountered.

TOFIELDERS PLAY CHESS AT EDMONTON

Five Tofielders comprising W. C Swift, L. W. Smith, George Coatts, W. P. McIntyre and O. P. Thomas journeyed to Edmonton and played chess at the Parliament buildings with an Edmonton club.

Following the games the Edmontonians entertained the visitors to a duck dinner which was very much enjoyed

LINDBROOK

The few fine days of last week helped to finish quite a lot of threshing around here, but there's still quite a lot left to do yet if it ever does get done, for it begins to look as if this is the start of winter

Mr. A. Tucker seems to have been in the wars a bit of late, for whilst threshing was in progress on his farm, a horse he was riding fell with him underneath, luckily he escaped unhurt. Then the day of the "big wind" of last week, he was blown with his hay rack on top of him and still came through unscathed. Must be a tough guy eh!

The wind blew quite a lot of hay stacks' tops off and distributed hay all over the country, and one heavy rack was lifted from its gear and turned upside down yards away, badly smashed.

We hear there was a dance at Mr. and Mrs. Tiedemann, north of here last Friday but have no details, but assume it was absolutely up to the mark.

Don't forget the Pie Social at Lindbrook School next Friday, Nov. 1st in aid of the childrens' Xmas tree, so do your part by helping the kiddies and having a good time whilst doing so.

Miss Pansy Bernice Bracegirdle celebrated her 10th birthday by giving a tea party to her schoolmates at her home here. Games, contests and candy pulling were enjoyed and whilst waiting for the "Farmer" of C J C A radio station to tell Pansy where to find her presents a singing contest was held, causing lots of fun and unearthing new talent, we hear that Mrs. J. T. Glenn especially excelled in this art. Guests present were: Misses Merna, Marie and Helen McMullen; Joyce, Alice and Irene Bailey; Rosaline and Margaret Brady, Vera Jenson; Thelma Kortzman; and Pansy's sisters, Star and Carol Bracegirdle; and Mrs. J. T. Glenn.

Our best wishes to Mr. and Mrs. Elmer Lindberg, (nee Miss Hoover) on the occasion of their marriage a week or so ago in Edmonton. These wishes are a bit belated but you kept it rather quiet Elmer and have fooled us once or twice before with false alarms, still we guess its O.K. this time and if a bit late with our wishes they are none the less sincere.

Miles. Marie, Louise and Lucille Boyle of Marquette, Mich., U.S.A. left for their home on Sunday after their holiday spent with their relatives here, Mr. and Mrs. J. Lepine. They have also visited other parts of Alberta whilst here, where they have relatives.

Mrs Wallace and daughter Betty, of Stettler, Alta, stopped off here enroute to their home after a visit to England to visit Mr. F. Gould and family here. Mrs. Wallace being Mr Gould's sister.

Storm Halts Threshing

WHETHER WINTER HERE TO STAY ABSORBING TOPIC

Stopping threshing after two or more previous interuptions, a snow storm started on Sunday and in a greater or lesser degree the weather has been cold and blustering all through the week. Coming as it has at the tag end of October, many weatherwise heads are pondering as to whether the storm is the first touch of real winter and the snow here to stay until spring, or whether it is a sporadic artic effort which will be compensated for by finer weather to come. Hoping against hope that we still have some fine weather ahead of us before real winter with its sub-zero temperatures commence, the Mercury set out to find the opinion of various people and found among the few people questioned about a fifty-fifty belief as to whether this is the right moment to don the heaviest of heavy winter woolies. Frank Pruden was the most cheerful of them all as in addition to expressing his opinion we would have some fine weather yet, backed up his belief by saying there were still some summer birds around his home. The rabbits, also he said were still wearing their summer colors. He made the reservation though that "nobody really knows anything about it "

Anyway it is unfortunate that the storm has come and put a stop to threshing, as each day that passes bring the inevitable winter weather that much closer. As near as can be gathered at the time of the shut down about 75 per cent of the threshing in this district was completed

LOCAL AND PERSONAL

Mr. and Mrs. Jobb and Thelma and Bob Whyte motored to Daysland on Thursday, to visit Mr. and Mrs Gordon Jobb

Mr Burroughs spent Thanksgiving day in Edmonton

Miss Lovell and Miss Pat Burnett visited at the Solberg home in Ryley on Thanksgiving day.

Mr S Worton of Wainwright spent Thanksgiving day at his parents home here.

Miss Agnes Johnson is visiting at Mr. and Mrs. Bert Swift's home at Fallis

We understand that Mrs. Rufus Wilson won the cutwork tea cloth which was raffled off by the Anglican W. A. Good going, Mrs. Wilson!

Mr. and Mrs. Stutzman left this week for the States, where they will visit Mr and Mrs. Cliff Stutzman at Peabody, Kansas.

Miss L. Ross visited the city one day this week

Mrs. Malcolm and Wes Taylor motored to the city on Thursday. Miss Muriel Malcolm, who has been visiting in Europe, will return with them

Mr and Mrs George Glover visited the Glover home here on Sunday

Mr and Mrs Lindsay of Innisfree and Margaret Lindsay of Ketchamoot, visited Anne Lindsay on Thursday

Miss Helen McCauley spent the week end at her home here.

Mr. Allison Scott returned home from the hospital this week where he underwent an operation for appendicitis.

The Misses Isabel Robinson and Eileen Allan and Messrs Harold Schultz and Ross Craig left this week to attend the college at Vermilion

Mr Ed Kallal spent a few days in the city attending the Swine show this week.

Mrs. McLeod and Jack and Hubert Bethel motored to Halcourt to bring Kathie McLeod home. Mrs McLeod remained there where she will visit for awhile

Mrs. McLaughlin entertained for Eileen Allan on Saturday evening. Eileen left for Vermilion on Tuesday.

Mr. Ray Coatts visited the city for the week end.

Miss Helen Gravelle returned home after spending a week visiting in the city.

Mr. and Mrs. McMurray of Edmonton spent the week end at the Bethel home.

Miss Gwen Firth entertained a few girls in honor of Eileen Allan one evening last week

Miss Redig spent Thanksgiving in Viking.

Miss Lois Thompson returned home after taking a beauty course at the Capital Beauty Parlor in Edmonton

The regular meeting of the Anglican W.A. will be held on November 7th, at the home of Mrs Barden

Corp Baynes visited Tofield last week end

Miss Edna Lindsay spent the week end at her home in Innisfree.

Born: To Mr. and Mrs. R. W Ferguson, Wednesday October 30th, a daughter Congratulations

Would the person who boldly unlocked the front door of Frank Dunn's residence on Saturday October 26th, and helped themselves to $10 00 off a high-up shelf, kindly return same by mailing back? By doing this they will avoid serious trouble for they are known.

The Jolly Eight Bridge Club met for the first time this year at the home of Thelma Jobb, only this year it will be the Jolly Twelve as the girls decided to have 3 tables this year instead of 2 as last year. High scores for the evening were Anne Lindsay and Hilda Nemeland

We understand Mr. McLaughlin has decided not to rebuild having purchased a hardware business at Wetaskiwin. Mr McLaughlin will not take over his new business for some time yet.

Mrs. J. W. Robinson, Thankoffering Secretary Treasurer of the Edmonton Diocesan Board of the Womens' Auxiliary attended the quarterly Board Meeting which was held in All Saint's Church and Parish Hall on Friday October 25th.

THE CANADIAN LUTHERAN BIBLE INSTITUTE

The time is fast approaching when the Canadian Lutheran Bible Institute will enter upon its fourth year. Sunday, November 10th will be the opening day. There will be an all-day service in the Camrose Lutheran Church. We invite the friends to try and be with us that day. Speakers from the various districts will be present [illegible] will be rendered.

We are looking forward to a good attendance at the Institute this year. There will be three instructors and a [illegible] and school class.

Students are encouraged to send in [illegible] We have not yet [illegible] students [illegible] families [illegible] as before [illegible] School.

[illegible] prayers [illegible] this work. We would also urge upon you to send [illegible] institution is carried on entirely with free will offerings. The Lord loveth a cheerful giver.

Send all your gifts to Mr. A. G. [illegible], treasurer, Camrose.

For further information write [illegible]

[illegible]gstad.

[illegible]

CARD OF THANKS

I [illegible] thanks [illegible] support [illegible] support they [illegible] before and during the last [illegible]. We [illegible] the grate [illegible] district [illegible]. When one [illegible] Mr. B[illegible] after [illegible] would take a [illegible] general conditions and a $25 [illegible] I have fallen defeated by much less able candidates [illegible] the [illegible] less to offer [illegible] than our [illegible] least alleviate the loss and lead [illegible] that the electors [illegible] dividends carried the day.

LEAVES FOR VERMILION

Completes Entire School Course in Tofield

Isabel Robinson who has the honor of being the first girl student receiving all her education locally to succeeding [illegible] 12 at [illegible] Vermilion Agriculture School on Monday [illegible] completed her Public School studies in seven years and her High School in four years during [illegible] has the distinction [illegible] failing an examination [illegible] extra units. She has always [illegible] words always remembering [illegible] faithfully accomplish all allotted homework and day studies, to concentrate diligently and to earnestly co-operate with the teachers in their efforts as well as attending regularly. She has had ten different teachers during her [illegible] all.

Isabel [illegible] Home Economics at the Vermilion Agricultural School. This is [illegible] Cooking, Dietetics, Sewing, Home Nursing, Laundry and Household Administration, some attention is also given to Horticulture [illegible]

[illegible] army [illegible]

[illegible] "Captain of that ship?" came a voice from the barge.

[illegible]

"Well, don't check your superiors [illegible]"

In any case I wish the winning candidate, Mr. Hayhurst [illegible] and hope he will be able to [illegible] as well [illegible] even better than I [illegible]

M. Loche[illegible]

DICTATOR BENITO PUTS NATION ON 6 MONTH DIET TO COMBAT REPRISALS

ROME, Oct. 29.—Premier Mussolini today put the nation on a six months diet to fight the sanctions imposed by the League of Nations.

The first of the measures, effective Nov. 5, ordered restricted sales of meats to reduce the necessity of import [illegible] measures were [illegible] dining rooms.

The first of the orders to become effective will close butcher shops on Tuesdays and Wednesdays during the duration of the diet law. Sale of beef [illegible] rigidly re[illegible] pay-ment for the two days closing will [illegible] Sundays [illegible]

[illegible] found [illegible] the 1935 wheat crop [illegible] 282,000,000 bushels which plus the reserve stock is considered sufficient to cover the [illegible] needs.

Mussolini rejected the idea of bread cards or any other such restrictions.

Hotels, restaurants and dining cars will be forbidden to serve more than [illegible] fish dish at a meal.

To increase the food supply the fish industry promised to increase production. Restrictions on game have also been [illegible] to encourage its use as food.

EDEN SEES WORLD MOVING TOWARD MUTUAL TRUST

LEAMINGTON, England, Oct. 29.—Anthony Eden, minister for League affairs, [illegible] charge [illegible] government [illegible] the armament and peace [illegible] words of reason [illegible] a speech [illegible] last night.

"Whatever the outcome of our present troubles," he said, "I am con[illegible] we are moving [illegible] an era when nations will strive to under[illegible] as individuals [illegible] day, when mu[illegible] will allay suspi[illegible] with more genuine en[illegible] we shall each strive to work together for the maintenance of peace."

CHARLES, AGE SIX MODERN SAMSON, EATS HIS SPINACH

NEW YORK, Oct. 29—Charles Lew Buchs was six years old Monday and among the birthday presents his father, Otto gave him was a telephone book.

Charlie was given the telephone book about 1½ inches thick here so he can practice tearing it in half, because Charlie is one of those strong boy prodigies who eat their spinach.

His father, a professional physical culture teacher, had the press down to the house Sunday and Charlie performed by tearing a pack of 52 playing cards in two and lifting a 150-[illegible] weight (three times his own [illegible]).

Mr. Tofball "Straith, what is [illegible]"

Straith (stretching and opening [illegible]) Everything [illegible]

Mr. Tofball (not irate) "Do you mean to tell me, this table is work?"

Straith (closing eye and resuming former position): "Sure, woodwork."

AUCTIONEER

Many Refinements in Ford V-8 Cars for 1936

FORD V-8 CARS for 1936 feature a completely new exterior treatment with new hood and fender styling, new grille and headlamps, new wheels and many detail refinements. Interiors are new with the style and color of instrument panel and mouldings to harmonize with upholstery, trim and appointments. Quiet helical gears are now used in all forward speeds and reverse. Steering effort is estimated to be reduced more than 25 per cent. ABOVE—The Tudor touring sedan, with commodious built-in trunk. Note the new wheels with 12½-inch hub caps and the longer body lines. INSET—The redesigned front end. Streamlining steps ahead. Fenders have a sweeping inward flare and horns are now carried behind grilles in the fenders. Hood louvres are newly styled.

Rexall One Cent Sale, November 20-1-2-3, A. A. Beirnes

AMISK CREEK

The Amisk Creek Ladies' Aid have decided to hold a Lutefisk dinner and sale of fancy work on November 11, Armistice day. Serving will start at twelve o'clock. Everybody welcome.

Mrs. C. Ward of Shonts entertained the Ladies' Aid, October 23rd. Most of the members and many visitors were present. It was decided that each member make a woolen quilt block, the quilt to be given to Sunshine or some needy family.

Threshing came to a stop due to the snow. It looks like winter is here to stay.

Mr. A. Erickson spent a few days visiting in the city last week.

Mr. and Mrs. A. Haugen were pleasantly surprised on Sunday Nov. 3rd, when friends from Bardo, Amisk Creek and surrounding district gathered to help them celebrate their silver Wedding. There was between eighty and ninety guests. A table was set for the family, and was centred with a beautiful wedding cake, made by Mrs. I. C. Olson and Mrs. C. Erickson. Seated with the honored couple were Mr. and Mrs. T. Rorem of Bardo, Mr. and Mrs. A. Patterson of Amisk Creek. The Haugen children then sang a couple of songs to honor their parents. When they were all seated Mr. B. Anderson of Bardo, gave a few remarks and led in devotion and prayer, after which Mrs. E. A. Moen made some remarks and presented Mr. and Mrs. Haugen with a purse of money from their friends and a set of cutlery from their children. Mr. and Mrs. Haugen responded suitably expressing their thanks and appreciation for the lovely gifts and pleasant surprise. Seven of their eight children were present, Thora who attends school at the Camrose College was unable to be present. The ladies of the community served a delicious lunch to all the guests present. Mrs. Haugen cut the wedding cake and everyone had a taste of it. Many congratulations and good wishes were extended to Mr. and Mrs. Haugen on their twenty-fifth anniversary.

Mrs. L. Watt from Edmonton was down visiting her mother Mrs. K. Olson, during threshing.

Grandma Moen has been sick in bed for a few days. We hope she is getting better and will be able to be around again.

Pearl Patterson who is attending school in Ryley spent Sunday at her parental home here.

Mrs. P. O. Moline spent last week end visiting with her daughters Florence and Margaret in the city.

The flu is still with us. The last we heard was that Ralph Olson was sick with it. We hope that he is better by now.

BEHIND THE HOG

Station A. B. C. will again broadcast the same old line- Behind The Hog- Jokes new and old -Highlights of the Roaring Game -as seen from Hog-Tee and back of the glass.

°°°°°°°°

We have a small reserve of jokes to draw on, but will try and not get our eggs all in the one basket. If you know any good curling jokes or jokes on Curlers, come up and see me some time.

°°°°°°°°

Hats off to the New Heads of the Club. Elected Tuesday, Nov. 5, by acclamation.

°°°°°°°°

They have as their objective 15 rinks in view—a small deficit to look after and lots of work in sight.

°°°°°°°°

They will start the season with a Mixed Spiel. Something a little different. Just a few catches to it. Ask the committe about this. You will enjoy this spiel and also the curling for the balance of the season. You will get the catch later.

SMALL FIRE ON SUNDAY

A fire occurred at the home of Mrs. Tataruink on Sunday about 2 p.m. Mrs. Tataruink was away from the house at the time, the fire being discovered by Mr. Ewanevich who saw smoke coming from the roof. He immediately went over and commenced drawing water from the well, while his son Mike went and telephoned in the alarm. As soon as the siren was sounded people came from all directions and in short order the chemical engine was on the scene. Damage was confined to the wall and roof of one room but the entire house was smoke-blackened and water soaked. The building is owned by Mr. Foster, a former resident here who now lives at Vegreville.

LOCAL AND PERSONAL

Monday, November 11, Armistice Day and Day of Remembrance, has been proclaimed a statutory holiday and all business places in Tofield will be closed.

Miss Muriel Malcolm who has spent the past five months visiting relatives and friends in Europe arrived home last Friday. Muriel had a wonderful trip visiting England, Scotland, France and Switzerland among many other places.

Miss Jean Ellis spent a few days visiting Muriel Malcolm here.

Mrs. Ellis and Miss Cherry and Ray Ellis visited at the Malcolm home on Sunday.

Born.—To Mr. and Mrs. Russel Ferguson (nee Miss Mabel Thomson) at Lamont hospital on Tuesday Oct. 29th, a daughter.

Wait for the Rexall Original One Cent Sale. Four big days. 250 bargains! And two for the price of one plus only one cent. Nov. 20, 21, 22 and 23rd. A. A. Beirnes Rexall Drug Store

The Misses Jean Hall and Florence Kendall of Leduc spent Sunday at the [illegible] home here.

The biggest money-saving event of the season is coming soon. Get ready for big bargains at the Rexal Original One Cent Sale, Wednesday, Thursday, Friday and Saturday, Nov. 20, 21, 22, and 23 at Beirnes' Rexall Drug Store.

Mr. Reber and Bryce of Edmonton visited Tofield on Sunday.

Among those who visited the city last week are: Dr. and Mrs. Law, Mrs. Smith, Mrs. McCauley and Bill McCauley.

Miss Dorothy Green left last week for her home in Dutchess, Alberta.

The Jolly Twelve Bridge Club met at the home of Mrs. Coutts on Tuesday evening. Honors went to Miss Redig and Miss Stuart.

Mr. McKenzie, superintendent of the Crown Lumber Co. visited Tofield last week.

Miss Selma Nomeland spent a few days in the city this week.

Mr. and Mrs. Calvert visited the city one day last week. Mrs. Calvert visited friends there for a few days.

Miss Kathie McLeod and Jack McLeod and Huebert Bethel spent a few days in the city.

Mrs. John Wood spent a few days visiting Mrs. E. W. Rogers in town this week.

We are glad to report that Mr Letourneau is improving.

Mr. and Mrs. H. Hicks and Edward left on Tuesday evening for Rochester where Mr. Hicks will undergo an operation.

Miss S. McCartney who has been staying at the Harold Hicks home, left for Edmonton on Wednesday.

We understand that Mr. W. J. Duckfield has purchased the house formerly owned by Mr. Blake.

The teachers at the Tofield Public and High school are attending the convention in Edmonton this week end.

Mrs. Lovell and Pat Burnett attended the Rebecca lodge at Ryley on Tuesday evening.

OBITUARY

The death occurred on Monday, October 28th, of Mr. Sutton sr., at the age of 72 years. He has been a resident of this district for many years and was well and favorably known. He leaves to mourn his loss one son and two daughters, Percy Sutton of Tofield; Mrs. Theresa Broche and Mrs. F. Burness. The funeral service was held at the home on Wednesday, October 30th, Rev. Stutzman officiating. Interment took place in Tofield cemetery, Geo. McLaughlin, funeral director.

The death occurred on Saturday last, from a heart attack of Mr. Blanchard senior, of Ryley. The funeral was held on Tuesday at Ryley.

Death came to Mr. A. A. King on Monday of this week, at the Royal Alexandra Hospital, Edmonton. Mr. King who was very well known throughout the district has resided here for many years. The funeral was held on Wednesday, service taking place at the Salem Mennonite Church, near Tofield.

CATHOLIC MISSION

Next Sunday Nov. 10, at 11 o'clock Mass, Rev. J. T. O'Sullivan of Edmonton, will open the "Renewal" of the mission in the St. Francis Catholic church. For the past 17 years Rev. Fr. O'Sullivan has preached Missions and Renewals all through the Maritimes and the Pacific Coast from California to Alaska.

His subject of Sunday night's sermon will be "The End of Man." Monday night, "The Effect of Mortal Sin," Tuesday night, "The Christian Family," Wednesday night, "Death", and Thursday particularly "Judgement."

Services each night at 7:30 and all are cordially invited.

ANNUAL BAZAAR AND CHICKEN SUPPER

Under the auspices of C.W.L. in the St. Francis Hall on Saturday Nov. 16th. Fancy work and sale of home cooking. Drawing for the raffle and Bingo after supper.

Supper starts at 5:30 — 35 cents. Everybody welcome.

POPPY DAY

[illegible] "Poppy Day" [illegible] wistful memories of the men who fought their Country's [illegible] this country is stirring, sounds to penetrate the heart and mind are nevertheless attuned to a sense of homage due those men whose faith [illegible] inspired [illegible] Canadians [illegible] for themselves for service [illegible] 1914 [illegible] and Belgium [illegible] graves [illegible] The [illegible] is filled with the joy of living. So also, were the 170,000 men who [illegible]

To manifest that proud recognition of their place in this Country, [illegible] Poppy Day [illegible] in order that we may [illegible] ing the Great Sorrow.

The [illegible] throughout Canada by the Canadian Legion's vast volunteer organization are the [illegible] men [illegible] the National [illegible] by the Dominion Government. To purchase a Poppy [illegible] For every [illegible] thing.

[illegible] wear a Poppy [illegible] Day.

ALBERTA WELL UP ON BIG FAIR WINNINGS

Within a few weeks, Alberta exhibitors, in seed grain and live stock will be setting out once more upon the trail of the [illegible] prizes at the big [illegible] Toronto [illegible] features [illegible] the province [illegible] great showing of the past, at least in some [illegible] classes.

A survey recently completed by the Alberta publicity bureau reveals that [illegible] Royal Fair [illegible] the Province of Alberta [illegible] a grand total of 2,750 [illegible] Royal and the Chicago International. This is a record which cannot be [illegible] were in [illegible] balance of 2,019 [illegible] championships, [illegible] and 415 first prizes.

At Chicago "International," the total won in the 13-year period was 560 prizes of all kinds, including 38 championships, 11 reserves, and 67 firsts. The [illegible] fall [illegible] alfalfa [illegible] live stock. Total [illegible] Chicago [illegible] were [illegible] live stock.

At T[illegible] Royal Fair the total winnings in the 13-year period were 2,215, of which 1,729 were in live stock and poultry, 229 in grains and 252 miscellaneous. The total of championships at Toronto was 121, of which 111 were in live stock and poultry, and 10 in grains.

In horse classes at Toronto, the 13 [illegible] prizes with 14 [illegible] Alberta [illegible] beef cattle 410 prizes with 45 championships; in market cattle 222 prizes [illegible] Shorthorns 19 prizes with three championships, in dairy cattle 301 prizes with seven championships [illegible] 200 [illegible] with 12 champion[illegible] with two championships; in poultry 261 prizes with one championship and in turkeys 31 prizes with three championships.

[illegible] a harvest of [illegible] Alberta, 54 of which were first prizes. In wool 63 prizes have been taken.

One of the outstanding facts which has come to light in recent years as [illegible] Toronto [illegible] which Alberta has de[illegible] dairy herds. The [illegible] dairy cattle in the 13 years is proof of this.

Beef cattle naturally have always [illegible] The total [illegible] beef cattle classes at Toronto [illegible] the 13 years, was 702.

All Parts Contribute

A distribution of the prizes won [illegible] Chicago and Toronto according to [illegible] the extent to which all parts of the province have contributed to the magnificent record in this respect [illegible] the province's enviable reputation for the production of high quality [illegible] Peace River and Grande Prairie [illegible] a total of 156 [illegible] division 2, which is in the extreme south of the province, with Lethbridge [illegible]

GAS PRICES HAVE DROPPED; SAVING OFFSET BY TAXES

The price of gasoline in Canada has become a [illegible] and one about which there is a great deal of [illegible] understanding; this is now offset in some measure by the results of an [illegible] very recently undertaken [illegible] East Canada [illegible]

[illegible] tax [illegible] gallon [illegible] sale, however, have lost this advantage because of the increasing taxation by provincial governments which [illegible] words, while the price of gasoline [illegible] gallon [illegible] Canada [illegible] 1926 [illegible] 1935.

LUMBER FOR SALE. [illegible] head Hotel for truckload lot [illegible]

DOMINION EXPERIMENTAL STATION LACOMBE, WEEKLY NEWS LETTER

Lamb Feeding is Profitable

The main profit of the Alberta lamb crop is often lost because the lambs are sent to market in poor condition. The experience of farsighted farmers and ranchers has shown that it pays to properly finish lambs.

The Dominion Experimental Station Lacombe, states that lambs for feeding should be of good type, growthy and [illegible] Poor type, "leggy" or [illegible] lambs should not be used, nor should those that have not been [illegible] the latter [illegible] a heavy [illegible] when marketed.

A [illegible] is paid for lambs weighing from ninety to one hundred pounds [illegible] good time to start fattening them [illegible] when they weigh from sixty [illegible] pounds.

M[illegible] the best lamb feeders start the [illegible] on a rape or rape barley [illegible] some of the best early lambs will finish and be marketed off this pasture. This is the most profitable way to fatten lambs.

Wetaskiwin and Camrose, with 76, and division 10, which is Vegreville-Lloydminster country, has a total of 61, with Edmonton district next with 53.

At a concert a young lady began a song, "The autumn days have come. Ten thousand leaves are falling."

But she began too high. "Ten thousand," she screeched, and stopped.

"Start her at five thousand," cried an auctioneer present.

Co-operation Eases Situation

How the Canadian Pacific Railway Company as a large property owner allowed its tenants to catch up on their arrears of rent and also earn some much needed cash is told by J. F. Hendry, Toronto, real estate agent there for the Company.

"The Canadian Pacific", said Mr. Hendry, "is owner of eighty six dwelling houses on Marlborough Avenue paralleling the tracks near North Toronto station. Many of tenants were in arrears on their rents despite every possible effort on their part to make ends meet. The majority, too, were tenants of long standing. We had a mutual get-together and decided that the unemployed tenants would paint all the eighty six houses under the supervision of one of their own number as foreman. The Company supplied all the material, insured the men under the Workmens Compensation Act, and the work was started. The results are most gratifying for all concerned. The unemployed tenants have seen their arrears of rent gradually erased from the ledger, and the property has been made spick and span at a reasonable cost because there was no idling on the job and everyone worked their hardest. In fact the scheme went along so smoothly that it was decided that all the labour would not be credited on the rent ledger but that each man would draw a percentage in cash to help keep his family and himself going.

Supper starts at 5:30 — 35 cents. Everybody welcome.

ARMISTICE DAY QUIETLY OBSERVED HERE

Monday, November 11th, Armistice Day, now known as Remembrance Day, passed quietly at Tofield. On the preceding day, Sunday, suitable services were held in the churches of the town, the ministers making special reference to the day and its special significance. Monday was observed as a holiday, all places of business being closed.

WEDDING

A wedding of local interest took place at Edmonton last week when Miss Irma Shupe was united in matrimony to Mr. George Simpson, the ceremony taking place in the Knox Church Manse at Edmonton. Miss Shupe is the only daughter of Mr. and Mrs. Frank Shupe, old time residents of this district, and Mr. George Simpson is a member of the mine farm crew.

ESTRAY—Six Spring Calves. Some reds, some spotted and one black. Been at my place for the past three weeks. Owner can have same by paying costs.—Ivor Moen, Phone 1805, Tofield.

Home Destroyed by Fire

MR. and MRS. SOMA LOSES SMALL SON FROM BURNS

A fire destroying the home of Mr. and Mrs. Soma, seven miles southwest of Tofield, occurred on Sunday afternoon. It also resulted in the death, in an Edmonton hospital on Monday of Arlie, three and one half year-old son of Mr. and Mrs. Soma. Mr. Soma also was badly burned about the hands in an endeavor to extinguish the flames from the young lad's burning clothing.

From information to hand it appears that Mrs. Soma was cleaning Mr. Soma's trousers in the kitchen, using gasoline as the cleaning fluid. Without any warning the gasoline exploded and the clothing of the young lad who was nearby, became enveloped in flame. Mr. Soma, who was also in the kitchen endeavored to put out the flames but himself became ignited. He shouted to Mrs. Soma to take the baby outside and rushed outside himself and with snow extinguished the flames on himself. He then dashed back, picked up the boy and rolling him in the snow extinguished the flames.

Mr. and Mrs. Lehman, who were passing in their car, immediately took Mr. and Mrs. Soma, the boy and a five month's old baby to the home of Mr. and Mrs. Nomeland, about a mile distant, from which place a call was sent for Dr. Law of Tofield. Upon arrival, the doctor, realizing the serious condition of both father and son, had them both taken to an Edmonton hospital, where the young lad, his lungs scorched by the flames died on Monday at 12:30 a.m.

The funeral was held at Kingman on Wednesday.

Mr. and Mrs. Soma came to the district about four years ago and in common with many farmers, seeking to establish themselves were passing through difficult times. They came from Minnesota and erected the home which was destroyed on Sunday, together with the winter's supply of vegetables, etc. The land is owned by Mr. Soma's uncle who lives in the United States.

FORD V-8 FOR 1936

Ford V-8 cars for 1936, of which details have just been announced by the Ford Motor Company of Canada, Limited, reveal no radical changes in design but include a number of mechanical refinements and attractive new front-end appearance.

Body lines which strike a new note in conservative streamlining, a new [illegible] of the steering and three [illegible] refinements in chassis engineering summarize improvements. The [illegible] V-8 engine of [illegible] unaltered.

[illegible] improved steering [illegible] greater ease and safety of [illegible] at improved transmission using quiet helical gears—formerly used only in second and high speeds—in all forward speeds and reverse.

A new front end treatment gives added distinction to the body lines. The hood is longer, extending gracefully over the attractive new radiator grille. With its vertical slots and more accentuated "Vee," as well as its [illegible] lower edge which [illegible] the streamlined curve of the upper portion of the fenders, the [illegible]

[illegible] stack of small round grilles beneath the streamlined headlamps. Louvres are of new design.

The welded steel body is low and wide with flowing rear quarter lines. [illegible] a Ford-developed baked enamel. There are five body colors, Washington blue, gray, Vineyard green, Cordoba tan, gunmetal and black, of which the first two are new.

Ten body types are available. These are:

De Luxe: Three-window coupe, five window coupe, roadster with rumble seat, phaeton, cabriolet with rumble seat, Tudor touring sedan and Fordor touring sedan.

Without de luxe equipment: Five-window coupe, Tudor and Fordor.

Interiors, especially [illegible] the de luxe types reveal [illegible] modern treatment. The [illegible] is a rich gray, with which the taupe of the upholstery fabrics harmonizes. Instruments are of new design to conform to the modern effect of the new gray metallic pyroxylin instrument panel. Safety glass is standard in windshields and all doors and windows.

It is estimated the effort required in steering has been reduced more than 25 per cent, through increasing the steering ratio to 17-to-1 from 15-to-1, fitting new roller bearings to the steering arm sector shaft, and grinding and lapping teeth of the [illegible] sector. Gear shifting is made easier by reducing the length of travel of the shift lever.

The new steel wheels consist of a [illegible] welded to the rim forming a [illegible] of exceptional strength. Each wheel is nearly five pounds lighter than the former steel spoke wheels. The wheel is completed by a 12½ inch hub cap with polished rustless steel centre. Tires are again 6.00 by 16 inches, 30 pounds pressure.

The cooling system has been improved and its capacity increased to provide adequate cooling under exceptionally severe conditions.

PUBLIC SALE OF LANDS UNDER THE TAX RECOVERY ACT, 1929

Notice is hereby given that, under the provisions of The Tax Recovery Act, 1929, the Town of Tofield will offer for sale, by public auction, in the Town Hall, Tofield, Alberta, on Saturday [illegible] 1935, at 2 o'clock in the afternoon, the following lands:

Each parcel will be offered for sale subject to a reserve bid, and subject to the reservations contained in the existing certificates of title. Terms cash [illegible] otherwise arranged.

Redemption may be effected by payment of the full amount of arrears of taxes and costs at any time prior to the sale.

Dated at Tofield, Alberta this 20th day of September, 1935.

J. W. CHAPMAN,
Secretary-Treasurer

KING-ROOSEVELT TALKS BRING FULL AGREEMENT; CABINET O.K.'S TERMS

OTTAWA, Nov. 11—Announcement that Canada and the United States had reached a definite trade agreement was [illegible] Prime Minister King [illegible] people of Canada.

The [illegible] of the agreement [illegible] Ottawa [illegible]

"I hope Mr. King [illegible] will [illegible] a better way [illegible] problems."

At early [illegible] meeting approved the terms of [illegible] tentative [illegible] Mr. King was in Washington last week and in talks with the prime minister and secretary of state Hull on Saturday night.

President Roosevelt included the announcement in his Armistice day address in Arlington Monday.

The prime minister will proceed again to Washington in a few days to sign the agreement. Until then its details will be kept a closely guarded secret.

After less than an hour of consideration Monday, cabinet council agreed to the draft agreement and Mr. King telephoned the president in Washington.

"[illegible] enough to ask me to sign the treaty on behalf of Canada," Mr. King [illegible]

[illegible] for signing the agreement. He will again go to Washington, sign the treaty and proceed farther south for a week or 10 days' holiday.

"All we have done—we have the power to do," Mr. King said in reply to questions whether the treaty would be subject to any contingencies. "There are no contingencies," he said.

Mr. King estimated the U.S. president had [illegible] the terms into text form for official signatures.

WASHINGTON, Nov. 11—President Roosevelt revealed Monday he and Prime Minister King of Canada "have reached a definite agreement which will eliminate disagreements and unreasonable (trade) restrictions and thus work to the advantage" of both countries.

KETCHAMOOT

Born: To Mr. and Mrs. Jesse McMullen on Monday Nov. 11, a son. Congratulations.

Miss Lois and Harland Thompson of Tofield visited Miss Ethel Coombes Monday afternoon.

Mrs. W. A. Mitchell, who was taken care of at the home of her mother, Mrs. Henderson, was moved home one day last week. We are glad to report that Mrs. Mitchell is better.

Mr. Howard Lee departed on Tuesday for Edmonton on his way to Red Deer, where he will play with the Red Deer hockey team. His father, Mr. Lee accompanied him as far as Edmonton to visit his brother Mr. John Lee.

Several families have installed new radios this fall to help brighten the winter. These are: Mr. Whillans, a De Forest; Mr. John Lee, Marconi; Mr. C. A. Ingram, Philco; Mr. Schultz, Mr. Sears, Sparton; and Roy Lee a Viking.

Mr. Johanne Jack and daughter Olive, and Miss Fawcett of [illegible] were Sunday guests of Mr. Schultz.

Our sincere sympathy goes out to the Soma family in the loss of their home and little son. Mr. Soma will be in the hospital for some time. The funeral of their son was held on Wed. November 13, at Kingman.

The Ladies' Aid will hold a quilting bee at the home of Mrs. L. Carlisle the last Wednesday of the month, November 27. Dinner will be served by the hostess.

[illegible] that half the farmers got their grain threshed this fall, making a [illegible] having the feed and straw stacks for the stock to [illegible] the grain. By the [illegible] we might just as well [illegible] spring and make the [illegible]

Mr. Ralph Whillans who has been [illegible] for the summer months near Barrhead, has been visiting a few days at the parental home.

Mrs. Irma Shope, whose marriage to Mr. George Simpson took place one day last week was guest of honor at a miscellaneous shower given at the home of Mrs. Charles Whillans. The bride was assisted in opening the many useful and pretty gifts by Misses Gertrude Ingram and Edith Davison, after which a delicious lunch was served. The guests included, Mrs. Shope and daughter Irma, Mrs. A. Hosler, Mrs. Gerald Hosler, Mrs. Norman Scott and Mrs. Thompson of Tofield. Mrs. Geo. Cookson, Mrs. Geo. Lawson, Mrs. C. A. Ingram, Mrs. L. Carlisle, Mrs. Earl Carlisle, Mrs. White, Mrs. Harrison, Mrs. Appleby, Mrs. Davison, Mrs. Albert [illegible], Mrs. [illegible], Mrs. Brick, Mrs. C. Coombes, Mrs. Sears, [illegible] Margaret [illegible] Ingram, [illegible] Janet Brown, Edith Davison, Maud [illegible], Margaret [illegible] J. Whillans [illegible]

The monthly meeting of the Ladies' Aid was held at the home of Mrs. J. Appleby Wednesday afternoon of last week, November 6, with 16 members and 5 visitors present. In the absence of the president and secretary, Mrs. Whillans, vice president conducted the meeting. Mrs. C. A. Ingram acting as secretary. After the meeting a social hour was spent, the hostess serving a delicious lunch. In spite of cold stormy weather a pleasant afternoon was spent. The annual meeting next month will be held at the home of Mrs. Sears.

AUCTION SALE OF REGISTERED HEREFORD CATTLE TO BE HELD NOVEMBER 20th

An auction sale of more than usual interest will be held at the Mine Farm, Tofield on Wednesday, November 20th, commencing at one o'clock sharp. In all there are thirty-seven lots to be brought under the hammer comprising both male and female animals of various ages.

This is we believe the first sale of its kind in Tofield district and is of interest, not only to local farmers who wish to improve their stock, but to many breeders of Hereford cattle throughout the province. Catalogues, with the registered name and number of each animal together with a brief pedigree, can be obtained from the Tofield Coal Co. Phone 30. Claude Gallinger is owner and J. W. Burns is the auctioneer.

STRATO BALLOONISTS REACH 74,000 FEET

RAPID CITY, S.D., Nov. 11 — Capt. Albert W. Stevens reported the stratosphere balloon Explorer II had reached 74,000 feet, setting a new unofficial world altitude record surpassing the mark set in 1934 by three Russian fliers.

The Russians, who were killed in descent, were credited with climbing 72,176 feet. The dizzy height reported by Captain Stevens was 12,764 feet beyond the previous U.S. expedition into the thin air—the 61,236-foot mark reached in 1933 by Lieut. Commander T. W. G. Settle and Major Chester Fordney.

SNOWFALL TOTALS 31 INCHES TO DATE

Sending the record snowfall to a new peak of 31 inches for the fall and winter season to date, a total of one and three-fifths inches of snow fell over the week end.

Apparently still unsatisfied with the achievement of tumbling a thicker white blanket over Edmonton than for a corresponding period to date for at least 30 years the weatherman promised "more snow, continued cold" according to a dominion meteorological bureau forecast.

The temperature fell to nine below early Sunday, rose to eight above at midday then fell to a low of two below at 4:00 a.m. Monday. The reading had risen four degrees by 9:00 a.m. A cold southeast wind prevailed.

Edmonton and district main roads were open for the most part, but if the snow continues or a strong wind breaks they will be rapidly rendered impassable.

Hereford Cattle Sale a Success

MAJORITY OF ANIMALS WENT TO OUTSIDE PURCHASERS

The auction sale of purebred Hereford cattle held at the Tofield Mine farm on Wednesday last, was a complete success so far as prices and buyers were concerned but practically all the purchases went to Hereford breeders from a distance.

R. N. Clark of Vernon, B.C. purchased ten head including Prince Domino 26th for $650.00, this being the top price of the sale. Included among Mr. Clarke's purchases was Panama Lady 6th for $225.00, this being the highest priced cow of the sale.

Among the other purchasers were S. Collet, Kelowna, B.C., one cow Ratherne Fairfax Dolly.

Charles Turner, Westwold, B.C., two head.

Eldorado Ranch, Kelowna, B.C., one, Balmore Jessie.

W. J. Edgar, Innisfail, Alta., Nine head, among them being Miss Panama Perfection 5th, $225.00; Sally Domino, $225.00; Willow Miss Domino 20th, $135.00.

A. G. Roper, Innisfail, Alta. one, [illegible]

C. Sorenson, Innisfail, Alta., three head

A. B. Mann Investments Ltd., Scotford, Alta., five head, being three young bulls $200, $250, $195, and two cows Miss Molly 3rd and Dolly Domino.

Elmer Georgiein, Tofield, Miss Dodo. Earlier in the year Mr. Georgiein purchased a young Hereford bull unrelated to Miss Dodo.

Kendall Stock Co., Kew, Alta., four head, Miss Panama Domino, $210.00; Miss Don Domino $195.00

The weather was fine and while the snow was deep, a good number turned out for the sale.

Among those who visited the city last week are: Mrs. Cap Lee and Delmer, Gwen Firth, Mrs. Wilson and Lola, Mrs. Sam Johnson.

BEHIND THE HOG

By A.B.C.

If no curlers smiled and no curlers cheered,
And no curlers boosted along.
If each curler looked after himself,
And the good rocks all went to the strong,
If no curler cared just a little for you
And no curler thought about me,
And we stood all alone in the house filled with stones,
What a dreary old rink she would be.

****

When the President's Missus slipped on the ice, Doc said, "Keep your chin up," but he forgot his bandages.

****

After playing and dickering around for 3 or 4 days, the President and his hirelings finally stepped into high and collected 17 rinks for the Mixed. Some of the executive seem to think this committee was picked for looks, but having served several years on it I know it is a working committee. I can assure you that it is not a position you hold but a job. What say, Mr. President.

****

Knocking is constructive at the rink — but for Gosh sakes use a hammer and Nails.

****

The Mixed Spiel started with a Bang, also a flock of misplaced stones — Geo. McLaughlin flung the first rock "or did he." The ice was lovely, but with the rink plastered and cluttered up with literature concerning don'ts and cannots for curlers, the new curlers find it hard to concentrate.

****

The Ladies have organized under the new rating system, under a secret system. We could write columns about this but have to live and work in Tofield, it reminds me of the old story. "And can you keep a secret?" I asked a dame who curled. She answered "Yes, you bet I can, I'll tell the cockeyed world.

****

The draws for this season will be posted at the Meat Shop. Yours for more and better meat. They will be posted well ahead, so not to conflict with other dates. Paste them in your hat. The draw committee change no draws, arrange with your opposition.

****

We pick up a few alibis every night which along with our old stock are available for all paid up members.

****

Mack's two proteges, B.C. and A. B. dropped the 1st game, but then most of the young rookies hit for the Miner League after the training season.

****

The Draw Committee have put the Stansfield's on and therefore you have no excuse if you are late for your games.

****

Sing a song of Curling, out to do or die,
17 good looking skips, feeling very spry.
Some will play in finals, let all the curlers sing,
We'll vote for the winners, and the prestige it will bring.

****

Watch for the final results of the Mixed Spiel next week. My choice, Yakabuski vs. McLaughlin. You pick em.

****

Know the West says the Denver Post.

One curler remarked that the rings looked like Jacobs coat of many colors. We refer him to Genesis 37 Chapter, where he will find that it was Joseph's garment that was referred to.

THE TOFIELD MERCURY

LINDBROOK

The recent onslaught of King (some king) winter has just about crimped things here; no one seems to be doing much hence not much news.

Most of the threshing got done somehow but the yields were very disappointing, and there is still quite a lot out in the stooks under the snow and its problematical as to whether it ever will be threshed. The early winter and snow has worked havoc with the feed supplies which were none too bountiful at the start and taking it all in all it looks as if 1935 will be a year remembered by all.

There have been two dances at the school here lately in aid of the childrens Christmas Tree. One was a pie Social and the other a Shadow Dance. Owing to the state of the roads and the cold weather, and also probably the financial conditions neither were very well attended and the returns rather meagre. It looks as if something desperate will have to be done to get funds for the tree.

One individual was asked what he thought of the weather, he replied that his reply was unprintable, another one said it was part of this "cultural heritage" that we hear so much of. Well they can have my share if this is it.

Several got the Armistice programme on the 11th November from C.J.C.A. put on by Captain Harry V. Coles, M.B.E. Edmonton and several of the "boys" thought it very good and would like to express their appreciation of it and of Captain Cole's efforts in making it possible maybe some friend of his will mail him a copy of the Mercury and let him know how we liked it, it came over very good and timed to the minute. "Give our love to the Sergt. Major" from the Lindbrook "troops."

Mr. and Mrs. Dacre who have been living north of Lindbrook for the last few years have left to reside in the U.S.A.

UNITED CHURCH NEWS

On Sunday evening 24th November the Sacrament of the Lord's Supper will be administered in the United Church. It is hoped there will be a good attendance of the membership for this occasion.

On Thursday 28th, at 8 p.m. the Rev. J. C. Mathieson of North Honan, China, will deliver an address. The press report speak of Mr. Mathieson as a magnetic, interesting and arresting speaker. We are fortunate in having Tofield on his itinerary. Do not miss hearing this splendid and enthusiastic missionary.

ONE CENT SALE GOING OVER BIG

The semi-annual one cent sale sponsored by the Rexall people and conducted in Tofield by A. A. Beirnes, druggist is proving as popular an event as ever. The bargains at this sale are real, two articles for the price of one plus one cent. The list is large and comprehensive and comprise many valuable household remedies, toilet goods, candy, nicknacks etc. The sale lasts until Saturday November 23rd.

Mr. John Lee sr. Passes Away

John Lee, 63, resident of Tofield for over 25 years and prominent in curling circles there and in Edmonton, died in Edmonton Wed. He had been ill for three months.

He was well known among curlers at the Edmonton bonspiel and last year's 'spiel was the first he had missed for many years. He won the visitor's competition three years ago.

A grain merchant, he was on the Tofield school board for 10 years, four years as chairman, and retired early in 1935 from that body. In 1912-13 he was on the town council.

Surviving are Mrs. Lee, children Mrs. John Aitken, Edmonton, Mrs. M. O'Brien, Ryley, Clifford E. Lee and Allan Lee, Edmonton.

Funeral will be held Friday at 2:00 p.m. from Andrews Brothers 112 st. chapel with Tofield lodge A. F. and A. M. participating. The Tofield lodge has asked Edmonton Masonic brethren to attend.

LOCAL AND PERSONAL

Miss Margaret Smith of Alliance spent a few days visiting Miss Muriel Malcolm last week.

A good crowd attended the dance put on by the curling rink last Friday night.

The Misses Mary Bernett, Edith Barden and Lois Thompson spent the week end in the city.

"Genial Joe" of the Club Cafe staff visited Edmonton on Tuesday. On Wednesday he visited Viking where the firm with which he is connected has business interests. They were not included in the fire losses of Wednesday.

Mr. and Mrs. Harold Hicks and young son, Bunty, returned home from Rochester on Saturday morning, having visited the Mayo Brothers clinic there. Mr. Hicks is at present convalescing.

Mrs. George Brace is recovering from an illness brought on by contraction of a severe cold.

CATHOLIC MISSION CONCLUDED LAST WEEK

Lasting four days, and considering the weather, being well attended, the Catholic Mission conducted at St. Francis' Church, Tofield, was brought to a close last Thursday night.

Rev. Father J. T. O'Sullivan was the principal speaker and his addresses were both inspirational and educational. Father O'Sullivan has conducted many missions at numerous points and delighted those who took the opportunity of hearing him while here.

SALE OF WORK AND CHICKEN SUPPER WELL PATRONIZED

The sale of work and chicken supper held by the Tofield C.W.L. on Saturday afternoon and evening was a decided success. In addition to the joy created by the bewildering array of good things to eat at supper time, an enjoyable social time was spent by those attending. Bingo was played extensively which in addition to creating much wholesome fun, resulted in quite a number winning valuable awards.

During the evening a draw was made for prizes the following being the winners:

1st, Hooked rug, E. Wuetherick; 2nd, Cut work pillow slips, Mrs. Pelot; 3rd, Cut work runner, Mrs. F. Seale; 4th, China Tea pot, C. Kallal jr.; 5th, Cup and saucer, John Cymbaluck.

The ladies of the C.W.L. wish to express their thanks to all those who by their contributions and support helped to make the event a success.

BOY SCOUTS TO REPAIR TOYS

The 1st Tofield Boy Scout Troop are once again having a Toy Repair Shop and would appreciate the donation of any used or broken toys. Christmas is liable to be dull for some poor kiddies. Would you help us to make it brighter for them? If so please look in the store room or shed.

The leaders or boys will be pleased to collect them.

Thanking the Editor of the Mercury for kindly inserting this notice and all who co-operated last year to make a success of the Toy Shop.

Signed on behalf of the boys,
Rev. A. Wallis,
Scoutmaster

THE NEW TRADE AGREEMENT—

THERE IS A strong current of opinion that the natural channels of trade on this continent run north and south. That regardless of different political affiliations, the great similarity between the American and Canadian people as regards language customs, etc., provide a ground for easy trading. Consequently the American and Canadian people may be excused for being a little jubilant over the recent signing of the trade agreement. Both countries were granted some benefits, which country received the best of the bargain is not so important perhaps as whether the whole agreement is reasonably fair as representing a deal between two parties.

This question of tariffs is an interesting one and represents "jockeying" as an art of a high degree. Designed for two purposes, that of providing revenue for the government and as protection for domestic industries, wherever there are tariffs there is a clash of conflicting interests. This is fairly well proven because no sooner had the new agreement been announced then opposition as well as approbation was expressed on both sides of the international border.

While a number of items directly affects the Alberta farmer, probably the most important is the reduction of the tariff as regards entry of Canadian cattle to the United States. The cattle market for many years has been anything but profitable, due to the lack of export markets. Great Britain took some of Alberta's cattle, but on the whole the trade was hardly satisfactory as the expense of rail and ocean transportation cut too deeply into the final returns to the cattle raiser. The United States tariff was an insurmountable barrier, and for all practical purposes there was nothing but the home market left, which as regards price was unsatisfactory. A perusal of the agreement as published in newspapers this week shows the reduction in cattle to be one cent per hundred pounds. The tariff was three cents and it has been lowered to two cents. There is a limited quantity of cattle to be allowed entry at the reduced rate and the rate is not the same for all classes of cattle. Even so the general effect of the tariff agreement as regards cattle is heartening, the gain is not as much as we would wish, but it is nevertheless a gain.

An encouraging feature about the agreement is the announcement that it will in no way detract from the advantages gained by the Ottawa Economic Conference. We sincerely hope the future will prove the announcement to be correct.

While we specifically mentioned cattle there are of course, literally hundreds of other products and articles affected by the new tariff. This applies to products both coming and going across the international line. In the big majority of cases, the tariff is cut to smaller percentage. Only rarely is it abolished. The following excerpt taken from an article entitled "A Trade Deal With Canada" by W. Y. Elliott, professor of Government, Harvard University, is interesting, giving as it does the American point of view on the agreement:—

> "We stand to gain tremendously if we can really meet Mr. King halfway. The Ottawa agreements hurt us without really helping Canada. He is our natural ally in bringing Canada once more into the natural economy of the American continent, and he has won an election on that issue.
>
> It would be a tragic pity if Canada's moral lead and real willingness to open doors should not get the full response of the United States. The recovery program is at a point where Mr. Roosevelt must push on freer trade if his country is not to stagnate into a perpetual program of limiting production.
>
> At the crucial period of world history, when the great democracies are confronted by an international situation of very grave danger to their own peace, it is more than ever essential for the United States to aid in the economic reconstruction of a sane international trade. Canada is a strategic point for a beginning. The objections against receiving goods produced by "coolie labor," doubtful enough in any case, certainly do not apply to the products of our Canadian neighbor.
>
> Canada and the United States are enabled to initiate a real breach in the hopeless situation created by impassable trade barriers between the nations. Reports of opposition by certain trade interests are comparable to that anticipated in Congress where a dozen or so senators see only the votes of their own interested constituents — not one hundredth part of the nation which ought once more to enjoy $1,000,000,000 yearly trade with Canada.

CAUSES AND EFFECTS—

HOW LITTLE we know of the consequences of our acts! "There is not a Red Indian hunting by Lake Winnipic"—(there was no Winnipeg then)—"can quarrel with his squaw, but the whole world must smart for it," wrote Thomas Carlyle ninety-odd years ago. "Will not the price of beaver rise? It is a mathematical fact that the casting of this pebble from my hand alters the centre of gravity of the universe." That was Carlyle's fantastic way of saying that effects have their causes and causes have their effects. Suppose he could revisit today this world of causes and effects. Would he not be amazed to find among the nations so much disregard of the plain facts of the interdependence and entanglement of human affairs?

HEALTH

by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

GROWING UP

The child's life is one of continuous growth and development. Born with certain instincts and a given measure of intelligence, his future depends largely upon how he is helped, particularly by parents and teachers, through his various stages of development.

Much has been revealed by science concerning the nature of disease. We are, today able to do more in the prevention of disease and in the preservation of health than ever before in the history of man.

We have learned that if a child is to grow up in a satisfactory manner, his mental and emotional development must receive consideration. It is generally agreed that what kind of adults we are to become depends, more than anything else, upon the start which we receive during the first five years of life.

The child requires a sense of security in his home. He needs freedom to develop, to become independent and to free himself gradually from his mother's apron-strings. Many parents find it hard to let go. The mother who is over solicitous and over-protective in her relationships with her child is almost surely expressing some lack in her own life. She wants someone to depend on her, but what she may think is an abundance of love for her child is really an expression of selfishness on her part.

The child must learn to overcome difficulties and to meet problems. He should be assigned tasks, suited to his age, which will call upon his powers to overcome. He must not fail too often, or he will come to accept failure as normal. The child wants to achieve and to receive for his achievements that recognition which he should have.

It is when normal development is halted by the lack of some of these essentials for healthy mental growth that the ground is being laid for difficulties in later life. Many of the problems and difficulties which afflict mankind rise from failure to grow up emotionally.

One thing we know is that as adults we make use of physical complaints to escape from something unpleasant if we have not learned, as children, to face conditions. Headache may arise from eye-strain or from gastric ulcers, but may also come from worry, fear, anxiety or family discord.

The future happiness and efficiency of each one depends largely on his start in life. If, as adults, we remain in part children, then we are likely to have an uncomfortable time ourselves and to be a nuisance to others. Parents should learn how to guide their children to maturity — to help them to grow up.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

DOMINION EXPERIMENTAL STATION, LACOMBE, WEEKLY NEWS LETTER

Characteristics of Alberta's Main Bacon Hog Breeds

Of late years the breeds of swine in general use in Alberta have been narrowed down to the two foremost bacon breeds — Tamworth and Yorkshire. The Dominion Experimental Station, Lacombe, has found that each breed has its own particular advantages and disadvantages, and that there are good and poor strains in each, so that the selection of the strain within the breed is more important than the selection of the breed itself. Breeding stock should show good breed type, with plenty of constitutional vigour, and should be from parent stock of proven performance, both as breeders and feeders.

Unfortunately, Tamworth sows are not as prolific as Yorkshires. The pigs have good depth of side, but most strains are somewhat lacking in length and in filling of the hindquarters. However, Tamworths almost invariably show good fleshing of back and loin, and are well finished at a weight of from two hundred to two hundred and twenty pounds.

Yorkshire sows of good strain produce large litters of uniform, easy feeding pigs possessing good length, a large proportion of which grade select. Because of its white colour and consequent tendency to sunscald some breeders are prejudiced against the Yorkshires; however, supplying suitable shelter and oiling the pigs will greatly lessen the damage done by the sun. As they are quite the best for winter feeding, and as both experimental work and practical experience have shown that Yorkshire pigs of good feeder type will produce pork at lower feed costs than any of the other breeds, Yorkshires are popular with most farmers. Also, because of the absence of the "seedy cuts" common in coloured breeds, the Yorkshire enjoys the favour of the packer.

THE WHEAT YIELD FOR 1935—

The yield per acre of wheat for this past season in different areas and districts of the Prairie Provinces, is probably the most varied that has been recorded for many years past. On the whole the moisture that fell during the season was sufficient to produce an average crop in most districts and a bumper crop over a large area. Unfortunately during the growing season rust and frost took a heavy toll from the growing crops and reduced prospective yields from a promise of 30 to 50 bushels to the acre in many districts down to as low, as some points, as 5 bushels only.

Rust took a heavy toll in Eastern Saskatchewan and in Manitoba. The loss from rust in wheat alone is estimated to have been about 100 million bushels.

Northern Alberta and Northwestern Saskatchewan suffered badly from frost. Only a comparitively small area, however, suffered from drought this year. This consisted of a strip some 75 miles wide, starting around Lethbridge in Southern Alberta, and extending from there in a northwesterly direction to Northern Saskatchewan, the centre of the area passing between Lloydminster and North Battleford. The area in Southern Alberta, Saskatchewan and Manitoba, South of the C.P.R. line, which some thought would be forever a "Great Canadian Desert," showed splendid prospects for a bountiful crop, indicating that whenever sufficient rainfall occurs the fertile soil in this area can produce abundant crops. Much of the fine prospective crop, however, was severely damaged by rust, which unfortunately not only substantially decreased yield, but as well lowered the grade of the grain in some points down to the bottom level.

The following outstanding features with respect to the varied conditions which prevailed, are worthy of note:

(a) That Reward wheat gave a higher yield and better quality under rust conditions than did Marquis, Garnet, Red Bobs or Ceres, although, of course, Reward not being a rust-resistant wheat still suffered somewhat.

(b) That early sown crops suffered less than those which were seeded later.

(c) That within both the rust and frost areas the use of fertilizer substantially increased the grade and yield of wheat, oats and barley.

(d) That it seems certain that reasonable security with wheat crops will not be assured in Eastern Saskatchewan, nor in the greater part of Manitoba, until a wheat variety, highly resistant to rust, is available to farmers.

(e) That Thatcher wheat (a rust-resistant variety developed in Minnesota) and the new rust-resistant varieties now being developed by the Dominion Rust Research Laboratory, Winnipeg, successfully withstood the rust infection and suffered no appreciable damage either in yield or grade. —Research Department Searle Grain Company, Limited.

ROYAL HONEYMOONERS VISIT WESTERN CANADA

WINNIPEG, Man., November 16— Royal honeymooners, the Prince and Princess of the Asturias, visited the city for forty minutes recently and paid tribute to the memory of the dead of the Great War before Winnipeg's Cenotaph.

On a wedding journey around the world, the young royal couple, travelling incognito as Don Juan de Bourbon and Princess Maria Mercedes Bourbon-Orleans, journeyed westward over Canadian National lines to spend a week at Jasper, enroute to the Pacific Coast.

From the cenotaph they rode to the legislative buildings grounds, circled Manitoba's capitol, then continued across the river to drive along Wellington crescent and on several residential streets in River Heights. They were then taken back to the centre of the city, where the car cruised through the business districts and finally returned to the Canadian National station.

Despite their experience in Toronto, where thieves invaded their suite in the hotel while they were at lunch and stole 19 pieces of Princess Maria's jewelry, valued at $7,500, they expressed admiration for Canada and Canadians while they talked with reporters for a few minutes before their train pulled out of the station.

In excellent English that showed the influence of his English mother, of an Oxford education and a term in the British navy, the tall young prince, who is the heir-presumptive to the throne of Spain, laughed when he commented on the weather and said, "Remember, we are going to Jasper, where it may be still colder." The Princess, who had carried a movie camera but did not take it out of its case while she viewed the city, also laughed at the reference to the cold.

The Prince's manner showed he preferred not to talk about the possibility of the restoration of the Spanish monarchy, but he did not hesitate when questions were asked by reporters. He said he believed there was a good chance, since there was a strong group in Spain who would like to see the royal family returned.

The whole situation was political and so it was difficult to say what would happen, he also said. He added that if the monarchy were returned, it would be his father, King Alfonso, who would take the throne.

After their honeymoon, they will likely live in France, although so far they have not decided definitely, the Prince said.

MUNICIPALITY QUITS PROVINCE PAYMENTS

NORTH BATTLEFORD, Nov. 11.—Council of rural municipality of North Battleford has by resolution shut down further payments in respect to public revenue taxes, payable to the provincial government. In event of dispute the members say, they will garnishee all monies on hand or due by ratepayers on account of public revenue taxes.

This drastic step, endorsed by a vote of four to two, is in line, it is pointed out, with a policy advocated by the Saskatchewan Association of Rural Municipalities for the past 18 years. Action by the local council is believed to be aimed specifically at the relief and indigent problem.

No money required!

In Olden Days Before Bookeeping Was Practiced - - -

Business was largely a matter of barter. With no currency systems to guide them, trading folk swapped goods and services. Today, in spite of wonderful advances in the business of banking, fund transferance etc., the barter system is not completely dead. Even in businesses of considerable magnitude between individuals situated in different countries, a two-way, three-way, or four-way plan is resorted to, by which goods are more nearly exchanged then purchased outright.

The Tofield Mercury has done considerable barter business for the past four years. In the payment of subscription accounts we have taken almost every variety of thing a farm produces, including wheat, oats, flour, butter, eggs, poultry, pork, beef, lard, etc. We prefer money of course, but again this year we will accept produce in payment of subscription accounts, both current and arrears.

We know that the year 1934 was not as good as it might have been. Perhaps no business reacts more quickly to "hard times" than the country newspaper business, and when it is "tough sledding" for the farmer it is equally tough for the newspaper man.

This is the time of year when many subscribers pay their renewals. Already a number have dropped into the office and paid up. If conditions are not **Too Hard** with you — may we expect you too?

THE MERCURY

CRATE FEEDING INCREASES POULTRY INCOME

By a simple method of crate fattening on a ration of finely ground home grains, boiled potatoes and sour milk, there is no reason whatever why a very large percentage of the poultry marketed should not be made to qualify for grade Special and grade A, and thus return for the farmer a better revenue, states a circular on "Poultry Revenue" issued by the Dominion Department of Agriculture. There is an evident need for this circular as only 22.93 per cent of the chickens inspected in Canada during a recent period qualified for grade A, and the reason for this very small percentage was that the chickens were not sufficiently fattened before they were marketed.

There are various fattening mixtures that give good results, but, as the circular explains, the point is to make use of the feed produced and available on the farm. The best results will be obtained if the birds are put in disinfected crates four or five weeks before marketing. The crates should be put in reasonably warm quarters free from draughts and the birds should be fed morning and evening, and the following ration is recommended: equal parts oats, wheat, barley or buckwheat. Add boiled potatoes at the rate of one-third of the total weight of the meal mixture. Mix with sour milk so that the mixture will pour easily. Further detailed information on crate fattening may be secured by writing the Publicity and Extension Branch, Dominion Department of Agriculture, Ottawa, for Pamphlet No. 128 on preparing poultry for market, or information may be obtained from the various provincial Departments of Agriculture. The crate feeding of the birds places the production of poultry on a substantial financial basis.

RUST RESISTANT WHEATS NOT YET SUITABLE FOR CENTRAL ALBERTA USE

This fall, after a summer when black stem rust destroyed a large proportion of the wheat crop on the prairies, a great deal of publicity has been given to the new rust resistant varieties.

In an endeavour to determine their suitability under Central Alberta conditions all of these varieties have been tested for a number of years at the Dominion Experimental Station, Lacombe. Although these new varieties appear to be admirably adapted to the climatic and seasonable conditions of those portions of the wheat belt in Manitoba and Saskatchewan where rust is prevalent, they are too late maturing to make it advisable to grow them in the park belt of Alberta. Most of them are as late or later than Marquis in maturing.

The problem in Central Alberta is altogether different from that of those areas in the wheat belt which are engaged in a battle to the death against rust. In Central Alberta, where there has never been any appreciable rust damage, the struggle takes the form of a race against frost.

A vast amount of experimental research is being applied to the problem of breeding up new and better varieties of wheat, and doubtless it will not be long before improved early maturing sorts that are both high yielding and rust resistant will be produced; but until such varieties have been made available to the public it will be advisable for the farmers of Central and Northern Alberta—where frost, rather than rust, is the vital problem—to continue growing the earlier-maturing standard varieties.

URGE MOTORISTS CHECK OVER CARS FOR WINTER DRIVING

A careful check-over of your motor car at this time of the year in preparing for winter driving is essential, according to officials of the Alberta Motor Association.

Close examination now may eliminate mechanical difficulties or other troubles that might develop during cold weather.

Brakes, tires and lighting apparatus should be given a thorough inspection, just to make certain that they are functioning properly and will continue to do so under winter driving conditions.

Motorists also are warned to be on their guard against the deadly carbon monoxide. There always is danger in running the car in a closed garage.

The approach of cold weather always brings an increased toll of deaths from carbon monoxide. To combat this hazard, motorists are urged to make sure a window of their car is always open and to keep their motors in accurate adjustment so that a minimum of harmful gas will be generated.

The heavy toll of road accidents also serves as a warning to motorists to carry insurance protection. In recent months many members have benefitted from the special accident insurance given free with memberships in the Alberta Motor Association.

GOVERNMENT HAS EMPLOYED A WELL KNOWN LION HUNTER

(From The Banff Crag and Canyon)

Ed. Lee of Rock Bay, Vancouver Island, known on the coast as "Cougar" Lee, arrived in Banff this week, accompanied by Mrs. Lee and their two sons, and will take up their home here for the winter.

Mr. Lee has accepted an engagement with the local game department to hunt for mountain lions in the park, his commission being a roving one, taking him to any district in the park for the purpose of chasing down these big cats, which for the past several years have been on the increase. The hunter brought with him two dogs, Pedro and Joe, famous for their skill in tracking down and treeing lions, holding the animal in the tree until such time as their master can get to them to despatch the quarry with a well placed shot.

Mr. Lee told the Crag and Canyon reporter that these dogs are a cross between a blood hound and coon hound. Their mother is a registered blood hound, brought to Vancouver Island from California, the father being a pedigreed coon hound from Tennessee. In his years of experience Mr. Lee says that he has found this cross of dog to be ideal for lion hunting, their keen scent always taking them to their quarry once they have taken the trail. The dogs are full brothers. Pedro has been at the kill of some 200 lions while Joe has upwards of 300 to his credit. When the dogs tree a lion they remain on the spot setting up a constant barking to attract their master and have never been known to leave their quarry.

Asked how long they would stay with their prey Mr. Lee stated he was not able to tell that as they have never been tested. One morning Lee left home on a hunt with the two dogs. Within a few minutes a lion trail was picked up and the dogs were started, the hunter following as fast as he could. It was not long before the "tonguing" of the hounds could not be heard. Lee persevered but nightfall overtook him and still the dogs had not been located. He camped out overnight and early in the morning struck out for home. On arrival, his wife told him that she heard the dogs in a certain direction at intervals the day previous. Getting his breakfast Lee struck out again and within a short time heard the dogs, but it wasn't until four o'clock in the afternoon that he reached them. They had chewed big gouges in the trunk of the tree in which the lion had taken refuge, indicating that attempts had been made to bring the tree down.

For a number of years from 1926, he was on the staff of the B.C. game department with a roving commission. He was paid a salary and was allowed to collect the bounty of $40.00, later the bounty was reduced to $30 and still later to $20.00. When the Tolmie government took office, as a measure of economy Lee was let out from the service and the bounty was entirely removed.

"There being no incentive to hunt lions, everybody quit, and within a couple of years the big cats increased at an alarming rate and today Vancouver Island is overrun with them. The deer, which at one time were very numerous on the Island, are being sadly depleted in numbers. Big grey wolves have also made their appearance in late years and they are also taking toll of the deer. Strenuous efforts must be made to reduce these enemies or there will be no deer left on the Island. The B.C. government has put back the bounty to ten dollars but that is not an inducement to do much hunting," said Mr. Lee.

Mr. Lee has killed upwards of sixty lions this year. In one week in June he destroyed ten of the big cats.

The hunter left today for Massive and will look over the ground there for a few days, and his movements are uncertain. "I've got to get acquainted with the country and learn where the range of the big cats is located," he said.

Asked as to the number of lions he had killed in his career he said he did not know. "I've been hunting lions all my life, whenever the chance occurred. Lion chases, sure I could tell you of a few that would be interesting and perhaps the next time we meet I will tell you of chasing a big 'tom' on Valdez Island for eighteen days before the dogs finally forced him up a tree. He was a dog killer that lion," said Mr. Lee as he left the reporter.

MUNICIPAL DISTRICT OF BEAVER LAKE NO. 486

The meeting was called to order at 2:30 p.m. by Reeve Moen. Councillors Chetney, Hillerud, Moen, Lucas, Kuben and Fane present.

Minutes of the previous meeting were read.

Moved by Mr. Hillerud that the minutes be adopted as read. Carried.

Minutes of the special meeting of October 7th were read and moved by Mr. Fane that they be adopted as read.

Moved by Mr. Fane that we agree to settle our hospital accounts with the Royal Alexandra Hospital for $1,000.00, being our account in full to Nov. 30, 1935. Carried.

Moved by Mr. Hillerud that the Reeve and Secty. be empowered to interview the Royal Bank of Canada at Ryley with the object of procuring $1000.00 to cover the above mentioned hospital account. Carried.

Mr. Young interviewed the Council regarding the road allowance W. 12 [illegible] and the same [illegible] and was [illegible] by the Reeve that he would personally see that some work was done on that road if necessary in 1936.

The [illegible] of Circulars from the Department were read by the Secretary pointing out that the [illegible] are to forward [illegible] applications after November 1 and that the Government would reimburse the Municipal District at the following rates. Of the first $7.50 per month the Govt. would pay $5.00 and the Municipal District $2.50. Any amount over and above the $7.50 would be split on a 50-50 basis, the Government to pay 50 per cent and the Municipal District 50 percent.

Moved by Mr. Moen that we advise the Provincial Government, Estates Department that the surplus grain from the [illegible] estate be turned over to Mrs. [illegible] to provide for her livelihood. Carried.

Moved by Mr. Lucas that we table the matter of raising Mother's Allowance for Mrs. Katie Romanisson until the next meeting. Carried.

Moved by Mr. Lucas that we do not grant any fee to the Salvation Army and that the Secretary explain to them our financial position this year. Carried.

The Secretary was instructed to write to the Northern Grain Company at Calgary, giving details of the road condition at and around Shonts Siding. Also pointing out that the particular road line mentioned in their letter has been found unnecessary by the farmers living in that locality.

Moved by Mr. Lucas that we approve the restaurant license in the case of F. [illegible] Klodnchuk, Haight. Carried.

Moved by Mr. Kuben that the Secretary be instructed to prepare a financial statement each month for each Councillor and that same be placed in the Councillors file. Carried.

Moved by Mr. Fane that the following resolutions be forwarded to the Municipal Association: (a) Whereas a great deal of our Municipal Relief is caused by Hail each year and whereas a number of the farmers have to be supplied with seed grain owing to Hail, thereby be it resolved that Hail Insurance in the Province of Alberta be made compulsory at a rate sufficient to warrant $5.00 per acre in case of full loss. (b) Whereas the Municipal Districts are finding it too heavy a financial problem to supply seed grain to the ratepayers this year, thereby be it resolved that the whole problem of supplying seed grain for 1936 be a matter for the Provincial and Federal Governments.

Moved by Mr. Hillerud that we meet again at 2 p.m. on Dec. 14 1935.

Moved by Mr. Moen that we instruct the secretary to advise the Provincial Government of all hospitals concerned that our hospital agreement at the 75% rate will be effective December 5, 1935. Carried.

CONSULT OUR AGENT AT LINDBROOK

WIT And WISDOM

Then Came the Storm

He pulled up at the Hotel Colossus with a whir of brakes. The commissionaire was beside the car in an instant.

"Good morning, sir," he said ingratiatingly. "Much luggage, sir?"

"Three bags," replied the young man, climbing out.

Three short blasts on a whistle brought three page boys racing through the revolving doors, and the luggage was solemnly carried in.

The commissionaire piloted the arrival to the door, where the head porter was bowing abjectly.

"This way, sir."

Scurrying footmen paused respectfully to allow the guest an unimpeded passage to the reception office.

"Name please?"

"Stubbs—Timothy Stubbs."

"Care for a balcony room—er—Mr. Stubbs?"

Tim Stubbs scratched his head.

"I'd like one miss, but do you think it'll be all right? You see, I'm the new waiter."—Tit-Bits.

••••••••

Boston Maid

"Will you please sweep out the room?"

"Well, madam," said the Back Bay maid, "I'll sweep out the dirt."

••••••••

Splitting Hairs

Hairdressers, a Chicago dispatch informs us, complain that "ordinary barbers in the Midwest are calling themselves hairdressers, to the great detriment of the advanced profession."

Reminds us of the late Judge Joseph Quinn of the Massachusetts Superior Court. In his court one day the district attorney, questioning a witness, asked, "You are a barber, aren't you?" The witness replied pompously, "I am a tonsorial artist." "Well, now," put in Judge Quinn, isn't that splitting hairs?"—Philadelphia Evening Bulletin.

••••••••

Her Weakness

An American playright noticed her colored maid pause in her cleaning of the apartment to pick up the manuscript of a new and very unsold play. The girl read for a minute and then broke into hilarious laughter. Naturally much pleased, the playwright asked what passage had struck her as so funny.

"No passage at all, missy no passage at all," replied the domestic. "It just don't take much to make me laugh."—New York Evening World.

TARIFF WALL LET DOWN A NOTCH THROUGH TRADE AGREEMENT

HOW TREATY OPERATES

Canada Gives:

Under the new treaty, Canada gives the U.S.

Most-favored-nation treatment.

Minimum tariff rates accorded any country apart from countries of the British Empire on every commodity.

Specific further reductions on 88 items in the Canadian tariff.

Free entry of 20 items now dutiable.

A guarantee not to increase the intermediate tariff on 77 items.

A guarantee not to impose duties on 15 items now duty-free.

Canada Gets:

The U.S. grants Canada:

Most favored nation treatment.

Minimum tariff granted any country outside U.S. possessions and Cuba, on every commodity.

Reductions in duty on [illegible] items.

A guarantee of continued free entry for 21 items now on the free list.

Assurance of no increase in present duties on four items.

OTTAWA, Ont., Nov. 18 — Back to the billion dollar trade level Canada and the United States start on January 1st with the promulgation of a treaty of reciprocity between the two nations which becomes effective on that date.

From the Atlantic to the Pacific the transcontinental trade divide has been levelled down, and the boundary which has seen no war in over a hundred years will now be shorn of its trade war.

To the United States the King-Roosevelt pact gives Canada's most favored nations treatment in general with special tariff concessions on special items. A similar grant is made by Washington to Ottawa. With the lowering of these barriers the trade stream, which has been down to half a billion dollars, will swell beyond the billion dollar mark.

To Canada's farmers, lumbermen, fishermen and miners, the basic workers of Canada the new treaty offers hope of early salvation from the depression. On the Atlantic the potato flow will be resumed and fish will find easier access to American markets. The fisheries interests of the New England seaboard have been successful in holding out against any influx of Canadian-caught cod, but other fish get lower rates. In British Columbia the fishermen will benefit greatly by the concessions on salmon and halibut.

The central provinces see hope in the recovery of the American market for cattle and dairy products. The States west will find a better market for its beef cattle. British Columbia benefits by a 50 per cent cut on lumber and need no longer worry so much about Russian lumber.

Ontario and Quebec will find the maple sugar duty reductions in good time for the spring flow of sap, the duty being cut from six to four cents. The same provinces benefit greatly by the cut in the whisky taxes, together with British Columbia. The cut from $5 to 2.50 a gallon is likely to increase the annual shipments from 3,000,000 to 10,000000 gallons.

EMPIRE PREFERENCE STAND

It is made clear in the agreement that nothing may interfere with the Imperial preferences. There was some question at the last Imperial conference about most-favored-nations treatment, and the possibility of claims by other countries to the concessions made between Empire countries. The principle was laid down that Empire preferences are a thing apart and do not come within the range of most-favored-nations concessions.

The treaty is hailed in Ottawa as a great achievement. Credit is given in the agreement itself to Mr. Bennet's efforts and his valuable contribution in laying the groundwork. Mr. Bennett's failure, however, lay in his refusal with respect to the nuisance imposts he himself had put on and refusal to make concessions to American manufacturers. Mr. Bennett is willing to exchange most-favored-nations treatment with the United States.

WARNING TO RADIO LISTENERS

Owners of unlicensed radio receiving sets are hereby warned that on and after 30th November, 1935, the Department of Marine will take steps to prosecute the owner or operator thereof.

Broadcast listeners who have not already procured their licence for the current fiscal year are accordingly advised to obtain such licence immediately.

The licence fee is $2 00 per annum.

Licences may be procured from Post Offices in cities and larger towns, Departmental Radio Inspectors, Radio Dealers, and others authorized to issue licences on behalf of the Department, or from Radio Branch, Department of Marine, Ottawa, Ont.

By order

R. K. SMITH,

Deputy Minister of Marine

Ottawa, November 15, 1935.

MUNICIPAL DISTRICT OF CORNHILL NO. 487

RE HOSPITAL AGREEMENT

Public Notice is hereby given that there has been introduced in the Council of the Municipal District of Cornhill No. 487, a Bylaw of which the following is a short synopsis:

"That in order to provide for the hospitalization of sick residents of the Municipal District of Cornhill No. 487, and in order to carry out the provisions of the Municipal District Act and the Hospital Act, in that behalf, the Council shall enter into an Agreement or Agreements with an approved Hospital or Hospitals, for the care and treatment of sick residents of the District; such Agreement or Agreements providing for payment by the District to such approved Hospital or Hospitals for such care and treatment the sum of seventy-five cents per patient day and limiting the liability of the District to such approved Hospital or Hospitals for such care and treatment to such payment, and that a copy of same may be seen in each of the following places.

Deville Post Office; Hay Lake Post Office; Kingman Post Office; Tofield Post Office; Municipal District Office; Lindbrook Store; Residence of Chas. Holmberg, N.E. 1-49-21-W 4 M; Ministik Hall.

And further, unless within 30 days from the publication of this notice, at least 15 per cent of the proprietary electors of the Municipal District of Cornhill, No. 487, petition the Council to submit such bylaw to the vote of the proprietary electors of the Municipal District, the Council will proceed to pass the same.

Dated at the Municipal Office, Tofield, Alberta, November 15th, 1935.

J. O. A. LETOURNEAU,

Secretary-Treasurer.

SMALL BUILDING BOOM

A small building boom is underway in town, three separate buildings going up simultaneously. The most pretentious, that of the Co-op store is nearing completion, work being rushed on the interior.

J. J. Hassan, who recently purchased the main street property of Mr. George McLaughlin is erecting a new building on the property to

ICE MAKING POPULAR SPORT

Whether it is work or play depends upon the way you view it, but for the past two weeks ice making in both skating and curling rinks has been going on apace. The curlers have two "sheets" laid, shiny smooth and white. The "houses" this year are colored, the three rings being red, white and blue. The colored effect is created by paper being laid under the clear ice, the white effect being obtained by adding a whiting mixture to some of the early flooding water. Those curling claim it is an improvement, the rings being visible from the far end.

The ice in the skating rink is also being laid and with the continuation of the cold weather it will only be a short time before skating enthusiasts will be able to indulge in travel on the steel blades.

take care of the gasoline and service station business.

At the rear of the Theatre a tie shed is being erected by the town so that farmers' horses will have some form of shelter during the cold days of winter. The building was taken from the exhibition grounds in sections and re-erected with necessary changes. This has been a need for some time and should prove quite a convenience to the community.

VIKING HAS DISASTROUS FIRE

In a disastrous fire which struck Viking early Tuesday morning, seven buildings were razed and nine places of business were involved. The fire started in the Royal Cafe kitchen, it is said, and was first noticed by the Laurie's cafe people. The King Edward hotel, managed and owned by W. Hooten, who is at present in Banff, was left in smouldering ruins and telephone reports state that only the office contents and some linen were saved. The buildings were all reduced to ash heaps, and at an early hour Wednesday the fire had practically burned itself out.

The places in the path of the fire were the hotel, the Royal Cafe, Dr. George Haworth's office and surgery, Dr. Richardson's dental parlor, Laurie's Cafe, Red and White store, Runyan's pool hall and barber shop, Graham's implement warehouse and a laundry.

It was possible to save the greater part of the contents of the various places it is understood, and Dr. Haworth was able to remove instruments and other valuables from his premises.

Russian Wheat Situation

Russia has been producing in recent years, on the average, about 6 ½ million bushels of wheat per annum. This year it is said she has a bumper crop—some consider over 1,030 million bushels. Her population has greatly increased in the last ten years. The Soviet is now permitting the people to use more bread. Considering these factors, how much wheat will Russia have to spare for export to world's markets? Only time will show.

SEARLE GRAIN COMPANY, LIMITED

CANADIANS AND THEIR INDUSTRIES—AND THEIR BANK

WHOLESALE AND RETAIL MERCHANDISING

MR. RETAILER: "You have consistently accommodated me on purchases, Mr. Manufacturer, enabling me to supply my customers with the best and latest merchandise, and I have met your terms of payment pretty consistently, too—haven't I?"

MR. MANUFACTURER: "Yes. The relationship has been clean-cut and mutually satisfactory for many years. We appreciate your business and you seem to like our way of dealing. Of course, you know we never could have been as lenient on credits if our own credit were not so good at the Bank of Montreal. The Bank permits us to borrow in substantial amounts during our busy seasons, because we are in good financial shape—have an excellent cash position and a reputation for paying bills and loans promptly."

MR. RETAILER: "That good credit idea is at the very foundation of successful merchandising and goes all the way through the business. Our customers are either cash buyers or have good credit. Most of them have chequing or savings accounts at the Bank and are sure of their ability to pay on our terms before they make purchases on their charge accounts."

• • •

Some of the Bank's facilities for the mercantile trade: Commercial deposits; savings accounts for customers and employees; safekeeping of securities and documents; discounting prime commercial paper; loans on notes and warehouse receipts; letters of credit; telegraphic transfers of funds; financing exports and imports and domestic shipments; foreign and domestic credit and trade information; purchase and sale of exchange "futures"; special wire facilities reaching the important exchange markets, affording prompt action; nationwide service through more than 500 branches.

Former Tofielder Dies at Coast

M.W. Urquart, One Time Store-Keeper Here Succumbs

M. W. Urquart former Tofielder and store-keeper here in 1911-12, died suddenly at Abbotsford, B.C. on Saturday last, November 23rd. Unemployed for some time he had re-commenced work on Wednesday of that week and was returning in a truck when a heart ailment caused sudden death. Prior to leaving for the coast Mr. Urquart owned and resided upon what is now known as the Tory farm. He leaves to mourn his loss, his wife and three sons, Talmage, Willard and Rupert, all at home. Mrs. Urquart is a daughter of Mr. and Mrs. J. M. Noland, formerly of Tofield but now residing at the coast.

LAND SALES

A reviving interest in land sales is being made evident by the occasional sale being made. During the past week two quarter sections have been purchased through the office of A. J. H. McCauley.

Mr. Henry D. Huebert purchased the N.W. ¼ of 26-50-20, W4 and will move onto it next spring. This quarter was formerly occupied by Mr. G. Henson. Mr. Huebert came from the dry area and has rented land here for the past two years.

Doctor Now Occupying New Office

Following the fire of late August when Dr. Law was compelled to vacate in a hurry the office he had previously occupied, he found it necessary to erect a new one.

This was done on a site immediately north of the telephone office, and now a very cosy and suitable building stands occupied.

It is really more than an "office". Entering from the front there is a small vestibule opening into, on the right the waiting room and straight ahead the emerging treatment room. The waiting room is attractive and comfortable and hung upon the south wall is a copy of a steel engraving of "The Doctor" the picture painted in 1892 by Sir Luke Fieldes, the original of which hangs in the Tate gallery in Great Britain. Dr. Law is indebted to Mrs. Malcolm for this contribution to his waiting room. The floor, woodwork and wall decoration all harmonize, the general effect being soothing and restful.

The office itself is spacious, well lighted both by natural and artificial light and directly adjoining it is the emergency room where patients requiring immediate treatment, may receive same. Off this room is the laboratory where the various tests necessary in medical work are made.

In all there are five rooms well appointed to make an ideal office home for a medical man.

All cards are printed with name, address and greeting and in their own range represent real value.

THE TOFIELD MERCURY

BEHIND THE HOG

By A.B.C.

A curling club by the side of the road,
Is Home Sweet Home to me.
I need not travel to see the sights
For the "sights" all come to me.

You can no curl in the summer time. The weather is so mild the curlers don't even get cold feet.

••••••••

"Philosophy is what people think." "Psychology is why they think it." But in spite of this the president and the school principal will admit Psychology is no so good in a Saturday night game, especially at the 12th end with the game won. We believe in common horse sense, or at least a little judgement. What say Mr. President?

••••••••

Our Curling Circles are all right, but to me they are just a place to put my rocks.

••••••••

The modern lady curler adores spinning wheels. But she wants four and a spare.

••••••••

No curlers in our club are going to stay put when they want to expand.

••••••••

All curling philosophy lies in two words "Subtain" and "Abstain".

••••••••

Fifty per cent of our men curlers are ruled by wives and don't know it, the other fifty per cent know it.

••••••••

Laughs and Laughs at the Rink

Laughs of anger and hate—laughs of weariness and resignation—laughs of intrigue and cunning—the silly laugh—the cynical laugh—the laugh of disgust—and tolerance—of peace — contentment—hope— friendship and affection. They do not always connote a pleasurable emotion—Who can analyse them, I can't.

••••••••

Another laugh—the number of curlers turning out to the Club's dances.

••••••••

"Are all curlers fools?" asked a curlers wife. "No dear, some are bachelors."

OBITUARY

Mrs. Anna Johnston, long a resident in the Ketchamoot district died at Oakdale, Man. on November 23rd.

The remains were brought to Tofield and interment took place in the Tofield cemetery on Wednesday, 27. A short service was held in the United Church, the Rev. D. K. Allan officiating. Mrs. Johnston leaves behind Mrs. Reid, Oakdale Man.; Mrs. H. Stein of Tofield; Mrs. Donough, Manitoba; Mrs. Mix of Edmonton; all daughters of the late Mrs. Johnson and J. W. and Malcolm, sons.

Mrs. McGuire, aged 52 passed away at an Edmonton hospital on Saturday morning, the body being brought to Tofield and interred Saturday afternoon. A short service was held at the graveside, Rev. D. K. Allan officiating. Members of the family left are Mr. McGuire, sons Orton and Clarence at home and daughter Myrtle at Athabasca.

FOR SALE—One purebred Yorkshire yearling boar, also four purebred cows. Swinton's farm Tofield.

NOTICE

I wish to inform the beauty parlor patrons that I have sold my business to Miss Viola Lee. I take this opportunity of thanking you for the support given me and bespeak the same patronage for my successor, Miss Lee.

The W.A. are holding their bazaar tea and sale of home cooking on Saturday, December 7, in the Tofield Curling rink.

The Student's Union Concert is to be held on Friday December 6. Much practice is being put on the numbers and this promises to be a program well worth attending.

Mr. and Mrs. O. O. Herschberger and family left on Wednesday morning for High River, Alberta. Mr. Herschberger who recently held an auction sale of his live stock, farm machinery etc. nevertheless shipped two cars of effects to his new home. Mr. Herschberger who has resided in this district for the past 18 years and is now a fully ordained minister of the Mennonite faith. Mr. and Mrs. Harvey Brenneman have taken over the Herschberger farm and are moving onto it at once.

MASONIC HONORS FOR LATE JOHN LEE

With full Masonic honors funeral services for John Lee, 63, 11165 65 st. prominent curler and long active in municipal life at Tofield, were held in Edmonton Friday.

At the service in Andrews' Bros. chapel at 3:00 p.m. Rev. D. Allan of Tofield, officiated. Tribute was paid to Mr. Lee's fine record of citizenship.

Chief mourners were Mrs. Lee, two daughters, Mrs. J. Aiken, Mrs. M. J. O'Brien and two sons, Clifford E. and Allan of Edmonton, besides the late Mr. Lee's brother, William, of Tofield and a sister, Mrs. D. Geddes of Edmonton.

Pallbearers were W. J. Richards, W. G. Walford, Dr. W. C. McClung, David Wilson, Paul Thomas and W. Chapman.

Palestine lodge, A.F. and A.M. of Tofield took part in the service. Masons also attended from Ryley and from Edmonton lodges. The service at the graveside in Edmonton cemetery was conducted by M. Downey, of Strathcona lodge.

The late Mr. Lee, who was a grain merchant at Tofield, was well known in Edmonton, having taken part in bonspiels there on many occasions when he won some of the principal competitions. He was a resident of Tofield for 25 years. Ill for the past three months, he died in Edmonton Wednesday night.

STAUFFER HOME NEAR DODDS DESTROYED BY FIRE

On Wednesday night of last week fire destroyed the square two storey well built house of Mrs. Stauffer, near Dodds. Mrs. Stauffer was spending the night at the King home where an auction sale was to be held the next day. There were four children in the house, the two Stauffer children and the two Bender children all of whom reached safety in time. The fire was discovered by one of the boys who awakened the others and then ran over to the Bender farm for help and in a short time several men were there and saved a number of articles from three downstair rooms.

The cause of the fire is unknown but it is believed to have been caused by a stove explosion.

Don't forget the dance in the new Co-Operative Store on Wednesday, Dec. 4th.

Curious Taxes

By

C A Crosser in the Christian Science Monitor

IN THESE days when the public is apprehensively speculating about new or additional taxes to be imposed on them, it is interesting to recount some of the curious taxes which past governments and rulers have levied on their people.

One of the queerest taxes ever imposed was that on beards levied by Peter the Great of Russia in 1720. This astute tsar revealed an acute and ironic conception of a tax with a certainty of collection He well knew how far his subjects would go to preserve their beloved beards. He called it a luxury tax. Beard owners were given tokens to prove they had paid. In case the taxgatherer came by, armed with a pair of shears, woe to the owner of a beard who failed to possess a receipt token. Tsar Peter II freed peasants from this tax and Catherine II entirely abolished it

One of these infamous feudal taxes in France before the Revolution was the tax for the **silence des grenouilles**, or silence of the frogs, which was levied in some parts of Brittany. This tax was paid in lieu of service in beating the marshes to keep the frogs quiet when the wife of the Marquis was in residence at the chateau.

The English Long Parliament, which sat just before the dethronement of Charles I, devised a tax equal in value to one meal per week, which is said to have raised 6,000,000 pounds in six years

The chimney tax appeared in England about the time of the Conquest. It was a small tax on each chimney of a dwelling. It was changed to a hearth tax in the time of Charles II. This met with popular opposition, not so much because of the tax itself, but because assessing it made necessary a visit inside one's dwelling by the assessor, which was an invasion of the privacy of an Englishman's home To avoid this difficulty, a tax on windows which could be assessed or counted from the outside. was imposed in the reign of William III Houses with less then eight windows were exempted

The Druid priests required the heads of families to report at their temples on the last night in October to pay their taxes. Following payment, the Celt householder was given a bit of the sacred fire

Not only have taxes been held responsible for overturning empires, but in these particular cases they have changed fashions. The English Parliament in 1762 enacted a duty on a certain type of imported hat for women, which was then the fashion, as security for a loan of 1,500,000 pounds. The women thereupon stopped buying this particular *type of headwear*. *Another tax, also in England*, levied in 1797 on hair powder, is said to have resulted in the lapsing of the custom of powdering hair by men and women

With governments as they always have been, in need of money, and with taxpayers always compelled to pay their taxes, it is not strange that many of the familar taxes of today have their origin in antiquity. The poll or capitation tax, of so much per person was imposed in Gaul. A seemingly stiff tax of 25 gold pieces was levied yearly against every freeman, who composed the smaller but wealthier portion of the population.

The English poll tax is supposed to have caused the Wat Tyler Rebellion, which almost cost King Richard II his throne In the reign of William and Mary, a peasant or laborer paid a 1s. poll tax yearly, a tradesman 10s. and a gentleman 1 pound. Roman Catholics were forced to pay double these rates

A tax on salt was common in past centuries. The Romans had a salt tax, or vectigalis salis. This tax became infamous in medieval France as the gabelle. Each province levied different tax rates on salt Consequently there was widespread smuggling into those district with the high rates. Befort the French Revolution, it is said that there were 3000 arrests a year for salt smuggling. In eighteenth-century England the tax on salt was said to have been over 20 times higher than the 8d. a bushel production cost of this commodity

Our modern sales tax has a long ancestry. A sales tax of 1 per cent was levied on all transactions in the public market in Rome. This was borrowed from Athens From the fourteenth century to recent times, Spain imposed the ruinous alcavala, a 10 to 14 per cent sales tax Catalonia and Aragon purchased their freedom from this tax by the substitution of a land tax, which some historians assert accounted for the comparitive prosperity of these two provinces. If anything further were needed to paralyze Spanish trade and industry, it was the bolla, or a 15 per cent tax on manufactured products

Mexico borrowed the sales tax from the mother country, with the result that every state and even cities levied many forms of this type of tax. An American residing in Mexico city some years ago wrote that, before he was able to set up in his house a stove costing $31, he had paid a total of $130, because of the many sales taxes. It was said that a loaf of bread in its evolution from grains of wheat was taxed 22 times

In the last year or two, many American states have levied 2 or 3 per cent retail sales tax, primarily to pay the tremendous relief costs

Augustus, first Roman emperor levied an inheritance tax of 5 per cent to pay for his soldiers' pensions. Another form of this tax was the "relief,"

(Continued on back page)

THE TIGERS OF THE SEA

An interesting article supplied by the Economy Bookbindery Co.

The voracious tigers of the sea have at last found their place out of the water, and into the sun. Sharks leather suitable for bookbinding is now available

The shark belongs to the mamal family Its skin is not like the fish skin. The construction of the epidermis and underlying fibers of a shark hide resembles the hide of a bovine animal, except that when tanned the surface of the grain of shark leather is harder, the epidermus thicker, and the fibres lie in a cross weave, some of the silken fibers being as long as three feet To these inherent qualities is due the remarkable non-scuffing and long wearing qualities of shark leather, and its great tensile strength

Although shark is a comparatively new leather, its quality and its use have increased tremendously during the past two years The problem of obtaining sufficient quantities of shark hides to supply the demand has been practically solved by the location of numerous fishing stations in widely separated territories, and thereby the regular supply is not affected by the migration of the sharks and the hazards of the hurricane seasons The market for shark leather will continue for some time to come to be governed by the available supply of shark hides, but as there are untold millions of sharks in the seas many new sources of supply will no doubt be established and developed to keep pace with the steadily increasing demand

The sharks are caught mostly in nets After removing the fins which are a valuable by-product, the shark is split down the back instead of the belly as in the case of cow hides. These hides are cured with salt and are shipped wet-salted to the tannery, and paid for according to their length. The leather is sold by the square foot The size of the skins measure from 3 to 20 square feet, the average being about 10 square feet.

Every shark is covered by a hard flint-like denticle called the "shagreen." There is a patent covering the process of removing the shagreen, after which the leather is mellow and pliable, but has a firm "feel," and the character of the natural grain which underlies the shagreen can be seen. The grains of shark leather are natural and will not pull or wear out. Splits are not utilized; only the top grain of the leather is tanned and finished The "Eastern" shark leather has a deep grain with beautiful markings varying somewhat over the surface of the skin, which lends character to the leather The "Oleotrop" leather coming from a different species of shark, has a smooth fine grain with regular markings similar to pin seal

Shark leather has extraordinary wearing qualities and is non-scuffable. A travelling bag, pocketbook or men's belts made from shark leather cannot be worn out, and a great deal of the leather is sold for quality goods It has amazing wearing qualities

There are more than 100 species of sharks, but only ten species are yet known to be commercially valuable for their hides and by-products. Some of them are the tiger, hammerhead, sawfish and nurse sharks which are more plentiful in the tropical and semi-tropical waters. Most of the shark leather sold for shoes in the United States is obtained from sharks caught in the Gulf of Mexico and adjacent waters, it is known by the trade names of "Eastern" and Oleotrop "

Galuchat: from a different species, namely the Japanese Ray, the pearl sharkskin or Galuchat is produced This skin is used principally for trim on pocketbooks and novelty purposes From the "Morocco" shark is procured the Boroso or Ro[illegible] es leather It is a very small shar[illegible] caught principally in the Mediter[illegible]ean Sea. It is used to some exte[illegible] for trim on women's shoes, pocket[illegible]ks and novelty purposes Most of these foreign skins as well as the Galuchat are tanned in Europe with the shagreen still on them, which makes it difficult to stitch

So again American genius salvages from utter uselessness, the most hated and feared creature of the ocean, and gives us the opportunity of useful decoration for his otherwise no-account hide

[illegible] ELIMINATION ALBERTA DEBT LAW

CALGARY, Nov. 25—Elimination of the Alberta debt adjustment legislation and the whole subject brought within the jurisdiction of dominion legislation was urged in a resolution sent to federal authorities Monday by the Calgary board of trade

The board also requests closer co-operation with the dominion farm loans board to enable farmers in justifiable circumstances to obtain loans.

CHILD MAKES LONG JOURNEY TO EDMONTON

Arriving at the local C.P.R. depot at 6:55 a.m. Tuesday nine-year-old Norman Bell will complete a 5,000-mile journey to his new home.

Decease of both parents left Norman alone at school at Stockton-on-Tees, England. His aunt Mrs. A. S. Jackson of 11820 93 st, Edmonton left for England in the summer to bring Norman back with her but the immigration officials presented some difficulties and she was forced to return home without him in August.

Mrs. Jackson's efforts since then have been crowned with success, and Norman was permitted to come to Canada Leaving on the Duchess of York, on November 13 Norman has travelled all the way by himself His passage was eagerly followed by his uncle and aunt as he reached Quebec on November 22 and took the train for Edmonton. On his arrival Tuesday Norman will find an uncle and aunt to welcome a brave boy to his new home.

MANITOBA MEN HAVE FRIGHTFUL TILT WITH DEATH

NORWAY HOUSE, MAN, Nov. 26.—Stranded seven days on a rocky unnamed island six feet square, Donald Lambert and Arnold Lunberg of Beconia lay in hospital with frozen feet in this outpost at the northern tip of Lake Winnipeg.

Escaping death by freezing, the pair were forced to spend a full week on the island reef while the lake froze so they could plod across to Black River, 60 miles south of here, for aid.

Breaking of the propeller of their boat during an off-shore wind put the two men into their battle with death.

Lacking paddles of any kind, they were forced to let the boat drift until it struck the tiny island.

Death by drowning was certain if they had tried to swim to the mainland. They had only two days' food supply. Rationing out the food, they started their dreary vigil for ice to form and make a pathway to shore.

They had no means of building a fire to make their isolation even a bit comfortable. Dropping temperatures brought them suffering but it meant their only chance of life. With sub-zero temperatures prevailing, the open water froze and they struck out with frozen feet for Black River.

Stumbling, fighting for life all the way, they reached Black River. Fishermen and trappers at Black River hustled dog teams, bundled the two men in blankets in a sleigh and rushed the 60 miles to Norway House.

Whether Lambert and Lunberg will have to undergo operations for amputation of their feet has not been determined yet. They are receiving medical attention and every effort to avoid amputation is being made.

Action is a universal language which all can understand.—St. Clair Stobart.

BANK OF MONTREAL

Established 1817

A presentation, in easily understandable form, of the Bank's

ANNUAL STATEMENT

31st October, 1935

LIABILITIES

LIABILITIES TO THE PUBLIC	
Deposits	$676,944,066.06
Payable on demand and after notice.	
Notes of the Bank in Circulation	[illegible]
Payable on demand.	
Bills Payable	353,011.79
Time drafts issued and outstanding.	
Acceptances and Letters of Credit Outstanding	7,066,426.36
Financial responsibilities undertaken on behalf of customers (see off-setting amount (x) in "Resources").	
Other Liabilities to the Public	1,784,347.07
Items which do not come under the foregoing headings.	
Total Liabilities to the Public	$716,107,779.60
LIABILITIES TO THE SHAREHOLDERS	
Capital, Surplus and Undivided Profits and Reserves for Dividends	76,665,093.08
This amount represents the shareholders' interest in the Bank, over which liabilities to the public take precedence.	
Total Liabilities	$792,772,872.76

RESOURCES

To meet the foregoing Liabilities the Bank has	
Cash in its Vaults and Money on Deposit with Bank of Canada	$ 82,711,635.13
Notes of and Cheques on Other Banks	27,614,596.16
Payable in cash on presentation.	
Money on Deposit with Other Banks	97,764,631.60
Available on demand or at short notice.	
[illegible] and Other Bonds and Debentures	361,769,848.49
Not exceeding market value. The greater portion consists of gilt-edge securities which mature at early dates.	
Stocks	103,872.95
Railway and Industrial and other stocks. Not exceeding market value.	
Call Loans outside of Canada	18,835,230.07
Secured by bonds, stocks and other negotiable securities of greater value than the loans and representing moneys quickly available with no disturbing effect on conditions in Canada.	
Call Loans in Canada	6,435,736.20
Payable on demand and secured by bonds and stocks of greater value than the loans.	
Bankers' Acceptances	139,252.54
Prime drafts accepted by other banks.	
TOTAL OF *QUICKLY AVAILABLE* RESOURCES *(equal to 74.48% of all Liabilities to the Public)*	$533,374,011.14
Other Loans	234,461,311.20
To manufacturers, farmers, merchants and others, on conditions consistent with sound banking.	
Bank Premises	14,500,000.00
Three properties only are carried in the names of holding companies; the stock and bonds of these companies are entirely owned by the Bank and appear on the books at $1.00 in each case. All other of the Bank's premises, the value of which largely exceeds $14,500,000, appear under this heading.	
Real Estate, and Mortgages on Real Estate Sold by the Bank	1,523,432.05
Acquired in the course of the Bank's business and in process of being realized upon.	
x Customers' Liability under Acceptances and Letters of Credit	7,066,426.36
Represents liabilities of customers on account of Letters of Credit issued and Drafts accepted by the Bank for their account.	
Other Assets not included in the Foregoing	[illegible]
Making Total Assets of	$792,772,872.76
to meet payment of Liabilities to the Public of	716,107,779.60
leaving an excess of Assets over Liabilities to the Public of	76,665,093.08

PROFIT and LOSS ACCOUNT

Profits for the year ended 31st October, 1935, after making appropriations to Contingent Reserve Fund, out of which Fund full provision for Bad and Doubtful Debts has been made	$4,087,302.06	
Less Dominion and Provincial Government Taxes	1,082,089.49	$3,005,212.57
Dividends paid or payable to Shareholders		2,880,000.00
		$ 125,212.57
Balance of Profit and Loss Account, 31st October, 1934		1,809,820.79
Balance of Profit and Loss carried forward		$1,935,033.36

• • •

The strength of a bank is determined by its history, its policy, its management and the extent of its resources. For 118 years the Bank of Montreal has been in the forefront of Canadian finance.

In Olden Days Before Bookeeping Was Practiced - - -

Business was largely a matter of barter. With no currency systems to guide them, trading folk swapped goods and services. Today, in spite of wonderful advances in the business of banking, fund transferance etc., the barter system is not completely dead. Even in businesses of considerable magnitude between individuals situated in different countries, a two-way, three-way, or four-way plan is resorted to, by which goods are more nearly exchanged then purchased outright.

The Tofield Mercury has done considerable barter business for the past four years. In the payment of subscription accounts we have taken almost every variety of thing a farm produces, including wheat, oats, flour, butter, eggs, poultry, pork, beef, lard, etc. We prefer money of course, but again this year we will accept produce in payment of subscription accounts, both current and arrears.

We know that the year 1931 was not as good as it might have been. Perhaps no business reacts more quickly to "hard times" than the country newspaper business, and when it is "tough sledding" for the farmer it is equally tough for the newspaper man.

This is the time of year when many subscribers pay their renewals. Already a number have dropped into the office and paid up. If conditions are not **Too Hard** with you — may we expect you too?

THE MERCURY

HEALTH

by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

WHEN?

There is a time for everything, and there are times when medical care offers most in the prevention of disabilities which are a handicap, taking much of the joy out of living.

This statement is prompted by the findings of a recent study which shows how very few women return to their doctor three of four months after the birth of a baby, for a final examination.

This examination is one which should never be neglected. It secures the future health of the mother because it allows for the discovery of the minor abnormal conditions which may be present as a result of childbirth at a time when prompt treatment will correct them.

It seems difficult for most people to grasp the idea that medical care may be required although they feel quite well. Not so long ago, people went to their dentist only when they had a tooth-ache. Now we consider that the person who waits until his teeth ache before visiting his dentist is a rather stupid individual.

The mother, busy with her new baby, does not realize that she may need medical advice. Even if she does not feel just right, she will likely persuade herself that there is nothing wrong and that everything will come all right in time. Time is a great healer of sorrow, but time does not, in itself, heal physical disabilities.

Childbirth is a normal process, but nevertheless, it does call forth an unusual effort, with the result that some damage may result. The more complete the care given before and at confinement, the less will be the damage. The only way to be sure, in each particular case, that recovery has been complete, is to have the mother pass through the regular routine examinations.

A great deal is said, and quite rightly, about maternal mortality. All will agree that pregnancy should be made safe. But pregnancy should be made more than safe; it should also be made as comfortable as possible for the mother. Furthermore our goal should not only be "Healthy Babies," but equally so "Healthy Mothers." The post-natal examination is an essential part of the service which aims to keep the mother healthy and to ensure that her health is not destroyed or minimized as a result of her pregnancy.

One time to secure medical examination is after the birth of a baby, to make sure that the mother has returned to a normal condition.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto will be answered personally by letter.

WHY BREAD IS GOOD FOOD

Let me trace briefly why bread has merited a prominent place in many human dietaries. Bread is a tasty food. Through its varied forms, crusty or soft, hot or cold, sweetened spiced or plain with bland aromas, and with sharp acid flavors, every taste and appetite can be satisfied. Bread can be combined with other attractive foods, including butter, jams marmalade, meat (as in the ubiquitous sandwich), and cheese to balance the diet and to add to the tastiness of the ensemble. Bread is ready to serve, requiring a minimum of preparation for the table. Bread is conveniently available for quick lunches. Bread is still useful and attractive as a food during many hours after it is baked; if rolls or loaves must be used after several days they can be refreshed by reheating or toasting. Bread is [illegible]; few ready-to-eat foods can be placed on the table at such a low cost per unit of nutritive value. Bread can be converted into many useful combinations or dishes including puddings, or as a base for meat and milk sauces. Bread is a good food; from the nutritional standpoint it supplies energy, useful proteins, and other valuable nutritive principles that can be fitted into balanced dietary. —Dr. C. H. Bailey, Professor of Agricultural Biochemistry, University of Minnesota.

ALBERTA MOPS UP AT STOCK WINTER SHOW

It was an all Alberta show in the class for carlots of 15 finished market steers at the Royal Winter Fair in Toronto Saturday with Angus and Hereford cattle sharing the honors about equally. C.P.R supply farms, Coaldale, with a slick lot weighing around 1150 pounds won first on steers mostly sired by their famous bull Middlebrook Prince. The second lot of C.P.R. steers stood fourth, second and third went to McIntyre bred Hereford steers fed and shown by C. R. Daniel, Lethbridge and V. Smith, Brandon Man

More for Alberta

Judging of the group classes in Aberdeen Angus brought another first second and third to Alberta, when C.P.R. farms, Coaldale won in graded herds get of sire, and junior herds respectively In the grand championship for market steer the big prizes stayed east this year. A senior Angus calf shown by F. G. Todd, Lucknow Ont. won the supreme honor with two Shorthorn steers next and the University of Alberta Hereford steer last. Noel Gibson Komoka, Ont. judged the carlots and market steers.

PRAIRIE BORN

There's something born and bred in them
To match the sweep of earth and sky;
Visions perhaps ...... of better things,
A cheerful courage clean and high
To bear the hardship of the soil,
A heart that will not break with toil

There's something flowing in their veins,
Some virtue drawn from the rough sod,
That seeps into the soul of them
And marks as with a branding rod,
And makes them fine and strong to stand
The cold and hardships of the land.

There is a cheerfulness in them,
A gaiety of heart and mind,
A happy faith in next year's crop,
An understanding deep and kind,
The scarlet cloak of courage worn
Only by those ...... the prairie born.

—Edna Jaques

MINING INDUSTRY FORGING AHEAD IN NORTHERN ONTARIO

SIOUX LOOKOUT, Ont , Nov. 25—No similar sized area in the world has had the rapidity of mining development experienced by northwestern Ontario, declared Fred V. Seibert, superintendent of natural resources for the Canadian National Railways at Winnipeg, at the closing banquet of the Northwestern Associated Chambers of Commerce here recently.

Two years ago there were two producing mines in the area — the Howey and the Moss. Today there are 16 producers in 12 mining fields from Long Lac to the Manitoba boundary. They are handling a total of 27,000 tons of ore per day, and this year will produce more than $6,000,000 in gold a production double that of last year

"Any one of these 12 fields is a potential Porcupine or Kirkland Lake. Neither Porcupine nor Kirkland Lake had a better start than any of them," Mr. Seibert said. "We just have made a start in northwestern Ontario—no one can guess what is ahead of the district." he added.

Expenditures by the mining industry in northwestern Ontario jumped from $2,300,000 in 1933 to $8000000 in 1934. During the last nine years expenditures have totalled $19,112,000. Approximately 40 per cent of this total has been spent in wages and services, 20 per cent on mining and mill, ing machinery and equipment, 12 per cent on food, 10 per cent on explosives and fuel, 10 per cent on miners stores and hardware, and 8 per cent on building materials

Mining development was bringing this area the "last gap" in the Dominion into its own and welding the Canadian confederation more closely together he concluded.

HOMEBUILDING ACTIVE IN GREAT BRITAIN

MONTREAL, Que., November 25—"Business conditions in Britain show a decided improvement, and with the exception of coal mining, all industries are more active than they have been for a considerable time," stated Alistaire Fraser, K.C., Traffic Vice-President of the Canadian National Railways, who has just returned from a business visit to Europe.

A tremendous amount of home building is being carried on throughout Britain and this has helped greatly in stimulating the demand for lumber, hardware and other building materials as well as labor. Throughout Britain and Europe, Canadian developments are being closely followed and there is today a great interest among all classes in the progress of the Dominion's affairs.

The Bitter End

A party was paying a visit to the docks, and for one of their number the endless row of buckets in a dredger seemed to have a great fascination While the others went off to enjoy themselves, this man kept his gaze fixed firmly on the dredger

Several hours later his friends found him at the same spot. When they told him the train would leave without him if he did not hurry, he exclaimed: "I don't care; I've counted 11,963, and I mean to see the last bucket if I stay all night!" —Ottawa Citizen.

HANDLING MANURE

(Experimental Farms Note)

The method of handling manure approved and followed at the Dominion Experimental Station at Rosthern, Saskatchewan, is to convey it direct from the barns each day in a wet condition to the pile. The preferable site for the pile is on the level or in a very slight depression. At Rosthern a new pile is started each fall just after harvest or in the latter part of September. The area staked out is about thirty feet by one hundred feet and this suffices for approximately one hundred head of livestock

The important factor in the building of the pile. First the manure is spread evenly over the whole area and then spread over the whole area in layers three to five inches deep, gradually building up the centre of the pile a little higher than the ends and keeping the sides straight. As the manure is spread on the pile it is also packed well, as this is very important. It may be found necessary to drive over the pile with the empty wagon to pack it sufficiently

It is also important to spread the manure while it is wet, as it will pack more readily in this condition and the desired heating and subsequent rotting will occur If there is a large percentage of straw in the manure, or if it is too dry, it is advisable to wet the manure pile with a hose if convenient, to aid in packing it. It is sometimes advocated to let the stock run loose over the pile to pack it. This practice, however, increases the waste because it is impossible to keep the stock from breaking down the sides of the pile and spreading it out.

Each fall the previous year's manure pile is spread on the land. If well packed when built the manure will be well rotted by that time and weed seeds will be killed one hundred per cent. It is the practice at the Rosthern Station to spread the manure on second year [illegible] land which is either fall or [illegible] ploughed and summer-fallowed the following year. Application on [illegible] land is usually made at the rate of ten to twelve tons per acre

COFFEE FROM KENYA AND UGANDA

A considerable quantity of Canada's coffee come from Kenya and Uganda, in East Africa Other products of these Empire countries which Canada purchases are sisal fibre, oils, tea beans, chillies and ivory, according to the Industrial department of the Canadian National Railways In turn, Kenya and Uganda take from Canada motor trucks and accessories, motor cars and accessories, motor tires and tubes, agricultural machinery, rubber manufactures, earthenware, textile manufactures, manufactured goods, tools, hardware, timber, electrical goods and appliances

KETCHAMOOT

Christening service was held on Sunday when Mr. and Mrs. Robert Berrelough christened their infant son Harold Lewis.

Preaching services will only be held every two weeks throughout the winter months at 2:30 p.m.

The annual meeting of the Ladies' Aid will be held next Wed. Dec. 4th at the home of Mrs. G. W. Sears. A cordial invitation is extended to all.

JR

Miss V[illegible] Lee is taking over Miss Lindsay's beauty parlor in Tofield the first of the month.

Miss Kathleen [illegible] is visiting her friend Mrs. [illegible] Payment in Edmonton.

Miss Margaret Lindsay spent the week end with her sister in Tofield.

Mr. Henry Mc[illegible] motored to Drayton Valley the first of the week in the interests of Mr. Hill.

Mr. and Mrs. Lee, Viola and Messrs. John, R[illegible] and Lorne Lee and Mrs. Peter Lee attended the funeral of the late Mr. John Lee in Edmonton Friday.

Mr. Schultz attended the funeral of the late Mr. John Lee in Edmonton on Friday.

Mrs. Williams and son Roy spent several days in the city last week with Mr. Williams' mother Mrs. Sheppard.

Mr. and Mrs. Wm Lee left on Wednesday for Edmonton where they have bought a home and will reside there for the future. Mr. and Mrs. Lee built up the home place some 30 years ago and have taken an active part in the church, school and all activities for the betterment of the community. They will be greatly missed but we are glad they can take it easier in their declining years and wish them every success in their future home.

We regret to hear of the passing of another beloved old timer, namely Mrs. Annie Johnson. Death took place at the home of her daughter in Manitoba. Mr. and Mrs. Johnson and family came to the Ketchamoot district some 30 years ago. Mr. Johnson passed away many many years ago. Mrs. Johnson carried on with her family on the homestead until the last four years when she went to reside with her daughter. Funeral services were held on Wed. in the United Church.

The shower in honor of Mr. and Mrs. Soma which was to be held on Tuesday was postponed until Friday of this week. The quilting bee will be held Thursday instead of Wednesday owing to the funeral of the late Mrs. Johnson.

Misses Mildred and Gertrude Ingram, Hazel Sears and Mrs. Henry McIntyre of the Social hour club finished a quilt at the McGinn home Friday for the Soma family.

AMISK CREEK

The members of the Amisk Creek Ladies' Aid extend their thanks to all and everyone who helped to make their sale and dinner on Armistice day. In spite of the nasty weather and bad roads a large crowd was present.

Erling Sand who was working for R. O. Berg during threshing, left for his home near Elk Point on Armistice day.

A large crowd attended the sale of cattle and machinery at the O. O. Herschberger place last week. Mr. and Mrs. Herschberger and family are leaving for their future home at High Prairie this week. We are sorry to see them go but at the same time we are wishing them all kinds of good luck in their new home.

Mr. and Mrs. Harvy Brenneman and family are taking over the Herschberger farm and are moving immediately.

Lil. Berg who is attending university in Edmonton spent the week end and Armistice day at her parental home here. She returned on Monday evening.

Nora and Gordon Sand of Elk Point arrived last week and will visit with their Aunt and Uncle, Mr. and Mrs. P. O. Flaaten, for some time.

The children and young people have started to practice for their Christmas program.

Mrs. R. O. Berg, Arnold and Lloyd motored to the city last Tuesday.

Mr. and Mrs. J. Berild were visitors at the E. A. Moen home on Sunday.

Several of the families from this district attended the dinner and sale held in Bardo last Saturday.

Mr. and Mrs. R. O. Berg and family and Mrs. J. Anderson visited at the J. Annelo home last Sunday evening.

Mrs. P. O. Flaaten, Nora and Gordon Sand and Lloyd Berg visited at the Berild home Friday evening.

Mr. E. A. Moen and P. O. Flaaten shipped calves and hogs last Tuesday. [illegible] Lillo from Ryley trucked them in to Edmonton.

BANK OF MONTREAL STATEMENT SHOWS USUAL STRONG POSITION

Strong in all departments, the annual statement of the Bank of Montreal just issued contains many interesting features.

The statement which covers the fiscal year to October 31st and appears elsewhere, is issued in an easily understandable form evidently in order that the general public may more fully appreciate the security that is afforded both depositors and shareholders. The statement shows that at the close of the fiscal year the total assets of the Bank were $792,772,872 as compared with $750,[illegible] a year ago, an increase of over $31,000,000.

Included in total assets are liquid assets of $[illegible] against $4[illegible]247,207 a gain of over $[illegible] and equal to 74 [illegible] per cent of all liabilities to the public. An outstanding feature is the holdings of government and other bonds and debentures amounting to $[illegible] as compared with $[illegible] a year ago an increase of over $41,000,000. In keeping with the Bank's policy the greater portion consists of gilt-edge securities which mature at early dates.

The immediately available cash is represented by cash on hand and money on deposit with the Bank of Canada of $62,711,635; notes of and cheques on other banks $27,614,806 and money on deposit with other banks of $17,704,611.

Call loans outside of Canada now stand at $18,835,238 down from $32,133,611. The decline may be attributed to the unusually low interest rates that have prevailed in the principal money markets of the world. At the same time call loans in Canada have declined to $1,4[illegible] from $8,300,657.

Current Loans Lower

While there have been reports of gains in many lines of business, current loans have not shown a tendency to increase, with the result that loans to manufacturers, farmers and merchants now stand at $234,861,311 down from $281,477,041. This would appear to indicate that many customers have been able to finance the present increase in business from their own resources.

Of special interest is the continued tendency of deposits to expand throughout the country and as a result, total deposits have now gained to $678,944,866 from $630,218,835 a year ago.

An informative feature of the report is contained in the section where the Bank shows that it has total assets of $792,772,872 with which to meet payment of liabilities to the public of $716,107,779 leaving an excess of assets over liabilities to the public of $76,665,093.

Profit and Loss Account

The profit and loss account shows earnings slightly down from the previous year. It also indicates that the Bank's taxes to Dominion and Provincial governments are in excess of $1,000,000.

Profit for the year amounted to $4,007,302 against $4,145,024 in the previous year. From the profit taxes to the Dominion and Provincial Governments required $1,002,080 leaving for distribution $3,005,212. Of this amount dividends to shareholders took $2,880,000 leaving an amount to be carried forward of $125,212. The net profits of $3,005,212 were equal to 7.92 per cent of capital, surplus and undivided profits. After provision for taxes and dividends, the balance brought forward increased the balance of profit and loss carried forward to $1,935,033.

TOWN COUNCIL

The town council met in regular session on Monday evening Nov. 25. Mayor Brace, and Councillors Swift; Hammond; Lovell; Taylor and Bellamy were present.

The minutes of the previous meeting were approved. A statement of receipts and expenditures made in the month of October was read and ordered to be incorporated in the minutes of the meeting.

Secretary reported that the town's books had been audited up to Oct 31st last. A number of accounts were ordered paid. The property committee reported the removal of the building from the fair grounds sold for erection as a horse shelter at the rear of the theatre. A by-law to amend the building restrictions by-law was discussed, but no further action taken. The Secretary was instructed to attend a session of the Utilities Board on Thursday Dec. 5 in Edmonton, when the town's applications for the cancellation of three portions of plans subdivision would be heard. A by-law providing for the imposition of penalties for breaches of town by-laws was given three readings and finally passed. The purpose of this by-law is to put the cash penalty provisions of by-laws in conformity with the new Town and Village Act. Councillor Hammond as chairman of the Fire committee was authorized to proceed with the reorganization of a new fire brigade.

Mr. T. McBratney had in an application for a Provincial restaurant licence for the purpose of operating a counter for the sale of soft drinks etc. in the pool room he proposes to open. His application was endorsed by the council.

Curious Taxes

(Continued from page 2) ... ..

or amount paid to the king to permit the handing over of an inheritance to the heirs. Most nations and states now levy this tax.

A land tax in Gaul took one third of the annual value of the produce which is no greater than the rate of tax paid by American farmers in many communities during low farm prices in recent years. King Henry I of England levied a tax of 3s. on a hide, or small tract of land, to pay the expenses of his daughter's wedding. Another early land tax was the Saladin tax imposed by King Richard the Lion Hearted, to finance his share of the Crusade against his gallant Saracen opponent, after whom the tax was named.

The land tax is the backbone of the American state and local tax structure. The rates are imposed against the supposed capital value of the land, whereas in England, France and other European countries this tax is levied against the real or theoretical income of the land and improvements.

Only a few weeks old, yet it has captured the tastes of thousands ...

Gas Line Hockey League To Resume Play This Week

At a league meeting held at Holden on Tuesday night the Gas Line Hockey League got under way again for another winter's play.

The president, W. J. Fleming was in the chair and he explained the primary object of the meeting was to consider the application of Wainwright to enter the league. Wainwright was represented by K. S. Tory, Mr. Stewart and S. Worton. These representatives stated that now the highway was completed to Wainwright, that team could maintain its schedule. Upon a vote it was decided to admit them, Mr. Tory expressing thanks and promising that Wainwright would do all they could to make the league a success this year.

The league play opens tonight (Thursday) with Wainwright at Irma, the next game being Monday next, with Viking at Tofield. A full schedule will be published shortly.

There are forty games exclusive of play-off games, each team making two trips to each other town.

The Tofield team was represented Les. Glover, Graham Allan and W. Worton.

Hockey fans are requested to turn out in force on Monday night and give the local team a good send-off. There are several changes in the line-up this year and until they meet in the acid test of a league game, little is known of their ability. But you can depend upon it if the weather conditions are at all favorable the locals will be in there playing and whether it is a win, lose or draw; it will be a real hockey game.

We still pick Stan and Mack to win the Mixed.

INTERESTING LECTURE ON MILLING OPERATIONS

Mr. Green of Edmonton gave a very interesting illustrated lecture on Saturday afternoon last, at the Co-op new store. While his object was to increase consumer interest in his particular brand of flour, the lecture was well worth listening to, quite an amount of interesting detailed knowledge regarding different kinds of cereals and flour being given.

There was a good crowd out to hear him, the store being comfortably filled.

TOFIELD FIRE BRIGADE RE-ORGANIZED

A re-organization of the Tofield fire brigade has recently taken place. For some years the chief, M. C. Hammond, has depended upon voluntary effort at fires but a new arrangement is now made whereby a number of young fellows under his direction meet, regularly check up and refresh their minds as to what to do in case of fire.

For this the town allows them 50c per meeting, while for fire calls the remuneration is $1.00.

A secondary chemical engine has been re-equipped and will act as an auxilliary to the one now held in readiness at all times. This should prove to be a great improvement.

AINT WE LUCKY!

The Edmonton Journal only recently announced its intention of giving away a fine dog to some lucky Edmonton youngster. Well, in this respect the Journal really has nothing on us, we can give away five. It is like this. A motherly canine creature, with a kindly but woe-begone face, thought our property was the best place to raise a family. Uninvited, and not particularly welcome, temporarily at least, she has made her home at the rear of our lot. There is no resisting the appeal in those brown eyes and for the time being at least she is safe. In the meantime get your orders in early.

R. W. PINCOTT'S "BLUFF" CALLED

A Pussy Willow in December

Early last winter when speaking with R. W. Pincott he said, pointing to the trees "look, those trees will be bare till next May." And of course he was right, but this year it is something else again. This week a sprig with a pussy willow bud fully out was brought to the office. Normally this does not happen until early spring, but the twisting around of fall and winter seasons have evidently got Mr. Willowtree out of time.

FOR SALE: HORSES. 2 geldings, one coming 3 years and the other coming 2 years. M. C. Hammond, Tofield.

LOCAL AND PERSONAL

Mrs. McLeod returned home on Tuesday from Halcourt where she has been visiting.

The Misses Kathrine, Mary and Alice Moen visited Tofield on Wednesday evening attending the dance in the new Co-Operative Store.

A number of the young people attended the hockey game in Edmonton on Sunday.

Miss A. Lindsay left on Saturday for her home in Innisfree. Miss Lindsay sold her Beauty Parlor to Miss Viola Lee, who started business on Monday.

Miss Margaret Lindsay spent the week end with her sister Anne here.

Mr. and Mr. Geo. Coatts are visiting the city for a few days.

Mr. Earl Bowden of the Tofield Garage staff, spent a couple of days at Lacombe this week.

Mr. and Mrs. McLaughlin motored to the city on Sunday.

Les. Glover, Graham Allan and Bill Worton motored to Holden on Tuesday to attend the Gas Line Hockey meeting.

The Jolly Twelve met at the home of Mrs. Innis on Thursday last. Mrs. Coatts on behalf of the Bridge Club presented Anne Lindsay with a box of notepaper, who was leaving for her home in Innisfree on Saturday.

We are glad to report that Mrs. Thomas, who has been quite ill is up and around again.

Mrs. C. Baptist and her mother, Mrs. A. Pollard of Edmonton, returned on Friday from a two month's visit in Los Angeles, San Francisco and other points in southern California.

FAREWELL PARTY FOR ANNE LINDSAY

On Friday evening last, Tofield and district young people gathered in the Curling Rink Hall to say Good-bye to Miss Anne Lindsay, who left for her home in Innisfree on Saturday.

The evening was taken up with dancing, the music being supplied by the Tofield Rangers orchestra.

At midnight a delicious lunch was served by the girls after which W. B. Worton on behalf of those present spoke a few words, saying that Anne had been here for three years and that she was well liked by everyone, both young and old. We all hated to see her go but all wished her the best of luck and happiness in her home at Innisfree. He then called Miss Patricia Burnett forward who presented Anne with a Compact set from the gang. Anne responded suitably saying that she would always have fond memories of Tofield.

"For She's a Jolly Good Fellow," and "Auld Lang Syne" were then sung by the crowd which was followed by dancing after which everyone departed for home.

On Tuesday evening of last week, a bridge party was held in honor of Miss Anne Lindsay at the Worton home. Four tables of bridge was played and honors were won by, 1st Ladies Thelma Jobb; 2nd Ladies Hilda Nomeland; 1st Gents Glenn Wood; 2nd Gents Charlie Edwards.

At midnight a lovely lunch was served by the hostess followed by tea cup reading which created much fun and laughter. "For She's a Jolly Good Fellow" and "Auld Lang Syne" were then sung and all departed for home.

ONE POULTRY BUYER AT LEAST AN HONEST MAN

Farmers may or may not rave about what poultry buyers do to them when buying poultry, but some one in the bank is congratulating himself that he did business with the right kind of a buyer on Wednesday.

On Wednesday, Mr. Dolinko cashed a number of money orders at the bank and should have received $165. Bankers were generous that day and ing home with a cow in a sleigh when dently he did not trouble to count it for later in the day he was confronted with a request for $35.00 from the bank. By that time considerable business had been done and a check-up of cash had to be made before admitting the liability. The bankers were right—that's where the missing $35.00 was and Mr. Dolinko with profuse apologies hands it over. It was really fortunate for the bank it was a poultry buyer—consider the plight of the bank had it been a country newspaper man.

LINDBROOK

The recent thaw has pleased some and not others. It would be better if it thawed more and got rid of all the ice and snow, still in the hills here, it is bare in places making a bit of picking for sheep, cattle and horses. The motorists tho, think it is the bunk. The highway being like a sheet of glass and cars cutting up queer antics despite their drivers efforts, lots making the acquaintance of the ditch, causing much worry and lurid language.

The sympathy of the people of this district is extended to our teacher, Mr. L. McLeay on the death of his father last week in Vancouver.

Messrs Herbert and Cay were around last week doing custom chopping and sawing in the district.

We are sorry to hear that Mr. Ted Geneski is seriously ill with pneumonia. We hope to hear of a speedy recovery.

Mr. Bracegirdle took his children up to view the T. Eaton Co's Santa Claus parade in Edmonton last week. Judging from the children's comments, it must have been dandy and they enjoyed themselves immensely.

The annual turkey slaughter is on this week and there doesn't seem to be the quantities as of old, owing no doubt to previous low prices, the result not so many birds hence higher prices.

Mr. Ralph Cohn of Blue Ridge, Alta who has been in this district over a year returned to his home last week.

COLD LAKE TROUT

Cold Lake Trout and other kinds of lake fish have in recent years become very popular as a welcome change to the winter diet of meat. Possessing valuable health giving properties, Cold Lake fish is a distinct asset to the winter menu of any family. Many people buy 100 pounds, frozen for their own family's use, while others get 50 pounds, again others join with their neighbors in buying 100 pounds or more. Following the Christmas season when there is usually a super abundance of poultry, Cold Lake fish provide a healthful and welcome addition to January and February meals.

MRS. COOKSON'S BIRDS WIN EGG LAYING COMPETITION

Maintaining a prize winning clip that put them in the lead a month or so before the end of the contest, the White Leghorn birds owned by Mrs. J. W. Cookson emerged victors in the provincial egg laying contest.

There were ten birds and the laying period covered one year. They layed 2,181 eggs for which they were awarded 2[illegible] points.

It is quite an honor to win this contest as it might be termed the elite of the provincial poultry yards assemble at Lethbridge to prove their worth. Mrs. Cookson has been raising White Leghorns for quite a few years and her many friends will congratulate her on winning this coveted honor.

"YOU WOULDN'T FOOL ME"

The Play is a comedy in three acts. It is one of the funniest stage performances you have ever seen.

The conversations that go on between the various characters are side splitting and the situations are comical and tragical.

But you have to see it to know there are a lot of funny things and funny people in this world.

The play is to be staged in the Variety Theatre on Friday and Saturday, 20-21st of December.

It is under the auspices of the United Church Ladies' Aid.

OVER GOVERNMENT—

THESE ARE days of inward searching. A time when people, realizing that things are not running as smoothly as they should, look about them to find out what is wrong, and failing, begin to wonder if some of the trouble at least is not to be found within the confines of their own "back-yard."

For several years Canadians, particularly Western Canadians have been suffering form successive shocks of market losses. True, there have been some gains in recent times, but market losses have been considered the one cause of our troubles. As a matter of fact, while market losses have played havoc with Canadian economic affairs, there is another thing that hangs like a millstone from the Canadian citizen's neck, and which if not at some time in the near future remedied, will make serfs of the rural population and hacks of the urbanites. The following excerpt taken from a Toronto newspaper, "The Farmers' Sun" (April 28th, 1932) and re-copied from "Pioneering in the Canadian West," presents a financial picture rarely studied by Mr. Average Citizen, who in some form or another is called upon to supply the "sinews" so that Canada as a nation may continue to go forward. The article in question is as follows:

> "Canadians are beginning to realize that among their least desirable assets is a tremendous overburden of government. We have, according to the auditor-general's report ending March 31st, 1929, collected a net revenue for governmental purposes $422,717,982 for a population of a little over ten millions of people. Is this a burden that can be borne forever?
>
> "Then the province of Ontario spent in 1931 $54,846,994. There are eight other provinces all spending and taxing. Then we have innumerable county councils, municipal councils and school boards, all with powers to tax and borrow and all spending on a horde of officials.
>
> "In addition there are various commissions, supposed to be free from governmental control, drawing big salaries and doing work that under proper administration of democratic government should be done by the representatives of the people."

Continuing to deal with the subject of over-government in Canada, the author of "Pioneering in the Canadian West" says:

> The hopeless part of the present position is that, under the British North America Act, i. e., The Canadian Constitution, these officers will increase automatically with the increase in population; and so, with an increase in the number of the members of the Prime Minister of Canada's Cabinet (at the present time it is 18), and with each of the nine Prime Ministers in the different Provinces increasing his Cabinet Ministers, the machinery of government will, as is easily seen, soon be overloaded, and the British North America Act will, of necessity, have to be amended.
>
> Let us observe the State of New York, with a population equal to that of the entire Dominion of Canada at the present time. It has but two members in the United States Senate, and these will never be added to, no matter how populous the State becomes.
>
> In Canada, on the other hand, the reverse is the rule; and so it amounts to this, that in Canada, where there is no army or navy to support, the people tax themselves for the purpose of keeping up a white-collared brigade!
>
> It requires more than sixteen per cent of the annual gross production in Canada to pay the cost of government—Federal, Provincial, and Municipal—which means that the farmer who grows 1,000 bushels of wheat must hand over at least 160 bushels in order to pay for his share of this high cost, and that the maker of automobiles who builds 100 cars must similarly hand over 16 of them. And that is what the farmer and manufacturer in the Dominion of Canada are doing today: but it is not realized, as most of this cost is paid through indirect taxation.
>
> But direct taxes are leaping up by leaps and bounds. When the author located his homestead in Alberta in 1902, the direct taxes were, annually, $4.50 for schools, and $2.00 for roads (local improvement); but at present on the same land, the annual taxes amount to $90.00, even though the land has no great amount of improvements on it.
>
> Taxes on farms throughout rural Ontario have increased in about the same proportion—and yet some wonder why the young man leaves the farm! Taxes may be quite as high in the towns and cities, but there the "buck" is more easily passed to the next fellow! The farmer, however, cannot work the land without valuable machinery and live stock,, and his assets are easily found and taxed."

At the present time the government departments of the province of Alberta are undergoing "reorganization," the final result of which it is hoped by those responsible, to be a saving. The idea or "reorganization," is a good one, with the exception perhaps that "firing" a man or women now when re-employment is extremely difficult to obtain is different from the same procedure ten years ago when re-employment was fairly easy to get.

MESSAGE FROM THE PRESIDENT OF THE UNIVERSITY OF ALBERTA

The president of the University of Alberta has issued a message to all Albertans. The purpose is that the people of Alberta should be fully advised of the work which it does, the services which it could still more adequately perform, the needs which it experiences, and the hopes and ambitions which it cherishes in the work in which it has been set apart to do.

One of the opening paragraphs of the message is headed—

The Function of the University

and is as follows:

"It has been indicated that the claims on the University are many and many-sided. The fundamental work which the University has to do can, however, be summarised in a single phrase. The purpose of the institution is to conserve and to widen knowledge. In other words, its function is two-fold: teaching and research. It must present what the past has achieved: it must do its part in the exploration of the unknown. The one cannot be done without the other. A teacher who is not an explorer of knowledge is not a stimulating teacher: an explorer who cannot communicate his zeal and enthusiasm to youth is seriously hampered in his work of exploration. There must be the backward look and the forward look: the acceptance of the experience and the knowledge of the past as a starting point for obtaining that wider knowledge which the claims of the present and the future demand."

Complete copies of the message may be had by writing the University for one.

SPIRIT LOVE KEPT HOPE FOR LIFER

ST. PAUL, Nov. 28.—The strange tale of a deathbed compact that kept love alive in the heart of a "lifer" in the Minnesota state penitentiary eight years after his sweetheart had died came Sunday from Italy.

The story concerns Michelangelo Gentilcore, freed from the prison last December to return to his homeland and wed his boyhood sweetheart Maria Delando.

Gentilcore is married now but not to Maria. She died eight years ago after exacting a promise from a friend to continue writing letters to her sweetheart signing the name "Maria."

Thus the monthly missives continued to reach Gentilcore, encouraging him to "hope and pray" for his release—a release which eventually came in the form of a pardon.

VIKING ASTRONOMER SPOTS 'BLOTCHES' ON SUN'S FACE

Believed to have a definite effect on the weather and radio reception, two enormous groups of sun spots, extending over 96,000 miles of the sun's surface, have been noted by H. B. Collier, amateur astronomer of Viking.

Edmonton astronomers when questioned said that conditions for observing the sun have not been good for two or three weeks but announced they would make a telescopic observation as soon as possible. According to Mr. Collier, the spots may be observed clearly through a good pair of binoculars, using a smoke glass as an eye screen.

Sun spots, it was explained, appear dark in contrast to the sun's surface, but really are 500 times brighter than the moon. Nothing positive has been established by science as to either the character or cause of sun spots, or their exact effect on the earth. It was recalled that a year or two ago the dominion observatory announced that Canada was entering a "sun spot period" which usually lasts 11 years. The effect of this will increase rainfall, it is believed.

STRANGE CULT SALTS 'CORPSE' TO RECREATE

BLANDING, Utah, Nov. 26.—Members of a strange cult, isolated on the arid slopes of southeastern Utah, awaited last night the fulfillment of the ritual to restore life to Mrs. Edith Pashal, who died 10 months ago.

"The re-creation will be soon now," a reporter from the Salt Lake City telegram quoted Mrs. Marie Ogden, leader of the group, styled the "Home of Truth," after an interview.

Daily the unburied body of Mrs. Pashal is bathed in salt water. For three months members of the cult have been watching the "re-creation," Mrs. Ogden said.

No one is permitted to see the body which lies in a building at Photograph Gap, near Blanding. The state health department recently was forced to obtain a court order to inspect it and make sure it was not a menace to public health.

"I cannot tell you just when she will come back," said Mrs. Ogden, who with her husband and three other members of the cult, carry out the daily ritual. "That is in the future, just like the coming of the master. Her return to full life must be gradual as was her disintegration period."

TOOTH DRILLING WILL BE MADE ALMOST A PLEASURE

NEW YORK, Nov. 29.—A literal meaning may soon be given that ominous dental admonition to "open wider, please; this isn't going to hurt—much." Columbia University announced Thursday discovery of a revolutionary and harmless pain deadner by Dr. Leroy L. Hartman, formerly of Victoria, B.C. and now professor of dentistry in the school of dental and Oral Surgery.

Medical claims attached to the new desensitizer state that it is expected to revolutionize the practice of dentistry by eliminating pain, and that "drilly" feeling in the preparation and filling of tooth cavities.

The new desensitizer perfected by Dr. Hartman after 20 years of research, is described as a solution applied to the surface of the tooth, not only preventing pain but also offering the possibilities of saving teeth now doomed to be lost through extraction.

Although full details were withheld, Dr. Hartman said the desensitizing solution is based on a new theory of pain and the recognition of a previously unknown substance in the dentine of the tooth.

It becomes effective in about one and a half minutes after application. It remains effective from 20 minutes to an hour.

It is to be patented and patent rights assigned to Columbia University which will control price and quality so as to make it available for public use and to prevent commercial exploitation.

Dr. Hartman said the new desensitizer causes no after-effects, as do certain other drugs, and that it is so simple to use the patient is not aware of its application.

ROME CLAIMS NEW TB. CURE

ROME, Dec. 2.—After 20 years of painstaking efforts an Italian chemist, Dr. Mario Nurkis announced today he had perfected a new treatment for tuberculosis.

For years Dr. Nurkis has studied treatment of the disease on the theory that it could be cured by a serum from the lung-tissues of certain animals that had been specially treated.

Aided by scientists who agreed with his theory, Dr. Nurkis treated 20 patients described as being in advanced stages of the disease. All of them recovered, it was said.

Answer

It was the end of the scene and the heroine was starving. "Give me bread!" she cried.

And the curtain came down with a roll.

BANK OF MONTREAL

Established 1817

A presentation, in easily understandable form, of the Bank's

ANNUAL STATEMENT

31st October, 1935

LIABILITIES

LIABILITIES TO THE PUBLIC

Deposits *Payable on demand and after notice.*	$676,944,866.06
Notes of the Bank in Circulation *Payable on demand.*	29,939,128.50
Bills Payable *Time drafts issued and outstanding.*	353,011.79
Acceptances and Letters of Credit Outstanding *Financial responsibilities undertaken on behalf of customers (see off-setting amount [x] in "Resources").*	7,066,426.26
Other Liabilities to the Public *Items which do not come under the foregoing headings.*	1,804,347.07
Total Liabilities to the Public	$716,107,779.68
LIABILITIES TO THE SHAREHOLDERS	
Capital, Surplus and Undivided Profits and Reserves for Dividends *This amount represents the shareholders' interest in the Bank, over which liabilities to the public take precedence.*	76,665,093.08
Total Liabilities	$792,772,872.76

RESOURCES

To meet the foregoing Liabilities the Bank has

Cash in its Vaults and Money on Deposit with Bank of Canada	$82,711,635.13
Notes of and Cheques on Other Banks *Payable in cash on presentation.*	27,614,596.16
Money on Deposit with Other Banks *Available on demand or at short notice.*	37,764,631.60
Government and Other Bonds and Debentures *Not exceeding market value. The greater portion consists of gilt-edge securities which mature at early dates.*	361,769,848.49
Stocks *Railway and Industrial and other stocks. Not exceeding market value.*	103,872.95
Call Loans outside of Canada *Secured by bonds, stocks and other negotiable securities of greater value than the loans and representing moneys quickly available with no disturbing effect on conditions in Canada.*	18,835,258.07
Call Loans in Canada *Payable on demand and secured by bonds and stocks of greater value than the loans.*	4,435,736.20
Bankers' Acceptances *Prime drafts accepted by other banks.*	139,232.54
TOTAL OF *QUICKLY* AVAILABLE RESOURCES *(equal to 74.40% of all Liabilities to the Public)*	$533,374,811.14
Other Loans *To manufacturers, farmers, merchants and others, on conditions consistent with sound banking.*	234,461,311.20
Bank Premises *Three properties only are carried in the names of holding companies; the stock and bonds of these companies are entirely owned by the Bank and appear on the books at $1.00 in each case. All other of the Bank's premises, the value of which largely exceeds $16,500,000, appear under this heading.*	14,700,000.00
Real Estate, and Mortgages on Real Estate Sold by the Bank *Acquired in the course of the Bank's business and in process of being realized upon.*	1,323,432.05
x Customers' Liability under Acceptances and Letters of Credit *Represents liabilities of customers on account of Letters of Credit issued and Drafts accepted by the Bank for their account.*	7,066,426.26
Other Assets not included in the Foregoing	1,846,892.11
Making Total Assets of	$792,772,872.76
to meet payment of Liabilities to the Public of	716,107,779.68
leaving an excess of Assets over Liabilities to the Public of	76,665,093.08

PROFIT and LOSS ACCOUNT

Profits for the year ended 31st October, 1935, after making appropriations to Contingent Reserve Fund, out of which Fund full provision for Bad and Doubtful Debts has been made	$4,897,302.06	
Less Dominion and Provincial Government Taxes	1,092,088.69	$3,805,213.37
Dividends paid or payable to Shareholders		2,880,000.00
		$925,213.37
Balance of Profit and Loss Account, 31st October, 1934		1,019,879.71
Balance of Profit and Loss carried forward		$1,945,093.08

CHARLES B. GORDON,
President

W. A. BOG,
JACKSON DODDS,
Joint General Managers

The strength of a bank is determined by its history, its policy, its management and the extent of its resources. For 118 years the Bank of Montreal has been in the forefront of Canadian finance.

In Olden Days Before Bookeeping Was Practiced - - -

Business was largely a matter of barter. With no currency systems to guide them, trading folk swapped goods and services. Today, in spite of wonderful advances in the business of banking, fund transferance etc., the barter system is not completely dead. Even in businesses of considerable magnitude between individuals situated in different countries, a two-way, three-way, or four-way plan is resorted to, by which goods are more nearly exchanged then purchased outright.

The Tofield Mercury has done considerable barter business for the past four years. In the payment of subscription accounts we have taken almost every variety of thing a farm produces, including wheat, oats, flour, butter, eggs, poultry, pork, beef, lard, etc. We prefer money of course, but again this year we will accept produce in payment of subscription accounts, both current and arrears.

We know that the year 1931 was not as good as it might have been. Perhaps no business reacts more quickly to "hard times" than the country newspaper business, and when it is "tough sledding" for the farmer it is equally tough for the newspaper man.

This is the time of year when many subscribers pay their renewals. Already a number have dropped into the office and paid up. If conditions are not **Too Hard** with you — may we expect you too?

THE MERCURY

"GRAIN FORUM" IS NEW FRIDAY RADIO FEATURE

Grain Trade to Sponsor short informative talks and Music.

Friday, December 6th, at 9 p.m. Central standard time and 8 p.m. Mountain standard time will mark the opening of a new all-Western programme known as "The Grain Forum" which will be broadcast over a net work of Western stations every Friday at the same hour. It is sponsored jointly by the Winnipeg Grain Exchange and the North-West Grain Dealers' Association and promises to contain several interesting features.

Tuneful music will be provided by a string orchestra, known as the "Cereal Strings," and on occasions, by a specially selected group of male singers.

Short, interesting addresses of not more than ten minutes duration will deal with various aspects of the production, distribution and marketing of grain.

An invitation will also be extended to all those interested in the growing of grain to submit questions on agricultural problems, all of which will be answered. The more important questions and answers will be broadcast.

The first talk on December 6th will be introductory to the series and will contain some announcements of particular interest to the farming community.

On December 13th a short talk on the "World's Foodstuffs and the Place Occupied by Wheat" will be given and December 20th will be devoted to a special Christmas broadcast, featuring the orchestra and the male voice ensemble.

Other talks planned for early delivery are: "Canada and her Competitors;" "The Services of the Country Elevator;" "The Grain Exchange, what it does and what it does not do;" "The factors that govern and influence the price of wheat."

Announcements will be made from time to time of other subjects to be discussed.

NATIONAL JUNIOR JUDGING COMPETITIONS

Justyn Rigby and Arthur Mackey of the Grande Prairie district were acclaimed as champion junior Grain Judges in the National Competitions held at the Toronto Royal winter fair.

In individual standing Justyn Rigby of Wembley led all Canadian grain judging teams with 554 points out of a possible 600; while his team mate Arthur Mackey of Teepee Creek was second with 550 points.

As the final results have indicated these boys were well mated. Both boys were twenty years of age. They have been members of the Wheat Club for several years and winners in previous district competitions. Both have matriculation standing and good address. Both boys not only know grain but, with the advantage of a high school education, their upstanding appearance and their thoroughness in their work made them a hard team of boys to beat.

Justyn Rigby came to the Wembley district about seven years ago with his parents from near Calgary. The Rigby's have been producing high quality seed in this district for a number of years and Justyn is a very thorough farmer. The large grain shows of Toronto and Chicago have seen a number of entries from the Rigby family. Their farm is largely a grain farm and exceptionally well farmed. Justyn attended the Vermilion School of Agriculture last winter. He is an active worker in the Junior Grain Club and carries thoroughness in all activities he undertakes.

Arthur Mackey has spent most of his later years in the Teepee Creek district about twelve miles east of Sexsmith, having come to that district with his family when quite young. The Mackey family operate a large farm in that vicinity. Arthur has been an ardent worker in the Junior Grain Club for the same time as Justyn Rigby. Since joining the Grain Club Arthur has been particularly interested in the production of good seed grain as well as livestock. He has also been a winner in local junior competitions within the grain club activities.

This grain judging team was coached by W. S. Morrison, District Agriculturist and Supervisor of Junior Club activities in the district. Wet weather coupled with muddy roads and a delayed threshing season made training of the boys extremely difficult. The boys had the opportunity of practice work on the world's finest grain samples, for they had samples from all the big prize winning exhibits of former years, on which they received an excellent training.

This is the first time that a Grain Judging team has gone to Toronto from the Peace River country and so the first time the trophy has gone this far north in the Dominion. In fact this is the first time that a National Judging Championship has been won by a judging team from the Peace River.

The Alberta Wheat Pool, which is keenly interested in and a supporter of this Junior Wheat Club movement, congratulates these boys on their success.

—Alberta Wheat Pool Budget.

THOSE POOR PIGS

Strange to say, I find myself in strong sympathy with the attitude of many folks who held up their hands in horror about the killing of little pigs. I will go further than most of them in condemning scarcity economics. We want an economy of abundance, but it must be balanced abundance of those things we really want. The pig iron reduction control of the big steel companies in 1933 was in principle one thousand times as damnable as the pig reduction campaign of 1933. Pig iron production in 1932 was about 20 per cent of that in 1929. Pig production in 1933 in pounds was 97 per cent of that of 1929. In 1934 pig iron production was 45 per cent of that of 1929. Pig production in 1934, the drouth year, was 80 per cent of that of 1929. In other words, farmers cut pig production 3 per cent when steel companies cut pig iron production 80 per cent. That sort of industrial reduction program plowed millions of workers out into the streets. It is because of that industrial reduction program that we have to spend billions for relief to keep the plowed-out workers from starvation. I hope industry in future reduction programs will not find it desirable to plow millions of workers out of their jobs. People are more important than pigs.

Great corporations should not finance people to attack agricultural adjustment. They are too vulnerable. Instead they should co-operate with agriculture to bring about increased, balanced production of those things which American people really want at a price which they can afford to pay, but at a price high enough to keep the production coming without undue speculative gain. If industry were as productive as it knows how to be, the increased home market for fruit, vegetables, meat and dairy products would be truly surprising. But this market cannot come to pass until industry ceases its reduction control programs. —Henry A. Wallace, U.S. Secretary of Agriculture.

TESTED RECIPES

Apple Chicken Salad

Take six ripe Canadian-grown apples, scoop out the centres. Fill them with finely-minced cold cooked chicken and season with minced green peppers and salt. Add enough cream to moisten. Place apples in a steamer and cook until almost tender. Place them on ice and serve with mayonnaise and lettuce.

Boiled Dressing for Salads

½ teaspoon salt
Cayenne
1 tablespoon flour
1 tablespoon butter
1 teaspoon mustard
1 tablespoon sugar
1 egg
½ cup boiling water
¼ cup vinegar

Mix dry ingredients thoroughly. Add butter and egg slightly beaten; then gradually add boiling water. When thoroughly blended add the vinegar slowly. Cook over boiling water, stirring constantly until the mixture thickens. Strain and cool. If desired, the dressing may be thinned with cream.

Apple and Date Salad

Cut Canadian-grown apples into diced parts. Cut dates into similar pieces, using a quarter as much date as apple. To each pint of material add two tablespoons olive oil and mix well. Let stand in a cold place closely covered for half an hour. Turn into bowl lined with lettuce leaves, add 1 tablespoon lemon juice. Serve with bread and butter at luncheon or supper.

Apple and Cheese Salad

Mix chopped pecans with twice their bulk of cream cheese, adding a little thick cream to blend the mixture. Season with pepper and salt and make into tiny balls. Pare mellow tart Canadian-grown apples, core and slice across the centre into rings about ½ inch thick. Arrange on lettuce leaves and place several cheese balls in the centre. Serve with cream or salad dressing.

BROKEN JAW: TURKEY SNACK PROVES FATAL

ROME, N.Y., Nov. 29.—John Nicholas Campanelli, 27 of Utica choked to death Thursday, while eating Thanksgiving dinner here.

Campanelli, convalescing from a broken jaw, was on a liquid diet. His jaws were wired together, to mend the fracture. He tried to eat a piece of turkey by pushing it through where a tooth had been removed and choked to death.

A FAT FOR WHICH THERE IS NO SUBSTITUTE

Butter is one of the foods which has been widely used for many centuries, but whose true nutritional merit has only recently been brought to light according to Laura C. Pepper, of the Dairy and Cold Storage Branch Dominion Department of Agriculture. Recognizing the importance of adequate amounts of fats in diet and the valuable contribution made to health by butter, modern scientists uphold the generous use of this superior fat.

Palatability and high food value are the two qualities which earn for butter the distinction of being the fat for which there is no substitute. Fats are recommended for their tasteless properties hold little or no interest for the woman who prides herself on her cooking. She knows it is butter that makes cream sauces look and taste so rich, it is the butter used in cakes and cookies that evokes praise from friends, and similarly it is butter that insures excellent flavour and colour in many dishes prepared for the family table.

As for food value, butter is a concentrated energy producer yielding two and one quarter times as much heat in the body as the sugar and starch foods. This is a strong argument in favour of using plenty of butter, particularly during cold weahter when the body requires extra heat. Butter is easily digested and readily and completely assimilated by the body; it contains small quantities of lime and phosphorus, and in addition has a high vitamin content which distinguishes it from other fats. It is an exceptionally good source of vitamin A which builds up resistance to disease and promotes normal health and growth. Butter is also one of the few foods which provide Vitamin D, the sunshine vitamin—so necessary for the development of bones and teeth.

CROP TESTING PLAN SHOWS WIDE USE OF POOR SEED

It is evident from the report of L. H. Newman, Dominion Cerealist Chairman of the Seed Grain Committee which was recently submitted to the National Advisory Committee on Agriculture that the majority of the farmers in both Western and Eastern Canada are indifferent concerning the quality of their seed, and consequently suffer very substantial financial losses. The report analyses the Crop Testing Plan for 1935. In the three Prairie Provinces—Manitoba, Saskatchewan and Alberta—14,107 samples of wheat were collected at 722 elevators in the autumn of 1934 of which 13,477 samples were grown at 71 points. An examination held in the summer of 1935 disclosed that of the 13,477 farmers whose wheat was planted for testing 41 per cent had Marquis, 19 per cent had Garnet, 8 per cent Reward, 5 per cent Red Bobs 222, two per cent Ceres, one per cent Early Red Fife and 3 per cent Durum. Fractions of one per cent contained some 19 to 20 other varieties such as Huron, Preston, Club; Stanley and Old Fife types; Kitchener, Percy; White Russian, Aurore; Prelude; Ladoga, Ruby, Red Fife; Vermilion; Parkers, Kota; Pioneer; Early Prolific; Kubanka and some off types of hybrids.

The analyses made of the samples grown disclosed that 29 per cent were Class A; 31 per cent were listed as passable or Class B while forty per cent were Class C, regarded as very undesirable from a seed standpoint. More than 20 per cent of the farmers gave the wrong variety name of their wheat when submitting samples.

The plan as conducted in Western Canada was made possible by the co-operation of five well known grain elevator companies, the three provincial Departments of Agriculture in the Prairie Provinces, the Faculties of Agriculture of the universities of these provinces, the Seed Branch and Experimental Farms Branch of the Dominion Department of Agriculture.

Several hundred samples of barley were also checked and analysed and disclosed that as with wheat, many farmers are using seed which is unsatisfactory from the viewpoint of getting profitable results.

The Crop Testing Plan was introduced in Eastern Canada in 1934 and continued in 1935 with encouraging results. It is to be extended in 1936.

The yield of potatoes in Canada in 1935 is estimated to show a reduction of 9,200,000 cwt. or 19 per cent as compared with 1934. This large decline was partly due to a decrease in the acreage of 62,400 or 11 per cent, and partly to the summer drought in Eastern Canada and British Columbia which reduced yields per acre to levels below those for 1934 and the long time average.

A little boy, after his first day at school, was questioned as to what happened at his first day.

"Nothing much," he said, "except that a lady there who didn't know how to spell 'cat' asked me how; and I told her."

DOMINION EXPERIMENTAL STATION, LACOMBE WEEKLY NEWS LETTER

How To Prevent Goitre, Joint Ill And Hairlessness

Following long winters with deep snow, as this winter promises to be, a great deal of trouble is usually experienced with hairlessness in young pigs, goitre in calves and lambs and joint ill in foals. According to information received from the Dominion Experimental Station, Lacombe these troubles may be traced to a lack of iodine in the thyroid gland of the pregnant female and losses from this cause may be avoided by feeding iodine in the form of potassium iodide.

Potassium iodide has a generally stimulating effect, toning up the whole system and exerts a particularly strong influence on the generative organs. Females which are apparently non-breeders will often become pregnant after this drug has been administered for a few months.

For cows, dissolve two ounces of potassium iodide in a cup of warm water, sprinkle this solution over 100 pounds of salt, spread evenly and in a thin layer on a clean floor and mix well. When the salt is dry place it in a box where the animals have free access to it.

For ewes follow the same method as for cows.

For sows dissolve one ounce of potassium iodide crystals in one gallon of water and mix one tablespoon[illegible] daily in the feed or drinking water.

For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

If potassium iodide cannot be secured from your local druggist it may be purchased from the Central Alberta Wool Growers' Association, Lacombe.

REWARD VARIETY IS TITLE WINNER CHICAGO SHOW

CHICAGO, Dec. 2—W. Freelan Wilford, grain farmer from Stavely, Alta was crowned wheat king for 1935 at the International Livestock Exposition's 17th annual Grain and Hay Show today.

Wilford won the title, one of the major honors of the show, with grain of the Reward variety. His sample weighed 66.6 pounds a bushel.

Reserve champion of the wheat growers was another Canadian, William Rogers of Tappen, B.C. He showed [illegible] of the Mindan type. His grain weighed 65.4 pounds per wheat. The same type won the wheat throne last year for another Alberta grower, Jack Alsopp of Wembley.

FAIR WEATHER FOR ALBERTA

Moderate winds with fair weather and practically stationary temperature forms the forecast for all Alberta and Saskatchewan. Santa Claus, who has been feeling the heat in the last week or so perspiring freely with his fur-trimmed garments and heavy growth of long flowing white whiskers, is feeling a little easier. Over the week end there was a drop in temperature which made the [illegible] the world with a [illegible] touch.

The average monthly temperature of the last 20 years was 16.5.

The highest average monthly temperature in the last 20 years was 34.4 in November of 1922 while the lowest November average temperature in the same period was [illegible] in 1927.

Snowfall during the month was the heaviest for many years.

The highest temperature on any November day of the last 20 years was 74 in 1931 and the lowest was 39 below in 1919.

The river is now [illegible] as the ice being unstable and apt to crack under weight. There are many open spaces.

The highest temperature recorded on Sunday was 34 and the lowest was 10. The mean temperature for the day was 22 above as against 17 for the same day of 1934.

Papa: "Bobby, if you had a little more spunk you would stand better in your classes. Do you know what spunk is?"

Bobby: "Yes sir. It's the past participle of spank."—Pathfinder.

This year marked the seventh consecutive victory for Canadian wheat in the international competition.

The judges, who had waited for full daylight today to choose the winning sample said his exhibit was "beautiful grain."

The year's "wheat king" was not in Chicago to receive his title.

Of the 17 annual grain shows held in Chicago, Canadians have carried off the wheat honors 14 times, and 21 times since the inauguration of the international wheat contest 25 years ago.

Alberta has won the wheat title nine times, Saskatchewan 11 times and Manitoba once.

"Reward" wheat, with which Wilford won the crown, is a variety of red hard spring wheat developed by the Canadian government's experimental farm in Ottawa, and was first released in the spring of 1928.

Since then it has won the world's championship every year with the exception of 1931 when Herman Trelle, who, like Alsopp, the 1934 "wheat king" farms at Wembley, Alta., won with a sampler of Durum.

KETCHAMOOT

Old time friends of the Easton family of Camrose regret very much to hear of the death of Mrs. Easton at her home in Camrose on Saturday, November 30th. Mr. and Mrs. Easton and family lived several years at West Ketchamoot, moving to the Bards district where they resided several years. While living there Mr. Easton was overcome by gas in a well, leaving Mrs. Easton with a family of four children to raise, all now residing in Camrose.

Mrs. I. Carlisle entertained 20 ladies of the community to a quilting bee on Thursday of last week. Dinner was served by the hostess and a pleasant afternoon was enjoyed by all.

Mr. and Mrs. C. Coombes made a business trip to Camrose on Monday.

Mr. Lorne Lee marketed poultry to Edmonton on Wednesday.

Mrs. Joe Brown sr. and daughter Jane entertained the Social Hour handed Mr. Dolinko $200 00. Evicellaneous shower in benefit of Mr. and Mrs. Soma. A large crowd was present, a generous amount of useful articles and necessities were presented to Mrs. Soma which were thankfully received.

Mr. A. F. Schultz was a passenger to Edmonton on Tuesday. He will be welcomed home by the neighbors with bells.

Misses Margaret Lindsay; Hazel Sears; Mildred and Gertie Ingram; Ethel Coombes; Les Ovaldson; Jim Ingram; Stanley and Charley Sears and Lyle Coombes attended the party in Tofield in honor of Miss Anne Lindsay.

Mr. Charlie Campbell is layed up with painful injuries, the results of an accident. Mr. Campbell was go- Club which took the form of a mis- it tipped over with him falling on his chest.

Mr. and Mrs. Hubert who have been residing on the Mitchell farm, have purchased the Whittley farm.

Heard in a Classroom

Teacher: "To what does '54-40' refer?"

Student: "United States and England had a dispute over the boundary line of Oregon territory."

Teacher: "Very good; and how was the matter settled?"

Student: "Fifty-fifty."

LAKESHORE

Mrs. L. H. Graham spent several days in Edmonton last week, returning on Monday.

Mrs. Warner of Clover Bar is spending a few days visiting relatives here.

Mrs. T. E. Seale entertained Mrs. Elmer Gongloin of Ross Creek and Mrs. John Wood, Mrs. J. M. Johnson and Mrs. W. E. Seale on Thursday of last week. The visitors indulged in a few rubbers of bridge which resulted in a win for Mrs. Johnson and Mrs. Wood.

The Ladies' Aid gave a Social at the J. B. Warner home last Friday evening. A record crowd of over 70 people was present and a most enjoyable evening as well as profitable was spent.

R. C. Phillips and Watson Johnson visited Lloyd Wood on Tuesday evening.

Henry Tiedeman, Lynn Phillips and Miss Winnie Stoddart left last week for Vancouver.

"I don't think," said Mrs. Hardcastle, "that I'll make a cake by the recipe that Mrs. Wigton gave me. It will be too expensive. The eggs alone will cost too much."

"Why," asked her husband. "How many does it want?"

"Eighteen—the yolks of nine and the whites of nine."—Whitely Seaside Chronicle.

OVER GOVERNMENT—

(Continued from page 2)

One of the simplest, most effective and sensible ways of lessening government expenditures would be to reduce the number of government members. This is not a new idea, the provincial conservative party has been advocating it for years. The province of Alberta no more needs sixty-three highly paid legislators than the Atlantic ocean needs salt water. This province is divided into seventeen federal electoral districts. These divisions could just as well be used for the provincial house and thus save the many thousands of dollars per year paid to unnecessary members. The salary of cabinet ministers is too high, four thousand dollars per year would be ample and ordinary members one thousand dollars per year. These amounts are far more then the majority of people receive, who by taxation are called upon to pay government salaries. During a crisis in the United States a year or so ago a number of brilliant men gave their services to the country at a salary of one dollar per year. In other words they gave their time and talents to the nation free. This would be a wonderful thing for our provincial premier to do. The prestige and admiration would far outweigh the money problem. We certainly believe in economy of government because out of every 1000 bushels of wheat; out of every 100 pounds of cream; out of every pig, steer, sheep or crate of poultry the government in some way or another picks off something, and the less they pick off the better it is for the farmer. You cannot have godd government without SOME taxation, but at present Albertans are over governed and over taxed. In attempting to bring down the cost of government, example is better than precept.

BEHIND THE HOG

More Curling History

The terms used in this vary. Curl for instance probably from Flemish or Teutonic origin "Kurzwell", a game. Tee seems connected with "tigh tee" meaning to point out. Bonspiel, a combination of two Belgic words "Bonne" a district and "Spel" play. This seems to point out that curling was not an invention of the Scots. Weights are a feature, early records of stone and iron rocks weighing from 70 to 115 lbs are down to this days weight from 35 to 45 lbs.. We are now all using the accurately, machined, brightly polished, neatly handled, Alsa Grays' Burnocks, Carsphurn Reds and Crawfordjohns. Do you know what class you are in. But after all, if your rocks be smooth, sharp or otherwise, good judgement is essential.

****

We seem to have more "ho jokers" than "Host Men" in our club.

****

Curlers can preserve most anything in alcohol—except their dignity.

****

This week's Brain Wave—Time is never idle with curlers—though a lot of curlers idle with time.

****

Wider skirts are the vogue with the lady curlers, and should help the dear things to put their best foot forward.

****

Some curlers are like wheel-barrows—no good unless pushed.

****

Doc says he doesn't believe in harping—I guess he means playing on a string instrument.

****

The curler who knows not to bend and laugh,
Has scarcely learnt philosophy by half
But the curler who mingles humor with his life,
Has found a cushion for a world of strife.

****

At the local barber shop. One of our curling barbers said to a customer: Have I shaved you before, and the customer says, no, I got that scar in the war.

****

After many verbal requests, we are asking the powers that be, if they will please give us a list of the nights that the ladies will not curl. We want to make a draw.

****

My guess Stan and Mack may not be so good, but if you don't bet on a "hoss" race you don't win any money. At that it still might be Stan.

The Farce
"You Wouldn't Fool Me"

will be played in the

VARIETY THEATRE

on

Fri. and Sat. Dec. 20-21

at 8:30 p.m. sharp

It is a lively comedy from the rise of the curtain, all through the three acts. The gestures, the talks, the dilemmas are just a riot of fun.

BE SURE YOU SEE IT!

Time — A spring morning.
Place — Cameron home.
Popular Prices, 40c — 20c
Under United Church Ladies' Aid Auspices.

Wedding

KETCHAMOOT NEWS

Mr. A. F. Schultz and Miss Frances Fawcett were quietly married at the Presbyterian manse in Edmonton Tuesday, December 3rd, by Rev. Andrew R. Osborn. Upon their return home Friday evening, a reception was held when 75 or more guests gathered at their home to offer congratulations. Dancing was enjoyed by the younger set, visiting and cards by the older ones. At midnight a delicious lunch was served by the young people. After lunch Mr. Jim Sutton on behalf of the guests made a short speech wishing them much happiness and presented them with a purse of money. Both Mr. and Mrs. Shultz responded suitably thanking one and all for their kindness after which dancing was continued for a few more hours.

On Wednesday afternoon of last week, Mrs. G. W. Sears entertained the Ladies' Aid at the annual meeting. Twenty-five members and visitors were present. Quilting was the first item on the program, after which the regular devotional and business session was held, with Mrs. McCowen presiding. The election of officers then took place, the following officers were elected: Mrs. McCowen re-elected President; Mrs. Carlisle, vice-president; Mrs. Sears, sec.-treas.; Mrs. Appleby, assistant secretary-treasurer. Owing to moving out of the district, Mrs. Shupe was unable to carry on with the secretary work, which she has done for several years very successfully. The January meeting will be held at the home of Mrs. Henderson.

The boys hockey team are about ready to start business. They have been putting in quite a bit of work on their rink south of the school house on J. M. Ingram's farm. To get the necessary equipment, the boys are putting on a dance and card party at the Schultz home, Friday night, December 18th. Manager, Russel Schultz; Captain Charley Sears; Secretary Stanley Sears.

It takes more than snow storms and blocked roads in the winter time and mud in the summer time to stop our obliging mail man, Mr. Wm. Bailey. He hasn't missed more than one or two times in the past year, which speaks wonderfully well considering the distance and dirt roads.

Owing to the cold stormy day, there was no preaching services on Sunday. A minister from Edmonton was to have been present. We hope it will be possible for him to come some other Sunday.

Several days of threshing was got in last week. The grain was needed for feed at the Sutton and Tollefson homes.

The rainbow quilt donated gy Mrs. Peter Lee to be raffled off was won by Mrs. Henry McGinitie.

Messrs. James and Frank Ratigan, Les Ovaldson and Bill Buckshott motored to Edson Tuesday to get work in a lumber camp.

Mr. Wm. Mund, our former elevator man, now of Dinant, attended the reception at the Schultz home Friday evening.

Stage Play Friday and Saturday

The play to be staged in the Variety Theatre on Friday and Saturday 20th and 21st of December, is creating quite an interest.

It is a fun provoking comedy entitled "You Wouldn't Fool Me."

Everybody intends to be at this show. It will iron out your wrinkles and keep you laughing for a week. The United Ladies' Aid is to be congratulated in getting together such a splendid caste. Each one is a real actor and together they will bring down the house.

The Women's Missionary Society of the United Church will meet at the home of Mrs. W. C. Swift at 3:00 oclock on Thursday, December 19. The election of officers will take place at this meeting so a full attendance is requested.

CANADIANS AND THEIR INDUSTRIES—AND THEIR BANK
· DAIRYING ·

HENRY: "Angus, do you ever think of the time we started this dairy business?"

ANGUS: "You bet I do, Henry. It all started with me driving that milk route at $20 a month and board. I worked early and hard for what I got, but the time came when the boss was willing to sell out. The Bank of Montreal knew I was thrifty from the way my savings account had grown steadily. They helped a lot by lending me some money—on good security, of course, it gave me a good start. I still worked mighty hard, but the profits made me forget I was so tired. We have a nice balance at the Bank now."

HENRY: "Yes, and you took me in as a partner and gradually we worked up to a fine herd of our own and later a modern dairy outfit. And don't forget what our wives and children did, Angus."

ANGUS: "No, indeed! Even the girls joined calf clubs and borrowed money from the Bank to buy the first few stock. They did their bit in building up our present prize-winning herd."

· · ·

Not only are the largest dairy concerns in Canada customers of the Bank of Montreal, but hundreds of independent dairy farmers as well. Large and small, they keep their business deposits and savings at the Bank and borrow at times for seasonal requirements. Many of them call on the Bank for other services, such as credit information, market conditions. Many of them have their bonds and other valuable papers with the Bank for safekeeping.

JOBB and CO.

LINDBROOK

Another touch of winter, still if it doesn't get any worse no one will kick much.

Quite a few took advantage of the C N R's final special to go and see the "bright lights" and do their Xmas shopping.

The highway in front of the store here was the scene of an auto smash last week. It seems that an auto stopped to let off one of its passengers when another auto came over the hill and slid right into the rear of the other, buckling the back and bending the bumper. The other car had its radiator badly smashed. Now the owners are in dispute as to who is to blame and pay for the damage; we're glad we are not the judges.

Our well known "citizen," Mr. R. Heathen of the P. and H. grain elevator here had quite a fortunate escape in an auto accident near Edmonton last week. It seems he was riding up with a traveller in the other's car. Near Edmonton they crashed into the rear end of a load of poles. The poles came right through the radiator and windshield and it's a miracle how the driver and a friend in the front escaped death. Our friend too, in the back seat escaped O.K. so he is still on the job.

A dance is to be held on Friday Dec. 13th at the Lindbrook school, again in aid of the Xmas tree. A good time is promised, and seeing this is the last chance to help the kiddies Xmas, it behooves you all to come and enjoy yourselves.

A pie social was held at Hastings Lake School last week. Messrs. R. Kortzman and G. Druce supplied the music, and, we hope enriched the Xmas fund for the youngsters considerably.

Say! Westlake district! are you all still alive up there, we never hear of anything happening up there.

So Mrs. J. Brown sr. handed Mr. Dolinko, poultry buyer, the sum of $200 at a club meeting of the Ladies' Social Hour Club. This sounds queer what the —— was he doing there? And why the princely gift? Some [illegible] conundrum that, eh? See last wk.

The W. A. and Vestry of Holy Trinity Church wish to thank all those who supported them in the annual bazaar, also to thank all kind friends for their generous donations which made it such a huge success.

The rug was won by Mr. Leslie Herndier of Lindbrook, and the S. School [illegible] cloth by Mrs. H. Kendall of Tofield.

Again Tofield and Lindbrook says Thank You.

IMMIGRATION—

WE BELIEVE the future material prosperity of this province depends upon a vastly increased population. At present the population of Alberta is about 750,000—it should be two million. How to bring about such an increase in population over a period of a few years, whether it is actually possible and even should it be financially possible, whether it would result in a contented people are all questions to be answered.

Mercury readers will remember the reference to the Hornby scheme which we made some months ago and will also recall to mind the visit to Tofield of Brigadier-General M. L. Hornby. Since that time a steady and persistent work relating to immigration has been kept up, and because of this in September of this year at Newcastle Upon Tyne, England, a Voluntary Empire Migration Conference was held at which delegates from the Dominions as well as from the United Kingdom were present. Among the delegates present was Brigadier-General M. L. Hornby. During the conference the following resolution was passed:

> "That this conference calls on the Government to take immediate action to formulate, with the assistance of Dominion representatives, and put into operation plans that will ensure the speedy beginning of a great migration movement."

The Lord Mayor of Newcastle, Councillor R. S Dalgliesh, chairman of the conference pointed out that while Italy is making war to find colonies for her surplus population, Great Britain was not making use of her vast Dominions.

"What is required," he continued, "is the group settlement of several hundreds of families who will form a friendly community carrying prosperity to the Dominion who receive them. Far-seeing Canadian politicians have recognized that Canada will not be able to absorb her unemployed until she gets more settlers."

A deputation was appointed to ask Mr Stanley Baldwin, Prime Minister, to urge the immediate commencement of a great migration program, while it was decided to set up a permanent committee to conduct a campaign advocating Empire migration.

Later in London, England, a small immigration scheme involving a few skilled miners going to Rhodesia was planned, in which connection, Mr. O'Keef, High Commissioner for Southern Rhodesia said:

> "My Government has always held the view that the fundamental principle on which the much-needed distribution of the population of the Empire must be based is not the payment of subsidies or the over-exploitation of sentiment. It must be business.
>
> "Rhodesia wants British settlers," he affirmed, "but there must be a market for the goods they produce. Happily there is a growing demand for Southern Rhodesia's minerals—last year the output," he said, "was valued at 5,687,615 pounds, made up mostly of gold.

Here in Alberta pretty much the same could be said. Past experience has shown that the different kinds of subsidized immigration has been none too successful. Will future schemes succeed where past schemes have failed? Frankly, we do not know. There are many things to consider, one by one, their relations to each other, and then as a whole. Perhaps the first thing to consider is a proper ratio of population for a given area considering the potential resources of land, forest, lake and stream. We have mentioned 2,000,000 as merely a guess. What we need is sufficient population to create a home market for the greater proportion of our products. The present condition is, as everybody knows, the reverse, we are almost solely dependent upon export trade for whatever degree of material prosperity we enjoy. Having decided that the province is large enough to absorb two million or more people, more questions follow. How are they going to get here? What will they do when they are here? And is it possible to transplant a large number of people from one country to another and have a working unit of civilization. What forces of finance will have to be unleashed to tide the new comers over the transitory period. We have in times past contended that the best type of immigrant is the man and woman who makes his or her own way in a new country, but times and economic conditions have changed, and it does not seem possible that any number of immigrants could come to the province of Alberta and make progress unassisted.

The most ambitious scheme yet to be advanced is what is now widely known as the Hornby plan. This plan has been explained in detail in previous issues of the Mercury, and Brigadier-General Hornby personally explained the plan to an interested gathering at Tofield.

We are of the opinion that sooner or later an immigration movement of considerable magnitude will take place. Europe is plainly over crowded, the Ethiopian war is evidence of this, and somehow or other these men and women in congested areas must be made self supporting in less congested areas. To quote from an appendix to a report of the Newcastle conference:

> "Thus there would be organized and developed on properly financed lines new communities overseas, which, by working to support themselves, would create fresh demands for manufactured goods and stimulate Dominions and Empire trade.

ART OF BEING KIND IS FINE ART SAYS CHANNING POLLOCK

(From the Banff Crag and Canyon)

The old-fashioned "art of being kind" is really a fine art, comments Channing Pollock, popular American playright, in the current Rotarian Magazine, and he suggests the Yuletide season provides an appropriate time to give it study and practice.

"I remember one 25th of December that was simply made for me," he writes, "by a soft, strange voice at the other end of a telephone wire that said, "I'm afraid you've got the wrong number, but Merry Christmas all the same." And in reverse, I remember countless other voices on the phones that implied very definitely that I had deliberately asked for a wrong number, and conspired with the operator to pick one whose owner was in the bath

"It's so easy to smile and to be agreeable, and even to do the small kindly thing, that I'm a little puzzled that it isn't a more common habit. One reason, I suppose, is that courtesy requires a two-way street.

"I don't excuse, but I do sympathise with the man who quit giving his seat to women in crowded subways after the 15th woman had taken it without a word of thanks. But here my wonder is at those 15—those 15,000 women. Dying they should be condemned to an eternity of swaying floors with an infinity of straps just out of reach.

"I find," he continues, "I have a definite weakness for the policeman I saw lugging the basket of an old Jewish woman through the traffic of Canal street, and the busy man who writes a long and courteous letter to the utter stranger in quest of information, and the cigar or drug clerk leaves his counter to instruct a non-paying visitor in the use of a dial telephone

"I think life would be easier if more of us liked people. All kinds of people under all kinds of conditions and handicaps. I think our heaviest burdens would be lighter, and our important problems less worrisome, if we didn't have to carry so many little loads of thoughtlessness, and have our minds and hearts troubled by so many trifling rubs.

"It's really quite easy to write a kind letter It's easier still to say a kind word Few of the things we have the opportunity of doing for other people really involve any very painful self-sacrifice. And the things of this sort we don't do sterilize our own souls, and harden our own paths. More than anything else in our journey through life, they rate us as first class, second class or steerage."

CHANGE IN WHEAT BOARD

John I. McFarland who has guided the destinies of the Canadian Wheat Board since it was formed has resigned from that position along with D. L. Smith and Professor Grant and a new board has been appointed with James Murray as chairman and George Mclvor and Dean A. M. Shaw as commissioners. The new chairman is a well known figure in the grain business in Western Canada. He is 51 years of age and a native of Limerick, Ireland. His knowledge of the grain business was acquired through long apprenticeship with the United Grain Growers, starting as office boy and rising to the position of general manager; also with the Winnipeg Grain Exchange, of which he was secretary; and latterly with the Alberta Pacific Grain Company where he held the post of general manager. Professor Shaw has been the dean of agriculture in the University of Saskatchewan for many years. George Mclvor was general manager of the Canadian Wheat Pool, subsequently assistant to John I. McFarland in his stabilization operations. Another change in the Wheat Board set-up has been the elimination of the advisory board and the responsibility now lies between the Wheat Board and the federal government. The connection between the two is through a committee composed of Hon. Mr. Euler, minister of trade and commerce; Hon. Mr. Dunning, minister of finance and Hon Mr. Gardiner, minister of agriculture.

What is contemplated in the way of new policies is not evident at the present time, although Mr. Euler has announced there will be no "fire sale" of Canadian wheat. At the same time it has been recently evident that uneasiness is being felt over the comparatively small exports of Canadian wheat the past four months. Attention has been called to this situation by financial papers and grain traders and the government urged to take steps to correct the situation. Just how this will be done it is hard to discern unless the board is prepared to cut prices and even such a policy might have difficulty in moving large quantities of grain. It is unthinkable that there should be any reduction in the minimum price at this stage after the great bulk of the crop has been delivered, so any sales of large quantities of wheat made at prices much below the minimum figure paid to farmers would entail considerable losses by the board.

It is obvious that overseas buyers have been looking for a change in wheat policy ever since the election and even before that. They have been holding off purchases persistently waiting for the break. In recent weeks the discussion over changes in the Canadian Wheat Board has encouraged these buyers to wait further.

HEALTH by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

COLD AIR

It was in the middle of the last century that the fears of vapours arising from marshes and bad drains reached its height. At that time, noxious vapours seemed to offer the most reasonable explanation for the otherwise inexplicable epidemics of diphtheria, typhoid fever and malaria, and other diseases.

Later came the real dread of night air, as the vapours and gases seemed to be even more deadly at night than in the daytime. And we are not yet rid of this false idea if one may judge from the way some windows are kept closed at night.

People still remain indoors for fear of catching cold or becoming chilled. The chill which often marks the onset of a cold is not due to cold air or to exposure of the body; the chilly feeling which precedes the fever has nothing to do with going out of doors.

Weak people used to be told to stay in at night and to sit in crowds so that, by breathing in the breath exhaled by strong persons they might gain some of the strength of these individuals.

Today, we recognize the value of fresh air. We know that there is no danger in sewer gas or night air Night air is just as good as day air. Vapours from marshes are to be avoided only if they bring those mosquitoes which spread malaria and yellow fever.

Fresh air, particularly out-of-door air, is good for us. It dilutes the droplets of infection (secretions from the mouth and nose) which are coughed into it by those with colds and other communicable diseases. When we live crowded together, there is much greater opportunity for the passage of disease, from one person to another, by droplet infection.

Cool air is stimulating; it increases the metabolism of the body and so more food is used up. Those who want to reduce should exercise in the cool open air. Cool air also stimulates the flow of blood in the membranes lining the nose and other parts of the respiratory tract touched by the air inhaled. This promotes a flow of the secretions with their protective values.

To sit in warm stagnant air is to bank down the fires of life, and will likely lead to a loss of appetite, to poor digestion and faulty elimination. It is generally true that better health is enjoyed by those who spend part of each day in some open-air activity, even if this is only walking out of doors, as long as the body is not chilled by exposure to cold. You need never be afraid of cold air. Wear just enough clothing to be comfortable at what you are doing, in or out of doors, whatever the temperature may be at the time. Each one has to decide his clothing needs for himself.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St. Toronto will be answered personally by letter.

Men to Be Watched

An elderly man, but also bookish, was haled before the bar of justice in a small country town. "Ye're charged with bein' disorderly," snapped the magistrate. "Have ye anything to say why the sentence should not be pronounced?"

"Man's inhumanity to man makes countless thousands mourn," began the prisoner in a flight of oratory. "I am not so profligate as Byron, so ungrateful as Keats, so intemperate as Burns, so—"

"That'll do, that'll do," interupted the magistrate. "Seven days. And, officer, take down that list of names he mentioned and round 'em up. I think they're as bad as he is."—The Chaser.

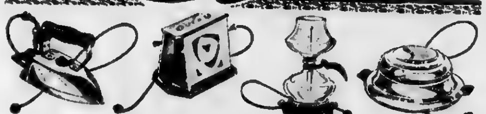
GIVE LASTING Electrical GIFTS

Always the Most Desired, Used and Appreciated

Have you ever watched women thrill over Electrical Gifts — heard them discuss how often they'll use them, the time saved, the work saved, the muss and bother eliminated? Haven't you wished that your gift would be as much desired, so much appreciated? It won't be — until you, too, satisfy these All-year Longings with Gifts from your Electrical Dealer.

Electrical Gifts are so beautiful, so practical and so varied in price that whether you have many dollars to spend — or just a few cents — you can give a gift this Christmas which is intensely desired —and which will be keenly appreciated for a long time to come.

Make Your Selection Early This Year



CALGARY POWER COMPANY LIMITED

T. E. Tanner, Local Manager, Camrose.

Keep the Home Fires Burning

At this season of the year rural residents are invited to spend their money, here, there and everywhere. We do not propose to tell anyone where to spend their money, for even in the most autocratic country a man's money is his own, to spend where and when he chooses. But we would suggest that as far as practical with you, your home town should be supported. Created for two reasons—to serve you and profit by serving you—unless it is supported by legitimate business, in the course of time it will simply cease to exist.

Your local paper has been issued weekly for 17 years and more. Like you it has had its ups and downs—its fleeting contact with affluence and its nose dive into the economic abyss. But through good times and bad times we continue to turn out a weekly sheet. That's our job.

We desire and seek your renewal and any new subscribers that may come our way, we are more than glad to add to the list. Perhaps you hav not any money—well we are ready to accept almost anything a farm produces. We have, since 1930, taken in some of the finest turkeys ever seen and we have also taken in chickens that simply fell off the perch because the weather was cold.

Hardly anything comes amiss. The truth is we want you to stay with the home town—we want you to stay with the home town paper.

THE MERCURY

DOMINION EXPERIMENTAL STATION, LACOMBE, WEEKLY NEWS LETTER

Fattening Calves to Make Baby Beef

At this season a great many calves are being put on feed for competition in baby beef shows in the spring. Calves for feeding should be good representatives of their breed, low-set and thick-fleshed, with plenty of quality and constitutional vigour. For best results they should be put on feed when between five and six months old, preferably before weaning, so that they will not lose their calf fat. They should be finished at nine hundred pounds.

The Dominion Experimental Station, Lacombe, recommends that for the first week or ten days the calf should be fed a mixture of three parts (by weight) of oats to one of barley. The proportion should gradually be changed until toward the end of the feeding period the calf is receiving three parts of barley to one of oats. As variety in the ration is extremely valuable wheat may well be used to replace up to half the barley. All grain should be ground.

At first the grain ration should be limited to two pounds daily. This amount should be slowly increased until the calf is daily consuming from one to one and a quarter pounds of grain per hundred pounds live weight.

When first put on feed the calf should be allowed all the good quality, well cured roughage it will clean up. However, as rapid fattening is dependent on heavy grain consumption the amount of roughage should be gradually decreased until, when on full feed, the calf receives only one pound of roughage to two pounds of meal.

If the roughage consists of non-leguminous hay ten per cent of linseed oil meal should be added to the grain ration; but if alfalfa or sweet clover hay is fed five percent of oil cake meal will be sufficient.

To avoid the mineral deficiency common to calves on heavy feed mixture of equal parts of salt and ground limestone or, for even better results equal parts of salt and mono-calcium phosphate, should be added to the grain ration, two pounds to each hundred pounds of grain.

When it is not possible to have fresh water constantly available the calf should be watered at least twice daily.

Too Bright

"John, I want you to meet a young lady who taught herself to swim in one lesson."

"Thank you," said John, "but if she has to teach herself to swim, I doubt if I'd care to make her acquaintance."

ALL-BRITISH EMPIRE LOAF EXHIBITED BY BAKERY FIRM

At a bakers and Confectioners Exhibition at Bournemouth, a seaside resort on the south coast of England, an interesting exhibit was made recently by Pillman and Phillips, of London, Liverpool and Bristol of an "all-British Empire loaf". The exhibit consisted mainly of an attractive display of bread and rolls which were made by a local bakery firm from a blend of Canadian and Australian flours. They demonstrated very clearly the superiority of the bread and rolls made from this empire blend.

In advertising their exhibit in the local press, Pillman and Phillips hoped bakers of the town and surrounding territory would be sufficiently impressed to give attention to the possibility of offering to the British public a 100 per cent British empire loaf of good quality, especially as there is a general desire for bakers to produce a better loaf

The exhibition was held on Oct 23rd, at the Bournemouth Town Hall under the auspices of the Bournemouth Master Bakers and Confectioners Association. There were at least 2,000 entries for the bread making competition. —Northwestern Miller

TRUTH SERUM SHOWS MURDER STORY FALSITY

ARNETT, Okla Nov. 29 —Truth serum administered a former dance hall girl and her divorced husband, caused dismissal last night of murder charges against her and a Justice of Peace, accused of killing a Texan with a "fat roll" during Shattuck's frontier days 28 years ago.

County Attorney Charles Leedy said the divorced husband, Ora Lovall admitted while under the effects of the serum that a desire to "get even" prompted him to reveal a "confession," incriminating Mrs. Bonnie Lovall and Justice J. C. Farmer

"It was a case of persecution, not prosecution" Leedy said.

"Truth serum was administered to Mrs. Lovall and her former husband early last night," Leedy added. "Both reacted strongly. In a short time I had sufficient information from each to know that Lovall had not told the truth."

The Magic Word

An angler, who had been trying to hook something for the last six hours, was sitting gloomily at his task, when a mother and her small son came along

"Oh!" cried out the youngster, "do let me see you catch a fish!"

Addressing the angler, the mother said, severely: "Now don't catch a fish for him until he says 'Please'!" —Tit Bits.

WIT And WISDOM

Economical

A Scot lover, wishing to know his fate at once, telegraphed a proposal of marriage to the girl of his choice After spending the day hanging about the telegraph office, he was finally rewarded, late in the evening by receiving an answer in the affirmative

"If I were you, I'd think twice before marrying a girl that kept me waiting all day for an answer," said the postmaster

"Na, na," retorted the Scot "The lass who waits for the cheap night rates is the lass for me "—El Paso World News

••••••••

Willing

A street musician was stranded in a village one Sunday morning, and as he was playing his cornet in the street he was approached by the clergyman of the parish, who said, "Do you know the Fourth Commandment, my good man?"

"No," the man replied, "but if you'll just whistle it over I'll do my best "—Pearson's

••••••••

Not to Be Outdone

Sol and Abe had always been rivals in the restaurant business When they had resorted to every means of outdoing each other and seemed to be running along at a dead heat, Sol took a chance and leased a building across the street from his rival He repainted its front and hung out a flaunting sign bearing the name of the new establishment It was "Grand Cafe of the Two Hemispheres."

Abe was distraught when he saw the custom that surged into the new restaurant and, vowing not to be outdone had his place repainted and hung out an even more ostentatious sign It read, "Grand Cafe of the Three Hemispheres "— El Paso World News

••••••••

Just One Question

"I want a shave," said the sergeant as he climbed into the barber's chair "No haircut, no shampoo, no rum witch-hazel hair-tonic, hot towels or face-massage. I don't want the manicurist to work on me, nor the bootblack to handle my feet I don't want to be brushed down, and I'll put on my coat myself. I just want a plain shave, with no trimmings Understand that?"

"Yes, sir" said the barber quietly "Lather, sir?" —Army and Navy Journal

••••••••

Milkman (to suspicious customer) "You won't find nothing wrong with that ma'am All our milk's been paralyzed by a government anarchist "—Unidentified

Former Tofielder Dies at Edgerton

ACCORDED MASONIC FUNERAL HERE

The death occurred at Edgerton on Tuesday morning of Clarence Martin Simmons, age 43. Mr. Simmons was a former resident of Tofield, working here in the early days of the railroad and later about 1909.

For some years now he has been station agent at Edgerton. He leaves to mourn his loss his wife; his mother, who lives in Halifax, together with some brothers and sisters also living in the east; also his mother-in-law, Mrs. Tofield, who for some time has resided at the Simmons household.

The funeral was held at Tofield on Wednesday, the Local Masonic Lodge assembling and a Masonic funeral service being held. Service was held at the Holy Trinity Church, Rev. A. Wallis officiating. Interment was made at the Tofield cemetery.

Floral Tributes

Mother and May; Edith, Florence, Harry and Allan; Max, Blake, Eva and Jimmy; Mr. and Mrs. W. O. Glover and family. The employees of C.N.R., Tofield; Mr. and Mrs. Percy Wolfe; The W. A., Edgerton; Old Timers Association, Holy Trinity Vestry and Congregation, Tofield; The Community Club, Edgerton; Mr. and Mrs. A. E. Ghallanger and Jean; Mr. and Mrs. Kingston and Mr. and Mrs. Evans; Mr. and Mrs. F. W. Davies; St. Mary's Church, Edgerton; Edgerton Curling Club; Mr. and Mrs. J. L. Dodds; Edgerton Lodge, A. F. and A. M.; Mrs. Golding; Mr. and Mrs. J. Warner and family; Mr. and Mrs. Stratton; Mr. and Mrs. Snyder; Telegraphers of Edmonton Div. 43; Jen and the children; Mr. and Mrs. McLaughlin and family; B. of R. T. No. 881, Biggar; Mr. and Mrs. F. E. Breach; Mr. and Mrs. F. Mitchell; Hilda Nomeland, Loretta Ross and Dr. Simpson.

STUDENT'S UNION PRESENT SPLENDID PROGRAM

The annual concert of the Student's Union was held at the Variety Theatre on Friday last. There was a very good attendance and the audience was more than pleased with the program presented. There were plays, skits, dances, besides creditable individual effort. The program was too good and too long to permit of separate mention.

NORMAL SCHOOL ALUMNI REUNION

On Friday, December 27th, an event of interest is to be held in Camrose, namely, the Camrose Normal School Alumni Reunion. We hope that all the members of the Association will keep this date open and put forth every effort to attend and help to make this reunion a success.

VIKING AVIATOR CALLED TO LONDON

Another graduate of the Edmonton and Northern Alberta Aero club to be provisionally accepted in the Royal Air Force is J. McCathy, Viking. He will leave Thursday for London, England. Five young Edmonton pilots also have received calls from the R. A. F.

Don't forget the hockey game on Tuesday, Tofield vs. Holden at 8.15 sharp.

LOCAL AND PERSONAL

Mrs. Richardson is visiting friends in town this week.

Mr. Harry Forgum of Holden visited Tofield over the week end.

Mrs. Allan is spending a few days in Edmonton this week.

The Jolly Twelve Bridge Club met at Hilda Nomeland's home on Thursday last. High lady was Marjory Stuart and Mrs. Weatherick was second.

Miss Annie Swift is visiting Mr. and Mrs. W. Swift of Camrose.

Mrs. Webb has purchased a Radiantfire Mantel, Mahogany finish. The final touch of beauty to the Hearth, is a stainless Steel Fender, making a complete fireplace, charm and comfort for the home.

Miss L. Ross spent the week end visiting friends in the city.

Mrs. Taylor and Mrs. Hammond spent a few days in the city last week.

Messrs. George and Ralph Kaufman spent the week end in the city.

Miss Kathie McLeod went to Edmonton, where we understand, she has obtained a position.

Mr. Jack McAthey of Viking visited Tofield this week.

Mr. F. Imler returned from a hunting trip this week.

Sid Worton of Wainwright visited his home here on Sunday.

Miss M. Redig spent the week end in the city.

Born. To Mr. and Mrs. McIntyre on Friday, Dec. 6, a son.

Miss Thelma Jobb and Bob Whyte spent a day in Edmonton this week.

Miss Helen McCauley spent the week end at her home here.

Mr. Wilbur Gallinger visited Tofield one day this week.

A transposition of correction lines in our last issue brought about some amusing situations. If you did not notice it, so much the better, if you did, and judging by the number of references made to it, everybody did, the explanation that correction lines were dropped in the wrong places will explain the unusual situations perfectly. A-hem.

TWO NATIONAL NAVY SABOTAGE ABUSES CITED

London, Dec. 9.—Tampering with the equipment of the battleship Royal Oak and the submarine Oberon today was under thorough scrutiny by officials of the Admiralty and Scotland Yard.

It was authoritatively learned the Admiralty believed sabotage was responsible for the damage done to the two warships. The Royal Oak and the Oberon were at Devonport dockyard in Devonshire when the incidents occurred.

Three days' close investigation followed discovery of a short circuit aboard the Royal Oak, a 29,150 ton battleship. The short circuit caused failure of the electric system. Finally it was found that a nail-pin an eighth of an inch in diameter had pierced a two-inch cable connecting the control tower of the battleship and the dockyard power station. The head-pin was sawn off and the lead cover of the cable replaced.

FRIDAY 13 IS PERFECT ALIBI FOR MISMATE

MILWAUKEE, Dec. 9.— Their friends couldn't understand why Wesley Bradd, 28 and Viola Gust, 27 were determined to marry next Friday, the 13th until Wesley explained, "Well this way, if anything goes wrong with our marriage, we always can blame it on bad luck."

WHY WORRY?

There are only two reasons for worry; you are either successful or you are not successful. If you are successful there is nothing to worry about; if you are not successful there are only two things to worry about. Your health is either good or you are sick. If your health is good there is nothing to worry about; if you are sick there are again only two things to worry about. You are either going to get well or you are going to die. If you are going to get well there is nothing to worry about, if you are going to die there are again only two things to worry about. You are either going to Heaven or you are not. If you are going to Heaven there is nothing to worry about, if you are not, you will be so busy shaking hands with your old friends that you wont have time to worry at all.

So Why Worry?

TOBIAS AVAILABLE FOR MARRIAGE AT AGE OF 109

NEW YORK, Dec. 9.—Tobias Wildstein helped blow out the 109 candles on his birthday cake Sunday and announced he was available for marriage "if the right girl comes along."

"Why not?" he said. "I feel just as strong as I did 50 years ago."

Wildstein, who has observed his last 18 birthdays in the home of the Sons and Daughters of Israel, intimated the "right girl" would have to be able to support him in the style to which he has been accustomed, but denied that he was a fortune hunter.

The aged Talmudic scholar has been married "2½ times," he says. He declines to explain what that means.

At his birthday party, Wildstein demonstrated his vigor by downing a drink of "corn likker" and giving one of the women inmates a few

TO WHOM IT MAY CONCERN

Fire Insurance Policies numbered 74697 to 74698 of the Dominion Fire Insurance Company have been lost, mislaid, destroyed or stolen from the office of A. J. H. McCauley of Tofield, Alberta. This is to notify that same are void and of no effect.

WEDDING

Mr. Anton Knudslein and Miss Lucille Dahl of Ryley were united in marriage on Wednesday, Dec. 11. The quiet ceremony took place in the United Church manse, the Rev. D. K. Allan officiating.

Mr. Rader Knudslein acted as best man and Miss Emma Dorin assisted the bride.

Not to Quit With

Nothing will take the place of the determination of the youngster with the pair of shiny new skates. Every effort to skate ended in a hard fall. He was particularly slow at learning and was paying a heavy price in bruises of body and pride. Sympathetic bystanders watched the struggle, and finally someone said:

"Buddy, you're getting hurt. Why don't you quit for a while, and watch the others?"

"Say!" said the boy, indignantly, "I didn't buy these skates to quit with. I bought 'em to learn with."

BY

CECIL NELSON IN THE CANADIAN NATIONAL MAGAZINE

"NEXT STOP MONTREAL!"

Outside the snow is falling in fine powdery flakes, driven across level fields by a freezing wind and piling against wire fences, scurrying madly on to the occasional verandah, as though it would escape the scourge that urges it on . . .

A farmer [illegible], ear flaps down, coat collar turned up to the [illegible], stands beside his team, waves at [illegible] through frosted whiskers as [illegible] the [illegible] Limited thunders [illegible].

A [illegible] warmly bundled, pauses from [illegible] with vigour in her morning battle against the playfulness of winter. But between sweeps she turns to watch the train [illegible] down and panting through the storm on the final sprint for home . . .

[illegible] the train. Against the [illegible] windows the [illegible] ill tempered, an [illegible] guest glimpsing for a moment [illegible] he would spoil [illegible] of bags [illegible] bundles of all kinds in [illegible] at the end of each car— [illegible] with deft swiftness [illegible] with a hearty "Thank you, sah, a Merry Christmas [illegible] Ma'am."

The day before Christmas!

A man at the end of the car chews an unlighted cigar reflectively. It is a good cigar . . . a Christmas cigar—a 15 center. He usually smokes nickel cigars but it's Christmas time—and, oh well! . . .

He's a bit on the heavy side, and most of his excess poundage has settled around his middle till the heavy gold watch chain that should swing loosely across his diaphram is now taut and straining. His face is heavily lined, his lips pleasant but firm, and in his eyes there is a twinkle that suggests stories in the smoking rooms or in hotel bedrooms.

"Christmas again!" he muses. "Boy, time sure does fly . . . but it's not been a bad year at that. Fortunate the Winnipeg business is cleaned up all right . . . or I'd never have been home for Christmas. That's the [illegible] of being a Sales Manager . . . on the road . . . winter and summer . . . no home life . . . But I guess at that a lot of chaps would be glad to get the same chance to break away.

"The kids . . . they're kids no more. Let's see . . . the baby . . . say, she'll be six next month . . . should make me feel old . . . but it doesn't. Funny thing that, too, when you come to think of it. And Bob . . . he must be going on twelve and Helen . . . fifteen! I'm getting [illegible] . . . but I don't feel it.

Nice to know they're still all at home for Christmas. Wonder how I [illegible]? Boy, those western boys sure [illegible] celebrate . . . a bit too robust for me. I like mine slow and easy . . . [illegible] like it used to be. Fine bunch of [illegible] the best sales crew in the [illegible]. Should be proud of 'em . . . [illegible] I've got to keep 'em on their toes. [illegible] praise them too much.

I wonder what Mother will say when she sees the new dress—I know . . . 'Oh John, you shouldn't have spent so much money.' But she'll be thanking all the time . . . 'Gosh I wish he'd give me the money to buy my own dresses. I never saw such a man for taste.' But you've got to get them something for Christmas . . . and hang it all, a dress seems a sensible kind of present. But I'm a little scared of that green shade.

"That mannequin was a swell looking piece. How the devil do they manage to keep so skinny? They eat enough . . . don't I know it . . . and yet it never shows. Maybe when she's as old as I am or mother is, she won't be so nice to look at . . .

"Let's see now . . . have I got something for everybody? Brenda a pair of skates, stockings and a winter play suit . . . a gun for Bob . . . and Helen . . . oh, yes . . . those silk stockings and underwear . . . panties the girl in the shop called them . . . and slims . . . silly ass pants . . . that's the name . . . panties."

"Hope they haven't spent a lot of dough on me. Ties and cigars . . . I'll bet my boots. That tie mother gave me last year . . . there was a honey. What a razzing I got when she made me wear it to the office . . . Hope that bell hop out west likes it. A business man can't be caught carting a thing like that around forever. They'd arrest him for disturbing the peace. Oh, well, they like giving me things like that . . . and who am I to complain . . . ?

"I must have squandered plenty this year. Have to pull in my horns next month . . . and the usual bills roll in then . . . insurance . . . oh, forget it. Let's see. Mother's dress . . . $75. Bob's gun $25 . . . Helen's underthings . . . $15 . . . say, that's money . . . but Christmas comes but once a year praise be . . . and its nice to spend a bit of money once in a while . . . when you've got it . . . and there's plenty of them that haven't . . . wonder how some of the poor devils in the parks make out this time of year. I must send in my contribution to the relief fund."

* * * * * *

She is sitting beside the writing table at the end of the car, adding a few skillful touches to her make up. A dab here, a rub there, a slight arch with the ball of the forefinger and the mouth becomes more rounded and inviting still . . . she glances . . . her compact mirror . . . yes, she'll do.

She wears a warm, dark [illegible] coat and her natty walking shoes are made from the skin of other beasts. Atop her head she has perched precariously a saucy pancake of a hat and her golden curls reflect the lights as ripe corn the rays of the setting sun. "These are my bags . . . please look after them," she smiles . . . the porter, who has just returned from a final clean up. "Thank you ma'am," he says, showing a fine set of . . . teeth as a bill finds its way satisfyingly into his trousers pocket. "And a Merry Christmas to you ma'am."

"Same to you George," she replies; his name isn't George . . . it's Alexander Washington . . . but he doesn't really mind.

"Let me see now. Have I forgotten anything?" She opens her bag for final inventory. "Lipstick . . . check, hanky . . . check, compact . . . check; house key . . . that sample of cloth Mary gave me . . . the clipping from that embroidery magazine . . . Mazie's address . . . my good luck rabbit's foot . . . two tens and a five and some small change . . . hobby comb . . . cigarettes . . . somewhat the worse for lipstick and powder . . . yes . . . all there.

"Ten more minutes. It won't be long now. I'll sit down." She starts to pull on her gloves over hands innocent of jewellery.

"Wow, that was a close one!" She slips off her glove again and fishes about her neck for a fine gold chain. She secures it, hauls in the slack and there on the end is a ring . . . a solitaire diamond. She unhooks it and slips it carefully on the third finger of her left hand. "That would have been a break. George would have noticed at once . . . and then I would have had to do some quick thinking. Funny, men are so touchy about these things.

"Well . . . he can't expect me to play the hermit just because I go away on a six months' vacation. I'll bet he played around while I was away too. Besides, we're not married yet . . . and I may as well have some fun before they snap the handcuffs on us.

"I'll bet the family's down in full force too. Sure to be. Mother will cry as usual and spoil my make-up . . . and Dad will muss me all up with that famous bunny hug of his . . . oh well, they enjoy it . . . and they're dears, both of them. And George . . . he'll be there with bells on . . . wonder how he looks. I suppose he hasn't changed much in six months . . . but it's funny how quickly you forget. Maybe it's just as well I'm coming home. There was that blonde boy out in Vancouver, the answer to any maiden's prayer . . .

"Wonder how I should act. I can just see George . . . craning his neck and spotting me and then galloping down the platform like a baltic ship under full sail . . . steam I mean. Aloof . . . that's what I'll be . . . doesn't do to make him think I'm too pleased to see him. Poise . . . that's what I'll show . . . none of this public exhibitionism . . . just a cool, quick kiss maybe and then casual conversation.

"Hope he's got me something nice for Christmas. He'd better . . . or he won't get those swell silver military brushes I bought for him in Vancouver. No . . . he's no miser. Have to give him credit there. A darned spendthrift rather . . . I'll have to look after that side of his character . . . oh forget it, woman, you're not married to him yet . . . take your time."

* * * * * * * *

"Wilbur, stand still while I button up your coat. It's cold. If you're not a good boy Santa Claus will not bring you a thing this Christmas."

A mother, slightly dishevelled, with small beads of perspiration peeking through the powder on her upper lip, strives valiantly with Wilbur, aged four, while Janet, aged six, passes the time pleasantly enough crawling in and out among the feet of her fellow passengers.

"Where is that child? Janet . . . come here this minute and sit down. There now. Try to be a good girl. Just try!"

"There ain't no Santa Claus. That's all boloney." This from Wilbur.

"Wilbur Witherspoon! How many times have I told you never to say ain't? And never let me hear you use the word boloney again. It's cheap and vulgar. It ain't . . . it isn't nice. You sound like a gangster."

"Am a gangster . . . am a gangster . . . I'll put you on the spot."

"Wilbur I'll not speak to you again. Stand still. I can't get the top button done up. Hold up your chin.

"Never again . . . the next time mother wants the kids she can take them herself. Spoils them . . . that's what she does . . . gives in to them too much. I'm worn to a frazzle . . . I'll never enjoy my Christmas dinner. Hope Mira doesn't cook the turkey to a crisp. I'd better speak to her about it tomorrow.

"How I wish they were in bed . . . but there's no use hoping for that. Dad will have them up half the night decorating the Christmas tree. We'll get no peace 'till midnight at least. Oh well, Christmas only comes once a year . . . and I'll have to put up with it I guess.

"But this visiting relatives in the bush. You have to spare the rod in front of mother as she's so hipped on this modern child-rearing business. She didn't spare the rod when I was small. Wonder if I was as much trouble as these two. I suppose so. She says Dad had to play the cornet every night to put me to sleep. Imagine. Catch me playing a cornet for my kids . . . I'd warm their hides first . . . the darlings . . .

"Wilbur. Will you take that marble out of your mouth . . . How many times . . . ? Janet . . . get up off the floor this instant. Look at the mess you have made of your dress and it was clean this morning. Your Daddy will attend to you when I get you home . . . you'll see . . ."

Alexander Washington stands at the vestibule door as the train clicks over the points of the yards. "Two more minutes . . . Lou'll be there awaitin' as usual. There's a sweet mamma, big boy . . . I'm telling you! Always there to meet her man when he's finished work. That's the kind of gal foh me. Dancin' . . . that's what I crave . . . [illegible] . . . and plenty of it. 'Hot Spot' tonight, as soon as I get mah dancin' clothes on . . . and then we'll feed and then be home for Christmas tomorrow. Hot Dog. Turkey . . . watch me wrap mahself around that bird.

"Hope she likes that orange shawl I brung her. The swellest thing ah've seen. She'll be a knock-out in it.

Alexander Washington fondles the coin in his pockets . . . crisp, crinkly bills and jingling silver coins and smiles appreciatively to himself. "Yas sir . . . that's one thing about Christmas. Folks opens up. Nice mess of pennies I got this trip . . . and Christmas tomorrow. You be . . . nothing like Christmas after a long run. Well, here we is. Let's get started."

The train slows down imperceptibly . . . the brakes grip the wheels . . . and as the steam is shut off he slides into the station as though on greased skids . . . and stops. The fine snow flurries down through openings in the station roof and carpets the cement walk with white. People mill around . . . excitement . . . squeals of delight . . . probing eyes seeking friends and husbands and wives . . . the first glimpse of them . . . a wild dash down to the end cars . . .

"There they are . . . come on . . . the second to last car.

"That's her luggage. I can tell it every time. She must be there . . . Hurry or we'll miss her . . .

"There's Mary . . .

"Ohhhh!

"Hello darling . . . gosh it's nice to see yoh."

"Sweetheart . . . how I've missed you!"

"Hello Jane . . . how're the kids and yourself. Have a good trip?"

"Back again mother . . . and am I glad. Dinner all set for Christmas?"

"Here ah is, honey . . ."

Merry Christmas. Merry Christmas . . . MERRY CHRISTMAS.

MR. McFARLAND ISSUES STATEMENT

Subsequent to his severance from the chairmanship of the Canadian Wheat Board, John I. McFarland issued the following statement to the press: "Over five years ago, in November, 1930 when panic and fear were in possession of the world's wheat markets; when the price of No. 1 wheat was rapidly declining toward 50 cents or lower, delivered at Fort William, and when the farmers on these Western prairies were shocked by the calamity which faced them, I reluctantly and in great trepidation consented to assume a responsibility, which I described through the public press at that time, as a national service in time of great national emergency.

"I further stated that my services were given in the interests of all farmers irrespective of whether they were pool or non pool. I am confident that my statement has been fulfilled in every respect, and every farmer who produced wheat, as well as every citizen has benefited.

"The direct cause of that national emergency was a world-wide overproduction of wheat. I need not dwell further upon that fact at this time, as everyone who has given any thought to wheat is well aware that an unwanted excess world surplus had accumulated prior to 1930. In the interval, but not because of any national or international measures of a corrective nature, but rather on account of three successive short crops on the North American continent, together with two successive short crops in Australia, and this year a short crop in Argentina, the world excess surplus has now been reduced to normal, or even less than normal.

"The unprecedented crop losses in these countries resulting from drought, grasshoppers, black rust and other causes have removed the unwanted excess supply, although it may be only a temporary correction. The vicious attacks by critics from time to time demanding fire sales, dumping policies and other quack remedies, have added to our difficulties.

"Despite such critics, our farmers have received an average of almost 80 cents per bushel for No. 1 wheat delivered Fort William for every bushel produced in the last three years.

"Throughout these difficult years I have never neglected my obligations nor have I evaded in any manner the great responsibility which was imposed upon me. I have served in the national interests regardless of political favor. After battling through these stormy years, I feel quite certain the people of this country are well aware that I am not at this time voluntarily deserting the ship, when we are so near the conclusion of a successful voyage.

"Looking backward over the past five years, I hope I may be excused if I express my one and only regret, namely, that events over which I had no control now prevent me from completing this year's operations as chairman of the wheat board.

"I want to thank my many friends who have been interested in my work and who have evidenced appreciation of my efforts."—Alberta Wheat Pool Budget.

A HANDY FILE FOR CLIPPINGS

(Experimental Farms Note)

"I ran across a good article on that the other day but I can't find the paper it was in." How often one hears such a remark! A horse takes colic; a binder knotter gets out of order, a construction problem is presented. There is any amount of help in print if it could only be found.

Over twenty-five years ago when first confronted with the necessity of finding answers to thousands of questions yearly, the writer hit upon a simple, adaptable system which is still in use and is now employed on the Dominion Experimental Sub-Station at Beaverlodge.

Several card-board boxes of cheap manilla envelopes were purchased, one for each department or group of questions, for example, Live Stock; Veterinary, Poultry, Bees; Farm; garden, Legal, etc. When a useful article was found it was clipped and inscribed with the date and name of the paper and the name of the author. It was then slipped into an envelope, on the upper, left-hand edge of which was written the subject, such as "Breeding Crate;" "Ringbone," "Spavin;" "Straw Loft for Poultry House;" "Green Manuring;" "Vegetable Varieties;" "Will, Probating," or whatever it might be. Within each box or department the envelopes were arranged alphabetically and since care was observed to write the most suggestive word first, e. g., "Will, Probating;" an item on any particular topic could be very quickly found by thumbing the edges of the upright envelopes even after the encyclopedia had grown to large dimensions. Sub-grouping aided this, for in time, "Live Stock" was subdivided into "Live Stock, Cattle," "Live Stock, sheep" "Live Stock, General" etc. Each box had its contents indicated by large print on the end, thus: "Live Stock, Cattle" A-M. If a box contained more than one group each group was indicated by a raised cardboard tab. One might commence with a single box of clippings alphabetically arranged, and sub-divide as the material accumulated.

One great advantage of the system is its adaptability. It never becomes overgrown. If one or more clippings on the same subject are taken they may both or all go in the one envelope. If in time some early article may be superseded by a more complete and up-to-date one the old one may be readily discarded.

A scrapbook becomes cluttered in spots while vacant on other pages. The envelope file may be divided and sub-divided without trouble. It may be expanded or contracted to any extent in any direction. It is handy and may sometime save an animal's life.

Tofield Takes Three Games Straight

WIN FROM VIKING—WAINWRIGHT—HOLDEN

Tofield 4 - Wainwright 3

Wainwright on the extreme east of the Gas Line League, and Tofield, who are on the extreme west end of the league, met on Sunday afternoon for the first time in many years, with the westerners collecting two points after a hard fought game which required an overtime period to decide.

Tofield, who played a nice passing game, were aggressive and worked hard every minute of the game, which no doubt accounted for their win. They scored the only goal of the first period. L. Burnett from L. Glover.

They came out in the second period and went on where they left off and ran up a 3-0 lead; W. Worton and N. Glover scoring on passes from Burnett and W. Worton respectively. Wainwright were then put back into the running, Key scoring on a pass from Lawley and R. Ganderton getting one by unassisted.

Coming out for the third period with the score 3-2 against them the Wainwright team tried hard to get the tying goal, which came after ten minutes of play. Ganderton scoring on a pass from Lawley.

When the bell rang for the end of the period the score was deadlocked at 3-3 and an extra ten-minute period was played, five minutes each way.

In the dying moments of the first five minutes, W. Worton bulged the hemp for Tofield and although the Wainwright team were through the defence a number of times they were unable to beat Bowick in goal for Tofield.

Referee: Dr. E. V. Springbet

On Tuesday night Holden opposed the locals on Tofield ice in what proved to be a fast and fairly thrilling game. Holden started off as though they meant business and for the first few minutes were bothering Bowick considerably. This steady sniping told and in about five minutes Holden scored. The Tofield team speeded up at this point and Mohs for Holden was kept busy. However he kept his goal clear of flying pucks and the period ended 1-0 for Holden.

The second period was going good with the two teams evenly matched when Worton got the equaliser. This had the effect of speeding up the play and end to end rushes were the rule. Bill McCauley put the locals in the lead when he shot the rubber past Mohs from close in. The period ended 2-1 for Tofield.

The third period opened up fast and furious, Holden setting the pace in an effort to score. A little too anxious they left their goal unguarded and Martin for Tofield scored their third. Throwing four men up Holden got through for a score from the stick of Kjosness but it was soon nullified when Tofield slipped in another, making the final score 4-2 for Tofield.

Line-up: Bowick, goal; defence, L. Glover; Allan; Forwards; Burnett, Worton, N. Glover, Spratt, McCauley and Martin.

Holden: Mohs; B. Harum, D. Edworthy; E. Logan; Ed Stewart; J. Swiorschke; C. Swiorschke; J. Ferson; M. Kjosness; A. Black; H. Harum.

Referee: R. Whyte.

On Friday night last, Tofield seniors played hockey at Viking winning by the score of 9-7. Wide open hockey was played as the score would indicate, quite a few players on both sides figuring in the playing.

THE COST OF WAR

According to the League of Nations Society in Canada the Great War cost Canada $1,000,000000. How much is that? It means an expenditure equal to $2,400 per day since the beginning of the Christian era, that is to say, $2,400 a day for 1935 years. Civilization is said to have begun 10,000 years ago; $1,000000000 represents an expenditure of $460 a day since the beginning of civilization.

The Great War cost the belligerents $331,000,000000. What does this mean? The war lasted from August 1 1914 to November 11 1918. During the whole of that period the war cost an average of $150,000 per minute or $9,000,000 per hour. It means $470,000 per day since the beginning of the Christian era or $90,000 per day since the beginning of civilization.

Because of that war Great Britain must raise $3,000 every minute of every day in the year to meet war debts and the annual payment represents the whole time labor of 2,000,000 men. Because of that war 40c in every dollar of taxation in Great Britain goes to pay war debts.—The Manitoba Co-operator.

TENDERS WANTED

For cutting, hauling and packing of approximately 75 tons of ice. Tenders must be in by December 31, 1935. Lowest or any tender not necessarily accepted.

LINDBROOK

A Very Happy Christmas to yr Editor and his family and all our friends of the Tofield districts from all at Lindbrook.

A dance was held at the Lindbrook school last Friday, 13th. This was the third of a series to provide funds for the Xmas tree and again was not an overwhelming financial success, although the social side went with a decided bang and all enjoyed themselves. What could one expect? Friday the 13th! a proper jinx day if ever; but the real reason is the frost and disastrously low prices prevailing for so long, it looks as if this Xmas will be a lean one for many, owing to the above causes, still it could be a lot worse, ther's none in want and practically all will be able to afford a little extra Christmas cheer and thats something to be thankful for; still we are straying from the subject of the dance, as was" aforesaid mentioned" the whoopee went well. The music was supplied by the artists Messrs. R. Kortzman and C. Lindgren. Refreshments by D. Inaahen. After these the dance went on until the wee sma' hours so we guess it was O K. and then some.

So once again the Season's Greetings from Lindbrook to the Empire, this is the ——— speaking, don't know the kilowatts or metres, so have a good time and forget your troubles, it is Xmas!

BEHIND THE HOG

The Mixed is over and Mack wins I said Mack and Stan, so I was not so hot. I figured I would lose my Xmas refreshments, but nobody called my bluff. As I remarked B4 now we can get on with the Curling.

What with hockey games, farewells, lodges, concerts and what nots, we are short of news this week, nobody does anything when I am around.

Take time to deliberate curlers, but when time for action arrives, stop thinking and shoot.

Lem says whatever is worth doing is worth doing well, and Gordon said, "Did you say whoever?"

[illegible]

On Monday last, in Edmonton, Miss Josie Thompson and Mr. Robert Bowick were united in holy matrimony. Miss Thompson is of Kingman district and Mr. Bowick is the son of Mr. and Mrs. J. Bowick, oldtimers of the Tofield district. We all join in congratulating the young couple and wish them many years of happy married life.

Tofield United Church

Special Christmas music will feature the service at the United Church on December 22nd.

The choir has prepared the anthem, "Oh Sing unto the Lord; a quartette and chorus "Angels from the Realm of Glory." Solos will be sung by Mrs. L. Smith and Mr. Cowell.

Christmas is a time of great joy, come and join with us in singing the familiar Christmas hymns.

Rev. D. E. Allen.

SOME PECULIARITIES OF HONEY

(Experimental Farms Note)

Before the introduction of cane sugar, honey was apparently the only sweet available for human consumption. In those days of long ago honey was not desired for its sweetness alone, but it was also considered to be a food of remarkable qualities, for instance, one old legend claims that strength and offspring to man. Furthermore, King Solomon in his wisdom advised that it be used not only for its sweetness, but from the standpoint of health as well. The [illegible] beekeeper is too much inclined to adopt the inferiority complex when it comes to advertising his product, and as a result overlooks many of the legitimate claims that may be given as reasons for using it in preference to many other products that are now in competition with it. In the first place honey is the only sweet that comes from nature to the table unchanged by human agency. Honey is the nectar of flowers gathered by the bees and ripened by them within their hives. The ripening process consists of driving off the excess moisture from the nectar and of certain chemical changes in the sugars it contains. Honey may be classified as a concentrated solution of sugars having a wide range of distinctive aroma and flavour that no other food possesses. Honey consists largely of invert or predigested sugars, levulose and dextrose, and because of this, honey when eaten is immediately absorbed into the blood stream and thus becomes a quick source of energy which makes it an ideal food for children and athletes. Furthermore being a predigested food it places no tax on the digestive system, a quality which makes it especially suitable for elderly people and those with impaired digestion. Honey also contains all the mineral elements necessary to the well-being of the human body. It is true that they are present in small amounts only, but the fact that they are present and in a soluble form is one that should not be overlooked. Flavour is necessary for the enjoyment of food, and honey absorbs its flavours from the flowers and a honey with a flavour that will suit the most fastidious palate can be obtained. Honey when first obtained from the bees is in liquid form but all Canadian honeys granulate sooner or later and many people prefer granulated honey to the liquid form. Honey is most widely used as a spread. If the reader desires to know of other ways in which it may be used he should write to the Bee Division, Central Experimental Farm, Ottawa for Pamphlet No. 161, N.S.

AMISK CREEK

The Ladies' Aid held their monthly meeting at Mrs. J. C. Olson's home. A good number of visitors and members were present. The Ladies worked on a quilt for Sunshine. The report of the Annual dinner was given by the secretary. Mrs. C. Erickson read an interesting chapter about Missionary Work at Madagascar. The annual meeting will be held at Mrs. E. A. Moen's home, the date not being set yet.

Palmer Annabo, who has not been very well this winter was taken to the Royal Alex hospital last week. The last report was that he was improving but had to stay in the hospital for a few days yet.

R. O. Berg's threshing outfit is now working at the J. Berild place.

Little Margarete Brenneman had to be taken to a hospital in Edmonton last week and was operated on for Mastoids. The last we heard was she was getting along as well as could be expected.

Mrs. J. Anderson, Hazel Hillerud, Alice Berg and Arnold Berg motored to the city last Saturday, returning the same evening.

Mrs. J. Pederson and daughter Esther, visited at the P. O. Flaaten and E. Moen homes last Sunday.

Miss Alice Berg visited at the E. Hilly home last Sunday.

Mr. J. Annabo visited with his son Palmer at the Royal Alexandra Hospital last Saturday.

Mrs. P. O. Flaaten, Nora and Gordon Sand and Lloyd Berg were visitors at the Erickson home last Sunday evening.

As Christmas is now drawing near, we again take the opportunity to wish each and everyone, editor, staff and readers of the Mercury, A Happy Christmas and a Prosperous New Year.

CONSTIPATION

As you read the advertisements, listen to the radio and heed the complaints of your friends, you become aware of the number of people who are troubled by constipation and the vast quantities of different laxatives which are used in an effort to correct or cure the complaint.

Just as food and air are required by the body to sustain it in health and strength, so must it get rid of its waste products. General experience indicates that regular daily elimination is a desirable habit in that it frees the body of its waste products without undue delay.

We are largely creatures of habit. We enjoy better health when we have our meals at regular hours. We enjoy certain foods at one meal which we would not think of eating at another. We do not eat soup or pie for breakfast; there are so-called "breakfast foods" which stay on the pantry shelves from one breakfast to another.

Regular elimination is more a habit than anything else. The bowel which has been trained to empty itself at the same time every day will keep on doing so. Such regularity is discouraged by failure to heed promptly the call of nature; it is encouraged by a regular visit to the toilet at exactly the same time every day regardless of any urge to empty the bowel.

Laxatives may empty the bowel, but laxatives will never overcome constipation. Indeed they encourage constipation because they train the bowel to depend upon the stimulation by a drug instead of having a normal evacuation. The way in which people turn from one laxative to another shows how laxatives gradually lose their effectiveness as the bowel becomes accustomed to the particular drug in the laxative.

Next to regularity of toilet habit as a means to secure regular elimination come diet and exercise. Many people are helped by using more water. A glass or two upon rising and between meals is a good habit. It is not advisable to fill the digestive tract with a lot of indigestible roughage but most people do require a reasonable amount of bulk in the diet. This is best secured by eating freely of fruits and leafy vegetables which contain a fair amount of fibre.

The abdominal muscles must be used if they are to be kept strong. This may be accomplished through your work or else such exercises as call these particular muscles into play. Defeat constipation with habit, diet and exercise. It can be done if you persist.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto will be answered personally by letter.

FOR SALE—One purebred Yorkshire yearling boar, also four purebred sows. Swinton's farm Tofield.

Engineer's Ashes Cast On Track

Fulfilling a last request, the ashes of Anthony Livono Silveno, who for 39 years drove an engine on the Esquimalt & Nanaimo Railway, operated on Vancouver Island by the Canadian Pacific, were cast along the track he knew and loved so well. Engineer A. C. Wilson, friend of the late "Tony" Silveno and chairman of the Esquimalt & Nanaimo division of the Brotherhood of Locomotive Engineers, is seen performing the last rites in the company of officials and railwaymen near Silveno station at the summit of the spectacular Malahat Pass, 16 miles north of Victoria, B.C.

LOCAL AND PERSONAL

Dr. Richardson will not visit Tofield on Thursday December 26th.

Among those who visited the city last week are: Mrs. Malcolm, Muriel Malcolm, Mrs. Calvert, Mrs. Taylor, Mrs. Rogers, Mr. and Mrs. Innes, C. Patterson, Miss L. Rose, Miss Esther Jacobs, Mrs. Letourneau, Mrs. Firth, Mr. and Mrs. Stan. Yakabuski, Mary Burnett, Mr. and Mrs. Ed Hicks, Mrs. Barden.

Mr. and Mrs. Pollard of Namao visited friends and relatives here this week. Mrs. Pollard was formerly Mrs. Herndon.

The Misses Betty McCarthy and Jean Baptist spent a few days in the city this week.

On Tuesday evening the Tofield [illegible] of the Eastern Star had a [illegible] party for Mrs. McLaughlin at the Jobb home. Mrs. McLaughlin is leaving for Wetaskiwin in the near future. A delicious lunch was served and the ladies presented Mrs. McLaughlin with a lovely gift as a token of remembrance.

Mr. J. D. Hannan was a visitor town on Thursday.

Miss Kathrine Moen is visiting in Tofield for time.

Miss Vi Moore spent the week end visiting in Camrose.

Mr. W. Eldred spent a few days in Edmonton last week.

The Beauty Parlor will be closed from December 24th to January 2nd. Miss Viola Lee.

Get in step! On Friday and Saturday, December 20 and 21st, everybody is going to the Variety Theatre.

Yes, sir, the play of the season, "You Wouldn't Fool Me" is to be acted by local artists.

You will agree there is enough fun and laughter packed in every act — and there are 3 — to put you in the right frame of mind to enjoy "A Joyous Christmas. We'll be seeing you!

For Dual Purpose

The undersized husband was trying on the overcoat his wife had bought him for Christmas.

"You know dear," he said, gazing at himself in the mirror, "this is a nice present and all that, and don't think that I'm ungrateful. But really, isn't it much too big for me?"

"I know my dear," she returned. "But we can't help that. You must remember that it's got to cover the radiator of the car in cold weather. We have to consider that first, haven't we?" —Answers.

S. SCHOOL XMAS CONCERT

The United Sunday School Xmas concert was held in the church on Tuesday evening. Each class in the school presented an item and all were very well done. The program included Choruses, plays, recitations etc. After the program the children were given their bags of candy and nuts. A large crowd was present, the church being packed.

ANNOUNCEMENT

I desire to inform the public that I have purchased and taken over the funeral directing formerly done by Mr. Geo. McLaughlin.

J. E. STINSON

HOLY TRINITY CHURCH

Sunday school 11:00 a.m.
Christmas Cantata "The Babe of Bethlehem" by Frank Allan, will be sung by the Choir instead of usual evensong at 7:30 p.m.

CHRISTMAS DAY

Holy Communion 11:00 a.m.

Rev. A. Wallis.

THE WORTHY CREW

Discontented? Job no good? Chief is never praising you? Going elsewhere? Wish you could? Feeling bitter, tired and blue? Sure you're meant for bigger things. Never get a chance, that's all. Long to use ambition's wings; feel you're up against a wall? Only just occurred to you, well, you scarcely like to ask—but after all, what does he do, what is the Chief's important task? Quite convinced you do the most? Of course you do not like to boast—you've other chances, by the score! When this [illegible] has you in grip (as some day it's bound to do), remember—a successful ship must carry, too, a worthy crew. When this mood nags at your heart, reflect —we can't all captains be; each must play his special part; ships need crews when off to sea.

KETCHAMOOT

May the editor and family, readers and correspondents of the Mercury have a Merry Christmas and Happy New Year is the wish of your Ketchamoot correspondent.

Born: To Mr. and Mrs. Joe Sutton, a son on Sunday Dec. 15th. Congratulations. Both are doing fine.

Mrs. Roy Lee entertained the Social Hour club at her home Thursday afternoon of last week. A pleasant afternoon was reported.

Miss M. Lindsay and pupils and Miss Hazel Sears as organist are busy preparing the Christmas concert which will be held at the school house Friday evening, Dec. 20th.

Mr. A. F. Schultz loaded a car of oats at the Bardo siding the first of last week.

Miss Mildred Ingram is visiting at the home of her sister, Mrs. T. D. Ferguson of Lakeshore.

Mr. and Mrs. Herman Lawson marketed poultry to Edmonton Thursday.

Mr. and Mrs. Paul Thomas, Miss Viola Lee of Tofield, Mr. J. Jack and daughter Dave and Miss Kennedy of Poe attended the dance at the Schultz home last Friday night.

Mr. and Mrs. Robert Sterrett of Farmington visited Mr. and Mrs. W. A. Mitchell at their home Tuesday of last week.

Mrs. Geo. Lawson and son Martin, Mr. and Mrs. Roy Lee and daughter Doreen motored to Camrose Sunday to visit Miss Mabel Lawson.

Mr. and Mrs. H. McGinnitie and family visited Mrs. McGinnitie's mother Mrs. Bruks of Shonts on Sunday.

Mrs. Sheppard of Edmonton came on Friday for a visit at the home of her daughter Mrs. Chas. Whillans.

Mr. and Mrs. Perry Sutton and family visited at the Joe Sutton home on Sunday.

The dance put on by the hockey team last Friday night at the Schultz home was well attended. Mr. Herman Lawson and daughter furnished the music, and all enjoyed the evening very much.

The Ministik hockey team came down on Sunday and played a game with the Ketchamoot team. The less said the better for our boys as the Ministik boys got all the goals 5 to be exact. But it was the first play or practice the Ketchamoot boys had had together, better luck next time.

Mr. Henry McGinnitie returned on Friday from another trip to Drayton Valley.

THE BUS

The Sunburst Motor service are running a new bus from Edmonton to Wainwright. The upholstery is of rich plush and the seats tilt backwards and forwards to suit the convenience of the passengers. The body was made in Calgary by the Sunnyside Body works, and is a great improvement over the old one.

Christmas Message From the Churches

Through the kindness of the editor of the Tofield Mercury, I am able to send this message to all and sundry.

In days gone by, we (as children) used to go around in groups in the old country, singing carols, and we wound up with an old rhyme:

"We wish you a merry Christmas
And a Happy New Year,
We're all teetotal
We drink no beer,
A glass of cold water,
A penny if you please,
If you haven't a penny,
A ha'penny will do,
If you haven't a ha'penny
God bless you."

Right merry was the old season of Christmas in those days, and should be today, but, I am afraid, many are not looking forward to it.

Owing to adverse conditions, crop failures, strife and unrest in certain parts of the world, etc., the old, old theme of joy and gladness may seem a little out of place to many. But remember, He Whose birthday we celebrate at this time underwent all the same difficulties you are undergoing. He knew hunger, thirst, loneliness, sorrow and discouragement. Yet He brought salvation to mankind, and it was at His birth the Angels sang "Glory to God in the highest, and on earth peace, goodwill to men."

For a little while at least then, this Christmas season, let us go back in mind to that Bethlehem scene, see the Christ-child lying in His lowly manger, and hear the song of the Angels to the shepherds. Then let us return with a full measure of joy and gladness in our hearts, praising God for His great gift to mankind, and if your life's path be rough and heavy, with sickness, sorrow or want, take courage, look to the Bright Morning Star to guide you into paths of peace.

My wish to one and all is, A very Merry Christmas and a Happy New Year.

REV. A. WALLIS,
Holy Trinity, Tofield

Through the courtesy of Mr. Worton I am privileged again to send Christmas Greetings and bring a Christmas and New Year's message to you.

This would be a strange world if there were no Christmas time in it. It seems as if everybody — boys and girls, men and women — were forgetting about themselves and thinking of others.

There is kindness, thoughtfulness and generosity everywhere. The spirit of Christmas is the genuine Christian spirit and these kind brotherly feelings and those desires to make others happy and those acts of unselfishness and of love can be traced to the fact "that God so loved the world that He gave His only begotten Son." Giving is a genuine Christian virtue. The story of the Incarnation is old but ever new, and so again we join the throng who believe and rejoice in the truth, "That Jesus was born in Bethlehem."

May your Christmas be full of real happiness and may the New Year find you facing things as they are in the Spirit of Jesus Christ.

Again wishing you "A Very Happy Christmas and Prosperous New Year.

REV. D. K. ALLAN,
United Church Manse.

TO WHOM IT MAY CONCERN

Fire Insurance Policies numbered 74097 to [illegible] of the Dominion Fire Insurance Company have been lost, mislaid, destroyed or stolen from the office of A. J. H. McCauley of Tofield, Alberta. This is to notify that same are void and of no effect.

Moving to escape taxes will never become 100 per cent effective until another habitable planet is located and space ships are perfected.

Italy's Wheat Imports

A few years ago Italy was a very large importer of wheat. In 192[illegible], for instance, Canada alone exported to her [illegible] million bushels.

During the past few years Italy has imported but little wheat. Italy's officials tell us this is because other countries are no longer willing to purchase Italian goods and products, therefore Italy cannot secure funds with which to purchase Canadian and other grains.

It is hoped that economic sanity will soon return to the world and that goods, commodities and wheats will be exchanged once more between the nations in generous volume.

Local Caste Present Bright Comedy

On Friday and Saturday, December 20—21, a local caste under the auspices of the United Church Ladies Aid, presented the farce "You Wouldn't Fool Me" to two full houses. The play itself was a lively comedy, creating much laughter from start to finish. The play takes place in the Cameron home. Mr. Cameron, a nervous and excitable gentleman, and who has been enjoying himself during his wife's absence received the news that his wife, mother and daughter are returning that morning. This naturally gets him all excited and he is anxious to hide traces of his good time from his wife. This part was taken by W. J. Duckfield and was very ably taken. In endeavoring to fool his wife, he calls for Andrew Davy, a young fellow who is visiting in his home, and who has the misfortune to stutter, to his aid. Andrew Davey was taken by Larry McLeay and was exceedingly well done. Hugh Cameron wants Andrew Davey to return a hat which he had picked up by mistake at a night club, which had the name D. Brown in it. He also informs Andy that he met a young lady and not wishing to disclose his own name he gave her his. Due to this and to the fact that Hugh Cameron wished Andrew Davey to meet his daughter and if things went all right to marry her, Andy was anxious to get away before the family arrived home. Mrs. Cameron, Grandma Cameron and Nancy Cameron arrive and immediately upon their arrival Mrs. Cameron begins demanding explanations. This part was taken by Mrs. Behrens and besides being a very heavy part was very well done. Grandma Cameron who was very hard of hearing created much laughter by her mis-interpretations of the players lines. She invariably finished up by saying "Don't shout at me young man, I can hear perfectly." This part was acted by Mrs. Firth. Nancy Cameron was a young lady who was madly in love with a young actor, Bruce O'Mara, but who was afraid her father would insist on her marrying Andrew Davey. Nancy was well played by Gladys Denney. Charles, (the chauffeur) claimed to be a "great little fixer" and often made things much worse with his "little white lies." Bill Worton took this part very creditably. Mrs. Cameron discovers the hat and believes it to belong to D. Brown, a poet. She is a great admirer of his works and is very thrilled at the idea of touching the hat that covered his head.. A rather elderly gentleman by the name of Victor Golden comes to the house at this time, gives Lucy his card and explains that he is there about a hat. Charles, who has been warned not to let anyone in tells him that his hat will be returned and politely sees him to the door. Mrs. Cameron, however, sees him and mistaking him for D. Brown proceeds to make much fuss over him. The part of Victor Golden was taken by Graham Allan and was very well done. Bruce O'Mara, Nancy's lover, comes to see Hugh Cameron to ask for the hand of his daughter. Mistaking Golden for Cameron, he proceeds to ask for his daughter. Golden, not quite understanding it all gives his consent. When Andrew Davey hears this he is very much put out for he and Agatha Golden(Gwen Firth) are secretly married. Bruce O'Mara (taken by Jack Whyte) challenges Andy to a duel. Before the duel is to take place explanations come thick and fast. Bruce and Nancy, with their parents consent come together, Agatha and Andy find that they need not keep their marriage a secret anymore, for Victor Golden welcomed Andy as a son-in-law. The hats are straightened out and although Ivy Cameron still thinks there is something up believes them when they all say "We wouldn't fool you." All throught the play the colored maid, Lucy, kept everyone laughing. Mrs. Hammond took this part and it was admirably done.

Messrs. Bill Robinson, Bill McCauley and Bill Worton motored to Innisfree on Sunday. Misses Anne and Nellie Lindsay returned with them, Anne spending Monday visiting here.

RAISE YOUR OWN BULL CALVES. Registered Shorthorn Cattle for sale:— Comprising a number of cows in calf to Viewfield General weighing over 2100; also a number of bull calves from the same sire. Bullcalves $15.00 and up.—Apply to J. Vaughan, phone 200, Tofield.

Mr. and Mrs. Provost of Edmonton, Miss E. Allen of Westlock, Miss Margaret Allen of Barrhead and Mr. R. Montgomery of Fort Saskatchewan spent Christmas at the Allen home here.

Miss Helen Audiamko is visiting Mrs. T. Nebroski for the holidays.

Miss Lois Thompson from Camrose spent the holidays at her home here.

The Anglican Church Sunday School party was held in the Curling Rink on Friday, 27th. Games were played and later in the afternoon Santa Claus came and gave each child a lovely gift. A nice lunch was served and the children all returned home after having a very enjoyable time.

The primary department of the United Church held their annual Christmas party on Friday afternoon. The little children played games after which they entertained their parents with a small concert. A bountiful lunch was served with plenty of ice cream and cake after which the children returned to their homes.

The Study Club entertained at tea in honor of Mrs. McLaughlin on Dec. 20, at Mrs. Braces home.

A Happy New Year To All

✱

This district in common with many others in the province experienced in 1935 as near a crop failure as it has been our lot to witness. From the promise in July of a bountiful harvest, there finally emerged in September and October only a fraction of the good things hoped for.

Although very disappointing to all and perhaps to some discouraging, there is really nothing strange in this turn of fortune. We know of no agricultural district where crops are perpetually assured. The forces of nature are so complex and varied that nothing can be taken absolutely for granted until the harvest is garnered in. Even then other forces are liable to offset the advantage of a bountiful harvest.

Perhaps in no other one year would a good crop at a fair price have straightened out so many farmers affairs here. Following five years of depression when most people had shaken themselves down to an economical standard of living, a good crop at a fair price would have set things just right for a return to a measure of prosperity. But it did not so happen, and not having happened in 1935 we still have it coming perhaps in 1936. Who knows?

Some writer in explanation of the law of averages, has written that if you take the roofs off of a certain number of houses in any large city any number of times, pretty much the same results will occur. There will be so many people ill, so many deaths, so many births, so many marriages, and that in the long run the proportion of these things as related to each other vary little.

We are of the opinion that the law of averages works out agriculturally, that a string of poor years will be offset by a number of good ones, and this is one reason why with many stooks under the snow, we feel quite optimistic as regards 1936. We believe, and certainly hope that the new year upon which we are all embarking will contain happiness and prosperity and contentment for all of us. It has been frequently said that the darkest hour comes before the dawn, and because of this we cheerfully, confidently, almost exultantly wish each and all a Happy and Prosperous New Year.

The Tofield Curling Club entertained in honor of Mr. and Mrs. McLaughlin. Bridge was played during the evening and a large crowd of curlers were there to say good by to Mr. and Mrs. McLaughlin who have left to make their home in Wetaskiwin.

On Monday December 23, a farewell party was held for Bob Whyte at the Jobb home. Bridge was played during the evening and honors went to Muriel Malcolm and Arthur Behrens. A delicious lunch was served by the hostess, after which the crowd sang "For He's a Jolly Good Fellow" and "Auld Lang Syne." The party then broke up with everyone voting a good time.

On Thursday evening Mrs. Firth had two tables of bridge in honor of Mrs. Geo. McLaughlin. A lovely lunch was served by the hostess.

Mr. and Mrs. McColl, and Miss Audrey Jobb spent the holidays at the Jobb home here.

On Thursday afternoon Mrs. Brace entertained a number of girls to tea. A social time was spent after which tea was served to the guests, Mrs. Firth assisting Mrs. Brace in pouring the tea.

On Monday afternoon Aileen Allen entertained a few girls to tea. A delicious lunch was served and a pleasant social afternoon was spent.

On Monday evening Aileen Allan enterained a number of friends after the hockey game Due to the strenu- [illegible] the boys played the hostess served a lovely lunch first after which the party enjoyed a game of bridge. In addition to playing bridge, the crowd had a lesson in modeling, Anne Lindsay being voted the best "gum" modeller. The part broke up early in the morning, everyone enjoying themselves immensely.

Mr. and Mrs. Wm. Stutzman returned on Tuesday after a visit of several weeks duration with their son Clifford and other friends in the United States. Mr. and Mrs. Clifford Stutzman are located near Wichita, Kansas.

LOCAL BUSINESS CHANGE

A local business change of considerable interest occurred just before Christmas when Mr. Oscar Rossland of Camrose purchased the business known as the Central Meat Market and owned by W. J. Duckfield. Mr. Duckfield has been a resident of Tofield for some number of years, in fact he was a resident prior to his purchasing the Central Meat Market. "Ducky" as he is popularly known, has been a rustler, a good mixer and an all round good fellow. He forged ahead in the curling activities of the town and was in frequent demand for amateur stage productions. About a year ago he married and together with Mrs. Duckfield formed a part of the community life.

We understand that Mr. Duckfield has purchased a butcher business in Wainwright and will move there very shortly. Mr. Rossland hails from Camrose and is an experienced butcher. Together with Mrs. Rossland they will occupy the house vacated by Mr. and Mrs. Duckfield.

MR. AND MRS. McLAUGHLIN LEAVE FOR WETASKIWIN

As previously announced in this paper Mr. McLaughlin has purchased a hardware business in Wetaskiwin and together with Mrs. McLaughlin and Enid left for that point last week.

The McLaughlin family have been residents in Tofield for many years, during which time they became very well known throughout the district Their chief community activities centred around the curling clubs, both Mr. and Mrs. McLaughlin being expert curlers They belonged to the Masonic fraternal organizations to which they were much attached. Their many friends wish them good luck in their new location.

Mr. Paul Thompson, whom Tofieldites will remember as having worked in the bank here quite a number of years ago was in town on New Year's day renewing old acquaintances.

Senior Hockey Team Ties With Irma

On Monday night Tofield and Irma met in a league fixture at Tofield. The rink men had laid a nice sheet of ice and a real fast game of the winter pastime was played.

The game was a little late in getting under way but made up for it in thrills when it did get going. The first period was fairly evenly divided between the two teams It was featured by end to end rushes, both goalies needing to step lively. A little better than midway through the period Tofield scored on a pretty piece of combination play. Worton, Allan and Burnett started away back of centre ice and kept up a steady and continuous passing right up to the goal mouth when Allan passed to Worton and Worton slipped the puck across to Burnett who made no mistake and sunk it into the net. The period ended 1-0 for Tofield. In this period Jack Bowick was hit by a flying puck and had to retire from the game. Following this Norman Glover was hit by a flying puck but was able to continue playing.

The second period was the fastest hockey of the night, Irma setting the pace. They skated like demons and only sensational work of Bowick in goal and the Glover bros. on defence held the Irma score to one, Martin from R. McGuire tieing up the score. Toward the end of the period Irma showed signs of tiring and the balance of play swung over to Tofield. The period ended with the score tied 1-1.

The third period was distinctly Tofields, Irma being on the defensive most of the time Even so in a rush they scored first in this period, Swallin putting them one up on a pass from Morrison. Tofield worked desperately to get the equalizer and about midway through the period, Spratt for Tofield scored unassisted, again tieing the score. In this period Lee. Glover got hit with a stick, but after a brief rest returned to the game, receiving a great ovation. At this stage of the game Tofield was swarming around Irma's net and did everything but score, the period ending a tie.

Ten minutes overtime was played and although both goals had narrow escapes the tie was unbroken, the final score being 2-2

J. J. (Bud) Hannan handled the game in an efficient manner

TOFIELD JUNIORS LOSE TO HOLDEN

The Tofield junior hockey team, under the managership of Graham Allan played their first hockey game at Holden on Saturday last. Due partly perhaps, that they had had only one practise and were not fully organized, the Holden boys managed to place seven goals in the net while our boys failed to score any

On Thursday afternoon at the Tofield rink they again played the Holden team and were again defeated, this time by the score of 4-1

Keep the Home Fires Burning

At this season of the year rural residents are invited to spend their money, here, there and everywhere. We do not propose to tell anyone where to spend their money, for even in the most autocratic country a man's money is his own, to spend where and when he chooses. But we would suggest that as far as practical with you, your home town should be supported. Created for two reasons—to serve you and profit by serving you—unless it is supported by legitimate business, in the course of time it will simply cease to exist.

Your local paper has been issued weekly for 17 years and more. Like you it has had its ups and downs—its fleeting contact with affluence and its nose dive into the economic abyss. But through good times and bad times we continue to turn out a weekly sheet. That's our job.

We desire and seek your renewal and any new subscribers that may come our way, we are more than glad to add to the list. Perhaps you hav not any money—well we are ready to accept almost anything a farm produces. We have, since 1930, taken in some of the finest turkeys ever seen and we have also taken in chickens that simply fell off the perch because the weather was cold.

Hardly anything comes amiss. The truth is we want you to stay with the home town—we want you to stay with the home town paper.

THE MERCURY

HEALTH by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

BETTER AND CHEAPER

We are apt to be suspicious of an article which is offered to us as being both better and cheaper than anything else. There is no doubt, however, that this claim can be made in so far as disease is concerned. No one can deny that the prevention of disease is better than cure and certainly it is much cheaper to prevent than to cure.

Tuberculosis, being a communicable disease, is preventable. With early discovery and adequate treatment, most cases can be cured. Unfortunately, many cases are either not discovered early or else they do not secure the treatment they need, with the result that many lives are cut short.

The prevention of tuberculosis is nothing mysterious. It depends upon our making use of what is already known concerning the disease. The germ which causes tuberculosis is transferred from the sick to the well in the droplets of sputum or saliva expelled by coughs, sneezes or spitting.

Just as soon as we realize that the body secretions coming from the mouth and nose are the most dangerous disease spreaders may we hope that effective means will be taken to prevent their passage from one person to another.

Those who know they have tuberculosis will if they have been taught, and particularly if they have had the great advantage of training in sanatorium, take such precautions as will protect those with whom they come in contact. There are many persons, going about their ordinary lives and work, who have tuberculosis but who do not know it; they are not taking any special care.

Everybody, men, women and children, should cover their mouths when they cough or sneeze. Spitting is mostly a habit as shown by the gradual disappearance of the spittoon. No one should talk right into the face of some other person.

Eating and drinking utensils, unless sterilized may pass these dangerous secretions from one user to another. The common drinking cup should be banished from the home as well as from public places. Health departments see that restaurants sterilize their dishes, but what happens in the home?

Each one can help to prevent tuberculosis by looking after his own general health, covering his mouth when coughing or sneezing, avoiding spitting, and by supporting the health organizations which work for the good health of all.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

THE FORGOTTEN RAILROAD

SASKATOON, Sask., December 20—Like the forgotten man of the last presidential campaign, the railways of Canada are rapidly drifting into the forgotten class, it was stated by Hon. C. P. Fullerton, K.C., chairman of the Board of Trustees, Canadian National Railways, who officially opened The Bessborough, latest addition to the company's chain of hotels, at a luncheon here December 16.

Forgotten by shippers in favor of buses and trucks, forgotten by the governments in their failure to apply the same regulations to the buses and trucks as were applied to them, the railways were gloomily reflecting in their annual statements the heavy expenditures of maintaining roadbeds paralleled by public highways which enabled the bus and truck to take away any revenues on which the railways were dependent for their existence.

Admitting that the truck and bus had a legitimate place in the transportation field and a right to operate under fair conditions, the Canadian National chairman pointed out that unregulated competition might have highly undesirable results.

"I am glad to learn from the newspapers that the matter of regulation of trucks and buses will be considered at the conference of Dominion and provincial premiers now sitting in Ottawa," he observed in more optimistic vein.

In a review of this years operations of the Canadian National Railways, Mr. Fullerton released some striking figures, which showed an operation profit for the railway's hotel system more than double the 1934 figure, an operating loss of $127,000 in connection with the merchant marine in 1931 transformed into an estimated profit this year of $273,000, and an estimated profit of $164,000 for the West Indies steamship line, which had shown an unbroken, if decreasing, record of deficits since its inception in 1929.

Surpassing even these figures, the chairman predicted a gross revenue for the railway system of $172,000,000 for 1935, a betterment of $9,000,000 over 1934.

Other speakers at the luncheon included S. J. Hungerford, president of the Canadian National Railways System who took to task the critics who were under the impression the railway managements were asleep; A. E. Warren, vice-president, Western Region; and Mayor R. M. Pinder, of Saskatoon.

Fur-clad Physician

By Thomas Wayling in the Canadian National Railways Magazine

In a tiny snow igloo far up in Baffin Land, an Eskimo mother sits watching her baby.

The child lies snuggled in furs on the sleeping platform and on the floor nearby his twelve-year-old sister plays with her walrus ivory doll, carved by her father, Iglulik, in the long winter night.

The mother is busy with ivory needle and sinew thread, for winter is coming on. The fragments of caribou she pieces together are tough to the needle's point. The caribou trek missed their camp this year.

The igloo is warm within, for all the bitter cold without. The wick floating in the oil-filled soapstone bowl throws off a flickery light and a wavering heat.

It is quiet there in the igloo. The baby smiles in his sleep; the mother nods over the needle. Little Tow-hee puts the crude little doll on the back.

A sinister rustle in the low doorway of the igloo diverts her attention. Her eyes dilate with horror. She screams and scrambles to the platform beside the baby brother.

A monstrous white bear is forcing his huge shoulders through the small doorway. The madness of starvation glares from his eyes.

The mother springs to her feet and gropes frantically, but in vain, for a weapon. Iglulik has taken his spears to the seal hunt.

Seizing a soapstone dish she hammers the snarling snapping head. The bear breaks through.

She died defending her children. Small Tow-Kee barely escaped with her life, though her little body was lacerated by those tearing claws.

When help arrived the bear was still there beside the mother's torn body. Eskimo hunters swiftly dispatched the bear, then found the baby safe under the skins piled frantically over it by little Tow-hee.

The women of the band dressed the wounds of little Tow-hee. It was poor and elementary, that dressing: just skins tied over the lacerated little body.

The Eskimos have no healing herbs, as have the Indians. They have no unguents, no medicine. They are possibly the world's only race without knowledge of medicine. They have a rough knowledge of surgery, but of preventive or curative measures, no knowledge at all.

Little Tow-hee was found soon afterwards in a neighboring igloo, writhing in pain from her hurts. Dr. L. D. Livingstone, on the memorable long patrol around Baffin Island, came to the encampment and learned from the natives the epic of the Arctic mother who died fighting with her bare hands the great white killer of the north.

The fur-clad physician who had travelled over a thousand miles by dog team and komatik took the child and healed her wounds, then passed into still more remote encampments. He cured their sick, healed their wounded, taught them hygiene and sanitation.

The Dominion government built a house for him at Pangnirtung on the eastern shores of Baffin Land. Slowly the news permeated the island and his patients began to come in. There is no moccasin telegraph, no bush wireless, in the Arctic. Days and weeks pass before news reaches the settlements.

One day a group of natives with dog teams howling and drivers yelling surged into Pangnirtung. On one of the komatiks a small boy lay under the furs. They carried him into the doctor and told a tale of a gunshot wound in the thigh that would not heal. For a long time they had tried to get him down to the white man who could heal, but storms had held them back and the 150-mile journey had taken long to cover. Dr. Livingstone swiftly prepared the boy for examination. He found a dreadful wound, gangrened and evil to look upon. He chased the Eskimo escort out of the room and got to work.

It was touch and go, for the wound had been long neglected but the fur-clad physician saved the boy's life and limb.

An Eskimo has but one cure for a swelling or similar ailment; to thrust a knife in. When the knife has been used in the hunting and not cleaned afterward, the remedy is worse than the disease. Infection set in and Eskimo surgery can do no more.

"If an Eskimo child falls sick," says Dr. Livingstone, "the mother's only attempt at remedy is to feed it. In fact, whatever happens to an Eskimo they give him things to eat.

"They eat heartily. They eat morning, noon and night. They eat because they have food to eat; they eat because somebody else is eating; they eat just to eat.

"They cook their food to some extent. They cook it over a big oil lamp. This is hollowed out of soapstone and filled with seal oil. Nowadays they have pots and pans they get from trading posts and make stews and whatnot."

The Eskimos seldom or never use salt. It may be that the seal meat and fish that form their staple diet have salt enough.

The igloo is their winter home, the tupek in summer. A tupek is a tent made of skins, canvas or whatever else may be available. The Arctic is a barren land and wood is scarce.

An Eskimo family sleeps late and stays up late. They never want to go to bed.

The Eskimo is a prey to simple ills. Chickenpox, scarlet fever, and similar diseases may ravage a settlement, for the Eskimo has developed no immunity to a disease not natural to the Arctic. Dealing with one chickenpox epidemic Dr. Livingstone reported that this broke out in the late summer. It was impossible to keep the nomads from visiting each other and in ten days the disease spread throughout the camp.

In other days it would have spread to other camps but the fur-clad physician put that camp under rigid quarantine for five weeks and so checked the epidemic.

The fur-clad physician's round in Baffin Land was a thousand mile patrol, by dog team and komatik. He brought a new health and strength to the Baffin Land Eskimos before the Canadian government transferred him to the west coast of Hudson Bay.

When Dr. Livingstone reported back to Ottawa on such leave, he joined other Canadian explorers on leave, consorting with them in the rambling office in Ottawa which has been dubbed the Igloo.

For some reason Dr. Livingstone found reason to call on his chief quite often and in the outer office always had a word for his chief's secretary, pretty Miss Mary Anderson.

Last year he started north again, to take up his health crusade at Chesterfield Inlet on Hudson Bay.

Not long afterward the departmental chief lost his secretary. Miss Anderson resigned, "for good and sufficient reasons." For years she had kept records and files and photographs of the Arctic administration. Now she was going to get some first-hand information.

The Anderson-Livingstone wedding took place in the little church at Chesterfield Inlet.

And the fur-clad physician expects to live happily ever after.

Shake

"Did you pass your exam?"

"Well, it was like this—you see—"

"Shake, neither did I." —Brown Jug.

Pass the Soap

An 18-inch bird bath that the whole family will enjoy as much as the birds do.—Hackensack (N.J.) department store bulletin, spotted by Literary Digest.

COMMON SALT

Salt is a very valuable commodity and, in addition to its use for seasoning and preserving foods, enters into a number of industrial processes. It is used in the textile dyeing industry, in the manufacture of kraft paper and sheet glass in the form of salt cake. There is a large consumption of salt cake in the United States which is supplied from three sources, from the Brine deposits in California and Texas, chemical manufacturers who use the sulphuric acid method in manufacturing hydrochloric acid and imports from foreign countries, chiefly Germany and Belgium. Canada supplies about 15 per cent of the total imports and stands third as a source of supply, according to the Industrial Department of the Canadian National Railways.

Hm-m!

"Why does a woman say she's been shopping when she hasn't bought a thing?"

"Why does a man say he's been fishing when he hasn't caught anything?"—Philadelphia Inquirer.

THOSE BEER ADS—

ANNOUNCEMENT HAS been made that after February 1st all beer advertising and liquor advertising is to cease. It is a government order from the premier and his cabinet and constitutes the first of its kind in Canada. The reason no doubt is an empty government treasury and with the beer appropriation to be had for the taking the premier and his cabinet simply reached out and took it. For the premier, cabinet ministers and members of parliament must receive their's even though holders of savings certificates are compelled to wait. In a province that is almost hopelessly bankrupt; a province that has never paid its way, has always lived on borrowed capital, it is a case of legislators first.

To write of beer in connection with beer advertising is something like greeting an old acquaintance, for in my very early youth many times have I traversed brewery property and have seen the amber liquid in all its stages of preparation. From the depths of the huge coppers full of liquor (water), I have pulled the thermometer and upon the desired temperature being reached in a piping voice gave orders to draw fire to be immediately followed by my father's stentorian one. I have seen the barley on the malting floor being transformed into malt and have seen the mash in the tun and later beer flowing like a rivulet over what were probably coolers. I have been in the huge warehouses, blocks in extent, where thousands of barrels were stored and seen the train back in to be loaded for shipment to all parts of the country. I have ridden behind brewery horses, the largest and finest shire horses in the world, specially bred for their life's work drawing heavily laden drays, never faster than a walk. I have cheered and felt youthful exultation when the home brewery tug-o'-war team beat the best teams England could then produce, and on more then one clear morning I have stood upon the "catwalk" at the very top of the brewery building and looking out to sea, seen ships fade into the horizon. And later it was destined that I should leave those things that lay at my feet and follow those ships into the unknown.

Brewing is a skillful art. Nowhere along the line of production is there any place for "I think," "I believe." Knowledge must be definite and trustworthy. Barley must be of the finest; the malting process must be even and uniform, and must be stopped at just the right moment. Water must be just chemically right, some large breweries having private water systems with wells situated miles from the breweries so as to get water of a particular kind. The first telephone conversation I had was from a brewery to a pumpman several miles distant. The business of brewing combines chemical action with mechanical precision and when a glass of foaming ale is set before you, it arrived there by a path beset with difficulties, by the aid of chemist, mechanic, laborer and salesman.

Men about breweries are hearty, jovial and above all, matter of fact. Often outspoken to the extent of bluntness. They have little use for subterfuge, specious arguments and promises of things to come. Generally they govern their lives as their business is governed, by rule, pay their way, live within their means and let it go at that.

There is however another side to the brewing industry, not so evident in this country and perhaps not so evident in England now as it was forty years ago. Many men and women too were prone to let beer become their master instead of their servant. Consequently homes that should and would have enjoyed a normal degree of happiness lost it through over indulgence. Often the wife and in those days the mother of a large brood would be the sorry victim of a father's craving for drink. And one could see on a Sunday morning the children of one home going sedately to church, decked in furs while the children of another home scarcely had shoes to wear. Perhaps this was one of the reasons why having been raised almost within the shadow of a brewery I took the course of total abstinence. It is a little difficult to understand that brewing, an art that goes back 3000 years before the Christian era, should produce a beverage of real tonic benefit to mankind and at the same time a beverage fraught with considerable danger. Perhaps one explanation can be found in the rosebush where beauty and fragrance and sharp prickly thorns spring from the same root. Mankind for his own preservation is compelled to use the power of reason given to him.

This paper has been publishing beer advertising for several years. At one time in our journalistic career we refused hard liquor advertising and only accepted beer advertising because the experience of prohibition convinced us that prohibition created more evils than it abolished and if people were determined to drink it was much better that they drink properly brewed beer than a concoction made by any Tom, Dick or Harry.

Viewed in this light the brewers are rendering a real service to the people and not a dis-service. Advertising one's wares is a privilege accorded all businesses and there is no good reason why the breweries should be dis-allowed to advertise theirs.

The premier and his cabinet have a real problem on their hands. Big strides have been made, thanks to Mr. Maygore, towards balancing the budget but the gains are small compared with meeting the $160,000,000 debt obligation of the province. The premier needs money badly, it having been suggested that he make a trip to England to see if he can raise money there.

Having picked up the beer advertising appropriation for the provincial coffers and having "fired" a few civil servants in the interests of economy, we suggest that the government really take the lesson to heart. Cut the number of private members by two thirds and then cut the salary of those remaining to $1000 a year. For cabinet ministers $2500.00 per year should suffice while the premier should be able to get along with $5000. Even this would not make much of a dent in that $160,000,000 debt, but it would be a real contribution and would show that the present government desire to give something to their province rather than take something from it. The present cost of government in Alberta is far too high.

REGULAR MONTHLY MEETING OF THE MUNICIPAL DISTRICT OF BEAVER LAKE COUNCIL

Meeting called to order by Reeve Moen at 2:25 p.m. on December 14.

Councillors Fane, Chetney, Kubin, Lucas, Hillerud and Moen present. Minutes of the previous meeting were read by Mr. Goodwin, Asst. Secretary. The Secy. had placed a financial statement for November in each Councillor file.

Moved by Mr. Fane that the minutes be adopted as read. Carried.

Moved by Mr. Lucas that the Secretary be instructed to write the Village of Holden requesting payment for the roadwork done in 1935, together with the grader blade as supplied by this District. Carried.

Moved by Mr. Chetney that we forward Savings Certificates in the amount of $294.90 to the Government for payment on behalf of the Trust ad Guarantee Corporation of Calgary and that when payment is received the amount be credited to taxes. Carried.

Moved by Mr. Fane that we file the E. Atamanchuk letter regarding Mothers Allowance in the case of Mrs. Babyn. Carried.

Moved by Mr. Kubin that we inform those ratepayers who have billed the Municipal district for a portion of their hospital accounts, that our Hospital Agreement did not take effect until December 1st and that they were not entitled to any payment. Carried.

Moved by Mr. Moen that the Secretary be instructed to complete the transfer of the Road Diversion for the N.E. 10-50-17-4 at the expense of the owner. Carried.

Moved by Mr. Moen that we extend the time for payment for tax consolidations and that they be kept in force if payment is received within one year. Carried.

Moved y Mr. Kubin that in such cases where farmers prove to be holding grain for better prices that we cancel the consolidation agreement if payment was not received on account. Carried

Moved by Mr. Moen that we do not give discounts on post dated cheques. Carried.

Moved by Mr. Lucas that no further discounts be allowed on payment of current taxes after December 15. Carried.

Moved by Mr. Fane that we ask the Royal Bank of Canada at Ryley for a refund of money paid for cheque paper in 1934, it having been found that we paid the bank for the paper used in our cheque forms and in future that we ask the bank to supply the paper for our cheques without cost to us. Carried.

Moved by Mr. Lucas that we offer the General Hospital at Mundare a Demand note for $600.00 in full settlement of all accounts owing to Dec. 1st, 1935 and that we advise them that payment will be made as soon as funds are available. Carried

Moved by Mr. Hillerud that we offer the University Hospital at Edmonton one third of their full account and that that be as full settlement to December 1st, 1935 and that we tender them a demand note for same. Carried.

Moved by Mr. Moen that we offer the Viking Municipal Hospital $10, one third of the M. Sherburne account as full settlement and settlement be made immediately an agreement can be arranged. Carried

Moved by Mr. Hillerud that we offer the Vegreville General Hospital one third of their account as full settlement and that a demand note be tendered. Carried.

Moved by Mr. Chetney that we pay the full costs of the Mohs Hospital Account to the Viking Hospital in the amount of $15.25. Carried.

Moved by Mr. Lucas that we offer to credit Municipal Taxes of Chris Christianson with the amount of the note of Wm. McIsaac. Carried.

The circular letter regarding Seed Grain By-Law was read and tabled until the January Meeting.

Mr. Hillerud reported that in the case of Charles Bowick's Hospital Account the Royal Alexandra Hospital should be advised that we were not responsible for him owing to the fact that he did not establish residency before being admitted.

Moved by Mr. Lucas that we call for a recess of a half hour at this time. Carried.

The meeting was resumed at five o'clock.

Moved by Mr. Fane that the Secretary write to the Department regarding the Homestead Loan to Carl Baron, referring to their letter of Jan. 17th, 1935. Carried.

Moved by Mr. Fane that we instruct the Secretary to take the matter of the Munro Hospital Account up with the Minister of Health, Dr. Bow, pointing out that Mrs. Munro had been admitted to the Hospital at Mundare on June 28th, 1935, after having resided in Mundare ever since November, 1934. Carried.

Moved by Mr. Lucas that we offer the Misericordia Hospital one third ($146.00) in payment of their account in full and that a demand note be forwarded as settlement. Carried.

Moved by Mr. Kubin that we offer the General Hospital of Vegreville one third of their account against T. Bamarchuk. Carried.

Moved by Mr. Lucas that we inform Dr. Richardson that we will not consider paying the account of A. W. Telir. Carried.

Moved by Mr. Chetney that we advise Dr. F. Oscar Wilson that the matter of taking the Slimko boy to the hospital is not a debt to the Municipality. Carried.

Moved by Mr. Fane that we offer the Lamont Public Hospital $25.00 as full settlement of our responsibility in the matter of the account of E. Allison. Carried.

Moved by Mr. Chetney that we recommend Old Age Pension in the case of Mr. and Mrs. Lupino to be increased to $15.00 per month each. Carried.

Moved by Mr. Chetney that we recommend Old Age Pension in the case of Mrs. G. T. P. Barlow of Holden at the rate of $20.00 per month. Carried.

Moved by Mr. Chetney that we ask the Department for an Inspectors Report in the case of the Mrs. Julia Logan Mothers Allowance account. Carried.

Moved by Mr. Lucas that we advise Mrs. Kaclam that in view of the increase in the relief allowed we cannot see fit to grant any clothing relief and that she may use part of her $15.00 allowance for the purchase of clothes. Carried.

Moved by Mr. Fane that we grant Mrs. Katie Caar an additional $4.00 for clothing. Carried.

Moved by Mr. Fane that we allow Mr. W. Bazarabu $10.00 to clothe his children that they might be in a position to attend school.

Moved by Mr. Fane that we authorize a clothing order of $32.85 for the Martin Berzenski family at Prosperity, Alberta. Carried.

Moved by Mr. Hillerud that Mr. Noah Selberg be appointed as returning officer for 1936 with a payment of $25.00 to cover all expenses that might be incurred.

Moved by Mr. Moen that Carl Erickson be appointed as Deputy Returning Officer for Division Three and that the Poll be held at the Amisk Creek School. Carried.

The other Councillors were not in a position to appoint their Returning Officers.

Moved by Mr. Lucas that the Annual Meeting be held at Ryley on February 15th, 1936 in conjunction with the Nomination Meeting. Carried.

Moved by Mr. Lucas that we authorize relief at the rate of $4.00 per month for D. Motuk.

Moved by Mr. Lucas that we notify Mike Deputan of Holden that a statement given on his relief application was untrue with regard to the car operated in 1934 and that we therefore cannot grant relief. Carried.

Moved by Mr. Lucas that the Secretary be instructed to write to the Bureau of Vital Statistics to search the records of the marriage of Frank Saver. Carried.

Moved by Mr. Lucas that we grant relief for Frank Saver at the rate of $5.00 per month from December 1st, for five months. Carried.

Moved by Mr. Lucas that we authorize relief at the rate of $10.00 per month to Wm. Benevitch. Carried.

Moved by Mr. Chetney that we authorize relief at the rate of $7.50 per month for Jno. Baraniuk. Carried.

Moved by Mr. Chetney that we refuse relief to Steve Baronoski owing to the fact that he is the only son living at home and that his father is in a position to supply him with the necessities. Carried.

Moved by Mr. Lucas that we authorize relief to Peter Werberski at $5.00 per month for three months. Carried.

Moved by Mr. Kubin that we do not raise the relief account of Mrs. Anton Skulski from $10.00 per month and that we advise them that their house is still available for them if they care to return to this district. Carried.

Moved by Mr. K[illegible] that we [illegible] the matter of granting relief to A. [illegible] until the next [illegible] Carried.

Moved by Mr. K[illegible] that we a[illegible] relief at the rate of $5 [illegible] per month to Mr. Peter Ogr[illegible] of Mundare and that in future [illegible] be made payable at the Red and White store there. Carried.

Moved by Mr. Lucas that he be allowed to investigate the length of time Mr. Fred Sikal lived [illegible] trict, before any relief was gra[illegible] Carried.

Moved by Mr. Kubin that the Secretary be instructed to [illegible] Mothers Allowance Old Age P[illegible] and Old Seed Grain accounts [illegible] Carried.

Moved by Mr. Fane that we off[illegible] Stadryk account with the Mun[illegible] Hospital as full settlement. Carried.

Moved by Mr. Kubin that we meet again on January 10th at 11:00 a.m. Carried.

The Whole Truth

Judge (to witness): "Was [illegible] friend in the habit of talking to himself when he was alone?"

Witness: "To tell the truth, your honor, I was never with him when he was alone."

* * *

"Here, Aunt," said the returned traveler, "is a frame I brought you from Paris as a souvenir."

"Thank you," said the dear lady. "I wish you would have brought me one of the Latin quarters I read so much about."—Long Beach Press-Telegram.

* * *

Judge: "And why do you think I should be lenient with you?"

Defendant: "It's my lawyer's first case."

TO WHOM IT MAY CONCERN

Fire Insurance Policies numbered 74897 to 74900 of the Dominion Fire Insurance Company have been lost, mislaid, destroyed or stolen from the office of A. J. H. McCauley of Tofield, Alberta. This is to notify that same are void and of no effect.

Dr. Law has his office all fixed up. Got an X-Ray that you can see through anything, but Mrs. Law says she don't need an X-Ray to see through most of these curlers.

****

A joint banquet was held at the rink by the ladies' and men's club as a farewell to Geo. and Mrs. McLaughlin. The toastmaster Frank Law [illegible]. The Veteran [illegible] as he said [illegible] was the speech maker and Mrs. Mason upheld his views [illegible] "Genial Geo." [illegible] a few kind words. The [illegible] the McLaughlin home at Wetaskiwin will always be open to all curlers and others who curl.

****

After one game [illegible] said, "You're [illegible]" Fred said, "Oh [illegible] even if you don't think [illegible] said, "Well we're square then, for I think so even if I didn't say so."

****

A [illegible] is the only animal [illegible] more than once.

****

Wanted: A good curler to take the place of Geo. McLaughlin who has left [illegible]. Apply at the Institute Rooms. Do not call unless you can fill this position.

****

The [illegible] Kitchen [illegible] curl Tuesday, Thursday and Saturday on ice [illegible]. The skips Muriel Malcolm and Maude Redig. Watch them go. They will have three willing helpers each.

****

The Mercury [illegible] schedule is out. Paste this draw in your hat. Draws [illegible] at both barber shops, the meat shop, rink. I have one, Bill Chapman [illegible]. If you can't curl your scheduled game, arrange with the opposition. The draw committee do not change games. Better late than never, but better never late.

Christmas passed very quietly in our district with the exception of the school concert no other public affairs were given. Family dinners were served in all the homes.

Miss Marjorie Duncan of Vermilion was a guest at the Schultz home over Christmas.

Mr. Harold Schultz who is attending the agricultural college at Vermilion was home for the Christmas holidays.

Mr. Stewart Harrison who is taking a druggist course at Lamont spent the Christmas holidays at the parental home.

The Ladies' Aid will meet on Thursday of this week, Jan. 2 instead of the first Wednesday in the month, at the home of Mrs. Henderson.

The directors of the Starrett phone line held a meeting at the Sears home Thursday afternoon of last week, with Messrs. Harrison, Schultz, Henry McGonigle, W. A. Mitchell, J. H. Ingram and Joe Sattle in attendance.

Miss Margaret Lindsay is spending her Christmas holidays at her home in Innisfree.

Misses Hazel Sears and Ethel Coombes and Messrs. Harland Thompson, Stanley and Charley Sears were guests of the Schultz family Thursday evening of last week.

Master Lloyd Ferguson of Lakeshore spent the holidays at the home of his grandparents Mr. and Mrs. J. H. Ingram.

One of the most successful school concerts was put on by Miss Lindsay and pupils on Friday, Dec. 20. The school house and tree was beautifully decorated and a lengthy program was given. We are sorry that we haven't it for publication but every number was very good. Santa Claus arrived at the close and distributed two presents apiece to the pupils, also the regular Xmas stockings. Apples were passed around to the adults. A large crowd was present.

Miss Annie Bruha of Shonts is visiting her sister Mrs. Henry McGonigle.

Miss Viola Lee and brother Lorne, spent Christmas day with their parents in Edmonton. Miss Lee remaining over the new year.

Miss Mabel Lawson of Camrose is home for the Christmas holidays.

Mr. and Mrs. McAllister and family, Mrs. Berryclough and family, Mr. and Mrs. Earl Carlisle and family were Christmas day guests of Mr. and Mrs. L. Carlisle.

Mrs. E. McMullen is the proud great grandmother of twins, born to Mr. and Mrs. Pennent, nee Sophie Brown of Bawlf.

Miss Edith Dawson, brother William and Wendall Wiley were Tuesday evening guests of the Sears young folk.

WOODLAWN

The Woodlawn Social Credit Study Group held their monthly meeting in the school on Dec. 13. Mr. Baker, M.L.A. attended the meeting and gave a very interesting address to a large audience. The next meeting of the group will be held on January 10.

Mr. and Mrs. Stanley Brown entertained the young folks on December 13, in honor of Miss Sutherland's birthday. A good time was had by all.

The Woodlawn School concert was held on December 20th. It was the best in years. The program consisted of recitations, dialogues, songs, pantomimes and dances by the tiny ones in costume and the Hanson family played some musical selections. The men of the district built a stage for the occasion which was of great benefit to those acting. Miss Sutherland thanked all those who helped to make it a success and the crowd responded with three hearty cheers. She was presented with a nice gift from the school children and others from individuals in the district. The Junior W. I. C. of Woodlawn made gifts for all the pre-school age children in the district which were distributed by Santa with the school children's gifts. The usual treats brought the concert to an end.

Mr. George Loughead is home for his holidays from his school at Brainville. Some of his friends surprised him at his home on Saturday evening. Music and games made a pleasant evening. After a delicious lunch they all departed for home.

START MOVEMENT TO SAVE GRAVELLED ROADS OF PROV.

Action on the part of the Provincial Government to check the deterioration of gravelled highways was urged at the recent annual meeting of the Edmonton branch of the Alberta Motor Association. Final steps in dealing with this as a provincial problem will be taken at the annual meeting of the A.M.A. on December 7 at Calgary.

The feeling of the Edmonton branch was that something should be done in order to save the huge investment in the gravelled roads of this province. Attention was drawn to the fact that in some parts these roads have had to be resurfaced already.

The condition of gravelled roads was ascribed in part to lack of proper control of truck traffic during wet weather conditions.

It was suggested during the discussion that the weight and speed of trucks might well be subjected to more restrictions at certain periods.

The Ketchamoot hockey team visited Ministik Sunday of last week, with better luck, tho not good enough yet as they lost 2-3 in favor of Ministik. This Sunday the boys motored to Hasting Lake, but by the time the rink was cleaned it was too late for a game. They are scheduled to go to Bardo Friday afternoon of this week. The Hasting Lake team will come down on Sunday for a game on the home rink. Earl Carlisle will furnish transportation.

LINDBROOK

A Happy and Prosperous New Year to all from Lindbrook, may it prove to be a far better one than the last one to which we all say "scram" and in a hurry too, for it was of the punk the "punkest."

Miss Mae Lepine has been and is still on the sick list, but after a trip to an Edmonton hospital she is reported as feeling a bit better.

Mr. Albert Lindgren, son of Mr. Otto Lindgren is ill with the flu, we hope soon to report him O.K. again.

The annual Xmas tree and concert was held at the school on the evening of the 23rd December. The children did their stuff very well, only Santa Claus was prevented from being there, broke his leg or something (say; this isn't a Scotch Santa Claus, guess you've heard of them, they commit suicide or elope or do something like that on Xmas eve. Anyway in his absence the teacher Mr. L. McLeay officiated as his deputy and gave away the presents from the tree, so it was a kiddies Xmas despite the conditions and Santa's absence.

SAYS BREWERS NOT IN FAVOR BANNING ADS

Brewers of the province were neither back of the proposal to eliminate beer advertising from the press nor to have the government take over the functions of Distributors Limited, stated J. G. Walford, general manager of Associated Breweries Limited, on his return from Regina, Friday. Mr. Walford's statement to the Herald was as follows:

"The suggestion, contained in the columns of recent editions of Alberta newspapers, that the brewers supported the plan to forbid advertising of beers and liquors in newspapers, in the belief that advertising did not materially assist them, and that it was costly, is unfair to the brewers. It was not, to my knowledge or belief, made by any Alberta brewer.

"It is equally unfair to say that the brewers favored the elimination of Distributors Limited," continued Mr. Walford. "On the contrary, we feel that it is a backward step which will interfere seriously with both our and the hotelkeepers' business and cause much inconvenience to the general public. Either the government will be forced to institute a similar system or beer sales will be reduced in favor of hard liquor.

"We hope that no change in delivery will be made which will act to the disadvantage of the purchaser who has no proper means of transportation to handle bulky packages to his residence and which may ultimately result in driving him to the purchase of more ardent liquor which is put up in smaller packages and more easily carried.

"In conclusion," said Mr. Walford, "I should like to point out that Distributors Limited was formed with the full approval of the government at that time with a view to eliminate open competition among breweries with all its attendant activities. We understand that another province, which has not been working under any scheme of distribution is seriously considering the early adoption of a similar system to that now in force in Alberta."

FOR SALE—New and second hand Singer Sewing machines. Expert repair work done on any make of machine. Leave your orders with the Tofield Mercury or write to H. Martin 9103—106 st. Edmonton.

FOR SALE—One purebred Yorkshire yearling boar, also four purebred sows. Swinton's farm Tofield.

THE NEW YEAR

The Budget extends to all its readers, on behalf of the Alberta Wheat Pool, sincere New Year's greetings. We wish you all the very best that life can offer.

Each week this little Budget tries to be helpful in the way of information it provides; hopeful in the sponsorship of the producers' co-operative movement in which we believe with unabated fervency; and interesting in the occasional scrap of literature it presents from the pens of the more able writers.

Here is our summed-up philosophy. That the castle of enchantment is still before us, and occasionally one can catch glimpses of its battlements and towers. The best of life is further on. Its real answer is hidden from our eyes, somewhere beyond the hills of time.

What we do in the New Year is the important thing now. Much can be accomplished and much will be accomplished as long as we keep our high purpose and our will to strive.

approximate cost of the grain required to feed a market hog up to two hundred pounds, when the grain ration is supplemented throughout the feeding period with the dairy by-products or tankage.

THE TOFIELD MERCURY

Vol. XVI., No. 40 Thursday, January 9th, 1936 $2.00 Per Year. To U.S.A. $2.50

LAKESHORE

Well, Christmas is over once more and 1936 is under way, and as per usual we made a lot of New Year's resolutions, chief among these being that we would be more faithful in our correspondence to the Mercury, thus showing our appreciation for the lovely gift which comes from the staff every year at this time, whether we deserve it or not (mostly not). This resolution will probably be broken as usual but we still live in hopes that maybe sometime we'll keep it all through the year.

Miss Ethel Baines of Gadsby spent a few days last week visiting friends in this district.

Neil Phillips spent the holidays at Mannville.

An enjoyable dance was held at the T. A. Jones' home last Friday evening. In spite of cold weather and drifted roads a large crowd attended.

Miss Grace MacKinnon returned from her home at Mannville on New Year's Day and school opened on Thursday.

Mr. and Mrs. R. C. Phillips entertained the Graham family, Henry Tiedeman, Ethel Baines and Mel Wood on New Year's Day.

The George Francis family spent New Year's day at the Jas. Francis home.

Mrs. Russell Ferguson and infant daughter visited Mrs. T. E. Seale on Tuesday afternoon.

Miss Ethel Graham returned to Edmonton on Monday where she is attending normal school, after spending the holidays at home.

Mr. James Gimmel of Lamont spent a day or two last week at the J. K. Johnson home.

Miss Myrtle Bethel left on Saturday for Sedgewick to resume her teaching duties there on Monday.

Miss Mary Dunne of Hastings Lake spent last week visiting at the Tiedeman home.

AMISK CREEK

Christmas has again come and gone very quietly. Rev. Solheim of Camrose conducted a service in the church in the afternoon of Christmas day. The weather wasn't the very best so the attendance was not as good as it would have been if it had not been so cold.

We are glad to report that Hilmar Moen who has been sick with pneumonia is now able to be up and around again.

Miss Doris Glasinger held her school concert on December 19th. A good program was rendered, the schoolhouse being packed. The children did their parts very well. After that Santa Claus arrived to distribute presents and treats for young and old.

The Young People's League and Sunday School combined held their Christmas concert in the church Dec. 27th. A beautiful Christmas tree was nicely trimmed and a very good programme was given by the children and the young people. Many nice presents and treats were received, the Young People's League putting up the treats for that occasion. Much credit and thanks are due to all who so willingly helped with the programme and the work.

Ruby Berg who is working in Edmonton spent the holidays with her parents and other relatives here.

Glen Olson from Camrose College

(Continued on back page)

Better Seed - - - Better Crops

True-to-variety crops yield better and grade higher, hence bring in more money to the producer. Good seed will produce such better crops. Our Company makes available to farmers, at cost, at each one of its elevators, some of the very best Registered and Certified seed of the standard recommended varieties.

Free Scoring Hockey Game Wednesday Night

A comparitively small crowd on Wednesday night witnessed a wide open fast skating game of hockey between Viking and Tofield. The number of goals scored must constitute something of a record for one line league hockey, no less then 21 markers being made in the 60 minutes of hockey. Fourteen of these were scored by Tofield and seven by the visiting team. While with the exception of almost ten minutes in the second period, Tofield had a distinct edge throughout the game, the Viking team never ceased trying, and right to the final bell played the game. It was a clean contest, only three minor penalties being handed out, two to Tofield, one to Viking. To the visitors credit it can be said that while on the losing end, unlike many other contests between different teams, they played the game right through and did not attempt to "roughen it up."

The first period opened up fast and both goalies were tested in rapid succession. Les Glover for Tofield made the first marker on a solo rush with a shot from well out. This was followed by a smart goal by Allen, a pass from N. Glover. Viking then stepped into the scoring column McLaren netting on an assist from Slavich. Allen for Tofield then scored his second on a pass from Martin. Viking came right back and scored, Ash being the marksman on a pass from McEachern. Tofield then took command and Burnett and Swinton scored both on passes from Worton. The period ended 5-2 for Tofield.

The second period saw Tofield gain another when Worton scored unassisted. At this stage Viking came to life and for about ten minutes played smart aggressive hockey, displaying a fast passing attack that brought them in close a number of times. They scored two goals in rapid succession, Ash making the first and McEachern the second. On one of Vikings rushes Les Glover for Tofield broke away and scored this being followed by another for Tofield by Worton on a pass from N. Glover. This ended the second period, the score standing at 8-4.

The same open type of play featured the third period. Worton opened the scoring for Tofield to be followed by another by Allan on a pass by McCauley. Viking scored next, Hardy netting the rubber on a pass from McLaren. Tofield came back when Worton scored on an assist from N. Glover, this to be followed by a solo goal by Burnett. Viking stepped into the picture again when McEachen scored and Tofield promptly cancelled it when McCauley scored on an assist by N. Glover. This was followed by another by Worton and to show they were in the game to the last, Hardy scored the last goal of the game for Viking. The game ended Tofield 14, Viging 7. We hope we have all the goals straight, if not remember 21 goal games are rare.

J. J. (Bud) Hannan efficiently refereed the game.

LOCAL AND PERSONAL

The Junior W. A. held their annual Christmas party at the home of Mr. and Mrs. J. W. Robinson on Tuesday, December 31st. After a short meeting, games and contests were enjoyed, followed by lunch, bonbons, Christmas riddles and other merriment around the table. Instead of the usual Christmas candies Isabel made some "suckers" and the recipe has been in great demand. Rev. and Mrs. Wallis assisted the hostess with the games.

The Women's Missionary Society will hold their regular monthly meeting on January 14th at the home of Mrs. Allen, "the Manse." Visitors are very welcome.

Mr. and Mrs. George Glover of Edmonton spent Christmas at the Glover home here.

Mrs. A. Sinclair and son Buddy from the coast are visiting Mr. Sinclair here.

Isabel Robinson returned to Vermilion Agricultural school on Thursday evening, as classes resumed on Friday morning, Jan. 3rd.

Mrs. A. Larson of Stettler is visiting her aunt Mrs. Rufus Wilson for a short time. Friends will remember Mrs. Larson as Miss Ora McHuffey.

Mrs. Bill Spilsted is visiting at the Rufus Wilson home.

Miss Lena Schmaume of Camrose spent the New Years holidays with her sister, Mrs. Joe Wiltzen.

Bill Robinson of the local bank staff, received word at the first of the week that he was transferred to Vegreville. Bill has only been in Tofield for a year but while here had made many friends, all of whom were sorry to see him leave.

The Teachers of the Tofield school are all back to work after the holidays. Mr. Thomas, who is ill is not able to teach so Mr. Broughton is taking his place and Miss Jean McLeod is teaching grades seven and eight.

Miss Viola Lee is back from the clay where she enjoyed a weeks holiday visiting with her parents.

Miss Edna Lindsay returned on Sunday from Innisfree where she spent the holidays.

Miss Annie Swift visited in Camrose for the holidays. While there she attended the Normal school reunion.

Bob Whyte who just recently left for Wetaskiwin, spent New Years day here.

Jean Innes spent a week visiting Enid McLaughlin in Wetaskiwin.

Miss Hilda Nomeland spent a few days in the city this week.

Mr. and Mrs. Morton and Dorcey Letourneau spent Christmas in Calgary visiting at the Adams home.

Quite a number of Tofielders visited the city on New Year's Eve.

Miss M. Neath of Edmonton spent the New Year holiday visiting at the Coutts home.

Miss Vi Moore of the hotel staff is on a month's holiday.

Eileen Allen, Ross Craig and John Moore returned to Vermilion on Saturday.

Jack Beirnes, who has been working in Edmonton for the past few months visited his parents here this week.

CANADIANS AND THEIR INDUSTRIES—AND THEIR BANK

SUCCESSFUL HOME-MAKING—CANADA'S GREATEST INDUSTRY

MECHANIC: "In recent years my pay has averaged $110 a month, but I have made as much as $200. My regular habit has been to deposit part of my pay in the Bank of Montreal."

SALES CLERK: "That reminds me—but finish your story."

MECHANIC: "Well, the job hasn't been easy, but here's what I have to-day: A debt-free home worth $2,000, summer cottage worth $500, $1,200 in the Bank, a small automobile, good furniture, including a piano. Of course, I saved something every month for many years."

SALES CLERK: "My wife runs our family finances. I hand her my pay cheque, and after paying bills and keeping our purse money, she puts the rest in our savings account at the Bank of Montreal. That's why we had the money to buy our nice little home—a bargain for cash."

MODERN, EFFICIENT BANKING SERVICE ..... THE OUTCOME OF 118 YEARS' SUCCESSFUL OPERATION

BEHIND THE HOG

By A.B.C.

The Golden Rod has vanished,
From the hillside and the plain,
And the Curlers need no longer
Look for brooms out in the lane.

****

The High School Girls should be careful about the remarks they pass on Mr. Wiggles, we sleep with one eye open.

****

Tofield retained the "G.A.N." trophy on Friday last. Scores, Tofield, 23, Viking, 21. Doc Law skipped one rink and Bert Calvert the other. Doc had as helpers, A. B., Uncle Alex and Lloyd Smith and Bert had Stan, Geo. and Fred, by the way Fred curled without his hat, or did he.

****

We paid our annual visit to the ladies curling games one day last week, and don't you think the ladies can't curl. We saw one skip play a "sporty" shot to collect four on the last end and tie up the game. It was cold and red seemed to predominate, especially the red noses. We used to think that sweeping had a lot to do with this game, but after watching the women we are not so sure, conversation will win a lot of games. Many ladies with poor shapes show good form and vice versa, but at that one needs a lot of clothes this weather.

****

Lunch is usually served by some of the ladies after the game with more conversation, the difference when the men finish a game of curling all one usually gets is a soldiers farewell.

****

Our brain wave went over big last week, we received some 40 more or less replies, mostly verbal, all the same, "Phooey to you."

****

This weeks brain wave—
"Of all the poets that line the wall
The curling poet is worst of all."

****

The saying "that is not cricket" does not mean a thing to some skips, at that some of the scores this week looked like cricket games.

****

Editing this column without ruffling somebody's feelings is like fishing without a hook on your line. Lots of recreation, but no result.

First Things First

In this, the first month of the year we are tempted to think of first things, how important they are and what they mean to us.

In the realm of economic affairs, attending to first things first often result in future well being.

If we take the general rule of life a man's first duty is to his family, his home and all it stands for. But he has other duties and responsibilities which can perhaps be listed in their order of importance. Commencing with his family there is next in order his community, his home town, his province, his country

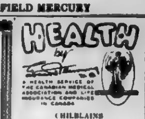
There are of course many things he cannot get from his own farm, the statement equally applies to his home town, but as far as possible his best interests are served by first building up his own place and then spreading out in the order named.

Many small towns which cater to the needs of the surrounding country have established in them a local newspaper. Often unpretentious and with no desire to "set the world on fire," yet it fills a niche in community life that would be lacking if it were not published. Essentially local, it should appeal to the residents of a town and district as one thing wholly theirs. As far as it is able it looks to their interest, gives them service and lets the rest of the world go by. There is no suggestion that you cease to enlarge your outlook or that you narrow your field of reading, but with your feet solidly on the ground in your own district you are better able to withstand the stress that comes from without

Your local paper, The Tofield Mercury, has been published at Tofield for the past seventeen years, some of which have been fairly prosperous and others quite lean. But through them all, the original policy of publishing a paper in and for the Tofield district has been maintained. Uninfluenced by passing provincial movements, opportunity of gain notwithstanding, its editorials are based on the desire to help the district as a whole rather then immediate profit to itself.

The cost of your home paper is small, $2.00 per year, 4c per week. May we solicit your renewal and your influence upon others to subscribe.

THE MERCURY



HEALTH
by
A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

CHILBLAINS

A purplish tinge to the skin with intense itching of the part, followed by a blister with severe pain, the blister breaking down later into an open sore which is slow to heal—that is a chilblain.

Chilblains do not endanger life but they destroy happiness and may even ruin tempers at Christmas time. The feet suffer most frequently; often the hands are affected and sometimes the ears. Chilblains happen as a result of poor circulation in the parts affected.

Children who are in poor health are frequent victims. This may be due to defective circulation which accompanies a low standard of nutrition and vitality.

The floors of stove-heated houses are usually cold. This is particularly true of the kitchen which has no cellar or an unheated cellar beneath it. The housewife who spends much of her time standing on cold floors is likely to have chilblains.

Tight shoes and tight stockings interfere with the circulation in the feet and so predispose to chilblains. Thin shoes and stockings which allow the feet to become chilled do the same thing. It is just as bad if the feet and hands are dressed too warmly for then they perspire excessively and later become chilled.

Enough has been said to indicate the lines of prevention. To begin with, general attention must be given to the health of the body. Next comes clothing suited to the temperature, rather than the season. Tight shoes and stockings are to be avoided, and round garters should not be worn as they may interfere with the circulation. Woolen gloves may not be in style but they may still be needed to keep hands warm.

The wrong way to treat cold hands and feet is to hold them close to the fire or heater. To do so causes a sudden rush of blood into the parts and this engorgement with blood is undesirable in those who are predisposed to chilblains.

The right way is to take off the shoes or gloves, bathe the feet or hands in cool water and follow this with a good brisk rub, using a rough bath towel. In this way, the circulation is improved, the extremities are made to feel comfortable and no harm is done. People who are subject to Chilblains must not rush to the fireplace or stove when they come in cold. They must keep their cold hands and feet away from the heat.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

DOMINION EXPERIMENTAL STATION, LACOMBE, WEEKLY NEWS LETTER

Pork Production Cost Estimated

How much does it cost to produce a two hundred pound marketable hog?" This question has been asked thousands of times during the past few years by farmers who want to know how much they may expect to gain by marketing their grain via the hog route.

The quality of the grain fed, the nature and quantity of supplements used, and the methods of feeding and management all exert a considerable influence on the grain requirement. However, from extensive data secured at the Dominion Experimental Station, Lacombe, where a great deal of experimental work on practical hog feeding has been conducted, it would appear that the average grain requirement to produce a two hundred pound pig in Central Alberta is about nine hundred pounds.

The Lacombe Station recommends that the weanling pig be started off on a meal mixture consisting of two parts of oats and one of barley or wheat, and that as the feeding period advances the mixture be gradually changed to one part of oats and three parts of barley or wheat. Using this as a basis, approximately two-thirds of the total grain fed would be barley or wheat, and one-third would be oats. Applying these proportions to the grain requirement of 900 pounds one finds that this quantity represents approximately 12½ bushels of barley or 10 bushels of wheat, and 9 bushels of oats

By multiplying these figures by the current market prices of the different grains and adding the resulting products one may arrive at the

Financial Genius

"Dad, it says here that a certain man was a *financial genius* What does that mean?"

"That he could earn money more quickly than his family could spend it."—Whitely Seaside Chronicle.

A MESSAGE FROM A. L. SEARLE, PRES. SEARLE GRAIN CO.

As the great depression has gradually unfolded itself, and difficulties have succeeded each other, and have weighed heavily upon all groups and classes of people in every nation. Together with others, our Western Canadian farmers have been called upon to endure their full share of these trials.

A short time ago extremely low prices made abundant crops unprofitable and farm incomes small. Then as prices rose, grasshoppers, drought, frost and this year the dreaded rust so reduced yields that again total incomes for many have been disastrously low.

At this time another serious difficulty is revealing itself that the millers and bakers of the world are using substantially less Canadian wheat and flour in their mix than they previously were accustomed to do—they have learned to substitute cheaper Foreign wheats for the more expensive Manitobas. Some observers have expressed the opinion that the large Overseas markets Canada once enjoyed for her wheat are permanently lost and that nothing remains for us in the West but to reduce our acreage in accordance with our present low level of sales. Others go even further, and tell us that the policies of "Nationalism" and "Self-sufficiency" or the determination of each country to produce all its own foodstuffs, and to manufacture all its own goods, will tend to increase, and that in consequence our sales of wheat—hence its production and consequently the amount of farm income—will decrease even to lower levels than the present entirely too low scale.

For myself I do not share these doleful views, for I have noted through a long life that whenever conditions suddenly "boom" or become substantially better than what might be termed the normal, worldwide forces set themselves at work to make corrections and adjustments. I have also observed that whenever conditions become depressed below the normal, that similar forces tend gradually to restore the welfare of the people affected. My friends will remember, for instance, that at the depth of the low prices I drew attention to the workings of these forces, and I thought then that the opinion was justified that prices would rise at least to pre-War levels.—At this moment this is approximately where they rest.— During the drought years I also ventured the thought that normal rains would once more occur, as they had done in the past, bringing with them generous crops. This hope was fulfilled last summer in most areas—but rust unfortunately over a large area destroyed the splendid crops that the rainfall and the soil had produced. — Happily, scientists now tell us that losses from rust will in a few years be a thing of the past

Noting the corrections and adjustments of low price levels, of drought and of other factors, that even in the past have taken place, emboldens me to believe firmly that forces are even now at work in the world that will restore eventually to Canada most, if not all, of the great wheat markets she once enjoyed.

One such force that at this moment is working in our favor is that Canadian wheat is now being offered freely at competitive prices on the markets of the world. This means that because of its superior quality our wheat should be eagerly purchased: this in turn emphasizes the extreme importance not only of maintaining, but of endeavouring to improve the present high quality of Canadian wheat.

Another force in which I have strong faith is the radio and other improved methods of communication are making us all realize that millions of people in the world are actually in need of more food. The League of Nations, for instance, tells us that untold millions of human beings, even in our western civilization, are underfed and undernourished. I have always found that the deep sympathetic instincts which arise in the hearts of people for those who are suffering, persuades governments, in the end, to devise ways and means to alleviate the distress. Therefore I feel sure that somehow, eventually methods will be devised to transfer the necessary foodstuffs from countries and areas that can produce them cheaply to those people in other parts of the world that need food so badly.

These are some of the reasons that prompt me, in wishing the many friends of our company a Happy New Year, to believe confidently that conditions in Western Canada will continue to improve and that the sales of Canadian wheat will increase, certainly that sales for the present crop year will be substantially greater than they were for the last—all consequently tending to improve farm incomes

Many years ago I felt strongly that the future of Western Canada would be a prosperous one. Some of this prosperity has already been enjoyed. In spite of the present serious difficulties I still today hold the same high hopes for the future of the West.

Saving Trouble

Mr. Parrott wanted the picture hung to the right of the mirror; Mrs. Parrott wanted it hung to the left. For once he proved the victor, and Joseph, the caretaker, was summoned to hang the picture according to his orders.

Obediently Joseph drove in a nail on the right, as directed. This done, he also drove one in the wall on the left.

"What is the second nail for?" Mr. Parrott demanded.

"It's to save me the trouble of fetching the ladder tomorrow when you come round to the missus's way of thinking," said Joseph.—Birmingham (Eng.) Weekly Post.

A writer says no man should marry a woman unless he likes her cooking. In fact it ought to be a case of love at first bite.—Charivari.

No money required!

Under our Flour Exchange System you don't need money. Just bring your wheat to our elevator and take home a load of high grade flour. It costs less.

AMERICA'S VIEWS ON WAR—

ABOUT TWO months ago a very popular American comedian, broadcasting a regular Sunday evening programme sang some lines that found immediate responce in the hearts of the audience. We cannot quote the lines but the tenor of them was, that European nations could fight if they wished to but America intended staying out of the fracas and had no intention of participating in a war "over there." Generally speaking, a comedian's song is simply a comedian's song, nothing more and should it touch upon anyone of a hundred or more every day subjects, it is to raise a laugh and be forgotten. But this song did more. It expressed a feeling, perhaps previously unexpressed, that lay in the heart of the large theatre audience listening to him. For as soon as the theme of the song became known, and before it was finished, irrepressible applause broke out, followed by quite an outburst at the ending. It was easy to see how a representative group of American people felt about that, and remembering that a vast number of others were listening and probably felt the same way, leaves no doubt that the American people have definitely turned their faces against any participation in an European war.

It is quite a step from a comedian's song to the President's New Year Message, but here again the same note was struck just as vigorously and met with just as hearty a responce. The President not only advocates non-participation in any European wars but suggests that America adopts a policy of supplying only normal every day needs to beligerant countries. He draws attention to the "neighborliness" of the entire American continent as against the warlike tendencies of the European continent.

This message to congress will have a profound impression upon the world. It will be remembered that during the Great War, America supplied billions of dollars worth of materials, as well as participating in the war itself. It entered the war a debtor nation to Europe and emerged from the war a creditor nation. Perhaps, as regards monetary profit, though much of it still has to be paid, the United States profited more by the war than any other single nation. But even so its heart and hand is definitely set against participation in European conflicts.

The average European is raised in an atmosphere of military and naval activity. From the time he is first able to walk about and observe things, all through his life he sees soldiers, sailors, motor transports, battleships, aeroplanes, and these things become a part of his existence. History teaches him that from time to time war has broken out and he to a large extent assumes that war is inevitable. He desires peace even as much as the average American desires peace. He has learned from experience that wars are costly to victor and vanquished, but how to escape the consequences of previous conflicts without engaging in another one is hard for him to understand. He has been raised in a belief that there are some things more important than even life and death.

President Roosevelt's New Year Message will give Europeans meaty food for thought. They will reason if one large continent can live and do business in the spirit of good neighbors, why can't another. Europe has never been slow in adopting American ingenuity to their special needs and there is good reason to believe the definite stand taken against war by the President of the United States and the American people will do more to bring about peace in Europe then any amount of moralizing or preaching could do.

There are only so many nations in the world and if one block of them continue to waste their material benifits in fighting it means that the block of nations that do not will outstrip them in all of those things that go to making a high standard of living.

The President's message was clear-cut and to the point. In order that our readers who have not read it in full may grasp its significance we append a portion of it below:

> "This policy of the good neighbor among the Americas is no longer a hope—no longer an objective remaining to be accomplished—it is a fact, active, present, pertinent and effective. In this achievement, every American nation takes an understanding part. There is neither war, rumor of war, nor desire for war. The inhabitants of this vast area, two hundred and fifty million strong, spreading more than eight thousand miles from the Arctic to the Antarctic, believe in, and propose to follow, the policy of the good neighbor; they wish with all their heart that the rest of the world might do likewise."

THE COUNTRY DOCTOR—

On January 4th, from Amerstburg, Ontario, comes a dispatch relating to a country doctor, who rose from a sick bed to make his round of calls and having made them, died at his home shortly after.

The position of a country doctor carries with it great responsibilities. Unlike his city brethren, who quite often have duties arduous enough, he stands alone as advisor to men and women and often saviour of their physical bodies. Seated at his desk in a well appointed office a country doctor can work with ease and comfort, but this is only half of the story. Sickness is no respector of time or place and quite often in the middle of the night with wintry conditions prevailing an urgent call comes which only duty demands that it be answered forthwith. Nowadays when so much travel is done by auto the country doctor's driving difficulties are different to what they used to be. Even now in midwinter an automobile is a mixed blessing as the condition of some roads make it impossible to drive automobiles over them. Consequently on a stormy night a doctor may start out in answer to a call and meet many unforseen difficulties before arriving at his destination. Prior to the days of the automobile, the horse and cutter was in general use. The writer has personally seen in southern Saskatchewan a doctor start out with rearing horses into the very teeth of a blizzard to render succor to a farmer's wife ten or twelve miles away. Using roads was out of the question the railroad track being the only way the journey could be made. How he got to his destination is something of a mystery, but having arrived, fought death all night—and won—and then the storm having ceased, had to battle huge snow drifts to get back. It was not money, it was not even professional pride that made this country doctor make this journey, it was plain duty and a sense of responsibility. This incident could be multiplied by hundreds with varying features, hardly a single country doctor at one time or another not having had to battle almost superhuman odds to reach his patient and then have to commence another kind of battle when his patient was reached. There have been many things that have gone into the building up of the prairie west, many of them highly praiseworthy, but the everyday work of the average country doctor is an example of devotion to duty in the face of great difficulties.

PROSPECTS FOR THE NEW YEAR

The past year has been an ill-omened one for wheat exporting countries insofar as the volume of production is concerned. However, the catastrophes which affected growing crops in North America depreciating the prospective volume by at least 40 per cent—possibly more—and which cut Argentina's crop by at least a hundred million bushels, resulted in a more favorable world statistical position for wheat. But the persistency with which Europe has followed its policy of self-sufficiency has resulted in a lower volume of world trade and a decided lessoning of the effect created by the lower production in exporting countries.

For the first twenty weeks of the crop year (August 1 to December 16) world wheat trade has totalled 180 million bushels. For the first twenty weeks of the 1934-35 crop year world trade was 207½ million bushels. Last year's exports were thought to be low but so far this year the volume is still lower. Unless there is a decided change over the remaining 32 weeks, world shipments will be below the low level of last year which totalled only 527 million bushels.

The following table of volume of wheat entering into international trade covering an 11-year period shows the low level to which wheat exportation has fallen of late years.

1924-25	772 million bushels.
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]
1930-31	834
1931-32	792
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]
1935-36	540 (estimated)

The above table shows more effectively than pages of words what has happened to the world wheat trade. It will be noted that while the figure of 540 million bushels is given for this crops year's exports, this is but an estimate made by Mr. Broomhall. If the rate of exportations do not increase above the figures shown by the first 20 weeks, the total will have difficulty in reaching 500 million bushels

Of course most authorities think that there is bound to be a big revival of world trade very soon, particularly in view of the change in the attitude of Argentina. There has been a tendency of importers in Europe to hold off buying with the hope that a free selling Argentinian policy would reduce prices. With that hope removed the attitude of these people may change quickly.

To be candid, all predictions and forecasts regarding the world wheat situation are pretty much a matter of guess work. Statistics even from the best sources cannot be positively correct. No one can foretell what the weather will be except for a few days in the future. Who can forecast with any degree of accuracy future political events or future wars? And all these factors as well as many others form part of a great composite picture commonly called "the wheat situation."

It is likely that a big dent will be made in the world carryover before next July 31st, in fact the figure may be down to what is considered normal (500 to 600 million bushels) by that time. Towards the end of the famous depression of the 1890's a couple of small world wheat crops restored the unequilibrium and brought a restoration to the wheat trade and wheat values. That may possibly occur again. But then war clouds were not nearly so ominous over Europe and the Orient as they are today, neither were the great world nations so obsessed with self-sufficiency policies. At the present time Europe is in a menacing position with war liable to break forth at a moment's notice and it is doubtful if any war could be localized at the present time. With this in prospect European countries will not for a minute relax their efforts to be self contained and principally in the production of wheat

There are people who think that the days of lush production and export of wheat and other food products from the newer countries of the world are gone. Among these is Sir Francis Floud, British trade commissioner to Canada, as well as quite a number of other well informed men. If their arguments are true the world wheat problem has not reached its critical stage even as yet. The law of averages suggests that North America in 1936 will not have another crop failure similar to the ones in 1935 and 1934. Argentina is hardly likely to have drouth two years in succession. If Canada, United States and Argentina produce average crops next year and Europe does the same the competition for markets will be terrific. However, all this is conjecture and can be considered only as a possibility.

Canada enters the New Year with around 250 million bushels of wheat available for export or carry-over. The Federal Bureau of Statistics figured the total supplies at August 1st at 477 million. Deducting therefrom domestic requirements of 112 million bushels and exports from August to November of 102½ million bushels left something like 262 and a half million bushels total as at December 1st. Exports for the month should be at least 12 and one half million bushels which leaves 250 million at the end of the year. Broomhall's estimate of Canada's share in world trade for the 52 weeks at 264 million bushels. If this is carried out Canada should have a carryover at the end of the year of around 90 million bushels.

The best that can be said of the whole situation is that the prospect is for much reduced world carry-over as well as reduced Canadian carry-over at the end of the crop year. It is to be hoped that there will be a decided enlargement of world trade as a result of the better balance. If this does not eventuate serious results are bound to ensue in wheat exporting countries.

Brittannia rules the waves; Mussolini waives the rules. —Washington Herald.

WHEAT AS FEED FOR LIVE STOCK

(Experimental Farms Note)

The year 1935 will be remembered as a very disappointing year. As a result of rust, frost and hail, yields of all grains were very much reduced and much of the wheat is of very low grade. Prices for this low grade wheat are so extremely low that, where possible, farmers will be wise to find some other method of marketing than through the elevators.

Wheat of good quality is a valuable feed for fattening purposes but low grade shrunken wheat because it is [illegible] that plump wheat has a tendency to produce growth rather than a fatter live stock. For this reason although it is a particularly good feed for young stock and milch cows, [illegible] shrunken wheat fed as the sole grain is not a good feed for finishing market animals.

Wheat that is badly shrunken is lacking in the starch necessary for producing fat and if barley of reasonably good quality is mixed with it the feeding value of the ration will be increased. Much of the 1935 grown oats and barley will contain a higher percentage of hull than usual and as wheat fed alone often forms a pasty [illegible] oats and barley would tend to [illegible] the "[illegible]" tendency of the wheat. For good results any grain should be mixed with at least one other grain and this is especially true of shrunken wheat.

Wheat may be fed [illegible] results [illegible] should be ground coarsely or rolled for cattle, hogs and horses. Sheep apparently do [illegible] as well on whole wheat as on [illegible] wheat.

In a [illegible] at the [illegible] Experimental Station, Lacombe, Alberta, [illegible] relative to the feeding and hog market value of frozen wheat, it was found that frozen wheat, when marketed through hogs selling at $7 per hundred, live weight, realized eighty-two cents a bushel.

AMISK CREEK

(Continued from front page)

spent his holidays with his parents here.

Mr. A. Erickson visited with Mr. and Mrs. J. Holtie near Camrose the week end between Christmas and New Year.

The flu has been visiting several houses around here lately. The last victims are Mrs. Moen and Edna and Mrs. Berg. We are glad to report that they are on the mend.

Misses Borst and Alfrieda Berild, who are attending school, Berild attending normal in Camrose and Alfrieda taking high school in Ryley, were both home for the Christmas holidays. Pearl Patterson who attends high school in Ryley also, spent Christmas at her home.

Thora Haugen, who attends college and Agnes Annabo who is working in Camrose were both home for the holidays.

Mrs. K. Olson who has been visiting in Edmonton for some time returned home just before the New Year.

Mr. and Mrs. R. O. Berg and family, Mrs. J. Anderson, Mrs. P. O. Flaaten, Nora and Gordon Sand were all guests at the A. Patterson home Sunday evening before the New Year.

The R. O. Berg and I. C. Olson families were guests at the E. A. Moen home on New Year's Day.

Mrs. P. O. Flaaten, Nora and Gordon Sand, Eric Lekues and Olaf Stokkan were guests for dinner at the Haugen home New Year's Day.

Mr. and Mrs. I. C. Olson entertained the young people at a social on New Year's evening. A large crowd was present and all report a very enjoyable time.

Florence and Margaret Mellee of Edmonton were home with their parents for Christmas.

Those visiting the city lately are Hazel Hillerud, Doris Glasinger and Mr. E. A. Moen.

Arnold Berg is assisting with the chores at the E. A. Moen place.

The R. O. Berg family and Mrs. J. Anderson were guests at the Berild home in the evening of January 1st.

Lily Berg who is attending the university left after spending the Christmas holidays at her parents home.

R. O. Berg and family and Mrs. J. Anderson were dinner guests at the A. Thorslie home Thursday of last week

School reopened after the holidays on Monday. Miss Doris Glasinger is the teacher.

ADDITIONAL LOCALS

After a short recess during Christmas week the Jolly Twelve bridge club resumed play on Wednesday evening at the home of Mrs. E. Rogers.

Mr. and Mrs. Duckfield left at the first of the week for Wainwright where they will make their home.

Miss Lois Thompson is home for a short time, she had been working in Camrose.

Miss Betsy Ness spent Christmas at her home in Tofield.

Mr. and Mrs. Stan. Yakabuski spent a few days in Edmonton.

Mr. and Mrs. Bert Lovell spent New Years in Edmonton.

In mentioning the play "You Wouldn't Fool Me" we omitted to make mention of the numbers put on between the acts. Solos were rendered by Mrs. L. W. Smith and Mr. Cowell. Miss Jean McLeod gave a few readings all of which were greatly enjoyed. Rev. D. K. Allen acted as chairman.

On Tuesday evening Muriel Malcolm entertained a few friends of Bill Robinson. Bill left on Wednesday for Vegreville where he will work in the bank of Montreal there.

The Annual meeting of the United Church, Tofield and district, will be held on Friday, January 17th, at 8 p.m. in Tofield.

This is an interesting gathering and a good attendance is hoped for. There will be a social half hour at the close.

May I, on behalf of the 1st Tofield Troops of Boy Scouts thank all those who so generously donated toys to the toy-repair shop and in doing so made many kiddies happy. Thank you.

Rev. A. Wallis,
Scoutmaster

RELIEF BURDEN HEAVY IN B.C.

VICTORIA, Jan. 6.— The British Columbia government's survey of persons on relief shows that more than 2,000 families have been on relief in the province for five years and more than 9,000 families for four years.

Out of 36,676 heads of families and single adult persons, 19,008 have not had any kind of employment since they first applied for relief. Of this same total 11,422 or more than 40 per cent are persons more than 50 years old. Dependent on the 36,676 persons listed are 12,772 wives, 14,747 sons, 14,906 daughters and 1,094 others, a total of 43,539 dependents.

The survey is said to be the most extensive of its kind ever carried out in Canada and similar to one planned for all Canada.

PROSPERITY RETURNS FOR VICTORIA MAN

VICTORIA, Jan. 8.—Prosperity isn't around the corner, it's here, at least for one Victoria caterer, Fred Seale, who wiped off all debts due him on New Year's Eve, closed up his place for a month and went on a holiday with his better half. Fred's debtors owed him a dollar and sixty-five cents.

Back to Doughty Street

By P.P.S. in The Christian Science Monitor

Preparations in London for the centenary celebration of the appearance of "Samuel Pickwick, Esquire, founder and president of the Pickwick Club," recall with increasing admiration the remarkable worldwide acceptance of that fiction character and his imaginary associates, as persons who have lived and left their mark. Only the pen that turns such creatures of the fancy "to shapes, and gives to airy nothing a local habitation and a name," could influence the thousands upon thousands of Dickensians who are turning their thoughts toward Doughty Street exactly one hundred years after the famous Pickwickians assembled, for the start of their journeying, in the waiting room of the Golden Cross.

When critics of "Boz" have said their worst against his lack of restraint or technique, and the modernest analysts of prose have reduced the novel to a chemical formula, still the characters of Charles Dickens will go up and down the world. Still the forms of Little Nell, Poor Jo, David Copperfield, Mr. Micawber, Fagin, Sairey Gamp, and the hundreds of others, will roam the paths of memory, quick to come alive at the lightest reminiscent touch. There are Ruskin clubs and Browning clubs and Shakespearean societies, depending for their support largely on an intellectual class. But the branches of the Dickens Fellowship, having headquarters in the Doughty Street house, where most of "Pickwick" was written, and flourishing in all parts of the United Kingdom, Canada, Australia, New Zealand, Denmark, Argentina and the United States, embrace within their membership not only persons of pronounced literary taste, but also a host of individuals who claim only a deep affection for "Boz."

Morbid, lesser writers who feel that they must embitter their work with the gall that flavors their own cup of disillusionment, may draw a valuable lesson from the marked ability of Dickens to dissociate himself from his characters. It is not always appreciated that the author of three-and-twenty, who delineated with such charm the leisurely, frequently foolish, activities of the Pickwick Club, worked under an economic pressure which necessitated producing the monthly installments of the book, to a large extent between midnight and two or three in the morning. It is not always appreciated that the delightful scenes of family harmony, or rather conjugal felicity, to be found in his writings were not exactly the parallel of his own experience.

There is no need to seek for the one outstanding cause of the novelist's greatness, for that quality which has endeared him to rich and poor alike. It is his genuine love of humanity, his tender understanding regard for his fellow man. This unselfed interest in both his subjects and his readers guided his brilliant pen to the constructive end of wholesome entertainment plus improved methods in parliamentary elections, more merciful poor laws, and the growth of educational facilities for the common man. When he satirized religious pretense he did so, in his own words, merely "to protest against the coarse familiarity with sacred things which is busy on the lip, and idle in the heart; or against the confounding of Christianity with any class of persons who, in the words of Swift, have just enough religion to make them hate, and not enough to make them love, one another."

In his preface to "The Pickwick Papers" he summed up his purpose thus: "If any of his (the author's) imperfect descriptions, while they afford amusement in the perusal, should induce only one reader to think better of his fellowmen, and to look upon the brighter and more kindly side of human nature, he would indeed be proud and happy to have led to such a result."

Obituary

The funeral was held on Wednesday of Mrs. Wilson, well known and respected resident of this community. Service was held at the United Church, Rev. D. K. Allan assisted by Rev. A. Stuart officiating.

Mrs. Wilson who had reached the ripe age of 77 years was born in Peel county, Ontario and came to Alberta in 1909, settling in the Tofield district. She leaves to mourn her loss a loving husband and one son, Earl who resides in this district, also two sisters, Mrs. Calvert and Mrs. Funk both of Edmonton; also a number of other relatives and friends. There were many beautiful floral offerings testifying to the esteem in which the departed lady was held. Interment took place in the Tofield cemetery.

OSCAR ELMER WILLIAM ANDERSON

The death occurred at Ryley on Wednesday, January 14th, of Oscar Elmer William Anderson, age 20 yrs. 11 months, after a short illness. The departed young man was born at Edmonton, and has resided at Ryley since the age of one month. Since leaving school, which was all taken at Ryley, he has been assisting his father in his work and has ever been considerate of the needs of his father, mother, brothers and sisters. Being of a very amicable nature he found many friends and his departure will be keenly felt by the whole community as well as by the bereaved family. He leaves to mourn his loss, besides his mother and father, four sisters and three brothers. Agnes, Mrs. Elmer Lundin, Jenevra, Mrs. Oscar Knudslein, Ruth, Mrs. Roy Davick, Norman Arthur, Alfred Martin, Herbert James, all residing in Ryley and surrounding district.

The funeral services were held in the Lutheran church at Ryley, Rev. D. K. Allan officiating. The congregation which was quite large was very sympathetic and keenly felt the loss of a popular young man.

LOCAL AND PERSONAL

The Jolly Twelve Bridge club met at the McCauley home on Wednesday night, Marjory Stuart being the hostess. Honors for the evening went to Winnie Worton and Mrs. Thomas.

On Saturday evening last, Miss Jean McLeod entertained a number of friends at her home after skating. A lovely lunch was served of which the girls all partook very heartily.

On Wednesday evening Margaret and Jack Whyte entertained a number of friends after skating. Bridge and games were played after which a delicious lunch was enjoyed by the crowd.

Miss Florence Kendall of the telephone staff in Leduc is visiting at her home in Tofield.

We regret to report that Mrs. A. Innes is ill and hope that she will soon be up and around.

Rev. Stuart of Edmonton, a former minister of Tofield, officiated at the funeral of Mrs. Wilson here on Wednesday.

At an Executive meeting of the Young People's Union held in the Manse Monday, plans were made for a skating party on Monday January 20.

Arrangements for a debate with Viking Young People's Union to be held in the Tofield United Church on Friday January 24 were also made. The topic is "Resolved that the platform is more powerful than the press." Tofield debaters, Blake Clutterham and Faye Wilson, will support the negative.

The Annual meeting of the United Church, Tofield and district will be held on Friday, January 17th, at 8 p.m. in Tofield.

This is an interesting gathering and a good attendance is hoped for. There will be a social half hour at the close.

Mrs. Funk of Edmonton, sister of the late Mrs. Wilson suffered a stroke while attending the funeral service of her sister at Tofield on Wednesday. A doctor from Edmonton was called and he ordered her removal to an Edmonton hospital by ambulance. Latest reports are that the lady is in a critical condition

Tofield is represented at the Viking Bonspiel by a rink composed of the following curlers: Glenn Wood; P. Imler; Dr. Law; A. E. Calvert, skip. At time of writing they had done very well and were headed for the prizes.

BEHIND THE HOG

By A.B.C.

It's Ho! for the road in the summer
It's Ho! for the woods in the fall,
But we find our own rink in the winter
The friendliest spot of them all.

* * *

Next week two ladies' rinks hie themselves to the city to compete in the Edmonton Spiel. Mrs. Bruce and Mrs. Hammond will skip and each will have three willing helpers.

* * *

The men's club is going to have a local spiel in Feb. Better get in a little practice boys, as the outside rinks will be packed to the eyebrows.

* * *

Bert Calvert took a rink to Viking for the spiel, to date they have won three and lost one. They are in the semi finals of the King Edward Trophy. One more beefsteak and they should win the Grand Challenge

* * *

Our 2 bit schedule is going strong (by the way, have you put in your 2 Bits yet). Cricket scores are all the go. Will give you full results next week.

* * *

Let us shed a tear for "Ducky", Actor, Butcher, Curler and a Gentleman.

* * *

We noticed your old friend J.O.A.L. at the rink the other night, and he curled a good game to, (behind the glass).

* * *

This week's brain wave. Golden rule at the rink. Do others or they will do you.

* * *

There's a fellowship fostered by winter,
That the long evenings linger to prove,
There's a light on dear faces familiar
And a Tee if you just get the groove.
There are Melody makers in May Time,
Musicians that carol in June.
But the Skipper that bails out our curling,
Has the rottenist, hatefullist tune.

R. S. Law

Mr. Law, as President and General Manager of United Grain Growers Limited, is to take up his residence in Alberta within a few months.

The Board of Directors of the Company has decided to establish the office of the President and General Manager at its Calgary Office. That office has been in Winnipeg since 1917, when the Alberta Farmers' co-operative Elevator Company amalgamated with the Grain Growers' Grain Company to form the United Grain Growers Limited.

Although the Company operates extensively in all three prairie provinces the extent of its business is much larger in Alberta than in either Saskatchewan or Manitoba. That fact together with the importance of the Company's business at Vancouver, makes Calgary a suitable location for the office of the President and General Manager.

Roll call. Fact about some famous man born in February.

Even the frenzied activity around a fire produces its portion of humor. One earnest worker who worked on the pump for a long period of time without tiring, said: "Now if this was only beer!"

Fire in Sub-zero Weather

What came very close to being a serious conflagration occurred this Thursday morning at the office and home of Mr. C. Hammond. The alarm was sounded about 10.45 and in short order the fire brigade and willing citizens were on hand to put out the blaze if possible. Fortunately there was a good supply of water, a well and pump being quite close. The fire had eaten into the west wall and was working across between the floor to the east side. At one time it appeared as if the building was doomed but smart work on the part of the brigade under the direction of Mr. Hammond who is fire chief extinguished the fire before it burst through.

This is the first real test for the newly formed fire brigade and they acquitted themselves well. Assigned to a definite job, work went forward without a hitch. In fact it is not too much to say that their work saved the building. While scattered and in different occupations, with the equipment they were at the fire within five minutes of the alarm.

OVERTIME GAME RESULTS IN WIN FOR LOCALS

Holden and Tofield clashed in a fast game of hockey at the Tofield rink on Tuesday night. The hockey as a whole was not of as high a grade as has been played here this winter, the shooting particularly being rather wild. Even so there were enough direct shots and scrimmages to give both goalies anxious moments and both goalies showed class in the pinches.

Tofield opened the scoring early in the first period when Burnett obtained possession and gave Mohs no chance. This caused Holden to speed up the play and the two veterans of the Holden team, B. Hurum and A. Black combined for a score. A. Black being the marksman. After many end to end rushes, Bill McCauley scored on a well earned goal for Tofield, taking a pass from L. Glover and skating in, shot one ankle high into the corner of the net.

The second period was the best hockey of the night, Holden trying hard for the equalizer and Tofield while playing aggressive hockey putting up a stout defensive game. There was no score in the second period.

The third period had scarcely got going when A. Black came up from his own defence and scored on a nice shot from the wing. Later he repeated on a pass from Stuart. This put Holden ahead and Tofield put on pressure and in a scrimmage in and the Holden goal Worton got possession and rammed one home tieing up the score. The third period ended with the score tied.

In the ten minutes of overtime Tofield forced the play and with [illegible] B[illegible] was assist from Worton [illegible]. Holden tried desperately [illegible] the goal but were unable to make it before the bell rang. The final score was [illegible] in favor of Tofield.

J. J. (Bud) H[illegible] refereed the game.

"TO THE RATEPAYERS OF THE MUNICIPAL DISTRICT OF BEAVER LAKE NO. 486.—Would all ratepayers please [illegible] that seed [illegible] Secretary-Treasurer's office [illegible] there. These [illegible] and we are therefore asking you [illegible] require seed grain to call at the Secretary's office before January 31st, 1936."

First Things First

In this, the first month of the year we are tempted to think of first things, how important they are and what they mean to us

In the realm of economic affairs, attending to first things first often result in future well being.

If we take the general rule of life a man's first duty is to his family, his home and all it stands for. But he has other duties and responsibilities which can perhaps be listed in their order of importance. Commencing with his family there is next in order his community, his home town, his province, his country.

There are of course many things he cannot get from his own farm, the statement equally applies to his home town, but as far as possible his best interests are served by first building up his own place and then spreading out in the order named.

Many small towns which cater to the needs of the surrounding country have established in them a local newspaper. Often unpretentious and with no desire to "set the world on fire," yet it fills a niche in community life that would be lacking if it were not published. Essentially local, it should appeal to the residents of a town and district as one thing wholly theirs. As far as it is able it looks to their interest, gives them service and lets the rest of the world go by. There is no suggestion that you cease to enlarge your outlook or that you narrow your field of reading, but with your feet solidly on the ground in your own district you are better able to withstand the stress that comes from without.

Your local paper, The Tofield Mercury, has been published at Tofield for the past seventeen years, some of which have been fairly prosperous and others quite lean But through them all, the original policy of publishing a paper in and for the Tofield district has been maintained Uninfluenced by passing provincial movements, opportunity of gain notwithstanding, its editorials are based on the desire to help the district as a whole rather then immediate profit to itself

The cost of your home paper is small, $2.00 per year, 4c per week. May we solicit your renewal and your influence upon others to subscribe.

THE MERCURY

HEALTH
by
A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

MILK

Milk is such an excellent food that every reasonable precaution should be taken to have it pure and safe. Milk contains so many of the food essentials that it is almost a mixed diet in itself

Milk should form a large part of the diet right through childhood. The protein of milk is used to build new tissues, and there is no better source of calcium (lime) which is needed for growing bones and teeth

Milk is a desirable food at all ages. A pint of milk a day for each member of the family is a fair allowance. Milk is a food, not a beverage, although we receive it in liquid form. Milk is a cheap food, and it is poor economy to cut down on milk in planning the food budget.

Milk should come from healthy cows. It is obvious that a sick cow will not produce good milk. Furthermore there are certain diseases which may be spread from the cow to man. The more important of these diseases are bovine tuberculosis, septic sore throat and undulant fever.

Milk should be handled in a cleanly manner by healthy persons. Many of the dangerous disease germs may be spread by milk if milkers and others who handle milk are either diseased or careless. Impure milk is frequently responsible for disease germs gaining entrance into the human body

Milk can be made safe. Disease germs are destroyed by heat. Pasteurization makes milk safe because the temperature to which milk is raised during pasteurization will destroy any disease germs which may have gained entrance to the milk from the cow or after milking.

Pasteurized milk is safe milk and is the best kind to use. Where pasteurized milk cannot be bought, home pasteurization is possible, or the milk may be boiled or milk powder used. Raw milk should not be used in town, city or country because it is practically impossible to be sure of the day-by-day safety of raw milk supply.

Milk should be used freely by everyone, but only pure safe milk.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

FIVE-YEAR-OLD WHEAT POOL CLAIM

Edmonton Journal, Jan. 7th, 1936

The speech that Mr. Gardiner, the federal minister of agriculture, delivered in the Assiniboia campaign gave new hope to pool farmers who have been pressing for an additional payment on their 1930 crop. Their claim has been widely discussed. If it is granted, timely help will be afforded many wheat-growers whose returns from last year's operations have been small.

Just before the Dominion election was held, it was announced that this payment would be made. Critics of the Bennett government denounced the proposed transaction, decided upon with a new parliament about to be chosen, as an act of political indecency and equivalent to a bribe. The reply was that it was simply a measure of justice that was being undertaken as soon as the state of the wheat operations conducted by the government agency permitted.

Mr. Gardiner told his Assiniboia audience that the adjustment would be effected as quickly as possible. He related how in 1930-31 initial pool payments were lowered so that some received only 50 cents, others 55, some 60 and some more.

The plan, as the report of the speech ran, was to give everyone at least 60 cents. On July 31 Mr. McFarland put 76,000,000 bushels into a separate account and placed a value of 60¼ cents on it. This was the wheat on which an adjustment was to be made but apparently there had been an agreement on it between Mr. McFarland and the pools till eight days before the general election. The amount to be paid was $9,262,000 to make the average payment for the 76,000,000 bushels 60 cents a bushel. By order-in-council this was subject to certification by auditors. Auditors had been put to work and, as soon as they verified the matter, the money would be paid. In the event the auditors did not approve the payment, said Mr. Gardiner, "we will sit down with the wheat pool to get a proper agreement under which a proper amount can be paid."

The government cannot act too quickly in accordance with the promise of the minister. His language must be interpreted as recognition that the growers possess a sound claim, even though they may have some difficulty in making it good to the amount that was agreed upon by Mr. McFarland and the pools.

THE AGRICULTURAL ADJUSTMENT ACT

United States' President Roosevelt's contribution to the farm population of that country was this week declared unconstitutional by the Supreme Court 6 to 3 and turmoil in political and economic circles has developed as a result.

The AAA has been known in the United States as "the farmers' tariff." For generations U.S. farmers have protested against protection for industries through the erection of tariff walls while agriculture had to meet world prices. Past United States' governments erected high tariffs against imports of agricultural products from foreign countries. This did not relieve the price situation because the farmers there produced surpluses and the exportable volume had much to do in the determining of the domestic price.

The Roosevelt government followed a different line of action. Through the AAA it imposed processing tax on wheat, cotton, rice, tobacco, corn, hogs, sugar cane, sugar beets, jute, peanuts and rye. The money collected in these processing taxes totalled approximately a billion dollars a year. This was distributed to the primary producers upon their signing contracts to restrict production as decided upon by the AAA administration. This plan was calculated to balance production with effective demand and raise farm prices to a parity with other prices.

In the case of wheat a tax of around 30c a bushel was imposed and approximately one hundred million dollars raised which was distributed to wheat farmers who signed an AAA contract providing for the control of acreage.

The supreme court's decision held that the act interfered with state rights and was beyond the power of United States' Congress. It also held that the plan was "in itself not voluntary."

This decision destroys a very elaborate structure erected with great pains by the United States' government. It also leaves that government with an obligation to pay a billion dollars under the 1935 agreement and unable to collect that money by way of processing taxes. The government states the money will be paid out of the federal treasury.

A large percentage of the farmers involved are in favor of the AAA, a vote taken some months ago indicating this by at least six to one in support of the measure. However, the total of the vote was not large and opponents of the AAA claim government agents used undue influence to obtain the voting support.

The strongest opponents of the AAA were the processors and they have fought it tooth and nail. For instance, the Northwestern Miller, spokesman for a large number of flour millers, has carried the following paragraph on its editorial page ever since the AAA was put into force:

Remove The Wheat Tax

"Whether it is paid by the producer or by the consumer, whether it is a tax on productive labor or on hunger, the excise on bread now being collected is inequitable, unfair and a gross abuse of the taxing power granted to the federal government by the states. It is a heavy addition to the burden of millions who are struggling for means of existence and to doubtful or negative value to the chosen few whom it is proposed to benefit. It should be repealed."

HOW TO FEED PREGNANT SOWS

Two of the most vital points in hog raising are the feeding and management of the sow during pregnancy, as these factors exert a considerable influence on the size and vitality of the young pigs.

The Dominion Experimental Station, Lacombe, has found that a mixture of 200 lbs. ground oats and 100 lbs. ground barley or wheat is well adapted to meet the main requirements of the pregnant sow. However no grain mixture alone will supply enough protein and mineral matter to produce the proper development of bone and muscle in the unborn young without sapping the sow's system. To fill this need skimmilk or buttermilk should be fed as a supplement; or if neither of these is available tankage may be used, mixing five pounds in every hundred pounds of meal. Gilts carrying their first litters should receive at least eight per cent tankage.

It is well to supply the sow with sods, greenfeed and alfalfa meal or hay. Roots, too, are good, lightening up the ration and whetting the sow's appetite

To prevent hairlessness in the young, 1 ounce of potassium iodide should be dissolved in one gallon of water, and one tablespoon of this solution per sow added to the feed or drinking water once daily.

A mineral mixture consisting of 75 lbs. slaked coal, 20 lbs. common salt, 3 lbs. ground limestone and 1 lb. sulphur should be placed in a box or self-feeder where the sows have ready access to it.

In order to force them to take exercise, sows should be fed at some distance from the sleeping quarters. They should also be closely watched, and the ration regulated to keep them from becoming over-fat.

THE HAPPY FARMER

By Artemus Ward in The Alberta Wheat Pool Budget

The farmer leads no E Z life,
The C D sows will rot;
And when at E V rests from strife
His bones all A K lot.

In D D has to struggle hard
To E K living out;
If I C frosts do not retard
His crop, there'll B A drouth.

The hired L P has to pay
Are awful A Z too;
They C K rest when he's away,
Nor N E work will do.

Both N Z cannot make to meet,
And then for A D take
Some boarders who so R T eat
& E no money make.

Of little U C finds this life;
Sick in old A G lies;
The debts he O Z leaves his wife,
And then in P C dies.

"THE GRAIN FORUM" RADIO PROGRAMMES

"The Grain Forum" radio programme, which commenced over a net-work of Western stations on Friday, December 6th, is a half-hour feature sponsored by the Northwest Grain Dealers' Association and the Winnipeg Grain Exchange. It commences at 9:00 p.m. Central Standard Time and 8:00 p.m. Mountain Standard Time.

As its name implies, "The Grain Forum" is intended for the public discussion of matters of special interest to grain producers. Thus in the series to date, brief talks have been given and questions invited on the following subjects: "The World's Foodstuffs and the Place Occupied by Wheat" and "The Winnipeg Grain Exchange, What it does." On Friday January 10, the subject of the talk will be: "What the Winnipeg Grain Exchange Does Not Do," and this will be followed on Friday, January 17th, by a talk on: "The Factors that Govern and Influence the Price of Wheat." Later in the series, another interesting subject will be discussed, namely: "Canada and Her Competitors."

There is, of course, the danger of a radio programme developing into a one-way affair, but the idea of this particular "Grain Forum" is that producers and all others interested should be represented in the discussions. Therefore questions relating to all grain problems, or to the subjects covered in the radio talks, are invited from listeners-in, and it is the intention to deal with these questions, so far as possible, over the air. All enquiries, in any event are answered by mail.

But this does not cover all the radio activities of the "Grain Forum" for pleasing and popular music is an essential part of the programme.

One other feature should not be overlooked. A special competition is now under way for bona fide growers of grain or members of their families, who are asked to submit ten-minute manuscript speeches on either of the following subjects: "Some Major Problems in Grain Growing" or, "Some Major Problems in Grain Marketing." Valuable cash prizes are to be awarded, fifteen in number, for the winning entries, and it is to be noted that free expression of opinion is welcomed and will not affect the opportunity of winning a prize. One of the winning contestants will be invited to Winnipeg as the guest of the sponsors of the "Grain Forum."

"The Grain Forum" welcomes constructive criticism and anyone who listens on Friday evening from 9:00 to 9:30 p.m. Central Standard Time (8:00 to 8:30 p.m. Mountain Standard Time) can thereafter consider himself or herself enrolled as a "candid critic" for the "Grain Forum" is anxious to receive comment from its already extensive and steadily growing radio audience.

CANADIAN BACON WINS [illegible]ISH HONORS

Winnipeg, Man., January 13.—At the 57th Annual Dairy Show held under the auspices of the British Dairy Farmers' Association at the Royal Agricultural Hall, Islington, North London, Canadian bacon won first and second prizes in the competition for bacon produced within the British Empire. There was a total attendance of 40,864, states the Agricultural Department of the Canadian National Railways, during the four days of the show and a considerable number of inquiries were received from individuals and firms in connection with the Canadian exhibits, which included along with dairy equipment, for which a number of orders were received, chilled poultry, butter, eggs, bacon and hams, milk powder, cheese and jelly powder.

GIVERS AND TAKERS—

SOME FEW months ago an article appeared in a popular American magazine relating to the experiences of a man who had won an Irish sweepstake. The amount of money won and collected was between fifty and sixty thousand dollars. Prior to winning this amount the man was a master painter earning on an average about six dollars per day. Six months after he had received his money he was back at work depending upon his wages for his living. The story appeared genuine, it certainly was natural and explained with some wealth of detail, including a financial statement, where the money went. There was a significant statement which said that mankind in general was divided into two classes — the givers and the takers. He had proved himself a good giver among a number of takers with the result that his monetary prize had just melted away.

The same idea was expressed recently at Edmonton when Howard Scott, chief of technocrats gave a lecture there. His words were, roughly, there are two classes of people, the chiselers and the chiseled, and it is the ambition of all those chiseled in turn to become chiselers.

There may be exaggeration in the above paragraphs but there is also no small degree of truth.

The art or quality of taking is a natural one and for that matter so is the art or quality of giving, but despite the fact that we are told "it is more blessed to give than receive," through most people's lives the greater emphasis is placed upon receiving. To a very large extent our manner of life precludes this. The man who is not successful as regards obtaining for himself a fair amount of material benefits, is not a very important individual among men of affairs even though quite worthy. Contrary to this the man who has surrounuded himself with material things, has his opinion often quoted and creates quite a stir in circles other than his own. In other words the world admires the successful man and ignores the unsuccessful one.

A large number of civilized or perhaps we could say mechanized countries are undergoing a period of distress. The causes are manifold and perhaps in escence is simply the desire of some men to forge ahead of their fellows, and having forged ahead to maintain that lead. Thus we find executives drawing large salaries and workmen small ones. To immediately blame the executive is not wise for if we examined things closely enough we would find the workman as jealously guarding his position against outsiders as the executive is guarding his against the workmen.

Mechanical invention plus financial navigation have brought about a peculiar condition of affairs. Due to mass production by machines many individuals who would and could be absorbed in industry simply find no place for them. If the machines of any given country can produce more than the needs of the people with only a portion of the population employed, two separate classes are going to develop. Those who have a job and those who have not. In the United States it is beginning to be realized that a large proportion of the young men and women who graduated from high schools and colleges between the years 1929 and 1934 are something in the nature of a lost generation. They are now too old to take real junior positions and not trained sufficiently to take senior ones. What to do with them is something of a problem. If this division of society is to take place, if it already has not done so, it would appear as if there is going to be a perpetual class "that have" and another that "have not." The dictates of common humanity demand that those who through lack of opportunity "have not" be supplied with means of existence by those "that have." This is exactly what we are doing now in a haphazard manner through relief systems, but the spread between what a person on relief receives and say a machine operator is too great; and there is another spread between the machine operator and the executive. It is unlikely that there will ever be a levelling off of income, even where this has been attempted it has not proved a success, but it is possible that some time in the future it will be found that the simplest and fairest way of taking care of citizens denied access to industry will be for the state to pay a "dividend" to each and every bonafide citizen. The money will have to be collected from the public in the form of an income tax. In other words due to the shortage of jobs and the abundance of men and women, those who work will be called upon to pay a certain percentage of their income for the upkeep of those who do not.

Thus we would come to a stage where the "takers" of present so-called society would be compelled by law to become "givers" and the "givers" of society would by law have an opportunity to "take."

LOVE'S LABOR LOST—

There is considerable appearing in the daily press these days about industrial codes and regulations pertaining to merchandising and other forms of specialized endeavor. We are wondering if the intensive study and midnight oil used in their preparation is not at least a little premature, and that the province of Alberta is still at heart purely a province of primary production.

Quite recently at the Tofield public school the teacher found the assignments of the day completed with some few minutes still to elapse before dismissal time. Wishing to be gracious and desiring to keep the children interested, the teacher gave the class the choice of deciding what they would do. The class expressed a desire to sing, to which the teacher replied; "Yes, that will do, what would you like to sing?" In unison and without a dissenting voice, the class replied "OLD FAITHFUL."

VANCOUVER TO CELEBRATE 50th YEAR

VANCOUVER, B. C.—Celebrating its fiftieth birthday in 1936, Vancouver is preparing a gigantic programme for the entertainment of the million tourists who are expected to participate in the festivities.

In its Golden Jubilee Year, Vancouver celebrates a half century of progress and development during which a little fireswept waterfront town climbed through its own ashes and charred debris to become Canada's third city and a leading world seaport. In elaborate models and pageantry will be shown it's emergence from obscurity to fame.

From May 24 to August 22, the spirit of carnival will reign supreme in a widely diversified programme. In a season of Mardi Gras — color, flowers, music, thrilling spectacles — there will be highlights worthy of world acclaim.

The fastest aircraft in the world will compete in the first trans-Canada air race, open to high speed aircrafts of all nations. Winners of the "Pot of Gold" race across Canada's rainbow trail will claim $25,000 prize money. It is the major feature of a week's air pageant, July 19-26.

It is expected that a huge airplane carrier and other naval craft will drop anchor in the harbor and an invitation to all countries will likely result in the greatest display of foreign capital ships in any Pacific port.

Depicting the inauguration of Canada's first coast to coast transportation system will be the re-capturing of the picture of Port Moody on that memorable day, July 4, 1886, when the first transcontinental train arrived. This event will be commemorated in Port Moody on July 3, with ceremonies typical of the period. A replica of the original train will have the same engineer, Billy Evans, in the cab.

Beautiful Stanley Park will provide the outdoor setting for many of the outstanding events, among them the impressive services of a four-day Diocesan Eucharistic Congress in June.

Focal point of a typical village in the park will be a great Indian Conclave Lodge, resplendent with totem carvings. Open for thirteen weeks, from May 30, this feature will mark the first opportunity for thousands to see British Columbia's coastal natives reliving the days of generations ago, plying their handicrafts, racing in war canoes, participating in their sensational and rhythmic interpretations of ancient ceremonials.

This park and other recreational centres will resound with the magnificent music of symphonic aggregations, concert orchestras, bands and choral groups, strolling troubadors and pierrots.

Vancouver sets a new record in dramatic achievement in the five-night production of "A Midsummer Night's Dream" in Stanley Park, in August. It will be the first Shakespearean play to be staged in North America on such a vast scale, in such a unique manner, in a purely natural setting. The grand musical picture of "Hiawatha's Wedding Feast" will also be presented in the park with incidental interpretations of the theme by dancers in Indian costume.

Home of champions, Vancouver will be the capital of the World of Sport next year. Every field of athletic endeavor, major or minor, amateur and professional will have a place on the calendar with world challenges and championships, special innovations celebrities.

CANADIAN FURS POPULAR IN [illegible]

Dame Fashion takes no account of climate, it would seem. Down in Brazil, in South America, which is primarily tropical and semi-tropical is the last place one would expect to find furs worn extensively, yet such is the case, with great partiality for silver fox. The furs are purchased through London, Antwerp and, to a lesser extent, New York, but are believed to be mostly of Canadian origin, according to the Industrial Department of the Canadian National Railways. Other types of fox and marten and mink are also popular in Brazil, although not in the same degree, with a small following of beaver, muskrat and dyed furs.

When the first-grade teacher began to check records she found that little Alice was several months under school age, so the child was sent home.

"What is the matter?" asked the little girl's mother when the child returned. "What has happened?"

"I—I got laid off," sobbed the child.—Indianapolis News.

RAILROAD EXECUTIVE MADE TRIBAL CHIEF

Saskatoon, Sask. Jan. 13.—Reviving their age-old tribal rites for the first time in nearly a decade, a band of Sioux Indians in full ceremonial costume from the Moose Woods Indian Reserve invested S. J. Hungerford, President of the Canadian National Railways, as an honorary chief. Henceforth he will be known by all braves as "Chief Mighty Power." Since Mr. Hungerford's lengthy railway career has been associated with the Motive Power department for so many years, the title was appropriate. The ceremony was performed in the Bessborough immediately after the official opening of that hotel here.

Chief Tom Bear placed the headdress, emblematic of chieftainship, on the head of the railway president and covered his shoulders with a blanket as a symbol of admittance to the tribe. Through an interpreter the new chief thanked the braves for the honor and wished them good crops and success in their adopted mode of living.

Strangely enough the last similar ceremony was performed to initiate W. A. Kingsland, now Vice-President of the C.N.R., Toronto, when he was operating chief of the Western Region. First railwayman to be taken into the tribe was B. T. Chappel, now General Superintendent for the National System at Vancouver.

THE WARP AND WOOF OF DESTINY

Momentous decisions are made and drastic changes put into effect, sometimes without being very much apparent, yet, a system hoary with age is swept away. Such is the case with the decision of the National Government of China to do away with the silver monetary standard which has been in existence in that country for centuries. What hardly makes a ripple on the surface today some future historian will read into the record as a momentous change, yet hardly perceptible to the people of the time. And the immediate cause is a nation across the other side of the world, a mere infant compared with the years which the other counts up stretching back into the dim distant past. When the United States adopted its silver purchase policy in June 1934, those in authority in China began to realize that the days of its silver monetary standard were numbered and there are indications that the new monetary system will be based on the amount of fine gold that can be bought in London, England for roughly, 30 cents in Canadian money. And so a city that was once a Roman camp in the days of Julius Caesar on the banks of the Thames sets the monetary values for a country which even at that time boasted an ancient civilization. China has always been a heavy purchaser of silver, states the Industrial Department of the Canadian National Railways and had immense holdings. [illegible] are the warp and woof of destiny.

DOMINION EXPERIMENTAL STATION, LACOMBE, WEEKLY NEWS LETTER

Feed Values of Barleys Compared

A great many live stock men in the West appear to believe that Trebi is inferior to O.A.C. 21 as a feed barley. As Trebi is an exceptionally good yielder this is a vital point for the farmer who wants to make the greatest possible profit.

At Dominion Experimental Station, Lacombe, hogs which were allowed free access to two self-feeders containing O.A.C. 21 and the other Trebi barley chop consumed considerably more of the O.A.C. 21. The greater palatability would account for the belief that O.A.C. 21 has a higher feed value.

In another series of experiments conducted at Lacombe one lot of pigs was fed Trebi and a second lot O.A.C. 21. Slightly quicker and more economical gains were made by the Trebi-fed lot, thus proving that Trebi is at least the equal of O.A.C. 21 in feeding value. These results may appear a little odd, in view of the fact that the pigs prefer the O.A.C. 21, however it must be remembered that most children are none too fond of the porridge, although it is far better for them than the sweets which they prefer.

It has also been proven that when pigs have access to no other chop they will consume Trebi barley quite readily.

In view of the fact that Trebi yields from ten to fifteen bushels more per acre and is equal in feeding value to O.A.C. 21 it is quite evident that, for a farmer who feeds all his barley, Trebi is the more profitable to grow.

Well, He Should Know!

A builder, when called upon for a few remarks, modestly observed that he was "more fitted for the scaffold than for the speakers' platform."

WIT And WISDOM

Observant Salesman

"I want some collars for my husband," said the woman, "but I am afraid I have forgotten the size."

"Thirteen and a half, ma'am?" suggested the shop assistant.

LAKESHORE

Miss Della Fry of Edmonton has been visiting for the past week at the J. H. Johnston home.

Messrs. T. A. Jones, J. H. Graham and Grace Eaton made a trip to Edmonton Tuesday.

The Beaver Lake Mutual Telephone Co. held its annual meeting on Tuesday. With the exception [illegible] the officers and directors of last year were returned to office.

Mrs. Phillips entertained Mrs. Graham, Mrs. Wood and Mrs. Johnston on Tuesday afternoon. The usual game was indulged in resulting in a win for Mr. [illegible] but after the evening meal play was resumed and the tables were turned literally and figuratively and the championship is still up in the air.

Mrs. Graham is convalescing after a severe attack of the flu. Nurse Baptist was in attendance several days last week.

The annual school meeting was held on Saturday with an attendance of two at the appointed time. However one more ratepayer appeared somewhat later and as there was [illegible] the school thus giving a number sufficient to conduct the necessary business. J. D. Ferguson was the new trustee elected to fill the vacancy left by the retirement of Lloyd Wood.

More interest was taken in the annual meeting of the Ladies' Aid and Congregational meeting of the United Church which was held at the Murray home on Friday. Despite the cold there was a good attendance.

Wesley Moore is attending radio school in Edmonton this week.

LINDBROOK

The New Year came into Lindbrook very quietly, the "city" police having no need to lock up and nowhere to lock them so we're starting good and hope the year 1936 will prove as good as possible for us all.

Mr. and Mrs. Jas. Bracegirdle and family and Mrs. F. Evans motored down to Wainwright on New Year's eve to spend the holiday with their relatives and friends there. They were accompanied by Mr. and Mrs. E. W. Hooper of Lindbrook.

The annual meeting of the ratepayers of Lindbrook S. D. took place in the school here last Saturday Jan. 11th. Mr. Jas. Bracegirdle took the chair. The meeting was quite harmonious as it usually is here. Mr. F. [illegible] was elected trustee vice Mr. W. C. Lancaster retiring.

We regret to hear of the death of Mrs. J. Wilson sr. of Lindbrook who passed away Sat. 11th of January, at her home here. Deceased was an old timer of this district and well respected and liked by all who knew her. The sympathy of the district is extended to her husband and family in their sad loss.

Mrs. A. C. Scott of Lindbrook spent a few days this week visiting friends at Ardrossan.

Miss Irene Anderson spent a few days in the district last week visiting old friends before returning to Ryley where the family is living at present.

KETCHAMOOT

School re-opened on Monday Jan. 6, after a two weeks holiday. Miss Lindsay spent the holidays at the home of her parents at Innisfree.

Mr. and Mrs. Warner of Tofield and Mrs. Henderson visited Mrs. W. A. Mitchell at her home New Years Day.

Miss Alice Moen of Tofield spent a few days around New Years visiting Misses Gertie and Kathleen Ingram.

Telephone line 19 has been bought over by the mutual telephone company with Mr. Bill Stairs President, Lorne Lee secretary. Three families are having their telephone installed, these are Mrs. Davison, Mr. George Lawson and Mr. Whillans.

The Stirrett telephone line held their annual meeting at the Harrison home Friday afternoon of last week. After one year it has proved satisfactory and all obligations have been met with a surplus for the ensuing year.

Mr. Lewis Carlisle made a business trip to Wainwright the first of last week.

Mr. and Mrs. Sears and family, Messrs. Virk and Neder were New Years guests of Mr. and Mrs. C. A. Ingram.

The annual school meeting of the ratepayers was held at the school house Saturday afternoon, January 11. Only eight ratepayers were present. Mr. Jim Sutton, the retiring trustee was re-elected for three years, other two trustees are Roy Lee and John Brown.

Mr. and Mrs. Chas. Whillans were guests of Mr. and Mrs. Sears Thursday evening of last week.

We extend our sincere sympathy to the Wilson family in the loss of mother, who passed away at her home in the Lindbrook district after a lingering illness.

The professor of law had been talking steadily for more than an hour, and his class was becoming a trifle restless.

"Take any article for instance," he droned on. "When it is bought it goes to the buyer—"

"What about coal?" interposed a weary voice.

The professor gazed over his glasses at the interrupter.

"Well," he snapped, "what about it?"

"When coal's bought, doesn't it go to the cellar?" asked the youthful student.—Swift's Gold Leaflet.

THINK OTTAWA WILL AID IF ABERHART AGREEABLE TO LOAN COUNCIL PLANS

Alberta has $2,000,000 in obligations maturing Wednesday and the eyes of financial Canada are on the province as it wonders what steps will be taken to meet its obligations, as it is believed that the province will be unable to avoid default if unassisted.

Premier Aberhart said Monday the provincial government is resting its hopes on the expectation that the federal government will provide the $2,000,000.

And said the premier, the Alberta government has no idea as to where the money can be found if the dominion government does not provide it.

The pressing question was the subject of conversations Monday between Hon. Charles Cockcroft, provincial treasurer and Hon. Charles Dunning, minister of finance at Ottawa, and it is taken for granted that the province has sought dominion aid in meeting its obligations.

In Toronto, Mr. Aberhart said Mr. Cockcroft spoke to officials of the banks but obtained no agreement pending decision at the Ottawa conference.

No confirmation of the outcome of the provincial-dominion financial conference was available Monday according to a dispatch from the Journal's Ottawa correspondent.

The dispatch stated that it was believed generally, that the dominion would go to Alberta's rescue but this was not official and such action might be contingent upon Alberta's acceptance of the loan council proposition which would entail strict regulation of provincial borrowings. So far Premier Aberhart's attitude to the proposed loan council has been distinctly lukewarm.

Premier Aberhart Monday denied a report that R. J. Magor, special financial adviser to the government had advocated that Alberta deliberately cut off its own credit as a means of enforcing a policy of living within its own income for the next few years at least. Premier Aberhart said that Mr. Magor repeatedly advocated the meeting of all obligations in order to maintain the province's credit.

Eastern Canada has been keenly interested in Mr. Magor's activities of late. Recently Mr. Magor visited Toronto to interview bond men and large institutional investors to ascertain what concessions they were prepared to make on behalf of the Alberta government.

The $2,000,000 in debentures maturing Wednesday carry interest of six per cent and were issued in January 15, 1921. In addition, the province has another $3,200,000 in debentures maturing April 1 and $1,250,000 on November 1.

Authoritative circles in the east state that Mr. Magor will be able to report to Premier Aberhart that he "got an interested hearing but made little progress" during his Toronto visit.

According to the Financial Post, the province's creditors replied to Mr. Magor in the following terms:

1. How can concessions be made without the province first presenting a comprehensive survey of its position and evidence that all future Alberta governments will be able to stick to their share of any bargain that might be struck?

2. Is it not unreasonable to propose a scheme of refinancing on the basis of permanent depression for Alberta when it seems probable that the province will eventually have a return of prosperity?

3. Why pursue a scheme of debt adjustment for Alberta alone when dominion government authorities are working on the loan council scheme of financing to aid all four western provinces?

RUDYARD KIPLING IS SERIOUSLY ILL

London, Jan. 13. — Condition of Rudyard Kipling was stated to be "very grave" at 3:30 p.m. Monday. Kipling took a turn for the worse late in the afternoon.

London, Jan. 13.—Rudyard Kipling, 70-year-old bard of empire, became suddenly, seriously ill Monday and underwent an emergency operation in a London hospital for a gastric disorder.

The poet, who observed his birthday anniversary just two weeks ago, was stricken in a hotel suite and, in a semi-conscious condition, was taken in an ambulance to the hospital Monday.

First hospital announcement said "an urgent operation was performed." The noon bulletin said the patient was "going on as well as could be expected."

The operation, requiring almost two hours, was performed by Dr. Alfred E. Webb-Johnson, honorary surgeon of Middlesex hospital.

An assistant secretary of the hospital said:

"It was a very urgent, complicated operation, but the patients condition is fairly satisfactory now."

Mrs. Kipling accompanied her husband to the hospital, remained in an ante-room during the operation and returned later to the hotel.

A Vegreville constituency Social Credit Convention will be held at Vegreville on Monday evening, January 27th at 7:30 p.m. Those attending from Tofield will find it possible to travel to Ryley on Monday and from there take the train to Vegreville. The train leaves Vegreville Tuesday for Ryley.

FOR SALE OR TRADE—Seventeen pure bred Barred Rock pullets, now laying. Apply in first instance to Mercury Office, Tofield.

RAISE YOUR OWN BULL CALVES. Registered Shorthorn Cattle for sale. – Comprising a number of cows in calf to Viewfield General weighing over 2100; also a number of bull calves from the same sire. Ballcalves $15.00 and up.—Apply to J. Vaughlin, phone 209, Tofield.

CHRISTIAN SCIENCE

At all Christian Science Churches next Sunday, the subject of the Lesson-Sermon will be "Truth". The following is one of the Scriptural quotations contained in the Lesson-Sermon: "Study to shew thyself approved unto God, a workman that needeth not to be ashamed, rightly dividing the word of truth" (II Timothy 2:15). One of the correlative passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, is as follows (Preface viii): "The question, What is Truth, is answered by demonstration,—by healing both disease and sin; and this demonstration shows that Christian healing confers the most health and makes the best men."

"So your married life was very unhappy? What was the trouble? December married to May?"

"Lor' sake, no, mum! It was Labor Day wedded to the Day of Rest."

Empire Mourns Death of Beloved King

His Majesty King George V. King of Great Britain and the Dominions beyond the Seas, and Emperor of India, passed away at Sandringham Castle, in Norfolk, England, about midnight Greenwich mean time on Monday last (5 p.m. Tofield time), at the age of 70 years.

Early Tuesday morning H.R.H. Prince Edward VIII. took the Oath of Obedience before the Privy Council, immediately following the announcement of the death of his revered father, King George.

The death of our beloved monarch ensued as the result of complications which followed an attack of bronchitis and catarrh from which the King had been a sufferer during his later years. In 1928 and again in 1929, he suffered severe illnesses from throat and lung troubles brought on by catching cold during an Armistice Day celebration in London, but on each occasion made wonderful recoveries after being dangerously ill.

On Thursday last it was publicly announced that the King was suffering from a slight cold, and since his serious previous illnesses great precautions were taken to safeguard his health, which was showing strain following tension of state matters in the European situation due to the Italo-Ethiopian war.

With three court physicians in attendance on Friday January 17th, a serious turn developed, and the medical bulletin issued stated that although the bronchial catarrh from which the distinguished patient was suffering was not extremely severe, there were signs of heart weakness which were regarded with some disquiet. This bulletin was signed by the eminent doctors Sir Frederick Willans, Sir Stanley Hewitt and Lord Dawson of Penn.

The King spent a more restful night on Sunday, and early Monday, propped up in his bed, signed a document which appointed as Counsellors of State to assume most of his royal duties Her Majesty Queen Mary and his four royal sons, the Prince of Wales and the Dukes of York, Gloucester and Kent.

During Monday morning (Tofield time) it was announced that the patient's strength was diminishing, and in the middle of the afternoon news came over the wires that "the King's life is ebbing peacefully to its close."

During the passing away of his late Majesty, the Prince of Wales, the Duke of York, the Duke of Kent, the Princess Royal, together with their mother Her Majesty Queen Mary were at the bedside of the dying King and Emperor while outside the gates of the castle estate, hundreds of loyal subjects were kneeling in prayer for their Empire's head, as was the Archbishop of Canterbury who was also in the bed-chamber.

At the time of making the announcement that the King was passing away, it was stated that nothing further would be given out "until the doctors have to announce the end," and at the same time the British Broadcasting Co. radioed the Empire that all stations were closed until the final announcement, which very sorrowfully came all too soon. The news of the death of the monarch was given to Londoners by the traditional tolling of the Great Bell of St. Paul's Cathedral in Ludgate Hill, the death of a King being the only occasion on which this bell is ever used.

It mournfully proclaimed the death of the beloved monarch of the British Empire, and the accession to the throne of Prince Edward VIII., which proclamation was officially made very early on Tuesday morning by the members of the Privy Council at their meeting a few hours after the death of King George V.

UNITED CHURCH ANNUAL MEETING

The Annual Meeting of the United Church Congregation was well attended on Friday evening. After a hymn and prayer the chairman, Rev. D. K. Allan called for the minutes of last year's gathering. Then came the reports from the Session, Board of Stewards, Ladies' Aid, W.M.S., Sunday School, C.G.I.T., Y.P.U., and Choir.

They were interesting reports and revealed splendid work done with satisfactory results.

The work of the church is in a healthy condition.

Fine tribute was paid to all the officials and workers of the church.

The financial condition of the congregation was suprisingly good, taking into consideration the difficult times through which our people have been passing.

Ketchamoot, Lakeshore and Tofield practically met all their obligations.

The Tofield Ladies' Aid raised more this year than last year.

Three new members were added to the Board, Messrs Bruce, Beirnes and Stinson.

There is room for still greater interest by those who belong in any way to the church. It is a fellowship and the desire of the minister, and congregation is that more enjoy that fellowship. The social half hour was heartily enjoyed.

OBITUARY

Benjamin Arnold Oslund, born on May 12th at Ryley, Alberta, passed away at the isolation hospital at Edmonton, Alberta, January 20th, at the age of 21 years. He is survived by his wife and mother, Mrs. Johanna Oslund of Ryley, three brothers, Joseph and Gustaf of Ryley, Alfred of Mountain Park; two sisters, Mrs. A. Killian and Mrs. E. Hutchison of Ryley.

The funeral was conducted on Thursday, January 23rd, in the Lutheran Church at Ryley. Interment took place in the Ryley cemetery. Rev. D. K. Allan officiated.

LOCAL AND PERSONAL

A number of Tofielders attended the Old Timer's Reunion in Edmonton on Thursday last.

Mr. Johnston Ferguson is attending the U. F. A. convention held in Edmonton this week.

Mr. Ray Coutts is spending a few days in Edmonton this week.

The Jolly Twelve Bridge Club met at Annie Swift's home on Wednesday evening. Marjery Stuart and Mrs. E. Rogers were the top scorers for the evening.

Charlie Edwards suffered a very painful injury on Saturday night when a piece of flint flew into his eye while he was sharpening a pair of skates. He was taken to a hospital in Edmonton where they removed the flint. We are glad to report that it is much improved now.

Mrs. Barnett, Mrs. McMullen and children, and Mr. and Mrs. Hunt of Iron Springs, are visitors at the Thompson home.

Miss Agnes Wick of Viking spent the week end visiting at the Imler home.

Mrs. Bill Chapman spent a few days in the city last week.

Born: To Mr. and Mrs. Walter Kendall, on Wednesday, January 22, a daughter. Congratulations.

Bill Robinson who was recently transferred to Vegreville spent the week end in Tofield.

Mr. Matchmann, formerly of the Vegreville bank has started his duties at the Tofield branch.

Bert Calvert, while attending the bonspeil in Viking had the misfortune to slip on some ice and fracture a rib. Tough luck, Bert.

The Y.P.U. held a skating party on Monday evening and afterwards gathered in the schoolroom of the United Church.

Everyone was ready for the soup and crackers, and it was good!

It was a lively party and after a few real live games, everyone went home delighted.

Don't forget to be on hand in the United Church on Friday evening to boost for your debaters against Viking.

Mrs. J. W. Robinson, Thankoffering Sec-Treas. for the Diocese of Edmonton, attended the quarterly Board meeting which was held in All Saint's Church and Parish Hall on Friday, January 17th.

TOWN COUNCIL MEETING

A regular meeting of the Town council was held on Monday evening, Jan. 20th. Present were, Mayor Bruce, Councillors, Chapman, Swift, Taylor, Hammond and Bellamy. Routine business such as reading the minutes, communication, and passing of accounts were dealt with. The Auditor's Report for the year 1935 was received and read. Publication of same appears in this issue of the Mercury. An inspector's report made on December 31st, together with a letter from the chief municipal inspector, were read and considered. No criticisms were offered.

Second and final readings were given to two by-laws, one appointing a returning officer and the other appointing an assessor for the year 1936. The secretary-treasurer was appointed to both offices.

A statement of receipts and expenditures for the month of December 1935 was read and ordered to be incorporated in the minutes as read. Meeting adjourned at 9:30 p.m.

TOWN OF TOFIELD

Notice of Annual Meeting

Public Notice is hereby given that a meeting of the electors of the Town of Tofield will be held in the Town Hall, Tofield, on Friday, January 31st, 1936 at 8 o'clock p.m., for the purpose of receiving the report of the Mayor and Secretary-Treasurer, Auditor, and chairmen of the various committees of council for the year ending December 31st, 1935. Dated at Tofield, this 22nd day of January, 1936.

J. W. CHAPMAN,
Secretary-Treasurer.

TOFIELD SCHOOL DISTRICT NO. 1999

Notice of Annual Meeting

Public Notice is hereby given that a meeting of the electors of the Tofield School District, No. 1999, will be held in the Town Hall, Tofield, on Friday January 31st, 1936 at 8 o'clock p.m.

J. W. CHAPMAN,
Secretary-Treasurer

Locals Win Hockey Tilt With Wainwright

In a game in which the brand of hockey was outstanding, Tofield barely nosed out a win over their far eastern rivals on Sunday afternoon last.

Both teams were playing short handed but speed, checking and stickhandling combined with snappy combination was sustained to the final bell.

The first period opened up fast and with only a minute or so of play, Key and Sid Worton combined for Wainwrights first goal. Within a few minutes Tofield evened the count by a goal by W. Worton on a pass from Norman Glover. This was repeated about the middle of the period by another by Worton on a pass from Burnett. Just before the end of the period W. Worton scored again for Tofield, the period ending 3-1 in favor of the locals.

In the second period the two teams battled on even terms both scoring two goals each. Wainwright reduced the lead by one when Ken Tory beat Bowick with a fast one. Tofield came back however when Jack Bowick scored from close in. The visitors again cut down the lead by a goal by Sid Worton, but Swinton for Tofield cancelled it with a well placed shot. The period ended with the score 5-3 for Tofield.

The third period saw Wainwright pressing hard, giving Tofield defence and goalie plenty to do, while the forwards found the going heavy. However they stood up under the strain and held their opponents to two goals while scoring one for themselves. Ken Tory opened the scoring for Wainwright early in the period but this goal was cancelled by a goal by W. Worton on a pass from L. Glover. At this period Wainwright were playing five men up and the play was mostly at the Tofield end. They were rewarded by a goal by Key which again brought them within one goal of the equalizer. At times it seemed as if the puck must go in the Tofield net but Bowick playing a stellar game and backed by a stout defence, staved off attack after attack and at the final bell the score stood at 6-5 for Tofield.

J. J. (Bud) Hannan did a good job of refereeing.

The men's curling rink which took part in the bonspeil in Viking were successful in winning 4th prize in the King Edward competition and 3rd in the Elks competition.

BEHIND THE HOG

By A.B.C.

All items below are censored outside of poetry and that is bad enough without censure.

∗ ∗ ∗

What care we for summer
Or the autumn and the fall,
But the Skips that made winter weather
Need a clout across the jaw.
My curling wheel goes round and round, until at last a name is found.
O.OH-O.OH-O.OH-O.OH

∗ ∗ ∗

Over at Chris' fire a stranger said to Chris, "Are you the Town Constable?" Chris said "SURE," the stranger said "Where is the Fire Chief?" and Chris said, "Wait till I change my hat."

∗ ∗ ∗

Believe it or not: Doc was in after a little snack after a game. He said, "Walter, can I get anything to eat in this dump?" The waiter said "Yes sir." Doc said, "such as what," and the waiter said, "such as it is."

∗ ∗ ∗

Our Waiting Room is an ideal place for a good time. Just the right degrees of Loungitude and Lassitude.

∗ ∗ ∗

My supper's cold, "Lou" swore with vim,
Then "Emma" made it hot for him.

∗ ∗ ∗

Apology to Robert Service

This is the song of the Skipper
As he squats in the hack alone,
Oh, give me the strength to deliver,
With weight and broom this stone.

This is the horrible story
Told as the twilight falls,
And the skippers walk together,
Hearing each others wails.

∗ ∗ ∗

Wisdom: Raphael paints it, Handel sings it, Phidias carves it, Wren builds it, Shakespeare writes it, Columbus sails it, Luther preaches it, but most of our skips just spout it.

∗ ∗ ∗

Voices of Experience: This is what the "KIDS" rink need mostly, also a little weight and broom. At that they look pretty snappy in their mannish outfits.

∗ ∗ ∗

This week's brain wave for the ladies:

Now I sit me down to eat,
I pray I may temptation beat,
For if I don't, before I'm through,
I'll surely gain a lb. or two.

∗ ∗ ∗

And the rocks go round and round,
And where they stop nobody knows
O.OH-O.OH-O.OH-O.OH
The lead and 2nd, how they sweep,
It almost makes the skipper weep.
O.OH-O.OH-O.OH-O.OH

∗ ∗ ∗

The 3 bit schedule looks something like this to date:

	Points	Ends
Calvert	73	41
Dodds	65	35
Chapman	72	41
Clutterham	61	34
Hammond	46	27
Hannan	80	43
Jobb	74	48
Law	77	40
Swift	60	30
Smith	46	37

∗ ∗ ∗

First Things First

In this, the first month of the year we are tempted to think of first things, how important they are and what they mean to us.

In the realm of economic affairs, attending to first things first often result in future well being.

If we take the general rule of life a man's first duty is to his family, his home and all it stands for. But he has other duties and responsibilities which can perhaps be listed in their order of importance. Commencing with his family there is next in order his community, his home town, his province, his country.

There are of course many things he cannot get from his own farm, the statement equally applies to his home town, but as far as possible his best interests are served by first building up his own place and then spreading out in the order named.

Many small towns which cater to the needs of the surrounding country have established in them a local newspaper. Often unpretentious and with no desire to "set the world on fire," yet it fills a niche in community life that would be lacking if it were not published. Essentially local, it should appeal to the residents of a town and district as one thing wholly theirs. As far as it is able it looks to their interest, gives them service and lets the rest of the world go by. There is no suggestion that you cease to enlarge your outlook or that you narrow your field of reading, but with your feet solidly on the ground in your own district you are better able to withstand the stress that comes from without.

Your local paper, The Tofield Mercury, has been published at Tofield for the past seventeen years, some of which have been fairly prosperous and others quite lean. But through them all, the original policy of publishing a paper in and for the Tofield district has been maintained. Uninfluenced by passing provincial movements, opportunity of gain notwithstanding, its editorials are based on the desire to help the district as a whole rather then immediate profit to itself.

The cost of your home paper is small, $2.00 per year, 4c per week. May we solicit your renewal and your influence upon others to subscribe.

THE MERCURY

Rudyard Kipling

By O. P. Thomas, Principal of Tofield School.

On Friday, January 17, 1936, there passed away in England one of the world's great literary figures. What position Rudyard Kipling will occupy in the world's great literary artists will only be known as time passes on. The ranking of a literary genius is only judged by the test of time. However, there is no doubt that time will only serve to increase the position of this poet and writer. Today, he is regarded as one of the greatest English literary men. To-morrow, the world will likely regard him in a higher position than we do to-day.

Rudyard Kipling was born in Bombay, India, in 1865. He was the son of a learned artist, John Lockwood Kipling. His father was the Curator of the British-East Indian Museum at Lahore and head of the School of Industrial Arts. Young Rudyard Kipling grew up in the social atmosphere of the British civil and military service in India. No doubt, it was at this time, that his imagination began to be fired by the teeming life in the Far East, with its mystery, splendor and squalor.

Quite naturally, when the time came for Rudyard Kipling to receive his education, he was sent home to England. His education was gleaned at a typical boys' school in that land. He gives us a very good account of this period of his life in "Stalky and Co." This was, however, but an interlude in his life. At seventeen years he returned to India, from which he drew his first inspiration. For the next seven years he engaged in journalistic work. Some of his best stories were dashed off in the routine of his early journalistic work.

By the time Kipling was twenty-one years old he had written a promising book of verse. In this were many strikingly original and vigorous sketches of the native life of India. These were gathered by Kipling in the course of his work in Lahore and Allahabad. Some of the stories had been told to him by his father, but the most of them he gathered from his own keen observation and sympathetic insight. When these poems were published they had an instant success in London. During this period of life in India he wrote a half dozen other collections of short stories and racy, vernacular verse of army life in India. These revealed him to a host of readers in Europe and America, as a new and virile writer of fiction and poetry.

Professor Broadus, of the University of Alberta, in his book "The Story of English Literature" says:

> "This brings us very near our own times. The nearer we get, the harder it is to decide which poets we should read, which we can afford to disregard. The oblivion of time simplifies for us the problem of the past. The innumerable forgotten poets of the former generations are generally well forgotten. Among the comparitively few whose works survive, it is not difficult to find our way. But our own day—though we sometimes accuse it of being exclusively absorbed in machinery and money-getting—is as prolific as any in the past. There is a bewildering number of minor poets, expert craftsmen, as like as peas in a pod. Are there any major ones? If vivid individuality, command of vigorous and stirring rhythms, and almost universal popularity count, Rudyard Kipling must be considered."

By the age of twenty-four, when he returned to England, he had won a conspicuous place among the creative artists of the day. He had the story-tellers supreme gift of brisk narrative, invention, the creation of original characters, drama dialogue and atmosphere. His methods and his materials were new. He invested India again with the mystery and the romance of the "Arabian Nights." His verse was not conventional, imaginative and often inspired. In his ballads he gave us the image of the British-Indian soldier and made him as "Tommy Atkins" a literary character. He celebrated the English sailor on deck and in the engine room. He sang praises of an English world empire.

He married an American lady of New York and upon coming over to this country to live he retired to Brattleboro, Vermont, so that he would not be continually bothered by the noisy hero worship of our modern times. While here he won a new and perennial audience of little folk with stories of children and jungle beasts and other talking animals. More will be said of these works following.

Upon his return to England he again retreated to a quiet part of England, Sussex, from which he hardly ever went out. He lived more and more the life almost of a recluse upon his own wish. The world was ever ready to lionize him and worship him, but he preferred it otherwise. Last week he was taken ill and removed to a nursing home. While it was known that he was seriously ill, it was not thought that he would succumb. However, he continued to decline until Friday evening, when the news was flashed to all the world, in every part of which were mourners, that he was dead.

A pioneer in theme and method, his style was highly individual. He has numerous imitators, and a considerable influence upon other writers of fiction and verse. It might be well at this juncture to consider some of those works which he has given us.

His first volume of verse, "Departmental Ditties" appeared in 1886. In 1887 appeared "Plain Tales from the Hills," his first volume of short stories. Since that time he has produced many volumes of stories, chief among which are "Kim" a story giving a vivid study of Indian life, which should be known by all Boy Scouts. A less successful novel was "The Light That Failed." His animal stories were told in two chief series "The Jungle Book" and "The Second Jungle Book." These last two are quite familiar to all pupils of the elementary schools. The Good Fairy Puck tells to two modern children a group of stories of olden times in "Puck of Pook's Hill."

As well as being the most popular of modern short-story writers, Kipling is the most popular of modern poets. Sharp eyes and a good memory, the habit of mixing comradewise with all sorts of people all combined to make his poetry interesting. He gets to the heart of the matter with few words. His style is plain and concrete, and at the same time racy. To these characteristics there was added a lively imagination and a command of swinging pulse-stirring rhythms. Thus Kipling the short story-writer becomes Kipling the poet. Here we find life in India, now with the native—now with the officer—now with the British "Tommy" at army-posts and on campaigns. The glamor of the East, the glory of the Empire, the songs, the heroisms of the British soldier were his themes. Because this was an unworked field, twenty years ago everybody was reading and reciting "Departmental Ditties" and Barrack Room Ballads." Not many of us have not heard:

"Oh, East is East and West is West,
  and never the twain shall meet,
Till Earth and Sky stand presently
  at God's great Judgement Seat;"

or;

"For the wind is in the palm-trees,
  and the temple bells they say
'Come you back, you British soldier,
  come you back to Mandalay.'"

After his return to England, Kipling wrote, in verse, of the marvels of modern invention. In "McAndrew's Hymn" one shares the feelings of the Scotch engineer as the steamship goes along with its throbbing engines and purring dynamos as it seems a living thing:

"Fra' skylight lift to furnace-bars,
  backed, bolted, braced and stayed,
And singin' like the Mornin' Stars for
  joy that they were made."

Only recently, on September 6, 1929 Kipling published "Hymn of the Triumphant Airman": This airman is supposed to be flying at the rate of a thousand miles an hour:

"Oh, long had we paltered
  With bridle and girth
Ere those horses were haltered
  That gave us the earth.

Ere the Flame and the Fountain
  The Spark and the Wheel,
Sank Ocean and Mountain
  Alike 'neath our keel.

But the Wind in her blowing
  The bird on the wind,
Made naught of our going,
  And left us behind.

Till the gale was outdriven,
  The gull overflown,
And there matched us in Heaven
  The Sun God alone

Of all the poems of Kipling that which will probably live the longest is the note of warning which he sounded on the occasion of Queen Victoria's Diamond Jubilee in 1897—"Recessional";

"God of our fathers, known of old,
  Lord of our far-flung battle-line,
Beneath whose awful hand we hold
  Dominion over palm and pine,
Lord God of Hosts, be with us yet,
Lest we forget, lest we forget.

The tumult and the shouting dies,
  The captains and the kings depart,
Still stands Thine ancient sacrifice,
  An humble and a contrite heart,
Lord God of Hosts, be with us yet,
Lest we forget, lest we forget!"

In closing this short tribute to Rudyard Kipling the following quotation form "English Literature" by Pace might be appropriate:

> "It may be fairly said that Kipling has utilized to the full the literary possibilities of practical modern life, and has infused it with the light of his imagination. He may not have sounded the depths of human nature, but he has given a series of pictures and character-sketches which have truth and power in a high degree. Tennyson called his "Ballad of East and West" the finest thing of its kind in the English language. Underlying all his work there is a strong sanity, which is well seen in the lines which close "A Song of the English":

"Go to your work and be strong, halting not in your ways,
Balking the end half-won for an instant of dole and praise.
Stand to your work and be wise—certain of sword and of pen,
Who are neither children nor Gods, but men in a world of men!"

"Moreover as a recent critic has said, 'Whether writing of the jungle or the barracks, for the children, or their elders, he worships not only the "God of the things as they are," but also the "God of our fathers known of old."'"

Star Enjoys Canadian Winter Sports

Nancy Carroll, red-headed Hollywood star, had her first taste of winter sports at Quebec over New Year's. "I have skated on artificial ice in Hollywood," she said to Jack Strathdee, Sports Director at the Chateau Frontenac, "but skiing, tobogganing, and dog sled riding are all new experiences." Her first ski lessons turned her into an enthusiast for breakfast off the sideboard.

THE KING IS DEAD—LONG LIVE THE KING—

ON MONDAY in common with all other Canadians the residents of this district heard with deep regret word of the passing of King George V. Though situated four thousand miles from the centre of the empire, rapid transportation and instant communication has brought to the people of this province an intimacy with His Majesty hitherto absent. And with this intimacy has come a greater bond of unity and a richer fellowship. The announcement of the passing of King George V created a sense of real personal loss to Canadians and it were as if a friend of their own choosing had been taken from them. To go down into history as "King George the Beloved," is one of the greatest tributes that could be paid to a King, a Man or a Name. Called as a young man from a naval career to ascend a throne; and passing through twenty-six years of strenuous reign, when the very world as he had found it seemed to be breaking up before his eyes; when thrones were toppling and royal families were rushing into exile, he so arranged affairs that his people came to love him more and more. An indefatigable worker, his powers were taxed to the limit during the Great War. Exerting his influence in the days immediately preceding the war on the side of peace and having failed, during the war he followed closely the movements of all Allied forces and at all times was solicitous about their welfare.

Since 1932 the science of radio communication enabled the King to make audible contact with many millions of his loyal subjects. And because of this, many people to whom the King had been a symbol, came to love him as a ruler of a vast empire. The deepest sympathy and concern will go out to Queen Mary, the Prince of Wales and other members of the Royal family in a loss which only faith can sustain.

The Prince of Wales, now King Edward VIII. comes to the throne well prepared and very popular Unofficially Britain's goodwill ambassador, he has travelled far and wide, and in the course of his travels a multitude have come to admire him. Here in Alberta we have a particular interest in His Majesty, for he is a land owner within the province. His ranch at High River holds particular interest for His Majesty and is one of the show places of the province. It is sincerely hoped that under the guidance of His Majesty, aided by the counsel of his ministers that peace, tranquillity and prosperity may not only abound throughout the British Empire, but throughout the world.

TESTING SEED FOR GERMINATION

If there ever was a time in the history of grain growing in Alberta when care should be taken to procure fertile seed for planting it is now. Extensive damage done the grain crops last year has resulted in a scarcity of good quality seed that will not germinate satisfactorily. It would be a grave error for anyone to take a chance on poor seed.

The Dominion Seed Branch in Calgary is fairly swamped with samples of seed sent in to be tested for germination. Hundreds of samples have been arriving almost daily and the task of trying to keep up with this is a stupendous one. The suggestion is advanced that a large number of farmers might well make their own germination tests. This can be done by taking a hundred seeds of a well cleaned and thoroughly dried sample and planting same in two pots placed in a sunny window at ordinary living room temperatures. At the end of 12 or 14 days count the healthy plants in each of the two pots and average the result.

G. M. Stewart, district seed inspector, Calgary, points out that frozen grain should be tested for germination under somewhat different conditions than heretofore. It is recommended that samples be thoroughly dried, then planted in deep boxes and covered with two inches of soil in order to simulate conditions in actual farm practice. Seeds that produce strong, vigorous plants are counted as satisfactory, others being excluded from the count.

THE ELUSIVE WILD OAT

Really I am never surprised at anything a wild oat will do. Have you ever seen the wild oats travel along the ground until they come to some crack into which they crawl? This movement is due to the winding and unwinding of the bent and twisted awn which carries the seed along with it. If one were to shell out a hand of wild oats on a table and then spray them lightly with water, they would go over and over until something stopped them.

To my mind the most remarkable thing about the wild oat is its ability to live in the ground. It has no oily protection like the mustard seed but, nevertheless in certain clays it seems to be able to live for quite a long time. Then, of course, it has the property of delayed germination which makes fall cultivation nothing more than an outdoor sport. —Dean E. A. Howes, University of Alberta.

STUART CHASE POINTS TO SWEDEN AS YARDSTICK FOR RECOVERY

The co-operative societies of Sweden own and operate ten per cent of all industry and handle some 50 per cent of all retail trade in such essentials as food, clothing, shoes. The co-operatives broke the margarine trust, the flour trust, the shoe trust, the electric lamp cartel. They break one private monopoly after another by threatening to organize their own supply. This has proved far more effective than anti-trust laws. The price of lamps was driven down from thirty-seven cents to twenty.

Sweden has obviously mastered the yardstick technique with which Mr. Roosevelt is now struggling. She has the highest standard of living in Europe, higher even than for the mass of Americans. She is now about 50 per cent collectivized — including the co-operatives as public business. Private business has resigned itself to the inevitable, and from time to time actively co-operates in some aspect of state enterprise. —Stuart Chase, in his latest book "Government in Business."

"Believe it or not" but Canada gets artificial teeth from Palestine, along with oranges. In turn, Palestine takes from Canada, in order of value, wheat flour, box shooks, canned fish, upper leather, fresh apples, wearing apparel, electric apparatus, automobile parts, fresh peaches, toilet soap. Canada increased her trade with Palestine in 1934 over the year previous by over 100 per cent, according to the Industrial Department of the Canadian National Railways.

M. C. McCANNEL, AUDITOR.
J. W. CHAPMAN, TREASURER

LINDBROOK

The district was shocked to hear the news of the death of W. H. Hobbs, teller of a Vancouver bank who was shot and killed by hold-up bandits whilst on duty in the bank. Deceased was only 25 years old and was well known here, spending part of his boyhood here when his father was C.N.R. section foreman here. He was well known and liked by all here especially by the boys of his own age. The sympathy of this district is extended to the bereaved parents and his elder brother Lester in their sad loss.

Mrs. G. Jones and son Mr. Ernest Jones of Vancouver are here on a visit to Mrs. Jones' brother, Mr. E. W. Hooper and family of this district. Miss Rita Cowan of Rosetown, Saskatchewan is also here visiting with them.

Mrs. F. Gould accompanied Mrs. [illegible] of Tofield to visit the poultry show at Edmonton.

Miss M. Lepine is well again after her recent illness we are glad to say.

Mr. Peter Enns of this district has had two narrow escapes from injury to his eyes lately. First time he was replenishing the stove in the dark of night and bending down ran his eye into the stove lifter which was sticking up. The second occasion was also indirectly connected with the stove. This time he was cutting wood with an axe when a splinter flew up and hit him on the other eye. Neither were serious but might easily have been so, it seems that the stove has it in for Peter, maybe he's been overworking it this cold weather.

LAKESHORE

Patrick Phillips has been quite ill with pneumonia, but at present he is improving slowly.

Miss Winnie Stoddart of New Westminster, B.C. is visiting at the Phillips home.

Miss Maggie Wood entertained Mrs. J. H. Johnston, Mrs. John Wood and Miss Della Fry on Friday. The usual bridge game ended in a win for Miss Wood and Miss Fry.

Mr. and Mrs. T. A. Jones attended the annual Old Timer's Reunion in Edmonton on the 10th.

Miss Grace Mackinnon and Neil Phillips were Friday evening guests at the T. D. Ferguson home.

MONCTON, N.B. January 20— Carrying out a century-old custom, Indians in Dorchester, New Brunswick, called on their "pale face" friends and this year they received many more gifts than ordinarily and twice as much money as ever before, from which Chief Peter Thomas was led to remark that, evidently, "good hunting has returned to the lodges of the pale faces."

These Indians are descendants of the Micmac tribe, a reservation being located at Beaumont, nearby, deeded to them in 1840. The Micmacs were native to the Maritime Provinces, except for a strip along the Saint John river, in New Brunswick, settled by the Maliceets, and played a considerable part in the contest between the French and the English for the conquest of Canada, states the Tourist Bureau of the Canadian National Railways.

TOFIELD W.M.S. MARKS PROGRESS

The annual meeting of the Tofield W.M.S. was held Thursday afternoon Jan. 16, at the Manse.

Rev. D. K. Allan conducted the installation of the officers for the new year, giving an encouraging message, showing the great sphere of work for women and their value to the church.

Mrs. L. W. Smith, new president, gave also a message for the new year.

The devotional was taken by Mrs. D. K. Allan.

Encouraging reports were given by the secretaries of the various departments. The treasurer's report showed that our auxiliary had met its allocation by freewill offerings.

Special meetings during the year were: The World Day of Prayer, Easter Thanking-offering with a special program, Autumn Thank-offering with Mrs. Dr. Archer of Lamont as guest speaker, who gave a very interesting history of the W.M.S. hospital at Lamont.

Mrs. Firth gave an interesting talk on the first chapter of the study book "The New Africa."

The officers for the year are as follows: Honary presidents, Mrs. J. Ferguson, Mrs. H. Kendall; President, Mrs. L. W. Smith; Vice-President, Mrs. D. K. Allan; Secretary, Mrs. W. C. Swift; Treasurer, Mrs. H. Kendall.

HEALTH

by

A Health Service of the Canadian Medical Association and Life Insurance Companies in Canada

DEAFNESS

Social life, whether in or out of the home, depends largely upon a free exchange of ideas and thoughts through the spoken word. Any marked degree of deafness is a barrier to normal social life.

It is from adults that we usually hear the first complaints of increasing difficulty in hearing. This difficulty in hearing may arise from what is known as progressive catarrhal deafness, so-called permanent deafness or otosclerosis, or nerve deafness.

With regard to the first cause-progressive catarrhal deafness—it is generally agreed that while the hearing difficulty first became evident in adult life, it had its beginnings in childhood. Preventive measures, if they are to be of value, must begin in the early years of life, seeking to prevent, to correct or to overcome those conditions which are so often the origin of ear trouble in later years.

The common cold does not kill, but it does do a frightful amount of damage in addition to the discomfort for which it is responsible. Diseased tonsils and adenoids are frequently the cause of recurring head colds and such recurring colds often mean that the eustachian tube, connecting the middle ear and throat, is more or less blocked.

Diseased teeth, infected sinuses, indeed any infection may be the source from which infection spreads to the ears. Structural defects of the nose itself or of parts adjacent to the nose, which cause an obstruction of the nose and result in faulty nasal breathing, may lead to trouble in the ears. Any blocking in the nose interferes with the normal secretion of the mucous glands in the lining of the nose; this encourages a growth of bacteria, and a chronic infection may result which tends to spread to the ears.

Enough has been said to show that the prevention of deafness in adult life begins with maintaining the health of the nose, mouth and throat of the child. The respiratory gateway to the body suffers from a number of disabilities, chief among which is the common cold, not usually serious in itself when it occurs but always serious in the results to which, particularly if neglected, it may lead.

Children should be taught to blow the nose gently. Do not say "give it a good blow," but have them blow the nose gently, closing only one nostril at a time; the hard blow may send infection from the nose up the eustachian tube into the middle ear.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

Flin Flon, in Manitoba, is much in the public eye by reason of the gold mining operations being carried on there. But there is another Flin Flon, in Manchuria, and not so long ago a letter posted in New York addressed to Flin Flon in Canada, found its way to Flin Flon in Manchuria and after a delay of two months it reached its destination in Canada, according to an item in the current issue of Canadian National Railways Magazine. Some postal clerk, who, evidently, must have been well up on place names in Manchuria, deposited the letter in the "China" bag, at first glance reading Manchuria for Manitoba. The letter was an important one and telegraphs and cables were brought into use in an endeavour to trace it.

THE BREAKING UP OF A HOME

Five little puppy dogs on the bonnel floor,
Came Mr. Moline and then there were four.
Four little puppy dogs happy and free,
Came Mr. Bigland, and then there were three.
Three little puppy dogs, feeling kinda' blue,
Came Mr. Dziewit, and then there were two.
Two little puppy dogs, having some fun,
Came Mr. Coutts and then there was one.
One little puppy dog, left all alone,
Came Stan Glover and then there was none.

PERFECT MAPLE LEAF

The most beautiful maple leaf, prize winner in the nation-wide competition conducted by the Canadian Pacific Railway, was submitted by Mrs. C. McConnell, Fredericton R. No. 2, York County, New Brunswick. It has a flare of autumn coloring ranging from light yellow to deep blood red, and its perfect symmetry and form won it distinction in competition with 10,000 other beautiful leaves, submitted by enthusiastic Canadians from Coast to Coast. The leaf, a thing of sheer beauty, was selected by such outstanding artists as C. W. Simpson, R.C.A., R. W. Pilot, R.C.A., and James Crockart.

In the largest leaf phase of the competition, six-year-old Bobby Hume, of Revelstoke, B.C., made an astonishing win with a leaf showing an area of 222 square inches.

The success which greeted the original competition this year has encouraged Canadian Pacific officials to plan for another competition on a larger and more comprehensive scale next fall.

CARD OF THANKS

We wish to express our sincere appreciation to all those friends who so heartily tendered their help and sympathy in our recent and bereavement. We also wish to thank the ones who contributed the beautiful floral tributes.

John Wilson and family.

KETCHAMOOT

Born: To Mr. and Mrs. Herman Lawson on Friday, Jan. 24, a son. Congratulations.

The regular monthly meeting of the Ladies' Aid will be held next Wednesday, Feb. 5th, at the home of Mrs. Lewis Carlisle. A cordial invitation is extended to all.

Mr. Frank Hull returned home one day last week from Iowa, U.S.A., after an absence of three years.

Mrs. C. A. Ingram, Mrs. Whillans and Mrs. Sears were week-end visitors to the city last week.

Owing to the roads and weather, Mr. Thompson was detained at the Bardo elevator last week.

Mrs. Junck, sister of the late Mrs. Wilson, who suffered a stroke at Mrs. Wilson's funeral, passed away the same day in an Edmonton hospital.

Mrs. Robert Berreclough and children of Bardo visited several days at the home of Mrs. Berreclough's parents, Mr. and Mrs. Carlisle.

Miss Esther Winder of Miquelon, is assisting with the work at the Herman Lawson home.

Mr. G. W. Sears attended the Spanish American war veterans Association in Edmonton Saturday evening of last week.

The Ketchamoot hockey team have won their last two battles. On Saturday, January 18, they met the Lakeshore team and on Wednesday, January 22, they played the Bardo hockey team. Both games were played at the Tofield rink.

The School trustees held a meeting at the Roy Lee home Saturday evening of last week. Miss Hazel Sears was re-elected secretary-treasurer. The board consists now of Roy Lee, Jim Sutton and John Brown trustees.

Miss Maude Whillans entertained a few friends Friday evening in honor of her 18th birthday.

Messrs. J. H. Ingram and A. Harrison attended the U.F.A. convention in Edmonton last week.

Miss Mildred Ingram has taken a position as clerk in the Co-operative store in Tofield.

Mr. Leo Ovelden returned home one day last week after working several weeks near Edson.

APROPOS OF BEHIND THE HOG

It was an interesting and smart column by A.B.C. last week and many people other than curlers read it and commented upon it. One item in particular, that of Chris Hammond changing his hat, reminds us of an incident that happened several years ago in a Saskatchewan village. A young preacher came out from England to take a station there and after a time made application to join the Masonic Order. When you join the Masonic Order they like to know whether your ancestors were hung at Newgate or whether they were among the bank directors who set the gold standard upon its course. Anyway they wrote to a Masonic official in England who happened also to be the chief constable of a city. The young preacher's brother was the city clerk of the same city and both chief constable and city clerk had offices in the rather pretentious city hall. When the chief constable received the enquiry he reached for his phone and called the city clerk department and said "You have a brother in Canada, haven't you?" to which the city clerk answered "yes." The chief constable then said "I've just had an inquiry concerning him," and hung up. The city clerk not knowing anything about the Masonic business began to ponder why the chief constable should have an inquiry about his brother in Canada. Anxious to help and somewhat worried he sent a cablegram to the chief constable at ——— Saskatchewan requesting information as to any trouble in which ——— was involved.

One morning while the young preacher was eating his breakfast in the hotel a man walked out of the kitchen and showed him the cablegram. The chief constable of the Saskatchewan village was the Hotel Cook.

Gently

A customer entered the shop of a cockney bookseller and requested a copy of "Omar Khayyam."

"Sorry, sir," replied the shopkeeper. "We 'ave 'is [illegible] and 'is 'Hedyssey,' but we 'aven't 'is 'Khayyam.'"

LOCAL AND PERSONAL

Mr. Harlund Thompson who is attending the University in Edmonton spent the week end at his home here.

Dr. Law, Mr. Smith, Mr. Abbott and Rev. Allan are attending the Wainwright bonspiel. The latest reports are that they have lost one and won one.

Walter Bellamy left for Wainwright on Sunday.

Miss Florence Kendall spent the week-end in Edmonton.

Mrs. McCauley visited Edmonton for a few days last week.

Mr. and Mrs. Eldred visited the city on Sunday last.

Bob Whyte of Wetaskiwin spent the week end in town.

Mrs. Bender is visiting at the Kendall home for a few days.

Mr. Earl Bowden visited the city last week.

Mr. and Mrs. E. Seale spent a couple of days visiting the city.

The Ladies' curling rinks which took part in the Edmonton bonspiel returned home on Friday last. Mrs. Hammond's rink was successful in bringing home fourth prize in the visitors competition.

The Anglican W. A. will meet at the home of Mrs. Malcolm on Feb. 6th, at 2:30 p.m.

AMISK CREEK

The King's Funeral service came in very clear on Tuesday morning. We heard everything very good.

The Young People's League held their annual meeting in the church last Sunday evening. There wasn't many present on account of the bad roads and weather but enough to elect the officers. Arnold Berg was elected as president, Hazel Hillerud retiring; Lloyd Berg was elected as secretary-treasurer, Hilmar Moen, retiring and Ole Berild was elected vice president, Arthur Haugen retiring. Members of the entertainment committee and the program committee were elected also. No delegate for the Young People's convention in Camrose was decided upon.

Mr. A. Erickson spent several days in the city. While there he attended the Old Timer's banquet.

Ingmar Olsen attended the U.F.A. convention in Edmonton last week.

Mr. E. A. Moen, Hilmar, Edna and Marvin and Robert Berg motored to the city last Thursday. Mr. E. A. Moen and R. O. Berg attended the U.F.A. convention in the evening. Hilmar and Marvin went to a hockey game in the arena and Edna visited with Lilly and Ruby Berg. R. O. Berg visited with his brother-in-law and family and returned Saturday evening by bus.

Bennie Moen of Bardo was a visitor at the Flaaten home for a couple of days last week.

Mr. Victor Neegaard from Kingman visited at the R. O. Berg and P. O. Flaaten homes recently.

The trustees and ratepayers of the school district held their annual meeting last Friday. There wasn't many present. Mr. A. Patterson was re-elected trustee.

Erling Sand from Elk Point arrived here last week. He drove his team the entire distance, the trip taking him two days. He is assisting at the E. A. Moen place.

Grandma Moen and E. A. Moen visited at the R. O. Berg home last Monday.

Myrtle, Edna and Marvin Moen; Edna Jounie and Crist Berild were visitors at the Flaaten home last Sunday.

Mrs. J. Anderson, Mr. R. O. Berg's sister who has been visiting at the Berg home for the past three months left over a week ago for her home in Wisconsin, U.S.A.

Some of the young boys around here have been busy making a skating rink. So far they have just about got the snow off when it would snow again. However they don't seem to give up.

Flu has been visiting nearly every home around here but we are glad to report that most of them are on the road to recovery.

BEHIND THE HOG

By A.B.C.

Some of our curlers are always giving themselves away. Unfortunately we don't happen to want one at the moment.

⁂

Why is it that our women curlers live longer than men? Well, we have heard that paint is a great preservative.

⁂

A stranger asked one of our Scottish curlers if he would spare something for a cup of coffee, and he replied. "Hoots Mon, D'e think I carry lumps of sugar around in my pocket?"

⁂

Our little Chalk Talk for the "KIDS RINK" seem to have produced the desired results. They chalked up the first win on Saturday night. See me for more chalk.

⁂

The Peter and Paul game on Saturday night was a humdinger, with Paul on the short end. Larry Broughton chucked a few for Peter, in fact on shoots 2 and 3 we had no less than 5 of the learned profession on the ice. We might suggest the curling was more Moral and Emotional than Intellectual. Six would be skips picked the ice, broom and weight for Peter and Paul.

⁂

If you are short of Eats, Peggy Hammond's rink each got a parcel of grub as a prize in the Visitors at the Edmonton Spiel.

⁂

The Banker, Doctor, Preacher and Barber are visiting Dusky and Geo. Agnew at Wainwright. They might take in the bonspiel while there.

⁂

And when thou cometh to the last end and has won the game and hast still a rock to play, and thou playest with great deliberation and thy rock gambols playfully down the ice, sailing jauntily around the guard and through the port, and wicked thine adversarys rock into the house so that it counts the end and game, and thou comest down the ice in fear and trembling, and art hailed by the enemy as a good sport and a curler, and by thine own side with groans and murmurings, and said thou has paddled the game away, thou shalt receive the proffered hand of thine adversary and wring it, even if in thy heart thou shouldst wish it were his neck.

⁂

I yam what I yam, but if I don't get some new jokes pretty soon I will be in a jam. Come on you curlers you each must know a good joke on somebody and I could use them all.

This week's brain wave: What most curlers think and what they think they think are quite opposite matters.

⁂

Doc, at lunch counter: "What foods these morsels be."

TOWN OF TOFIELD

Municipal Election 1936

Public Notice is hereby given that I will attend at the Town Hall, Tofield on Monday the 3rd day of February, 1936 from eleven o'clock in the forenoon until twelve o'clock noon for the purpose of receiving nominations of candidates for the office of councillor for the next ensuing two years.

Given under my hand at Tofield, this 27th day of January 1936.

J. W. CHAPMAN,
Returning Officer.

TOFIELD SCHOOL DISTRICT NO. [illegible]

1936 Elections

Public Notice is hereby given that I will attend at the Town Hall Tofield, on Monday the 3rd day of February, 1936 from eleven o'clock in the forenoon until twelve o'clock noon for the purpose of receiving nominations for the office of school trustee for the next ensuing two years.

Given under my hand at Tofield, this 27th day of January 1936.

J. W. CHAPMAN,
Returning Officer.

FOR SALE —GRAIN CLEANER Combination Mill, will separate wild and tame oats from wheat or barley, also wild from tame oats to your entire satisfaction. Bring in some grain and we will show you. M. C. Hammond, Tofield.

Word has been received that Horace McHeffey, having completed a successful season in [illegible]ville, Quebec, left last week for New York. Good going Horace!

Hockey

The senior hockey team ran into tough luck on their trip east last week end. On Saturday night they played at Irma, the game being an exceptionally hard and fast one, running into the usual ten minutes overtime. At the end of the sixty minute period the score stood at 2-2, and in the overtime period Irma scored what proved to be the winning goal of the encounter.

Journeying on to Wainwright the team met Wainwright on Sunday afternoon and took the short end of a 12-3 score. The hard game the night before evidently effected their playing as normally there is not that much difference between the two teams.

On Wednesday night at the Tofield rink the local team triumphed over Irma to the tune of 7-2. The first two periods was the best hockey of the night, both teams giving a good exhibition of Canada's winter game. The locals are playing a nice game this season, a game worth turning out to see. C. Smallwood accounted for Irma's first goal and F. McGuire the second. For Tofield W. McCauley opened the scoring with a very nice goal while other goals were scored by L. Glover, Burnett from Worton; Worton from J. Bowick; J. Bowick from Worton; A. Swinton; L. Burnett from Worton; Allan.

J. J. (Bud) Hannan was the official in charge.

HOCKEY BOYS TO BENEFIT FROM QUILT DRAW

Chiefly due to the enterprise of Mrs. Malcolm, Miss Malcolm and Mr. Burrows, the hockey team will, it is expected be sporting new uniforms. The eiderdown quilt is a gorgeous affair and if you would like to own it several young ladies who have tickets to dispose of will be glad to let you have a chance. Members of the team also have tickets, but act quickly as it will only be a matter of a few days before the fortunate owner will carry it home.

LONDON SUBWAYS OPEN ALL NIGHT

LONDON, Jan. 27.— London's underground railways operated all Sunday night for the first time in history in order to take home the thousands who continued to visit the bier of King George long after midnight.

The great human queue which at one time stretched for four miles lined both sides of the Thames near Vauxhall bridge. More than 500 persons in the line fainted during the evening hours.

SHARPEN AXE FOR NEW LIST OF EMPLOYES

Orders to dismiss all building maintenance employes of the government who are not actually needed in the civil service, whether or not they got jobs through Social Credit patronage, have gone out at the legislative buildings, it was revealed Monday by Hon. W. A. Fallow, minister of public works.

"I have told Mr. Stacy (J. E. Stacy, superintendent of buildings) that we must save money wherever possible, and he is now making a survey to weed out unnecessary employes," the minister said. "I will check each recommendation for dismissal, and if the man is not needed he will go out."

Full Recognition to the Memory of His Late Majesty at Tofield

On Tuesday last, in unison with all Canada and other parts of the Empire, Tofield observed the holiday in memory of His Late Majesty King George V., the funeral services being held at London, England on that day. At two o'clock in the morning many were at their radios listening to the broadcast from London and again at six a.m.

At eleven a.m. at Tofield a special Memorial service was held at the United Church, conducted by Rev. Allan and Rev. A. Wallis. The church was filled to capacity and both ministers paid tribute to the sterling qualities of the late monarch. Solos were rendered by Mrs. L. W. Smith, Mr. Broughton and Mr. Cowell. Flags were flying at half mast from the Town Hall, Post Office, Hotel and C.N.R. depot.

The afternoon was [illegible] the [illegible] resumed [illegible] Wednesday [illegible]

ANGLICAN ORGANIZATION TO STAGE PLAY

Organization is completed whereby the Anglican Vestry will stage a play about the end of February. The exact dates will be given later. The production is of the comedy-drama type and of course has its serious and humerous features. The title "The Path Across the Hill" sounds as if the path might lead to many unusual incidents that will be unfolded as the play progresses.

Since the above was written the dates have been announced as Friday and Saturday, February 21 and 22nd.

First Things First

In this, the first month of the year we are tempted to think of first things, how important they are and what they mean to us.

In the realm of economic affairs, attending to first things first often result in future well being.

If we take the general rule of life a man's first duty is to his family, his home and all it stands for. But he has other duties and responsibilities which can perhaps be listed in their order of importance. Commencing with his family there is next in order his community, his home town, his province, his country

There are of course many things he cannot get from his own farm, the statement equally applies to his home town, but as far as possible his best interests are served by first building up his own place and then spreading out in the order named.

Many small towns which cater to the needs of the surrounding country have established in them a local newspaper. Often unpretentious and with no desire to "set the world on fire," yet it fills a niche in community life that would be lacking if it were not published. Essentially local, it should appeal to the residents of a town and district as one thing wholly theirs. As far as it is able it looks to their interest, gives them service and lets the rest of the world go by. There is no suggestion that you cease to enlarge your outlook or that you narrow your field of reading, but with your feet solidly on the ground in your own district you are better able to withstand the stress that comes from without

Your local paper, The Tofield Mercury, has been published at Tofield for the past seventeen years, some of which have been fairly prosperous and others quite lean. But through them all, the original policy of publishing a paper in and for the Tofield district has been maintained. Uninfluenced by passing provincial movements, opportunity of gain notwithstanding, its editorials are based on the desire to help the district as a whole rather then immediate profit to itself.

The cost of your home paper is small, $2.00 per year, 4c per week. May we solicit your renewal and your influence upon others to subscribe.

THE MERCURY

Douglas, Aberhart & Alberta

From the Douglas Social Credit Advocate—By Local Request

For months, indeed for at least two years, before the Alberta Provincial election in August, 1935, there was a constant conflict between the Alberta Social Credit League, advocating Mr. Aberhart's interpretation of Social Credit, and the followers of Major Douglas.

The difference of opinion existed until a few weeks before the election, although the numbers differing from Mr. Aberhart were growing smaller to the extent, at any rate, of admitting that he was getting action even if his ideas were not what they understood Major Douglas to be teaching. Just before the election there was a very definite swing of what was known as "Douglasites" to Mr. Aberhart's side, the swing being very close to 100 per cent. This change of attitude was brought about by Mr. Aberhart's constantly proclaiming that he had no plan for the Province, and that if and when elected he would call on the founder of the movement, Major C. H. Douglas, to set up a Social Credit State in Alberta.

Major Douglas was, of course, at that time under contract with the existing Alberta government as chief reconstruction advisor, and it was merely one government carrying on with a contract entered into by another government. Another government could have cancelled that contract or at least have made it practically non-effective. Mr. Aberhart announced that he was prepared to carry on with the contract.

That was one of the important factors in bringing not only Douglasites into the fight but many other citizens who were not particularly informed on the subject but who felt that if the new party went into power they would at least attempt to do somehing and would secure the best available advice on how to do it.

The Aberhart party was elected with an overwhelming majority, and speaking from the Prophetic Bible Institute the Sunday after the election, Mr. Aberhart stated that he had cabled Major Douglas asking him when he could come to Alberta, and that Major Douglas has stated "in September." So far so good.

But Major Douglas did not come. Instead of this, shortly after Mr. Aberhart made a trip to Eastern Canada, there arrived in Alberta a Mr. R. J. Magor, a very estimable gentleman in every respect but, as it is well known that he has close connections with the "sound money" interests of the East, hardly a gentleman who could be expected to be in sympathy with such a philosophy as Social Credit. Mr. Magor, so we were told, was giving his services to the Province of Alberta for his expenses, and his task was to advise the Alberta Government on the best way to "balance the budget" and "to prepare the way for Major Douglas."

In view of Mr. Aberhart's many and rather caustic comments about those people who attempted to balance budgets at a time when people were suffering from the lack of the necessities of life, this was, to say the least, rather surprising, and it brought the first pangs of uneasiness to the minds of those who were anxious to have the assurance of Major Douglas's presence in the Province as soon as possible.

Weeks went by and drew into months, and still the visit of Major Douglas was uncertain. Evidences of typical budget balancing were seen in the discharge of civil servants, to cut down expenses. Talk at Ottawa about revising the B.N.A. Act to give the provinces the right of indirect taxation brought visions of more taxes to provide funds to balance the budget. Suspicion gave way to fear in the minds of those keenly interested in the Alberta experiment.

A caucus of Provincial members was held, and at this caucus the subject of Major Douglas's visit was discussed. Even the elected representatives were becoming worried.

After this caucus the press informed the public that a cable had been sent to Major Douglas by the Alberta Government asking him to come here not later than January 6th. In the meantime Premier Aberhart gave a statement to the press in which he is reported as intimating that Social Credit, as it will be introduced in Alberta, will differ in important respect to the Townsend Plan in the United States though similar in principle. What the "similar in principle" was, we were not told.

On January 7th the Southam papers carried the despatch that Major Douglas had not left London, and that he would not do so until "satisfactory arrangements" for his visit had been made. Premier Aberhart was unable to say what the "satisfactory arrangements" were, and added, "The Government is continuing negotiations with Major Douglas in the hope of reaching an early decision as to when he will come."

On January 9th the question was being asked as to whether Major Douglas would be considered as having broken his contract with the Province, as no word had come from him other than a letter from the Secretariat acknowledging the receipt of the cable. Premier Aberhart was quoted as saying that he had not determined [illegible] Major Douglas will have broken his contract. "The contract," the Premier said, "states that Major Douglas is to come here once or twice a year when and as required by the Government." "I want it known that we asked him to come here," the Premier added "I want it recognized that we did all we could, , and tried to get all the expert opinion we could, on establishment of Social Credit in the province." He doubted, said the press report, whether the arrival of Major Douglas even within the next week would permit of gathering of necessary information in time for presentation to the legislature session which opens February 6th.

January 10th brought a despatch from the London correspondent of the Southam papers, in which Major Douglas was quoted as saying: "It rests entirely with the Alberta government. I have had occasional correspondence with them, but I have no direct invitation to go out."

"There must be some misunderstanding." was Premier Aberhart's reply to this. "I have in my files a copy of a cablegram which the cabinet sent to him December 20th, asking him to come to Edmonton on or before January 6th. I also have a letter from his secretary acknowledging receipt of this cablegram.

On January 11th the press contained further light on the Douglas-Aberhart controversy, when it was stated that Major Douglas expressed surprise when shown a statement made by Premier Aberhart that he had not answered the government's request to go to Edmonton.

"Your information puzzles me." Major Douglas is quoted as saying. "There can be no question of my breaking my contract with the Alberta government considering that last week I received a cablegram from the executive council asking me to defer my coming." When shown this statement in Edmonton, Premier Aberhart stated that "Major Douglas is apparently speaking in regard to a cable which the government sent him about December 20th.

There had been no mention by Premier Aberhart of this second cable in the controversy. He had, however, stated that if Major Douglas did not come to Alberta they would "put in their own plan." What this plan is is well known, and it was repeated by Premier Aberhart from the Prophetic Bible Institute on Sunday afternoon, January 12th, when he gave an illustration of the government's policy as assisting business that extra profits would be made and that the merchant should have no objection to passing part of this profit over to the government in the form of unearned increment tax.

The idea of providing the "dividend" through a tax on unearned increment still seems to be the thought in the minds of government leaders despite the fact that Major Douglas, when on his way to Alberta last May stated to a press interviewer that "no plan of his would include Mr. Aberhart's scheme of taxation," and further that "taxation would tend to increase prices rather than lower them."

It was, however, acknowledged by Major Douglas that many of Mr. Aberhart's statements might be regarded as "election talk," and further stated that "Unless Mr. Aberhart were to persist in actually attempting to attain an increase of purchasing power by the processes he discusses, I should not myself be inclined to take a political speech containing them with too much seriousness."

In the meantime those concerned with the success of the experiment in Alberta are hoping that whatever the "satisfactory arrangements" for the visit of Major Douglas may be they will be made without delay, and that the Alberta government will not be left to try and implement their election promises of $25 a month with the imposing of an unearned increment levy.

TWO-LINE ADVERTISEMENT

Eighty-five years ago merchants were unaccustomed to using large advertising space. Consequently Col. Alden Spooner, who published a newspaper at Sag Harbor, was very much elated when a local retailer began using double column space, not quite full column length.

After this advertisement had appeared in two or three issues, another dealer, carrying a similar line of goods, asked the cost of two lines of advertising, to be placed where the advertiser specified. Colonel Spooner quoted 50 cents an issue. Thereupon the retailer closed the bargain and submitted his copy, which read:

I TOO
John Thompson

and requested that it be run directly beneath his competitor's advertisement.

HEALTH

by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

PNEUMONIA

As the recognized cause of much illness and many deaths, pneumonia possesses an unenviable reputation. Under the descriptive name of "inflammation of the lungs" pneumonia was just as well known to, and equally feared by previous generations.

The inflammation or pneumonia is due to one or more bacteria germs. The disease may be primarily an inflammation of the lungs, or it may develop as a secondary condition. Secondary pneumonia is quite common in the early years of life, following upon measles and whooping cough; it becomes a rarer complication with advancing years excepting as a sequel to influenza.

Pneumonia reaches its height during the colder seasons, not because of the lower temperature of the air, but because as the out-door temperature drops, windows and doors are closed, people crowd together indoors creating those conditions which favour the spread of all diseases of the respiratory organs, from the common cold to pneumonia.

All ages, both sexes and all social classes fall victim, but pneumonia is more common and most severe among those who, because of comparative poverty, live in overcrowded homes without proper food possibly deprived of sufficient warmth and sanitary facilities.

Nevertheless, by far the most active predisposing factor in the development of pneumonia is an attack of one of the communicable diseases and particularly, whooping-cough, measles and influenza. It is because of the pneumonia complication that these diseases are always such a serious menace to life.

Those suffering from pneumonia should be isolated and their sputum disinfected. The disease is not readily spread. It is caused by a living agent or germ present in the sputum, therefore, precautions should be taken to prevent the transference of the germ in the sputum or secretions of nose and throat from the sick to the well.

General preventive measures consist of preventing the predisposing communicable diseases, and if these do occur to give adequate care to those suffering from whooping cough, measles and influenza in order to lessen the likelihood of pneumonia. Fresh air, no overcrowding, proper food, personal cleanliness, together with avoiding fatigue and exposure are essential in the promotion of health and the prevention of pneumonia.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

DOMINION EXPERIMENTAL STATION, LACOMBE

Central Alberta Pavilion and Hall To Open March 5th

Central Alberta is recognized as one of the greatest live stock producing areas in Canada. The very large numbers of market animals — horses, cattle, sheep and swine annual sold prove this fact. The large annual sales of purebred animals, the foundation of the live stock industry are further proof.

Lacombe is centrally located in the territory between Calgary and Edmonton, and during the last twenty years the large annual sales of sheep, cattle and horses brought in from a radius of one hundred miles around Lacombe have become widely known among buyers from British Columbia to Nova Scotia. The proceeds of these sales for the last eight years have been $263,151.15; and this does not include several purebred sales for which figures are not available.

These sales have quite outgrown the old sales pavilion with a seating capacity for less than two hundred. Last fall the Dominion Government decided to erect at Lacombe a large new building to accomodate these rapidly growing annual sales, to be used for the many purposes of the Dominion Experimental Station, and to serve as a community hall for the citizens from both town and country, throughout Central Alberta. This building will have permanent seats for seven hundred, with room for chairs to seat another three hundred. It is planned to open the building with a combined concert, supper and dance on Thursday evening, March 5.

TOWN AFFAIRS—

THERE ARE various ways of interpreting a town financial statement. A town may be owing thousands of dollars yet be considered in good shape financially. This is exactly the position of the Town of Tofield to-day, it owes a lot of money, $89,282.37 to be exact, but due payments have been met and the large sum is of course spread over we believe about thirty more years.

By taxation the town collects about $19,000 a year and two items the school and debenture payments account for the greater portion of it, the school $6,000 and the debenture $6,500. The rest of it can be traced by reading the statement in the adjoining columns. The town council are a fairly economical bunch. As a matter of fact they have little choice as regards spending money. After the two main items are taken out of the receipts, there are still a number of items that could be classed as fixed charges. Secretary's salary, street lighting, road maintenance, fire protection, etc. What there is left after these are taken care of has to be juggled pretty carefully to make it go round.

There is just one really big question confronting the Tofield Town Council, that is a reduction of interest rate on the debenture debt outstanding. It is no new topic, but is becoming increasingly important as the years pass by. If it were possible to cut this interest in half the town would save a large sum of money. Effort has been made along these lines, but up to the present with no success, though late last summer, Mr. Fream, a then member of the Financial Commission said Tofield was now due for some consideration. There is a difference of opinion as to the procedure the town should take. The town has a $5145.00 reserve fund and as long as this fund is available and sufficient taxes are collected it would seem as if the town will have to rely on the good nature of the bond holders and as a class bond holders are not particularly soft hearted, where the money is obtainable, otherwise they would not be bond holders.

The other course would be for the town to allow itself to get into a position where it had no money and force the bondholders to reason a half loaf is better than no loaf at all.

The town pays six per cent on its debenture indebtedness which can be classed as long term investment. The rate of interest on bonds is supposed in some degree to represent the risk involved. It is therefore interesting to note that for long term bonds two lowest rates of interest in the world at present is that paid by the governments of Great Britain and the United States. The rate for Great Britain is 2.69 per cent; and that of the United States 2.75 per cent.

The annual meeting is on Friday night. Previous annual meetings have been poorly attended, in fact in most cases no attendance at all. Whether the attendance on Friday of this week will be an improvement over previous years remains to be seen, there are signs that it will.

MUNICIPAL COUNCIL OF BEAVER LAKE MEET

A regular meeting of Municipal Council of Beaver Lake was held at Ryley on Saturday, January 18th. There were present Reeve Moen; Councillors Chetney, Hillerud, Moen, Lucas and Kubin.

The Council was interviewed by Mayor White and Councillor Olsen of Holden, regarding the removal of the Municipal Office from Ryley to Holden. Mr. White acted as spokesman and pointed out that he did not wish to give the impression that he was trying to take the Municipal office from Ryley but if it so happened that the office should be moved to a town where a chartered bank was in operation that the Village of Holden would be very pleased to have it.

Twenty-three separate relief cases were dealt with by the council, some receiving favourable consideration, others for various reasons refused.

Moved by Mr. Hillerud that we write direct to the Viking Municipal Hospital offering them $50.00 as full settlement for the M. Sherburne account and that we inform them that we have been able, in the case of most of the hospitals, to make settlement at one third of the amount owing. Carried.

Moved by Mr. Kubin that the Secretary be instructed to segregate all relief and hospital accounts paid and that they be entered upon the Roll wherever possible and further that a set of books be set up for any accounts which cannot be charged to the Roll. Carried.

Moved by Mr. Hillerud that we agree with the Vegreville General Hospital to pay $200.00 as full settlement of our accounts with them to December 1st, 1935.

Moved by Mr. Chetney that owing to the fact that the Council cannot see any way in which Mr. Chris Lindbeck could make a living in the Hamlet of Poe that the Council refuse to sell him Lot 7, Block 12. Carried.

Moved by Mr. Chetney that owing to the fact that Mr. M. Glenger intends to establish a business in the Hamlet of Poe that we sell him Lot 12 Blk 1. Carried.

Moved by Mr. Kubin that we continue to do business with the Royal Bank, at Holden for the present and that the Secretary is instructed to open accounts there as soon as the Branch at Ryley is closed. Carried.

Moved by Mr. Kubin that Mr. M. A. Powley be appointed Deputy Returning Officer for Division Five. The Polling place will be Borothow Hall—NE 22-51-16-4. Carried.

Moved by Mr. Chetney that we appoint W. Thompson for Deputy Returning Officer, Division One and that the Poll be held at Poe School. Carried.

Moved by Mr. Kubin that we authorise the licensing of the restaurant to the Committee of the Oleskow Hall. Carried.

Moved by Mr. Kubin that we give authorization that Mr. Elsow Star of Poland may be able to have his wife and family enter Canada. Carried.

Moved by Mr. Kubin that we meet on February 8th at 1 p.m. Carried.

Moved by Mr. Kubin that we adjourn.

CANADIAN TIMOTHY SEED OF HIGH QUALITY

Due to the great drouth in the United States last year there have been increased imports of timothy seed into the United Kingdom from Canada and Continental countries. The United States up till 1934 formerly supplied all the requirements in Timothy seed of the United Kingdom and European countries. This year, however, there appears to have been a bumper crop of timothy in the United States which will probably affect the market for Canada. Sweden and Finland are being favoured as well as home-grown seed as sources of supply due to the excellent results achieved. Canadian timothy is considered of high quality and tests have been arranged at all agricultural colleges in Scotland for next year, according to the Agricultural Department of the Canadian National Railways.

ROUMANIA BUYS CANADIAN GOODS

Eighty per cent of the income of the people of Roumania is derived from agriculture so that crop conditions have a very great bearing on national. Poor crops and falling prices in recent years have seriously affected the national finances of Roumania but the prospects for the 1936 season are favourable. In 193[illegible] Great Britain replaced Germany as the chief source of supply for imports, a position Germany held for a number of years by a large margin. For the first seven months of 1935, however, imports from Germany were double those from Great Britain for the same period the year previous. During this period, imports from the United States dropped from 236.6 to 170.1 million lei. Canada supplies a comparatively small share of the market, mostly automobiles and rubber tires. Germany takes the greater quantity of Roumanian exports, followed by Great Britain, France, Austria, Italy, Hungary, Czechoslovakia, Egypt, Holland, Greece, Belgium and Poland the principal countries buying Roumanian goods, according to the Industrial Department of the Canadian National Railways.

SCOUTS DOING THEIR RELIEF

Reports from such widely separated points as Midland, Ont., and Wetaskiwin, Alta., reflect the Dominion-wide extent of Boy Scout contributions to relief work. On the same Saturday the Midland Scouts were making a house-to-house canvass for clothing for the Red Cross, and the Wetaskiwin boys for the local Welfare League.

MYSTERIOUS RADIO SIGNALS

Radio technicians speeded up efforts to determine the source of a mysterious signal audible in short wave receivers at numerous points all over the world and strong enough at times to disrupt commercial traffic.

Word reached marine department officials that the signal, constant in nature and resembling a loud power hum, had been heard as far away as India and in such widely-scattered points as Louisburg, N.S.; Herschel Island in the western Arctic; England, Labrador and the North American Atlantic seaboard generally.

The marine department said as far as it could determine the signal originated in a westerly direction from Ottawa and in a high latitude that is far north of the equator.

The best teacher is the one who suggests rather than dogmatizes, and inspires his listener with the wish to teach himself.—Bulwer.

Churchill's Reply

A story of Winston S. Churchill—told by Gertrude Atherton:

"Shortly after he had left the Conservative side of the House (of Commons) for the Liberal, he was taking a certain young woman down to dinner, when she looked up at him coquettishly, and remarked with the audacity of her kind: 'There are two things I don't like about you, Mr. Churchill.'

"'And what are they?'

"'Your new politics and mustache.'

"'My dear madam,' he replied suavely, 'pray do not disturb yourself. You are not likely to come in contact with either.'" — Atlanta Journal

TRAPPER OUTWITS WOLVES

Clayton Mack is undecided whether to assume timber wolves are cowards or blood-thirsty killers.

On a trip through the Anahim Lake country, 100 miles east of Bella Coola, B.C., the young man was stalking an eagle to obtain feathers for a broom when he spotted a huge black timber wolf. Pursuing the beast he was surprised when it stopped, sat on its haunches and howled. Presently many supporters were summoned to the spot.

Being poorly supplied with ammunition, Mack shot only the large black one and another grey running mate. On the return home he outwitted the beasts by turning around frequently and staring at them. Arrival of a horseman eventually put the wolves to rout.

Mack would not say whether the animals were merely curious or intended to attack. He was satisfied to return safely rewarded by two fine wolf skins and the bounty on them.

Little Mary

Tofield main street will not be quite the same this summer as for several summers past. Little Mary will not be up and down the sidewalks as formerly. Little Mary who was 12 years old was not quite the same as other children. When being brought from Poland to Canada eleven years ago, she contracted a cold which made her permanently deaf and dumb. And when other children of her age commenced school, Mary in her own way alone with her thoughts, was left to provide her own amusement. Many times have we observed a tiny nose flattened against the Mercury Office window, surmounted by a pair of bright eyes intently watching the wheels of the linotype go round. Though deprived of speech and hearing, Mary was smart—real smart. As she grew older she entered wholeheartedly into the play of the other girls around. In the summer when the youngsters played "Hit the Can" Mary would be right there, the brightness of her expression making up for her lack of hearing and speech. She quickly "caught on," knew the rules and was only "it" when the result of the play determined it.

Immediately south of the Mercury office there is a hollow, which the early spring thaws fill with water, the water often later becoming frozen. Mary could not pass up an opportunity like this, and somewhere procuring a pair of skates, all alone would venture out, make a stroke or two and down she would go, only to look around to see if she was observed, scramble up and try again. It was not long before Mary was skimming along as smoothly as any child of her age.

Mary loved company, honoring each Sunday school at some time or other with her presence. At the United Sunday School, cards are given the children to color and Mary was quite clever and showed exceptional talent in coloring her own cards. At the recent Christmas concert Mary was in an action sketch and took huge delight in the imaginary rolling of a pie crust.

But Mary was taken sick early in January and though she was taken to an Edmonton hospital and given every care, a sudden relapse caused her demise early morning of Saturday, February 1st.

No, as we said at the beginning, main street Tofield will not be quite the same this summer.

BEHIND THE HOG

By A.B.C.

This week's brain wave: He's a wholesome curler, he holds some six pints.

****

While down at Wainwright after some Buffalo Robes, Doc Law picked up 8 cases, 4 cases containing 24 curling spoons and 4 cases containing 160 pints of oil. He kindly divided this mess among his three little willing helpers. George Agnew, [illegible] Shooter and Oil Pedler from Wainwright took care of the Buffalo [illegible].

****

One of our Scotch Curlers lost his Tam-O-Shanter at the rink and he had to try on several before he found his own.

****

To Cold for Curling

The Eskimo sleeps in her white Bear Skin, and sleeps very well I am told, But last night I slept in my bare white skin, and caught a Helluva cold.

****

Our three day Spiel starts next week, we expect to be back at work about noon of the second day. That's what you think.

After a curling game one curler beat his wife all the way home. By 5 minutes.

****

It was a toss up whether he went to church or curled. Yeah, and he had to toss 15 times before putting on his curling togs.

****

How About Fees?

Ashes to ashes, Dust to Dust,
If the curlers don't pay, the Sec'y must.

****

In curling, Go slow and fare well; Go fast and farewell.

Miss L. Ross motored to Wainwright on Sunday to attend the hockey game between Tofield and Wainwright.

The Misses Katharine and Alice Moon of Edmonton spent the week end here.

We very much regret that while making mention of the mark of respect shown to His late Majesty King George V., by the lowering of flags to half mast, we omitted that flown by the staff of the Alberta Government Telephones.

The report of the Tofield-Wainwright game we are compelled to hold until next week. The game was played at Wainwright last Sunday and resulted in a 3—3 tie.

Annual Ratepayers' Meeting

On Friday evening at the Town Hall quite a large gathering of ratepayers assembled to hear the various reports of the Mayor, Councillors and Secretary and also to carry on any discussion deemed necessary.

By motion Mr. George Edwards was elected chairman and the meeting endorsed the appointment of Mr. W. Chapman, town secretary, as secretary of the meeting.

The chairman after a few introductory remarks brought up the matter of council purchasing and installing the fire alarm siren. The exact cost of the siren completely installed was $384.87. The chairman was under the impression installation costs were sixty-odd dollars, but a reference to the records showed them to be thirty-odd dollars, this including material as well as labor. Discussion then centred as to whether the council should have bought the equipment through an agency or direct from the factory. It had been purchased through M. C. Hammond. A difference of opinion developed here, some maintaining that companies selling electrical equipment had two figures, an agents figure and a retail figure and that the council had no choice in the matter. Others claimed the council by dealing direct with the factory could have been granted a rebate.

Discussion then swung to the debenture debt, the town secretary stating that he had written to the two largest bond holders and had received a reply from only one. This reply could be construed as being favorable for a consideration of the debenture debt. The other, the largest bondholder did not reply to a further letter.

Mayor Bruce then gave a brief account of the town business for the year, mentioning the new assessment, the effort made to have the debenture debt reduced and other matters.

A motion by Mr. George Coutts seconded by Mr T. McBratney was then passed endorsing the stand taken by the council on the debenture debt, and urging them to do all in their power to bring about speedy action.

School matters then came up for discussion, the chairman mentioned that the office of school secretary and town secretary were held by the same individual and thought in these times the office of school secretary should be given to some other person. It was pointed out that the two offices in some respects interlocked and there were advantages in having them in the same building, also the salary of the school office $90.00 per year did not make it, in view of the amount of work involved, very attractive.

Mr. A. Harrison asked the meeting to register its opinion regarding the school board having the children inoculated against scarlet fever. On the motion of Mr. C. Swift, seconded by Mr. T. McBratney the meeting went on record as favoring the school board arranging to have the children inoculated.

A vote of thanks was then accorded the council and school board and the meeting adjourned.

Following is the secretary's report:

To the Mayor and Councillors of the Town of Tofield:—

Gentlemen, under the Town and Village Act, the provisions regarding annual ratepayers' meetings require that the Secretary-Treasurer prepare and submit a report for the year last past.

As this is the last council meeting to be held before the annual ratepayers' I am first submitting my report to you:—

I beg to report as follows:—

1st. **Personnel of council:** Mayor G. B. Bruce, Councillors Swift, Lovell, Bellamy, Chapman, Taylor, and Hammond.

Councillors Chapman, Taylor and Hammond's terms of office expire in February 1936.

2. **Auditor**, McCannel Bros. & Co., Chartered Accountants of McLeod Building, Edmonton. The above firm has audited the books of the Town and School District for the past eighteen years.

3. **Books and Records**, the books and records of the Town have been properly kept. The minutes of each council meeting, and each by-law passed have been placed in proper books kept for that purpose. The books of account have been audited periodically during the year; and on January 13th last, the Auditors completed the audit for the year 1935 and prepared the Annual Financial Statement. A statement of Receipts and Expenditures and a Balance Sheet, together with a statement of Debenture Liability will be published in the Tofield Mercury of January 22nd. As members of council are aware, in addition to periodical audits, a statement of each month's receipts and expenditures have been submitted month by month to the council and are incorporated in the minutes of the meeting at which they were read.

4. **Assessments:** The assessor for the year 1935 was Mr. Edward B. Mowers of Calgary who was engaged by the council to make a new valuation of all property in the Town and School District; also to make a new assessment of all premises used for business purposes. The result of the new assessment was to reduce land values and increased improvement values. Value of Buildings and Improvements in 1934 for assessment purposes was $100,944.00 while in 1935 it was $135,196.00. The reduction in land assessments just about offset the raise in improvement values.

5. **Debentures:** Provision was made for the redemption of all debenture coupons falling due in 1935 in the amount of $8560.34. Since the refunding issue was made in 1924 a total of $72,262.74 has been paid to debenture holders of which $9561.90 was applied on principal and $62,700.75 on interest. During the year 1935 a petition was presented by the Council to the Board of Public Utility Commissioners, requesting the Board to negotiate for the Town with the bondholders for a reduction in the rate of interest payable on the Town's bonded indebtedness. The present interest rate is 6 per cent. Material covering about 25 years, and giving exhaustive information as to assessments and finances over that period were prepared by the Secretary-Treasurer and submitted to the Board.

I have recently written to the Board asking what steps have been taken in this matter, so that the information might be available at the ratepayers meeting. I have not yet heard from the Board on this matter.

The total amount owing to the various owners of the Town of Tofield debentures is $80282.37.

The two largest bondholders were written last year, before the Board of Public Utility Commissioners were written, as towards their attitude toward a reduction in the rate of interest. No reply was received from the Canadian Order of Foresters although they were written again some months later and asked for a reply. L'Union St Joseph Du Canada replied in what might be considered a favorable tone. This letter was filed with the Board for its information when dealing with the matter.

6. **Tax Levies:** The tax rate of land and improvements in town limits for the year was 60 mills, with an additional levy of one-half of one mill for Supplementary Revenue purposes. Rate of levy on businesses was also 60 mills.

7. **Tax Collections:** Under the new Town and Village Act provision is made for the consolidation of current levies for municipal and school purposes. This method was followed and the total taxes collected (including amounts received for lands sold for taxes) was $16816.50. This amount was collected on lands and improvements in town and school

JOBB and Co.

"There's Not Much In It--- But All Reach For It."

Country newspaper men [illegible] knocks and boosts, unkind words and kind [illegible] daily bill of fare. We have never known one [illegible] on a diet of praise but we have observed [illegible] knocking gave the first push along that journey in a westerly direction from which there [illegible] return. Consequently it was with some [illegible] that we heard from the lips of a subscriber [illegible] years standing, "There's not much in it, but they all reach for it when it comes in."

It is true of course that there is not much in it," when considered in the light of modern city journalism. But it would [illegible] true to say "there is not much in [illegible] western Canadian weekly newspapers mirror in no uncertain manner the towns in which they [illegible]. Almost invariably the larger the town [illegible] the paper. But it was a much appreciated compliment the lady was giving us, and as such has [illegible] appeal than this office. The [illegible] of a family that have been [illegible] as one of his best customers. We are [illegible] in a deep seated communal loyalty and [illegible] the subscriber believes the same, anyway the family lives it. If real communal loyalty [illegible], a great deal of the discontent [illegible] rural districts today would [illegible]. There is reason in all things of course and we would not like to see a 'yokel' type of [illegible], but it is hopeless for certain rural communities to expect to make much headway [illegible] worship at distant economic shrines. Business men, professional men and merchants should take note of this incident, for it has a deeper significance than perhaps at first intended. Effort should be made to hold the interest of rural residents; there is always a strong under-tow toward [illegible] and this should be counteracted by a strong [illegible] pull toward the local community centre.

True communal loyalty is not built up over night. It is not even quickly brought about by a "Buy at Home" campaign, valuable as this might be. What brings communal loyalty [illegible] is the every day business of [illegible]. Contact must be constantly maintained [illegible] there is no better way of maintaining [illegible] through the columns of the local paper. Even if "all reach for it when it comes in," there is not much advantage to the merchant or business man whose message is missing.

HUNTING IN CANADA

WIDE VARIETY OF BIG AND SMALL GAME

HUNTING GROUNDS EASILY REACHED

SEASONS OF GENEROUS LENGTH

[illegible]

Hunting Grounds Easy of Access

A considerable [illegible] of much of Canada's hunting territory. The country is well served by roads, railways and steamboat lines over which the sportsman may [illegible] in comfort to the game [illegible] [illegible] now be reached [illegible] [illegible] game area and [illegible] will be found reliable [illegible] guides who [illegible] In several of the provinces it is compulsory for the hunter to be accompanied by a guide but even in those provinces where it is not compulsory it is [illegible] advisable to engage guides. [illegible] the territory in which they operate are able to add greatly to the enjoyment and success of the trip.

Conservation of Game

In Canada a practical form of conservation is found in the setting aside of tracts of public lands as game reserves and in the rigid protection of game in the extensive national and provincial parks. In these areas the game multiplies rapidly, under protection and spreads over into the surrounding country. These favourable conditions coupled with sound protective legislation regulating the open seasons, bag limits, issuing of licences, etc.

HEALTH
by
A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

BAD BREATH

Whether it is called bad breath, or halitosis, it is equally offensive, and most, if not all of it can be overcome by giving greater attention to the care of the mouth.

Halitosis is not a new complaint. It was known to the Greeks who called it by several uncomplimentary names. Modern advertising has had so much to say about it that many people have been made uncomfortable for fear that they may be offending.

The most common cause is the teeth. We all know the bad smell which comes from decaying meat or vegetables. Similar decay takes place in the mouth when particles of food are left in and around the teeth, and the breath is tainted thereby. Teeth which are themselves decayed, or gums which are oozing pus also foul the breath.

One odour may be overcome by another odour, it is then a question as to which you prefer. At one time, perfume was used chiefly to offset body odours due to a lack of bathing. Mouth washes and gargles do not take the place of mouth cleanliness any more than the use of perfumes overcomes the need for regular bathing.

The bad breath may arise from diseased tonsils or infected sinuses; rarely is it due to other than local conditions in or adjacent to the nose and mouth. Eructations of some material from the stomach will taint the breath for a few minutes only.

Proof that it is the particles of food which are responsible is seen in the experiment carried out when onions and garlic were swallowed in capsule form; there was then no odour of either on the breath.

Social customs have had an important influence upon personal health, which in turn, contributes to the general health and well-being of the whole body. A healthy mouth allows for proper mastication and so gives digestion the right start. A healthy mouth is a clean mouth, and a clean mouth is an odourless cavity.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

POULTRY WAX NOW AVAILABLE IN STORES

The interest aroused throughout the Dominion by the wax-plucking demonstrations carried out by representatives of the National Research Council of the Dominion Department of Agriculture has resulted in the wide-spread adoption of this successful method of preparing poultry for market. In the first place it is not an expensive process and it improves the appearance of the plucked bird. Not only are the pin feathers and hairs removed but the scurf and scale on the skin are taken away and a most pleasing and fresh appearance, which adds to the sale value of the bird, is the result. There is also a substantial saving in time, particularly when very pinny specimens, are dealt with and the operations involved in the whole process are simple and straightforward.

The only initial drawback to the universal use of this method was the scarcity of the special wax necessary for successful plucking. This wax was prepared at the laboratories of the National Research Council and, necessarily until arrangements could be made for wholesale manufacture the supply at first was limited. Ordinary forms of wax, of course, are not satisfactory. However, the difficulty has been overcome and an adequate supply of wax is now available at hardware and flour and feed stores throughout the Dominion.

TO EXTEND CARCASS GRADING OF HOGS

The increase in the number of hogs being carcass graded under the service arranged by the Live Stock Branch, Dominion Department of Agriculture, indicates that this system is proving very popular among farmers in Eastern Canada and arrangements are therefore being made to introduce it into Western Canada.

Dressed grading means that hogs are graded as carcasses after being slaughtered and hung on the rail, and consequently the farmer is paid on the basis of quality and weight after slaughter. The results of this system have shown very clearly that top quality hogs yield higher returns to the producer than under the live grading system.

It is possible to grade the hog much more accurately after it has been dressed because then such characteristics as thickness and distribution of back fat, balance of carcass, thickness of belly and other characteristics can be noted correctly. In addition only by this system can the exact weight be known.

These points are very important for a large proportion of Canadian hogs are exported to Great Britain as Wiltshire sides and if these are not up to the exacting standards demanded a sharp discount in price is the result. Moreover, the hog which produces the best Wiltshire side for the export market is also the one that commands the premium price on the domestic market. It is by the dressed or carcass grading system that the producers can get information which will assist him in learning the value of raising the best quality of bacon hog.

The market both at home and abroad is never glutted with quality products; it is the low grade product that sags the market. There is always a ready demand for the highest grade product.

Incidentally Canada is the only country exporting bacon that does not have a general system of carcass grading.

SOIL DRIFTING CONTROL IN WINTER AND SPRING

Winter drifting is a serious hazard where the ground is bare of snow for any length of time, unless good control practices have been followed in the summer. If the soil thaws under such conditions, any method used at other times to prevent drifting may be employed in winter, such as ridging by deep cultivation with a duck-foot, listing, ploughing furrows or even ploughing the entire field but if all but an inch or two of the top surface is frozen the disk is about the only implement that can be used. A single disking has been quite effective in checking drifting temporarily on loam soil on the Dominion Experimental Station at Lethbridge, Alberta. The disk runs on top of the frost and puddles the soil sufficiently to furnish protection until the clods thrown up are again broken down by weathering. Little trouble is experienced with the disk clogging except on extremely heavy soil, as the pans vibrate sufficiently on the frozen soil to shake off the mud.

Disking may not be effective on sandy soils, and, if not effective, scattering straw or manure may be about the only control method available in winter. Considerable labour is involved in scattering manure, but straw spreads much more easily. A load may be sufficient for 2 to 3 acres if only an occasional spot has started to move, and severe drifting has been stopped with about a ton of straw per acre.

It is necessary to cultivate fallows in the spring before seeding, to destroy weeds, and, if the soil is likely to drift, this first operation may be made an effective drift control measure by cultivating deeply. Where a top crust is present it may be broken up into a cloddy mulch with a shallow cultivation. A drag harrow is sometimes satisfactory for this purpose.

For extreme cases of drifting, ploughing or deep listing may be desirable before seeding, but if straw is available it may be more feasible to stop the drifting with it than with extreme cultural practices. Straw is also useful where drifting starts after the grain is seeded. Ploughing furrows at right angles to the wind may be effective on seeded fields, but if conditions are extreme it may be desirable to give the field a deep cultivation or ploughing and reseed.

More complete information is available in bulletin 179, Soil Drifting Control in the Prairie Provinces, which may be obtained free of charge by writing to the Publicity and Extension Branch, Dominion Department of Agriculture, Ottawa.

BEES AND WASPS

When watching a wasp or bee drive home its weapon, one gets the impression that it is done in fiendish glee. Such an impression however, is not correct, for these insects seldom attack except upon provocation of some kind, but unfortunately it is not always the guilty party who suffers. Bees and wasps are very closely related insects, and there are many species in each group some of which live together in colonies, while others are solitary in their habits. The honeybee is the best example of the social bee; its colonies often consist of seventy-five thousand to one hundred thousand individuals, each of which are subordinate to the welfare of the colony. Normally a colony of honeybees is continuous from year to year. The bumble bee is another type of the social bee, but its colonies contain fewer individuals than the honeybee colony and are not continuous since it is only the queens that live through the winter, and each queen starts a new colony in the spring. In addition to the social bees, there are numerous species of solitary bees that make their nests in many different places, but never form colonies, although several of these bees may congregate and build their nests in one locality. A common type of solitary bee is the leaf-cutter that takes semi-circles from the leaves of plants, chiefly rose bushes. These pieces of leaves are used for nest building.

There are also social and solitary wasps. The social wasps form colonies, and some build their nests either in a suitable cavity in the ground or in hollow logs or walls, while others build in the open, suspending their nests from the branches of trees or the eaves of buildings. The wasp colonies break up in the autumn and new ones start each spring. The solitary wasps build in the ground or in some suitable cavity elsewhere. One common type is the mud dauber that makes its nest of mud, attaching it to the rafters of buildings or some other convenient place. Wasp and hornet are synonymous terms, but the latter is usually applied to those wasps that build their nests in the open. Both bees and wasps are beneficial insects. Honeybees of course are well known. Bumble bees and solitary bees are useful for pollinating flowers, while the wasps are useful in that they prey on other insects that are injurious. The benefits derived from these insects far outweigh the occasional sting and transitory pain that may be inflicted by them.

HAPHAZARD SETTLING OF WEST IS BLAMED

TORONTO, Feb. 6.—Four major factors have retarded economic recovery in the west, John M. Imrie, managing director Edmonton Journal said Thursday in an address at a joint luncheon of the Empire club and the annual convention of the Canadian chamber of commerce. He called them "mistakes" by the west itself and by the country as a whole.

First and fundamental was the mistake of "haphazard settlement," the scattering of 290,000 farm homes over the long stretch from southeastern Manitoba to the Peace River area—a distance of 1,200 miles. Tens of thousands of farmers, Mr. Imrie said, were permitted to homestead on sub-marginal lands where failure, or at best precarious living was inevitable.

"With the hindsight that is usually clearer than foresight, it is apparent now that under ordinary settlement, with outer areas opened up only as those closer in were settled one prairie province would have sufficed, and enormous expenditures on public buildings, roads, government education and other public services would have been avoided," he said.

Other major mistakes were overemphasis on wheat production, an unwarranted increase in public and private debt and the withholding of wheat from market in 1929 in expectation of higher prices and the associated establishment of direct selling agencies in Britain and elsewhere.

One corrective measure "must surely be a thorough and searching inquiry into the whole problem of settlement on sub-marginal lands," Mr. Imrie said.

"Thus far we have simply played around this problem," he asserted. "In some quarters there is an attitude of 'Hush, hush,' with a forecast of another series of wet years. Others are putting forward a great variety of alleged but quite contradictory solutions.

Must Face Problems

"Meanwhile in some sub-marginal districts one-half or more of the occupied farms have been abandoned and many others are being maintained only through large relief expenditures. It is high time we faced right up to this difficult and delicate situation and ascertained:

"First, the actual conditions; second, which areas are worth salvaging, having in mind the need of low production cost and high-quality production in a period of low world prices; third, by what process such salvaging is to be effected; fourth, which areas should be completely evacuated, and fifth, where and how settlers presently on the latter may be given a new start.

"In my own province," Mr. Imrie said, "approximately 2000 farmers have been moved recently from sub-marginal lands to those of greater promise. That process must be extended both in Alberta and Saskatchewan. But it is only part of the ultimate and complete solution, and as yet no one knows what that it."

Favors Diversification

Mr. Imrie favored encouraging the tendency toward diversification of production in areas suited to mixed farming. The empire trade agreements, he said, already have resulted in an increase of 800 per cent in hog production in Canada, but even so shipments of bacon and hams to Great Britain last year were only 45 per cent of Canada's quota. He hoped the quota would be attained by 1937.

While immigration was not a welcome word in these days of unem-

(Continued on back page)

CORNHILL M.D.'S FINANCES WELL MANAGED—

During this week there has been a general distribution of the financial statement of the Municipal District of Cornhill, part of which appears in this issue. By careful reading, the average ratepayer may ascertain how the money paid by him to the Municipality is spent; how the Municipality stands as regards its general financial condition and in addition how much his own school district and other school districts cost to administer. There is also plenty of other detailed information.

It is generally taken for granted that hard times make tax collections more difficult and no doubt such is the case, consequently it is with some surprise that we note that Municipal taxes and costs paid in cash in 1934 was $19,845.19 and the same item for 1935 is $20,819.18. These figures speak well enough for the tax paying ability of ratepayers or the tax collecting ability of the office staff—or both. However if we turn to the assets and liabilities page we find that in 1934 the uncollected Municipal taxes (for all years) is $39,607.90 while in 1935 it had advanced to $42,828.45. This is accounted for no doubt by the fact that while more money was collected on Municipal taxes in 1935 than in 1934, in no one year are all the taxes paid that are levied.

The financial condition of the Municipality as a whole is good. There is a substantial amount in the bank to the districts' credit and the assets are considerably in excess of the liabilities.

It is not possible to get a true picture of the district's finances by picking out an item here and there, the whole statement must be read and studied. Even the items we have mentioned, while correct as far as the figures are concerned need to be read as part of the whole statement rather than isolated items.

Upon the reeve and councillors of course, falls the responsibility of policy, but upon the secretary-treasurer falls the responsibility of detailed financing. Therefore the secretary of Cornhill Municipal District is to be congratulated upon, even through difficult times, keeping the "district's head" above "financial water".

THE ANNUAL MEETING!

Interest in town affairs has the remarkable quality of floring up and dying down like one of those old kerosene flares common among side shows forty or fifty years ago. For many years the Annual ratepayer's meeting was so poorly attended that one could almost say that there was no attendance at all. Then quite suddenly in 1936 enough interest is created to fill the town hall almost to over flowing. Judging by the time given over to a discussion regarding the purchase and installation of the new fire alarm siren, this piece of equipment has the peculiar quality of drawing men together whether silent or shrieking its alarm. In the discussion pertaining to this piece of equipment too much emphasis was placed upon whether the agent's commission could or could not have been saved. This probably is an open question and will have to remain so. Strangely enough, with the exception of a casual remark by a ratepayer present, no question was raised as to whether it was a wise or unwise purchase. Whether it is worth what it cost or whether it would have been better not to have purchased it at all.

Naturally enough the debenture debt again came in for considerable discussion, the meeting passing a resolution urging the council to use every endeavor to obtain a reduction of the interest rate which was, of course, good business. While the Mercury fully appreciates the viewpoint of some people, that to get a reduction of interest it is better to keep up regular payments, in other words to play fair regardless of sacrifice, we also feel that to get attention from the bondholders, inability to pay will have to be stressed. It is rather futile to stress inability to pay when the town keeps on paying. Bond interest rates are down to what they were a few years ago and this argument could possibly be used.

HOCKEY BOYS PROFIT BY QUILT RAFFLE

The hockey team now have suits all the same color, thanks to the enterprise of Mrs Malcolm and Mr Burrows, and the selling ability of the Misses Pat Burnett Muriel Malcolm and Loret Ross. In all 600 tickets were sold the gross proceeds being something over $50 00 The suits were paid for, the quilt paid for, tickets paid for and a surplus of $15 00 handed to the hockey club

The quilt was drawn for on Wednesday evening at nine o'clock, Mayor Bruce drawing the ticket The lucky winner was Mr Hubert Bethel of Tofield.

CARD OF THANKS

The Tofield Senior Hockey Club wishes to thank Mrs Malcolm, Mr Burrows, the Misses Pat Burnett, Muriel Malcolm and Loret Ross, as well as all others who assisted in making the recent quilt draw a success

POOL ROOM FIRE EXTINGUISHED IN EARLY STAGES

About three o'clock Tuesday morning citizens were awakened by the fire siren sending forth its urgent call. In a very short time members of the brigade were at the fire hall and drove the truck to the scene of the fire McBratney's Pool Hall on third avenue

The floor had become ignited from the stove and the fire was spreading underneath There was plenty of smoke but little actual blaze. By chopping sections of the floor away and playing chemical liquid on the burning joists the fire was got under control the damage being roughly about one hundred dollars

The fire was first discovered by Mrs W Bailey who had got up to cover her young daughter Observing clouds of smoke through the window, Mrs Bailey investigated and then informed Mr Bailey the pool room was on fire Mr Bailey jumped up, observed the smoke, and then sent in the alarm

It is very fortunate for all concerned that Mrs Bailey discovered the fire when she did, otherwise another extensive conflagration would possibly have occurred The amount of insurance carried on the pool room was negligible

HAPHAZARD SETTLING OF WEST IS BLAMED

(Continued from page 2)

ployment, the speaker believed the time was not far distant when a selective form of immigration would be desirbale and possible "I have in mind particularly those fitted and willing to engage in mixed farming on small holdings on a basis of self-attainment, rather than for export," he explained

"Thickening-up" of settlement in the better prairie areas would help to ease the west's debt burden, he thought Alberta's Social Credit premier, William Aberhart, was credited with working along the lines of debt reduction

"In my own province a definite effort is being made at the moment to reduce expenditures with a view to early balancing of the budget This, at least must be put to the credit of Premier Aberhart," he declared.

A CHOICE OF SEVEN FOR THREE OFFICES

The ratepayers of Tofield will have a choice of seven candidates at the municipal election to be held on Monday More often than not Tofield councillors are elected by acclamation, but not so this year There were eight men nominated, but Mr T. McBratney withdrew Those seeking municipal honors are A E Calvert, Barber, John Chapman, Retired; George Coutts, Garage operator, George Edwards, Coal Miner, M C Hammond, Implement agent; Frank F Law, Physician and Surgeon; Thomas E Wallington, Teamster

MR THOMPSON, ELEVATOR AGENT AT BARDO HURT

Mr Thompson, resident of Tofield and elevator agent at Bardo met with a painful and serious accident while at work on Monday He was carrying some ashes down a stairway when he slipped and fell striking his hip or back He was found to be in a serious condition and Constable Davis of Tofield was notified He made a quick trip to Bardo and brought the injured man to Tofield in the caboose of a freight train that happened to be passing From the train he was taken to his home at Tofield, later being transferred to Edmonton Latest reports are that further examination of his injuries will be necessary before the exact extent of injuries can be ascertained.

Mr. JAMES HANNAN, SR.

The death occurred at St Mary's hospital, Camrose on Saturday, Feb 1st of James Hannan, father of J. D. Hannan, proprietor of the Arlington hotel He was 86 years old

The late Mr Hannan had made his home with his son for the past sixteen years He was a familiar figure in the rotunda of the Alexandra hotel at Tofield when his son was proprietor there, and had also been a familiar figure about the Arlington hotel here for the past four years, his genial personality earning for him the friendly name of "Dad". He will be missed, particularly by members of the traveller' Association. Mr Hannan had been active and in good health until a month before his death.

Deceased was born in Ontario in 1850. The body was sent to Mt. Carmel, Ontario, for interment beside the remains of Mrs. Hannan, who predeceased her husband 30 years ago.

He leaves to mourn his passing, his son, "J D." and daughter-in-law, Mrs. Hannan; two grandchildren, Bud Hannan of Tofield, and Mrs. James Carver of Saskatoon, and six great-grandchildren, Glenn, Keith and Carrol Hannan and Doreen, Doris and Bill Carver.

CARD OF THANKS

I wish through this medium to thank the fire chief, the fire brigade and any others who assisted in extinguishing the fire at my place of business early Tuesday morning.

T. McBRATNEY

ANNUAL RATEPAYERS' MEETING WELL ATTENDED

(Continued from front page)

district In addition the sum of $1,321.84 was collected from business tax and $184 00 from Minimum Educational Taxes

Proceeds from lands sold which were not credited to taxes amounted to $1080.00 This represents cash proceeds from cancelled subdivisions

General During the year a fire siren was installed at a cost of $334.47 This was not budgeted for The sum of $288 50 was spent on cancelling subdivisions This amount was not budgeted for. However, during the year some 800 lots were secured by the Town under various procedures and lands cancelled during the year and for which the town now has titles, are 2 blocks of approximately 13 acres each, 1 block of 9½ acres, and 1 block of 20½ acres. Proceedings have been commenced against Tofield Heights subdivision, and will be completed during the year This subdivision contains 120 acres A survey was made of an additional portion of the cemetery, and a new plan of the whole cemetery made by the surveyor.

It is almost unnecessary to mention the disastrous fire which almost wiped out all buildings on Block 11 Main street.

Some new buildings have been erected, namely by J. J Hannan, Dr. F. F Law and Central Co-operative Stores Limited. The new buildings erected, however will not replace the assessed values destroyed in the fire.

The reserve Fund was not used during the year, although the council passed a by-law for the purpose of permitting the Town to hypothecate certain of the bonds in order to secure a loan if necessary The Reserve Fund consists of Edmonton Debentures having a par value of $5000 00. They are shown above in the balance sheet at the figure which they cost the town, namely $4145.40.

Comparing Tax collections with the previous year, in 1934 a total collected for all purposes was $15,251.01 in 1935 the total collected was $18,082.40.

In the estimates for the year 1935 the receipts were $18280.57. Actual Receipts were $20,888 10.

Estimated Expenditures were $17,370 82, while the actual expenditures were $14,700.00.

Each parcel of property on assessment roll in the Town and School District has been checked for the purpose of ascertaining the actual amount of taxes collectable as at December 31st, 1935 This is shown in the balance sheet as $8506 65

MARY EWANIW

Mary Ewaniw, the 12-year-old daughter of Mr. and Mrs. P. Ewaniw of Tofield, Alberta, passed away in the city Saturday, February 1. The funeral service was held on Monday afternoon at 2:00 o'clock from the Greek Catholic church, 97 st. and 108A ave. Interment took place in the Edmonton Roman Catholic cemetery Rev. Father Dydyk officiated Andrew Bros., funeral directors.

Mrs. Geo Bruce visited the city for the week end.

LINDBROOK

The cold snowy weather still stays with us and is making the stockmen look askance at their forage supplies, and the grain farmers are wondering how many lakes they will have to plow around this spring with resultant less acreage and more awkward to work the fields Oh, its a great life, but lots, after seeing the "Mutiny on the Bounty" think Tahita would be a good place to be, still that would have its drawbacks too

Mrs G. Jones and Mr. Ernest Jones of Vancouver who have been here visiting their relatives the Hooper family left last week for their home, as did Miss Rita Cowan whose home is in Saskatchewan.

Congratulations to Mr and Mrs. W Herbert of Lindbrook North on the birth of a daughter. Both mother and baby are doing fine.

We regret to hear that Madame Jean Corbin, wife of Mr J. Corbin of Lindbrook was taken to an Edmonton hospital seriously ill. We hope soon to be able to report her speedy recovery.

The first lamb of the 1936 season arrived at Mr. A. Scott's farm here this week. It was born Sunday night when it was about 30 degrees below zero, but despite its chilly reception the youngster is alive and well and husky.

NOTICE OF POLL

Town of Tofield—Municipal Elections

Public Notice is hereby given that an election will be held for the office of councillors of the Town of Tofield for the years 1936 and 1937, and that the polling will take place on Monday the 10th day of February A.D. 1936 from ten o'clock in the forenoon until seven o'clock in the afternoon at the Town Hall, Tofield; and that I will at the Town Hall in the Town of Tofield at 9 o'clock in the evening, sum up the votes and declare the result of the election.

Given under my hand at Tofield, this 4th day of February A.D. 1936.

J. W. CHAPMAN,
Returning Officer.

Lee Burnett suffered a painful accident while playing hockey at Wainwright when he strained the ligaments of his knee. He is improving now although it will keep Lee of his skates for a while

LAKESHORE

Mr. L. H. Graham left on Sunday for Calgary where he will attend the School Trustees' Convention held there this week.

Mrs. McConnel entertained Mrs John Wood, Miss Maggie Wood and Mrs. J. H. Johnston one afternoon last week.

Grace Mackinnon and Neil Phillips were guests at the Murray home on Friday evening of last week.

The Ladies' Aid held a very successful social evening at the Booth home on Friday evening. As usual the checker tournament created quite a lot of interest to both participants and spectators.

The battling bridge players met at the Johnston home one day last week and Mrs. Graham and Mrs. Phillips went down to defeat. But there's always another day.

A dance was held at the T. A. Jones' home on Friday evening, and as usual when this popular couple entertain a good crowd attended and a splendid time is reported by all.

TO THE EDITOR

Dear sir:

Through your valuable paper I would like to pass my opinion upon what might have been two more disastrous fires, namely Mr. C. Hammond's and Mr. McBratney's. One of the fitest of the fitest in this town of Tofield tried to show me that the fire siren saved the day in both cases. I am open to admit that it played its part as a unit, but this gentleman seemed to forget the other unit, our young and worthy fire fighters, who, since being organized has so promptly answered the call of the siren, realizing they had a duty to perform. So anxious to perform that duty I understand one of them forgot to don his underwear at 40 below. Let me say then, with such fire equipment that we have it was not the siren that saved the day, but the prompt action of our fire boys. Let us give credit where credit is due.

Yours truly,
GEORGE EDWARDS.

Tofield Annual Bonspiel Making Good Headway

With keen ice and sub zero temperature the curling fraternity at the Annual Bonspiel are playing the game as it should be played—and enjoying it.

As in former years there are four main events each carrying its quota of prizes for the skillful and fortunate winners. Neighboring curling associations are well represented ten visiting rinks being present. It is interesting to note that two of the visiting rinks are skipped by former residents of Tofield, namely, George Agnew of Wainwright and J. D. Hannan of Camrose. Other visiting rinks are Kingsbury of Edmonton, Cowley and Davidson of Wainwright, Ross and Graham of Viking, Kmond of Holden and Hay and Anderson of [illegible].

In addition to the visiting rinks are a number of local rinks comprising: J. W. Chapman, A. B. Clutterham, J. G. Jobb, Dr. F. F. Law, W. C. Swift, Bud Hannan, M. C. Hammond, S. Yakabuski, L. W. Smith.

At time of writing the competitors are advancing to the eights Winners of the different events will be published next week.

LOCAL CAST TO PRESENT POWERFUL PLAY

Departing from the straight comedy, under the auspices of the Anglican vestry, a local cast will this year present a three act production of the comedy drama type.

The story of the play to which there is a moral attached deals with the experiences of an old gentleman together with those of some relatives and friends. Honor and sacrifice are presented at their peak and the dramatic part of the production will be of absorbing interest to you. Intermingled with the unfolding of the story and becoming a part of it is plenty of sparkling wholesome comedy that will lighten your heart against the adversities of every-day life. Remember the date, time and place, for it is a good play to see. At the Variety Theatre, Tofield, Friday and Saturday, February 21st and 22nd.

Central Co-op Store

KETCHAMOOT

We regret not having more news, but when we all do most of our visiting on the phone and have the radio for entertainment, well it just isn't done to go out in such weather as we have had since the new year.

Mr. and Mrs. Joe Sutton and children spent Friday and Saturday in Edmonton.

Mr. Thompson, Bardo elevator man met with a painful accident one day last week, when carrying out ashes he slipped and fell on some steps. He was taken to an Edmonton hospital the next day, being unable to walk. While no bones were broken, he will have to remain in the hospital for a week or ten days.

Mr. Earl Carlisle has been taking chiropractic adjustments in Edmonton the past two weeks.

Mrs. A. F. Schultz visited her brother Mr. Fawcett in an Edmonton hospital, who had suffered a stroke.

Mrs. L. Carlisle entertained the Ladies' Aid at her home Wednesday afternoon of last week. Owing to the severity of the weather not a large crowd was present, but those that braved the cold spent a pleasant afternoon. Four members and five visitors were in attendance. The March meeting will be held at the home of Mrs J. H. Ingram.

We were very sorry to hear of the death of Mrs. Hill, our former Bardo correspondent and mother of Mrs. Lorbekme at her home in Oregon. Mrs. Hill had passed her 80th year and was beloved by all who knew her.

Mr. Herold of Edmonton has taken over the grain elevator in the absence of Mr. Thompson.

Our sympathy goes out to our mail man, Mr. Bailey, and his faithful steed this winter. At times the mail doesn't seem to be so important as to make the trip, but not once has he missed.

The Holy Trinity W. A. are holding a whist and bridge drive at the home of Mrs. Malcolm on Monday, Feb. 17th, at 8:30 p.m. Good prizes and lunch. Admission 25c.

LOCAL AND PERSONAL

We regret to hear that Miss Jean McLeod is on the sick list.

The hockey play-off games have been postponed until the weather moderates.

Mrs. W. K. Seale returned home after a week's visit in Edmonton.

Frank Carter is visiting at the Thomas home here.

Miss A. Wick of Viking visited Tofield over the week end.

Barney Kendall attended the Dairymen's convention in Edmonton on Tuesday.

Mr. and Mrs. Eldred and Bill McCauley visited the city on Wednesday and Thursday. While there Mr. Eldred attended the Dairymen's convention

Mr. C. Sprott spent the week end visiting at the Bowick home here.

There are quite a number of cases of the measles throughout the district just now. Most of the cases are, however very mild.

The Jolly Twelve Bridge Club met at the home of Mrs. Thomas on Wednesday evening. Honors went to Mrs. Rogers and Mrs. Coutts

The regular monthly meeting of the Women's Missionary Society will meet at Mrs. Cowell's on Thursday afternoon, January 20th. Visitors very welcome.

On Wednesday evening Miss Malcolm entertained a few friends in honor of her birthday. Bridge was played and honors were won by Miss Thelma Jobb and Mr. Newell.

WAINWRIGHT PRESBYTERY TO MEET HERE

The Presbytery of Wainwright will meet in the United Church on Monday afternoon February 17th. There will be interesting papers and discussions at all the sessions which are open to the public.

On Monday evening at 8 p.m. Dr. J. L. Nicol, Saskatoon and the Rev. E. F. Kemp of Irma will deliver addresses. Everyone is invited. An offering to meet expenses will be taken.

The Presbytery will continue until Tuesday afternoon. The Rev. R. W. Griffiths of Kinsella is chairman of the Presbytery.

On Sunday evening, February 23rd, Miss Constance Ward of West China will speak in the United Church.

WAINWRIGHT AND TOFIELD PLAY TO 3-3 DRAW

Wainwright and Tofield played to a 3-3 tie on Sunday last at Wainwright. Both teams played good hockey and the score is a good indication of the play. The goals were scored by Key, and Ganderton for Wainwright and by W. Worton, L Glover and J. Bowick for Tofield.

These teams were to have met in the final game of the semi finals on last Sunday at Tofield but due to blocked roads the Wainwright team was unable to get here. All other arrangements for the play offs have been postponed until the weather moderates.

OBITUARY

The funeral was held on Wednesday of this week of Nils Solberg of Ryley, service being conducted by the Rev D. K. Allan of Tofield. Mr. Solberg who had reached his eightieth year was born Feb 26, 1856 at Nordfjord, Norway. He died Feb. 10, 1936 at Ryley, Alberta. He was united in marriage with Ellie Roberg on June 14, 1887 and emigrated to the U.S.A. in 1887. He came to Canada in 1902 and homesteaded near Ryley where he lived until his death

He is survived by his wife, five daughters and four sons. Mrs. P. J Davick, Mrs. H. B Hillerud, Mrs. I. T. Skiles, Mrs. T. Brucke, Mrs. E. P. Tomlinson Mathias, Ole N. Eli A. Noah M. and a foster son Carl Gjerde. Also thirty-five grandchildren and eight great-grandchildren.

NOTICE

Re: Central Meat Market & W. J. Duckfield

Please take notice that all accounts owing to the above business should be paid to Walter Bellamy, who is authorized to collect same and issue receipts therefor.

(Signed) W. BELLAMY,
Box 105, Tofield.

Tofield Council Election Passes Quietly

POLLING DAY QUITE COLD

With the thermometer well below the zero mark, Tofield ratepayers found it difficult to inject much enthusiasm with the election for councillors. Even so, 128 voters braved the cold to cast their votes The remarkable feature of the election was the relatively small difference between the first and sixth candidates Unsuccessful candidates can almost share in the congratulations of the successful. The result was as follows: Dr F. F. Law polled 69 votes; M C Hammond polled 64 votes; G. Coutts polled 60 votes; A. E Calvert polled 57 votes; G. Edwards polled 55 votes; J Chapman polled 52 votes; T Wallington polled 8 votes

McLAUGHLIN WINS GRAND CHALLENGE AT EDMONTON

After setting a victorious pace throughout the bonspiel winning 15 games in 16 tries, George McLaughlin and his powerful Wetaskiwin rink polished off their brilliant week's performance Saturday night by edging out a 10-7 victory over Mel Strickland's rink from the Royal Club to win the Edmonton Breweries trophy and Grand Challenge event.

With a crowded gallery of tense spectators held in sway till the dying moments of the game, the score standing at 7-8 in the eleventh end, the encounter was a fitting climax both to McLaughlin's grand performance and to the bonspiel itself, the 19th of the Alberta Curling Association and one of the most successful ever held in this city.

Trophy winners in the nine events follow: McLaughlin won the Grand Challenge and the North West Brewery, also the Grand Aggregate awarded to the team which has won

NINE MORE DEGREES AND WE'RE BACK TO GLACIAL AGE

Saskatoon, Feb. 12.—Dr J. B. Mawdsley of the University of Saskatchewan, and recently elected fellow of the Geographical Society of America, in an address Tuesday before the Saskatoon Archaeological society, stated that if the mean annual temperature of North America fell nine degrees the glacial ages which covered this continent with ice thousands of feet thick would return.

An increase in precipitation could have the same effect, Dr. Mawdsley declared.

These remarks were made as Saskatoon faced the prospect of the coldest night in the last 55 evenings, when the mercury has never been higher than 20 below.

His Majesty on the Canadian Pacific

Canadians have a particularly warm spot in their hearts for King Edward VIII, a sincere affection honestly earned by His Majesty during his visits to this country as Prince of Wales. The Picture layout shown above graphically illustrates several phases of his different journeys by Canadian Pacific steamships and rail lines. Illustration No. 1 shows His Majesty in the typically courteous act of thanking the crew of the Royal Special. No. 2 His Majesty and Sir Edward Beatty, G.B.E., K.C., LL.D., chatting on the station platform at Calgary. No. 3. In the driver's seat. His Majesty on the "right hand side" of Canadian Pacific engine 2231. No. 4. Edward VIII, with the exception of his voyage on H.M.S. Renown, has travelled across the North Atlantic on Canadian Pacific Steamships. The picture shows him with Captain E. Griffith on board the Empress of France.

HEALTH

by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

SIGHT-SAVING

Throughout the world, there are millions who cannot see. In Canada, the number runs into several thousands. Most of this blindness could have been prevented. Are the children of our present generation going to avoid a similar catastrophe?

Total blindness, or serious permanent damage to sight, occurs as a result of ophthalmia neonatorum, commonly known as "babies' sore eyes". This unfortunate happening comes from certain germs gaining entrance to the eyes at the time of birth. Inflammation follows, with destruction or damage to parts of the eye which are essential to sight.

Fortunately cases can be prevented by the use of a prophylactic treatment applied to the eyes at birth. This treatment is simple and in many places it is required by law as a routine procedure. During more recent years, since this preventive method has been widely used, there has been a remarkable decrease in blindness from this cause.

Every adequate school health service provides for routine vision testing of all school children. The child may appear to be stupid; he is apt to fail in his work; he may suffer from headaches or other physical discomfort which arises from eye-strain. This condition of affairs may be the explanation of the child's becoming a problem in his attitude towards school and life in general. Properly fitted glasses will give the child proper sight in most cases, and so overcome his other difficulties arising out of his inability to see properly.

Many school boards do, and all should provide for sight-saving classes. Started in England, these classes now are found in every civilized country. They serve to furnish education while conserving the sight of children whose vision is already seriously defective. They prepare these children to grow up into self-supporting adults rather than being dependent with all that this means to the happiness of the individual child and, later, adult, as well as to society as a whole.

In the case of injuries to the eyes, more eyes are lost from failure to secure proper treatment than from injuries themselves. It follows that any injury to the eye, no matter how simple it may seem, should receive skilled care and that without any delay.

The routine treatment of the eyes of the new born should never be omitted; the eyesight of children should be tested and corrected by properly fitted glasses; sight conservation classes should be available to all whose sight demands special education; facilities for eye injuries and eye disease should never be neglected. This is a practical program for sight-saving. Is it not worth while to prevent blindness?

Questions concerning health addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

MARKETING SEED GRAIN

(Experimental Farms Note)

Good seed grain is grain of known variety that is free from weed seeds and admixtures of other varieties, and that has sufficient vitality to germinate quickly and produce strong, vigorous plants.

At no time in the history of the agriculture of Western Canada has there been a greater need for good seed than is the case at present. Rust, [illegible] and the inroads of disease and [illegible] have lowered the amount of grain that is suitable for seed to a point that is decidedly below the level in quantity and quality of [illegible] normal seasons.

[illegible] as it may seem, there is [illegible] more good seed available throughout a district than is [illegible], preliminary estimates. For [illegible] reasons certain crops have escaped the ravages of weeds, disease and frost, and thus constitute a source of seed for the 1936 crop.

[illegible] grain that is of sufficient quality and that is high enough in germination to permit it to be sold as commercial seed will find a ready market at a premium of ten to twenty five cents a bushel over the local elevator prices for commercial grain of similar quality.

Some of the farmers who have grown such a crop do not seem to appreciate its value either to themselves or to the district as a whole. For that reason, those having a crop that is reasonably free from weed seeds and other impurities, and that is reasonably plump and mature as a result of escaping damage by frost or disease, would be well advised to clean up a sample of such grain and forward a one-pound sample of it to the nearest Dominion Seed Branch office for a germination test. Those living in the Prairie Provinces should send their samples to Calgary, Alberta; Regina, Saskatchewan, or to Winnipeg, Manitoba.

Finding a market for either registered or commercial seed is just a matter of giving the fact that it is available all the publicity possible. There are a number of ways, most of which are free, of letting the public know that such seed is to be had. Information as to the amount available, the variety, generation if grown from registered seed, seed grade and price, should be sent to the office of the nearest Dominion Seed Branch, Provincial Field Crop Commissioner, School of Agriculture, Experimental Station, District Agriculturist, etc., all of whom are pleased to have information relative to sources of dependable seed. In addition, a small advertisement in the local newspaper may help materially in bringing buyer and seller together.

Years of experience in preparing and distributing seed grain have established a few simple rules to follow:—

(1) Get the seed grain cleaned and a sample germinated and graded as soon as possible after threshing.

(2) Information as to variety, germination, grade and amount for sale should be available by the time the Provincial Seed Fair is held.

(3) Prepare an exhibit and enter it at local and Provincial seed fairs.

(4) Let the different agricultural departments and field men know you have seed for sale.

(5) Do not price the seed too high. It is both more profitable and more satisfactory to sell the seed in larger amounts at a moderate price than to sell small amounts at high prices.

MATING THE BREEDING PEN

(Experimental Farms Note)

The matter of the breeding pen should be a matter of serious study, and careful consideration, for the success of future operations depends more on this than on any other phase of poultry work. Not only does next season's success depend on it, but it may seriously affect the work of future years as well.

If trapnesting and pedigree breeding have been followed, full advantage should be taken of the progeny test, and males and females that have proved to be breeders by the test should be used in future matings and the offspring, particularly the sons of those matings that have proven best retained.

For many years the endeavour in breeding has been largely along high egg production lines and in many cases not sufficient attention has been paid to breed type which is conducive to high table quality.

A drive has been inaugurated this year to try to improve the type of Canada's market poultry. (See publication 482, Farmer's Bulletin 2, Dominion Department of Agriculture.) Stress should be laid on a great, breed type and the quality as outlined in the bulletin, without however, losing sight of the egg-laying qualities of the flock.

The male is half the pen, and special care should be taken in his selection. He should be the son of a high laying, large egg hen, and should be well grown, show good size and breed type, and above all he should be vigorous.

While vigour may be denoted in every section of the bird—the broad back, deep body, well set legs, and a general action—nervous force, the paramount requirement in an egg-breeding male is indicated by a bright prominent eye set in a clean-cut face. This is the kind of a male that should give results when mated to equally carefully selected females.

It will pay those who have no such males to purchase them from careful breeders who have them.

A safe plan to avoid all danger of the bringing in of disease is to purchase pedigreed hatching eggs or day-old chicks, and select the breeders from among the males raised from them.

"THE GRAIN FORUM" RADIO PROGRAMMES

The Grain Forum radio speech contest is attracting a very great deal of interest in the country.

Judges who have consented to select the prize winners are:

Professor A. Savage, B.S.A., D.V.M., M.R.C.V.S., Dean of the Department of Agriculture, University of Manitoba. Mr. L. T. Chapman, B.S.A., Editor of "Nor'-West Farmer." Mr. P. M. Abel, Associate Editor, "Country Guide."

The programmes will be broadcast every Tuesday night, commencing February 4th.

During the ensuing few weeks the following subjects are down for discussion:

Feb. 11th—"The Country Elevator."

Feb. 18th—"Some Wheat Problems." (An informal discussion between Major H. G. L. Strange and Mr. I. W. Brockington.)

Feb. 25th—"The Canada [illegible]."

Mar. 3rd—"The Future Market."

A large number of questions have been received on problems of grain marketing and grain growing. All are answered and many of the more interesting are answered over the air.

This feature of question and answer is proving very attractive.

ANOTHER WRONG TO WESTERN WHEAT GROWERS?

Are seventy-seven thousand Western Canadian farmers to be euchred out of $8,000,000 properly due them because the financial interests of Eastern Canada and the grain trade of Western Canada does not want them to get the money?

If Grant Dexter's despatch to The Winnipeg Free Press is inspired from official sources that is what is going to happen.

That money was the amount agreed upon between the Wheat Pools and the Wheat Board for the equalization of the 1930 Pool payment.

Two and three-quarter million dollars would come to 27,000 Alberta farmers, the remainder to farmers in Saskatchewan and Manitoba.

These growers contributed their wheat for the federal government price stabilization operation.

In that operation the elevator companies were annually paid huge sums for carrying charges. The banks annually were paid large sums for interest charges for credits they advanced without a semblance of risk.

It has been calculated that some FIFTY MILLION DOLLARS were paid banks and elevator companies in the stabilization processes.

All Canada benefitted because wheat prices were kept from going down to ruinous levels.

Now it looks as though they were trying to make "goats" out of the farmers who contributed their wheat and are justly entitled to some financial reward.

The Ottawa despatch says the wheat Board found a loss of $16,500,000 had been incurred when the surplus was taken over on December 2. The suggestion was made that the surplus will have to be sold at a profit before the growers get anything.

Sixteen million dollars loss is not a great deal for five years of price stabilization. Australia, who raises little more wheat on the average than does the Province of Alberta, provided $50,000,000 for cash bonuses and other forms of aid to her wheat growers.

The United States has spent around $500,000,000 to aid her wheat growers during the depression. And other countries gave aid on similar generous terms to their wheat growers.

Is Canada, the greatest wheat exporter of them all, to deal in niggard fashion with her wheat farmers?

Thousands of farmers are depending on this money to pay accounts to hundreds of small storekeepers; to pay years' accumulations of tax arrearages; to pay hundreds of thousands of dollars of debts of various kinds, and to aid them in their farm operations.

Money is direly needed in the frozen out areas, in the dried out regions and in the localities where hail ravaged crops.

And this money is properly payable. It has been carved out as fairly as has the carrying charges of the elevator companies and the interest charges of the banks.

Are the selfish financial interests and the grain trade so strong a combination that they will succeed in keeping the $8,000,000 out of the pockets of 77,000 western grain farmers?

AIR CONDITIONING ON CANADIAN TRAINS

MONTREAL, Que., February 10—Canadian railways are making arrangements to introduce air-conditioning into their train services. This was announced in a joint statement issued by the managements of the Canadian National and Canadian Pacific railways, and the coming summer will see several trains equipped on the more travelled lines of both companies.

The work of air-conditioning present equipment will be undertaken gradually so that the types of air-conditioning devices used will be operated throughout the year adding to the comfort of passengers in both winter and summer. The object is to have the air in passenger cars clean and pure at all times and the temperature agreeable, irrespective of the winter or mid-summer temperatures which may exist outside. Further, it is the aim to eliminate dirt and dust entirely and reduce noise to a minimum.

Committees of mechanical and traffic officers of the two Canadian railway systems have been quietly but thoroughly making investigations of air-conditioning devices for passenger equipment for a considerable time, studying in particular the success obtained with the various types which have been in use, determining their relative efficiency, economy, etc. The railroad officers state that they early recognized that air-conditioning will eventually be in common use, and their researches have been made with a view of ensuring the travellers in Canada air-conditioning which would embody all the known improvements.

After being cleansed, cooled or heated to the desired temperature the air is released into the cars through special ducts to avoid drafts, and ventilators pass out the used air. Air-tight windows and doors are necessary in successful air-conditioning and also to eliminate dirt and reduce noise.

The work of installing the air-conditioning equipment on Canadian National and Canadian Pacific is now going forward. The question of what class of cars will first receive the new type of equipment is being considered. For the present year it is likely to be confined to sleeping, parlor and observation cars. It is anticipated, however, that the air conditioning will be gradually extended to practically all important main line trains.

"It's just as true as truth can be,
We see it every minute—
Life won't return what we don't earn,
But just what we put in it."

CANADIANS AND THEIR INDUSTRIES—AND THEIR BANK

SUCCESSFUL HOME-MAKING—CANADA'S GREATEST INDUSTRY

MECHANIC: "In recent years my pay has averaged $110 a month, but I have made as much as $250. My regular habit has been to deposit part of my pay in the Bank of Montreal."

SALES CLERK: "That reminds me—but finish your story."

MECHANIC: "Well, the job hasn't been easy, but here's what I have to-day. A debt-free home worth $3,000, summer cottage worth $500, $1,200 in the Bank, a small automobile, good furniture, including a piano. Of course, I saved something every month for many years."

SALES CLERK: "My wife runs our family finances. I hand her my pay cheque, and after paying bills and keeping our purse money, she puts the rest in our savings account at the Bank of Montreal. That's why we had the money to buy our nice little home—a bargain for cash."

SOME OF THE BANK'S SERVICES TO THRIFTY CANADIANS

Personal savings accounts, banking by mail, safekeeping of securities and other valuable papers; chequing accounts; letters of credit, money orders and travellers cheques.

ANOTHER TERROR ELIMINATED—

IN THE OLD days, before the discovery of anesthetics, dentists' chairs used to be equipped with straps to keep the patient from leaping out of the window when the dentists' instrument struck a nerve. Folks didn't bother much about fillings, in those good old days. If a tooth ached it was pulled out, and the best dentist was the one who had the strongest fingers. Teeth that couldn't be pulled by the fingers, were knocked out with a mallet and chisel!

Seeking a way to make dentistry less painful, an American dentist named Horace Wells discovered, in 1844, that nitrous oxide, which used to be called "laughing gas," would render a person unconscious of pain—and everything else—for long enough to extract the most resistant molar. That was a great stride forward in human knowledge; and an even longer step was taken two years later by another American dentist, Dr. W. T. G. Morton, who discovered the anesthetic properties of ether in 1846.

For the first time in history, major surgical operations could be performed without pain to the patient. Previously surgeons either had to knock their patients unconscious by hitting them on the head or strap them to the operating table and let them scream.

Now the dental profession has once more added to the world's knowledge and its comfort by the discovery of a compound which, applied to the tooth, renders it insensitive to the pain of the dentists drill. Dr. LeRoy L. Hartman, professor of dentistry in Columbia University produced the formula after 20 years of research and instead of patenting it has given it freely to the world. Thousands of dentists began to use the new "Hartman's Solution"—which any pharmacist can make—on the day the formula was published, and while it still does not make a visit to the dentist exactly a popular amusement, it robs the ordeal of many of its terrors. "Painless dentistry" is at last pretty nearly a reality.

A BANKER LOOKS AT BREAD—

It is not often that the annual reviews of bank chairmen are devoted to the problems of the people's eating habits. Generally they are concerned with the statistics of trade and finance. But this year Colin Campbell, head of the National Provincial Bank, one of Britain's "Big Five, "departed from precedent. Not only did he review the humble problems of the people's food; he urged that the time had arrived when the Government should see that the people had more of it. The speech sounded more like a social reformer talking than the chairman of a banking institution.

The speech, indeed, is a reflection of what the British, high and low, are thinking. King Edward VIII is reputed to be concerned with the people's housing. Britain has already done notable work in clearing out the worst of the slum areas and in providing decent homes for the poor. Of course the project has necessitated public subsidies. But the British no longer blink at that. In a recent article Frank A. Vanderlip told of the number of leaders he met in England who wanted to see the housing of the poor given the full-fledged status of a public utility.

In regard to food British opinion seems to be turning along much the same channel of social thought. Food and shelter are, after all, basic human needs. If society is unable to distribute both sufficiently to maintain what is called in Britain an A-1 population, then Government must take over the function. This is the implication of recent British thought.

Undernourishment in a country which has gone to undreamed heights of material prosperity since the industrial revolution is a matter of public record. Last year Sir John Orr startled the British Association and the British nation with the latest survey. He said that, in order to provide the people with proper sustenance, consumption of milk should be increased 42 per cent; of fruit and vegetables, 53 per cent; of butter and eggs, 25 per cent.

In giving those figures Sir John unfolded a national task. It was to "marry health and agriculture." Newspapers such as The Times (London) began to read like social service organs. Recently that newspaper expressed horror that boys transferred from derelict areas in Cumberland had made their first acquaintance with eggs as food and did not know how to eat them. The pressure on the Government is now coming from the bank parlors. A people united above the clamor of partisanship in such a beneficent undertaking can remove mountains of economic difficulties.—Christian Science Monitor.

Mrs. Newlywed: "Dinner is ready, dear, and the cook has made us a nice, big mess of hash."

Mr. Newlywed: "Of all things."

I had decided to take the furnished flat.

Landlady: "Of course I must ask you for a deposit."

Myself: "Certainly" (handing over the required sum).

Landlady (beaming): "Thanks. And now, do you want a receipt, or shall we trust one another?"—Montreal Star.

MONEY SCRACE?-MANY LOSE IT

Prognosticators of better times have each their own theories concerning the various factors involved in a return to greater prosperity, so frequently indicated by the upward turn shown in graphs and charts. L. L. Grubill, general agent, baggage department for the Canadian National Railways, also has his theory of returning prosperity, which is supported by tangible evidence. This is the fact that patrons of the railway still leave their purses and handbags on trains and Mr. Grubill argues, with considerable logic, that if money was so awfully scarce why would people be so forgetful as to leave it behind them.

No less than 20 purses and handbags were found on trains of the Canadian National Railways within the past month. Aside from causing temporary consternation, the missing articles, with their contents, were not a permanent loss, however, thanks to the honesty of railway employees, for they were all later recovered at the Lost and Found Department, much to the satisfaction of the passengers.

TORONTO MAID SEEKS HUBBIE VIA CITY HALL

Twenty-four years of age and weighing 165 pounds, a Toronto maid seeks a husband, preferably a northern rancher or a Mountie. The mayor's office, which is a sort of unofficial matrimonial bureau for would-be wives and husbands, has received this request from the eastern lady who solicits the services of Mayor Jos. A. Clark, K.C. in the role of Dan Cupid.

Grinning broadly the mayor refused to let the newspapermen have a peek at Miss Toronto's letter. "She's confided in me and I certainly am not going to give you her name," he said, adding that she would prefer a "northern rancher or a Mountie."

Nettled, reporters opened a barrage of expostulation. "We've got to know what she looks like and how old she is. Nobody'll marry her without the facts."

Rising to the occasion the chief magistrate declared she was 165 and weighed 24 pounds—our mistake, she's 24 and tips the scales at 165.

"Blonde or Brunette?"

"Don't know!"

"But Mr. Mayor, it's important to know her particular shade!"

"Listen here, you fellas, anybody would think you were thinking of marrying her. Mind your own business, and just tell interested bachelors to get in touch with me."

So there you are, interested bachelors. You know as much as we do.

ECHO BEATS ALARM CLOCK ALL HOLLOW

CHARLESTON, W. Va., Feb. 10.—A rugged mountaineer failed to find anything impressive about the "corridor of echoes" in West Virginia's capital building.

Tom Richardson, a guide, said the visitor tramped away, remarking:

"Shucks, that's nothing like the echo rock where I live. Up there before I go to bed at night I shout, 'Hey Jim, time to get up.'

"And at five o'clock next morning it comes back to me. Why, I haven't had no alarm clock in 17 years."

DUGGAN ASKS INFORMATION ON FINANCES

Terms of the Dominion government proposal regarding Dominion guarantees covering new capital and refunding requirements are sought by D. M. Duggan, provincial Conservative leader in a notice of motion filed in the legislature. Mr. Duggan seeks his information as part of a comprehensive survey of the whole provincial financial outlook and covering many activities.

He demands to know whether the proposed refunding scheme contemplates the refunding of the entire funded debt of Alberta in one operation or "will it be limited to refunding maturing obligations?"

Mr. Duggan also seeks to determine the amount of money the province owed the banks at August 22 last; September 3, December 31 and January 31 last, and what security hypothecated by the province on the dates specified.

It is also demanded by Mr. Duggan whether any formal proposal has been made by the province to the Dominion to take out long term, low interest bearing bonds to cover demand or short term loans and if so, what terms are contained in the proposal or whether any counter-proposal has been made by the Dominion?

Total amount of the school lands fund which was turned over to the province with the natural resources also is required by Mr. Duggan, together with information on how the fund is invested; under what authority and whether any proposal has been made to the Dominion to amend the legislation covering the school lands fund, so that these funds can be invested in provincial bonds and if so, what "is the expressed attitude of the Dominion government toward such a proposal."

The amount of the cash settlement awarded to the province by the commission on natural resources also is sought by Mr. Duggan, together with information on the legislation required before the money is made available to the province.

He also seeks information as to whether the Dominion government has suggested to the province that it intends to apply this money to the reduction of loans made by the Dominion to the province.

Information is also sought as to whether the province has obtained legal opinion with respect to the power of the Dominion to withhold these funds and to apply same against loans made by the Dominion to the province and, if so, what advice has been given.

Total loans by the Dominion to the province as at March 31, 1932; and each year thereafter at the same date and as at Feb. 1 of this year, is also asked by Mr. Duggan.

He seeks in this connection, information on loans for maturities on bonded indebtedness; for general relief purposes; for agricultural relief; loans to cities rate of interest payable by the province; nature of security given by the province to the Dominion, covering loans and amount and maturity of each loan.

NEW COMPANY TO BUILD PLANT FOR NORTH SALT PRODUCTION; 30,000 TONS YEARLY CAPACITY

Erection of a $70,000 salt refinery at McMurray in the spring will be carried out by Industrial Minerals, Limited, a new company formed to develop the McMurray salt deposits, F. L. Batchelor, Cornwall, Ont., head of the new firm stated on his return here from a week's inspection trip at the salt beds.

The former Calgary bank manager stated his inspection of the field with C. H. F. Cottee, Ottawa mining engineer, had brought no changes in the plans announced Jan. 30 in the Journal.

A diamond drill crew will commence operations immediately the cold snap breaks in the north and will continue test drilling until spring on the property leased from the provincial government, he said.

If present indications of the extent of the salt bed are confirmed, the refinery will be constructed in the spring, Mr. Batchelor said.

Plant will have a production of 30,000 to 32,000 tons yearly.

Central western provinces use 70,000 to 80,000 tons a year which is more than double the production planned for the McMurray plant, the company head stated.

Average consumption on a medium sized "mixed" farm is around half a ton yearly, he estimated.

Plant will be confined to manufacturing table salt at the outset and will branch into various grades of salt later.

The salt is mined by drilling and pumping the salt to the surface in the form of brine. The brine is evaporated in the refinery.

Refinery will be erected beside the railway at McMurray and if necessary the brine be piped from wells some distance away.

Production is expected to commence by next September. Mr. Batchelor left the city Sunday to return to Cornwall. Mr. Cottee will remain here in charge of development operations.

WOMAN TAKES DAILY DIPS IN SUB-ZERO BATH

EAST JORDON, Mich., Feb. 10.—Mrs. Peter La Londe didn't need a thermometer to know it was 13 below zero today. She took her daily dip in Lake Charlevoix. She hasn't missed a morning plunge all winter.

STRATFORD, Ont., Feb. 10.—Spectators rubbed their eyes when they saw a youth on the river, wearing trunks and cutting a hole in the ice. A few minutes later he plunged into the frigid water.

The youth was Kirkor Hekimian, a 23-year-old Armenian who picks up a few dollars by pulling his polar bear act.

EXPECT 500,000 TO VISIT HOME OF QUINTUPLETS

TORONTO, Feb. 10—The Ontario government plans to arrange tourist accomodations and a recreational park for visiting children near the Dionne quintuplets' hospital at Callander, Ont.

Dr. Allan Roy Dafoe, physician to the famous girls, said a few days ago he expects 500,000 people to visit the quintuplets this year.

Welfare Minister Dave Croll paid a visit to Callander over the weekend.

It is understood a small woods behind the hospital will be made into a private playground for the Dionne sisters, said to outgrowing play in the hospital.

U.F.A. FAILS TO SECURE DATE WITH PREMIER

Result of losing power in government and elimination of its legislative representation is being acutely felt by the United Farmers of Alberta organization and after 14 years of tasting the sweets of power it must be content with sitting on the outside looking in.

For the first time in many years, the resolutions passed at the annual U.F.A. convention—it was held in Edmonton from Jan. 21—24—will not be presented to the government as the executive has been unable to make an appointment for presentation of them, with Premier William Aberhart.

As efforts to make an appointment fell by the wayside, Norman F. Priestly, vice-president of the U.F.A., who is a city visitor, mailed 24 resolutions to the Premier.

Speaking on this subject on Monday, Mr. Priestly said that "When the executive of the U.F.A. met here following the convention, efforts were made to present the resolutions. As the Premier was engaged on Tuesday, the day of the memorial service for King George, the executive endeavored to arrange for an opportunity to present the resolutions the next day and members were prepared to stay over a day for that purpose. Later, we were informed by the secretary that the Premier had no time to see us."

He further stated that a letter also had been sent to the Premier's office in which it was stated that the delegation would return at some convenient date later on, as it was the desire to present the resolutions before the legislature opened.

But no reply had been received and "since then we decided that the resolutions should be mailed to the government."

CORONATION IN MAY, 1937

LONDON, Feb. 10.—May, 1937, is the month most likely to be fixed for the coronation of King Edward VIII, Reuters learned Sunday from persons in close touch with Buckingham Palace. The occasion will be marked by a great gathering of statesmen from all parts of the empire. An early announcement regarding the actual date is expected.

It also was learned on good authority that the next Imperial Conference will be held in 1937, either immediately before or after the coronation.

OLD WHEAT BOARD MEMBERS TO GET HALF YEAR'S PAY

OTTAWA, Feb. 10—Members of the old wheat board established by the Bennett government last summer will be paid half their first year's salary as recompense for the work they did between the time of their appointment last August and reorganization of the board by the new government last December.

Official notice has been made public that John I. McFarland, former chairman of the board will get $9,000; D. L. Smith, former vice-chairman, $8,500; and H. G. Grant, former member, $7,500. Total cost to the government of the retirement allowances will be $25,000. All the recipients are Winnipeg residents.

16-OUNCE TOT HOLDING OWN

OAKLAND, Calif., Feb. 10—A specially-made "life line" tube fed teaspoons of milk to 16-ounce Nancy Lee Vogt Sunday and physicians reported the week-old infant "more alert."

The diet of the prematurely born baby, smallest on record here, was increased yesterday from 75 drops of mother's milk every hour and a half to two teaspoonfuls every two hours. Between "meals" lactose solutions are injected through the "life-line" directly to Nancy Lee's stomach.

CONVICT NORTH TRAPPER OF MURDERING PARTNER—TRIAL LASTS SINGLE DAY

Battleford, Sask., Feb. 8th.—John Harms, 37-year old Athabaska trapper, Wednesday was sentenced to hang at Prince Albert, May 8th, for the November murder of his trapping partner, Johnny Anthony.

The jury, which received the case at adjournment late Tuesday afternoon, returned with its verdict of guilty when court reconvened Wednesday. Mr. Justice Bigelow pronounced sentence. Hearing of evidence occupied but a single day.

No defence witnesses were called by Harms, but his plea of self defence was entered. Witnesses in the case, brought 550 miles by dog-team, aeroplane and trains, prepared to begin their long trek back to cabins in the northern wilderness.

Tuesday a statement given by Harms after his arrest, and accepted as evidence, set forth that the killing had been done in self defence after prolonged drinking had taken place. Court also learned of a terrible four-day vigil by Mrs. Ira Allen as Harms tried to break into her cabin.

REFUSE REVEAL LETTER SERIES WITH DOUGLAS

Crushing the opposition in two divisions on votes of 55 to 7, with all members in their places, the government Tuesday defeated two motions which asked for production of correspondence with Major C. H. Douglas, British economist and chief reconstruction advisor of the administration.

The divisions were the first of the present session. Supporting the motions asking for the correspondence were the opposition members, five liberals and two conservatives; opposed were the solid ranks of the Social Credit supporters.

Leading the battle against the motions, Premier Aberhart, taking part in debate for the first time and evidently warmed up over the opposition moves, declared it was not in the best interests of the public to produce the correspondence now. Later he said it was impossible to give the information asked for at this session.

Information would be given at the proper time, said the premier.

At one juncture, the premier, on a point of order, protested a statement by W. R. Howson, Liberal leader, that if the government would not agree to production of all communications with Major Douglas, then it was the desire "to conceal from the people of the province the people's own business."

"Withdraw! Withdraw! cried members on the government side.

On Speaker Tanner's ruling, Mr. Howson withdrew the remark, adding that "if the government refuses to give this information to the public, then there is information in the hands and minds of the government that the people of this province are entitled to."

Premier Aberhart: "They will get it."

Though it downed the motions asking for the Douglas documents, the government agreed to others moved by D. M. Duggan, Conservative leader, asking for copies of all correspondence with R. J. Magor, of Montreal, financial advisor to be laid on the table, besides, information as to his salary or remuneration and upon whose recommendation he was appointed.

WIT And WISDOM

Sandy joined a golf club and was told by the Pro, if his name was on the golf balls and they were lost, they would be returned to him when found.

"Good," said the Scot, "put my name on the balls."

The Pro did.

"Say, would you also put 'M.D.' after it said the new member. "I'm a medical doctor."

The Pro obeyed.

"There is just one more request," went on the Scot, "can you squeeze 'Hours 10 to 2' on as well."

* * *

The minister called on the Jones' home one Sunday afternoon and little Willie answered the bell.

"Pa ain't home," he announced. "He went to the golf club." The minister's brow darkened and Willie hastened to explain.

"Oh, he ain't gonna play any golf, not on Sunday. He just went over for a little game of stud poker, sir."—Guild Artist.

* * *

Uncle and niece stood watching the young people dance about them.

"I'll bet that you never saw any dancing like that back in the nineties, eh, Uncle?"

"Once—but the place was raided."

* * *

A Bit "Rattled"

A very nervous young man called at the house of the dean. When the butler appeared, he said:

"Excuse me, but is the Bean dizzy tonight?"

* * *

Suspicious

Gentleman rider at village store: "I want some shorts for my horse."

Country girl: "Oh you do, do you? Next thing I suppose you'll want a brassiere for your cow."

* * *

It was one of Mother's busiest days. Her small son came in with his trousers torn. His mother helped him to change to another pair, but in an hour or so he was back, his trousers torn again.

"You go right upstairs, remove those trousers and mend them yourself," his mother ordered.

Some time later, she thought of him and went upstairs to see how he was getting on. The torn trousers were lying on a chair, but there was no sign of Johnnie. Returning downstairs, she noticed the cellar door open, so she called down loudly and sternly: "Are you running around down there without your trousers on?" A deep voice answered: "No, madam. I'm reading the gas meter."

SIGN OF SPRING !

During the sub-zero weather on Wednesday night, the men of Ross Creek organized their Soft-Ball Society for the coming summer. Ed Thor is to be the Manager, and Clifford Hackett the Secretary-Treasurer. Clarence Peterson will be the Captain of the Senior team. The members are putting on a dance in the school on St. Valentine's Day to defray expenses.

I wonder, is this a sign of spring?

BANK OF MONTREAL ISSUES INTERESTING BOOKLET

There is much about bank methods and practices that is a mystery to the ordinary man and woman. They know about savings accounts and cheques, but they know little about numerous other services that the banks are prepared to give them.

To enlighten the public on the subject the Bank of Montreal has just issued a new edition of its booklet entitled "Your Bank and How You May Use It." Prepared "for the purpose of setting forth the many ways in which the bank can serve the individual," this booklet is really a most valuable manual on Canadian banking.

One of the surprises it provides for the reader is the extraordinary range of services which the bank offers to the public. Something like a score of these services is listed, and not only is each service explained in language that is easily understood, but the correct method of procedure are also described.

In the latter connection, the booklet is illustrated by reproductions of various bank forms correctly filled out and such points as the difference between "Order" and "Bearer" cheques

PRODUCTION LOANS URGED FOR FARMERS

Production loans for agriculturalists were urged by Solon Low, Social Credit member for Warner, when continuing the throne speech debate in the legislature Wednesday.

"We shall not desert the people who placed us here. We can give just as good government as any of the parties and in addition we will give you Social Credit if you stay with us," said Mr. Low.

The member lashed out at W. R. Howson, Liberal leader.

Drawing attention to Liberal disappointment over not being triumphant in the last general election, he said, "Beware of the tactics of a disappointed party for when the insatiable appetite for power is denied satisfaction, resulting bitterness finds expression in questionable propaganda that often borders on treason."

FAITHFUL DOG PUTS OUT FIRE WITH HIS FACE

Bulyea, Sask. Feb. [illegible].—A police dog weighing 100 pounds known as "Big Dick" was found by his owner lying beside a hole burned in the floor with the hair on his face singed upon arising one morning. His master had fixed the fire for the night in his restaurant and retired. During the night the dog had discovered the outbreak and put it out, and had to be ordered to leave the hole.

* * *

are explained and illustrated.

Among the subjects dealt with is that of borrowing money from the bank—a subject that is of timely interest and of particular importance. The booklet may be had for the asking at any branch of the Bank of Montreal.

INTERMISSION IS INTRODUCED IN LEGISLATURE

Institution of a 15 minute intermission halfway through the afternoon sittings of the legislature proved welcome to members and spectators when Mr. Speaker N. E. Tanner announced the innovation on Friday.

About 4 p.m. when Roy Taylor, Social Credit member for Pincher Creek, had finished moving the reply to the speech from the Throne, Mrs. Edith Rogers, S.C. member for Ponoka, was endeavoring to catch the eye of the speaker to speak in seconding the reply.

At this point Mr. Speaker rose and declared that if there was no opposition, he would declare a 15 minute intermission.

It is likely the practice will be continued throughout the session.

OFFER OF $15,000,000 FOR ALBERTA'S PHONES IS EXPECTED

An offer from New York or British financial interests for Alberta's $15,000,000 provincial telephone system is expected by the government, states Hon. W. A. Fallow, minister of railways and telephones.

A survey of the system was made last month by engineers from the east who had no hesitation in expressing their commendation, particularly of the Calgary exchange and the accounting system of this department.

"While I have not heard from them since they were here on Jan. 25, I have every expectation of receiving an offer," said the minister.

"What price would be asked by the government?" the Journal reporter inquired.

"I don't see how the government could consider anything less than $15,000,000 though I am not saying that would be accepted. But I feel that an offer of anything less would be only wasting time," said the minister.

Mr. Fallow said that when he was in Ottawa attending the dominion provincial conference, some New York people had arranged by telegram to meet him in Toronto. At Toronto, he met C. S. Howe Jr., of New York, who was understood to be representing old country financiers, and Mr. Pitfield, an engineer, who was the spokesman.

SCHOOL AT AMISK LEVELLED BY FIRE

Amisk Creek one-room rural school six miles east of here was destroyed by fire early Saturday. The blaze was noticed by P. O. Malme nearby farmer too late to save building or contents.

TRAIN HITS SLEIGH — THREE ARE INJURED

Hurled into the ditch along with the sleigh in which they were riding, Nick Jakaltz, Edmonton, and his two sons Frank, 10; and Joseph, seven, escaped death when struck by a southbound Canadian Pacific railway freight train at the crossing at 62 ave. and Calgary trail about 5:00 p.m. Friday.

All three were rushed to hospital by a passing motorist. The father, who suffered a fractured right arm, left hospital shortly after the accident. The eldest son, Frank, received a broken thigh bone while Joseph was kept in hospital suffering from shock and bruises.

The vehicle driven by the father was a long sleigh, covered with a large sheet of canvas as protection against the cold. This covering may have prevented his sighting the oncoming train as he turned into the level crossing. The sleigh was crushed and the horses bolted with the front runners still hanging to the wagon tongue.

CRITIC OF HOWSON CALLED TO ORDER

Unusual spectacle of Mr. Speaker calling a government supporter to order when the opposition member to whom the remarks were being applied said he had no objection was witnessed in the legislature Tuesday.

At the time, P. Anderson, Social Credit member for Calgary, was handing out some sharp comments on the address of W. R. Howson, Liberal leader, who had attacked the government and Premier Aberhart in particular.

"The honorable member fell into the error, common to small minds—" Mr. Anderson was saying, when Mr. Speaker called him to order.

Mr. Howson—"Let him go on, I don't object."

Mr. Speaker—"I do object."

Mr. Anderson—"I withdraw the remark, Mr. Speaker."

Premier Aberhart—"Then Mr. Howson should withdraw his remark."

There was no further discussion.

FLASH—Hannan of Tofield wins grand challenge at Tofield Bonspiel. Final game was between Hannan and Kingsbury of Edmonton. Full results will be published next week.

TRUSTEES TURN DOWN SCHOOL UNIT SCHEME

Calgary, Feb. 4th.—With less than half a dozen dissenting votes out of an assembly of some 700, the Alberta school trustees' association voted non-support of Premier Aberhart's scheme for larger school units Tuesday. The vote was as decisive as the association's rejection of the "Baker Bill" in former years.

The rejected motion read: "Resolved that we fully endorse the proposal made by the Hon. William Aberhart, minister of education, to establish 43 or 45 school districts in the province to replace the 3,226 that now exist."

Not one delegate supported the scheme in its entirety, though a few were willing to accept it in part. The great majority, however, would have nothing to do with it.

Farewell to Organ-Grinders

By J.C.R. in the Christian Science Monitor

The organ-grinder no longer fills a needed want, says Mayor LaGuardia of New York City. And with a flourish of his pen he has consigned him to that dim limbo where a refuge is provided for those relics of the past which have outlived their usefulness. We must make way for modernity, I suppose, even though we do so with regret and a lingering, backward look. True the Mayor's decision affects only his own city, but it undoubtedly has its significance. All true lovers of the hurdy-gurdy may well take note. Out in the distance progress has sounded the bell and another exit has begun.

A little boy once swung on a gate and saw an organ-grinder come down the long cinder path that passed his door. He had heard of a hurdy-gurdy, but he had never seen one before. But he knew it; a little boy knows lots of things and he could never be mistaken about an organ-grinder, especially if there was a monkey, too. Perhaps it is as well he didn't know the rigors of an organ-grinder's monkey's life, the not infrequent cruelty of training and the chills of an alien climate. So this little boy watched the swarthy grinder come, with rings in his ears, his organ bobbing over his back and the monkey perched on top of it all, wearing a yellow suit and a [illegible] Robin Hood cap.

Suppose, [illegible] ht the little boy, entirely forgetting to swing on the gate so great was his excitement, suppose that marvelous thing should stop and play? Suppose the monkey should come down and dance? If I can count twenty-five before he gets to the beginning of our fence he'll stop and play! Breathlessly he counted, desperately making sure he didn't skip even one number. Twenty-three, twenty-four, oh it was no use. He was past! He wouldn't stop now. He'd go on. And he'd never hear that wonderful music. But he wasn't going past. He wasn't! He was stopping, taking his hat off, bowing. Could he be going to? Could he—?

The organ-grinder smiled at him and his white teeth gleamed in the sunshine. He replaced his hat, and swung the organ to the path, the pointed balancing stick biting into the cinders with an inviting crunch. And then he turned the crank and the music began to play. The little boy thought he had never heard such beautiful music. But the monkey! It had jumped to the ground and before he could say Jack Robinson it was on the gate beside him and holding out its green hat. He looked at the organ-grinder who was nodding his head to him and smiling. "Oh," said the little boy, understanding what the outstretched hat meant, "wait for me! Please wait!" And he was gone as fast as his short legs could carry him into the white house. "Mother," he cried wide-eyed, "Mother, organ-grinder - come - down - the - cinder - path - monkey - jump - on - the - fence!" But he didn't have to ask for the pennies because even before he could finish his breathless sentence she was handing him the coins and telling him to hurry.

Outside the grinder was still playing and the monkey was sitting on the fence post. One by one the little boy dropped the coins into the hat. Copper coins to pay for a stream of gold music!

That afternoon the little boy's mother read him Alfred Noyes' poem about the barrel organ for the first time. He didn't understand all of it but parts he thought beautiful, as where it said,

> There's a barrel-organ carolling across a golden street
> In the City as the sun sinks low;
> And the music's not immortal; but the world has made it sweet
> And fulfilled it with the sunset glow.

Later on he learned to prefer the lines,

> The cherry trees are seas of bloom and soft perfume and sweet perfume,
> The cherry trees are seas of bloom (and oh, so near to London!)
> And there they say, when dawn is high and all the world's a blaze of sky
> The cuckoo, though he's very shy, will sing a song for London.

In this time this particular poem is not likely to mean very much to the children growing up in the city. And somehow I feel that the loss of anything so conductive to beautiful memories, for however practical a reason, is just a little to be regretted. Mayor LaGuardia said that "the hurdy-gurdy is a form of begging." I have no doubt he is right. But it is a form of giving also. And even though the practical Mayor may say so, the radio will not quite take the place of the decorated square music box, the gold earrings and the monkey. There was a glint of romance about the very trappings of the organ-grinder that made up for what the cold machinery was likely to forget.

Good-by to the organ-grinder! He no longer fills a needed want. Perhaps he will long fill a needed past.

No Kick From Bonspielers On Weather

Those curlers who like their ice as hard at the top as it is at the bottom had no cause for complaint during the recent Tofield bonspiel.

Commencing on Wednesday of last week and running until Friday night the event was a complete success all through. The following rinks emerged trophy winners of the different events.

Grand Challenge—J. J. Hannan of Tofield.

Terwillegar—R. Kingsbury of Edmonton.

Pincott—Fred Ross of Viking.

Boon—L. W. Smith of Tofield.

Kingsbury whose only defeat was by Hannan in the finals of the main event, also won the Grand Aggregate.

Personnel of first prize winning rinks:

Grand Challenge—J. J. Hannan, Glen Wood, A. Francis and W. Taylor.

Terwillegar—Roy Kingsbury, F. A. Nichols, A. Hudson and F. Granville.

Pincott—F. Ross, T. E. Haskins, W. Kelly and Harry Law.

Boon—L. W. Smith, T. McBratney, J. E. Stinson and C. Patterson.

Other prize winners were: Grand Challenge—Kingsbury second, Clutterham third, Dr. Law fourth; Terwillegar—F. Ross second, Emond third, Davison fourth; Pincott—Cowley second, Hay third, Emond fourth; Boon—Jobb second, Graham third, Chapman fourth.

FEW ATTEND ANNUAL MEETING OF CORNHILL M.D

Partly due to the cold weather and partly due to lack of contentious matters only a few ratepayers attended the Annual meeting of the Municipal District of Cornhill, held at the municipal hall on Saturday afternoon last. At the appointed time the returning officer, W. Foreman called for nominations and only two were handed in. These were for Jacob Benson and Wm. Christenson for division one. The election will be held on Saturday, February 22nd, the polling place being at Kingman. In division four W. Glenn was elected by acclamation and in division five W. C. Morden was elected by acclamation. The other councillors whose terms do not expire until next year are division two, Chas. Holmberg; division three, Gilbert McSporran; division six, G. O. Walker.

OBITUARY

We regret to report the death on Tuesday of Dale Hosler, young son of Mr. and Mrs. G. Hosler of Tofield. The little tot who was sixteen months old, contracted a cold which later turned to pneumonia the cause of his death.

The funeral was held on Thursday of this week service being held in the United Church, Rev. D. K. Allan officiating. His message was one of comfort and solace to the bereaved parents to whom the sympathy of the entire community goes forth. Interment took place at the Tofield cemetery.

CARD OF THANKS

We wish to extend thanks to all those kind friends for their help and expressions of sympathy during our recent sad bereavement. For the floral offerings we are especially grateful.

Mr. and Mrs. G. Hosler and Mr. and Mrs. A. Hosler.

BEHIND THE HOG

By A.[illegible]C.

This is how they looked after the last rock was flung. By the way, Gordon Jobb threw the last in the spiel, you ask him what happened.

* * *

Grand Challenge; 1st, Hannan; 2nd, Kingsbury; 3rd, Clutterham; 4th, Law. Terwillegar; 1st, Kingsbury; 2nd, Ross; 3rd, Emond; 4th, Davidson. Boon; 1st, Smith; 2nd, Jobb; 3rd, Graham; 4th, Chapman. Pincott; 1st, Ross; 2nd, Cowley; 3rd, Hay; 4th, Emond. Aggregate, Kingsbury, Edmonton.

* * *

It was no fault of Art Hosler if the curlers failed to make the shots, because Art sure knows his frozen water.

* * *

The good samaritan in Curling has always fascinated me. What fun he must have.

* * *

The spiel is over and we are going to give you our little spiel as to what we heard spieled.

* * *

Every solitary curler in the Spiel had one alibi. It was too darn cold to curl.

* * *

Jim Hannan's boy, Bud, and his three boy friends won the Challenge. They MUST be good as they beat me in the semi-finals.

* * *

Geo. Agnew and his swedish 3rd Yonnie, as curlers are good goose hunters. Geo. left his prizes, or was it his shaving kit. As a curler myself, I make a good stamp pedler.

* * *

Noble Graham has the best holler, some of the boys had such colds they could hardly whisper.

* * *

Most of the boys made the mistake of playing the wide open game when they should have played the draw, and vici versa.

* * *

One of our curlers asked a visitor how they were treating him, and he replied, "Very seldom."

* * *

Some curlers grow under responsibility, others merely swell.

* * *

What about a little spiel? Lady skips with three men as helpers. There should be no chance of an argument, because when Mother says yes, and Father says no, thats the shot you play.

TENDERS WANTED

Tenders will be received up to Feb 29th for the purchase of the buttermilk output for the two year term ending March 29th, 1938. Lowest or any tender not necessarily accepted.

THE TOFIELD CREAMERY,
W. Eldred, Manager

Reading in Wednesday's Journal of a lady at Regina who froze her teeth and had to have them thawed out, reminds the writer of a similar incident as reported locally. One of our old-timer citizens who, of necessity, leaves for work early arose one morning and found his upper teeth frozen solid in a cup on the kitchen table and had to hurriedly thaw them out in the oven before partaking of breakfast. Such are the vagaries of a Canadian winter.—Caution. Leave false teeth overnight in a warm place before retiring when the temperature hovers between twenty and fifty degrees below zero.

Central Co-op Store

LOCAL AND PERSONAL

We regret to report the death of Mr. Johnnie Jack of Poe, who died early Wednesday morning of pneumonia.

Miss Helen Schultz who has been visiting at the Thompson home returned to Edmonton on Monday.

The Jolly Twelve Bridge Club met at the home of Winnie Worton on Wednesday evening. Honors were won by Thelma Jobb and Winnie Worton.

The Firemen's Ball held in the Variety Theatre last Friday was rather sparsely attended, due perhaps to the extremely cold weather.

Mr. Chris Hammond spent a couple of days in the city this week.

We are sorry to report that Miss Hilda Nomeland and Mrs. A. Innes are on the sick list this week.

Until March 1st last opportunity of obtaining Avon Dental Cream (No. 2) for 27 cents per tube—regular 48 cents; also specials on Brushless Shaving Cream; Antiseptic, Talcum Powder and Powdered cleaner. Orders taken by Agent, Mrs. J. W. Robinson; Phone 43.

AMISK CREEK

The Ladies' Aid held their annual meeting on Feb. 4. All the members were not present so it was difficult to elect the officers for the coming year. The president was not elected. Mrs. A. Haugen was elected vice-president and Mrs. P. O. Flaaten was re-elected secretary-treasurer.

Arnold Berg attended the Young Peoples Convention held in Camrose a couple of weeks ago.

Several from here attended the funeral of late Nils Solberg which was held in the Ryley Lutheran church. Interment took place at the Ryley cemetery.

Mrs. J. Berild visited the city for a couple of days last week.

Mr. and Mrs. A. Haugen entertained the young people around here to a social last Friday evening. In spite of the cold weather quite a few were present, but many more would have gone had the weather been a little warmer. Everyone spent a very enjoyable evening.

The Teacher and pupils got an unexpected holiday when the school burnt down. They are now ready to start school again, having had the church fixed up where they will have school for the rest of the term.

Master Moen had the honor of representing the Ryley Seed Grain Club. He was awarded a free trip and two days visit in the city last week.

Mr. and Mrs. F. A. Moen and Hilmar, Doris Glasimer and Mr. A. Patterson motored to the city last Thursday to get the equipment to start up the school again.

Mrs. C. Erickson has been quite sick for some time, but we are glad to report that she is now on the road to recovery.

Miss J. Aasmo and J. Vestby were visitors at the P. O. Flaaten home last Thursday.

Nora Sand is assisting with the house work at the Erickson home.

Mrs. H. Sorenson and daughter [illegible] of Poe were visitors at the Erickson home last Saturday.

HEALTH

by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

YOU CAN'T

Certain questions addressed to the Health Service might be considered flattering because they imply a rather unlimited faith. It is these questions which prompt an article to show that there are many things which we cannot do, we do not know how to do them.

Two words which are not used in medicine are "always" and "never". So it is that we cannot assure our correspondents that something will "always" or "never" happen. We cannot give the unqualified assurances which the person gives because we have too much respect for scientific truth.

A diagnosis cannot be made by correspondence, it is only possible to make a guess in this way. A doctor does not make his diagnosis solely on the symptoms as described to him by his patient; examination and study of the patient are always necessary. The woman who writes in to ask us if a lump in her breast is cancer should know that we cannot give the answer to her question because all we know is what she tells us. Only an examination will reveal the nature of the lump.

Underweight and tuberculosis are fixed together in the minds of many people who think of tuberculosis, as they have seen it in its late stages as a wasting disease. You can't recognize tuberculosis, whether in children or in adults, by weight because individuals who are overweight and individuals who are of average weight and who are under weight may have the disease.

You can't eat a meal in five minutes and, at the same time, chew your food properly. The human body may be likened to a machine, but it is much more than a machine because you can't have mental health unless you get personal satisfaction out of what you do.

Many people are concerned about their personal appearance. They spend much time and a great deal of money on so-called "beautyfying." They believe the advertisers. You can't feed the skin by rubbing in cream; neither can you make hair grow by applying medicines to the scalp or remove freckles or pigmented spots with salves or lotions.

You can't break in a new pair of shoes; what you do is to break in your feet to fit the shoes, which may or may not be a painful process.

It would seem that more money is spent on laxatives than on all other drugs, and yet you can't cure functional constipation by the persistent use of laxatives. You can't get exercise by riding in a motor-car, nor can you hire someone to do your sleeping for you. Eating, exercising and resting are things you must do for yourself.

You can't get health through someone else. You must practise health habits yourself.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

BEANS

Dried beans are a cheap and appetizing source of protein and at all be served as the main course of a meal as a meat substitute rather than as a potato substitute.

Bean Scallop

****

1 cup beans
2 tablespoons of butter
2 cups cornflakes
1½ teaspoons salt
1 No. 2½ can of standard quality tomatoes

Soak one cupful of beans overnight. Cook until tender. Add melted butter, tomato and seasonings. Stir in cornflakes. Turn into a buttered baking dish and bake in a moderate oven until brown. Serves 4.

Bean Chowder

****

2 cups beans
2 carrots diced
2 small onions, diced
2 medium sized potatoes, diced
3 teaspoons salt
1 can No. 2½ standard quality tomatoes
¼ cup diced fat salt pork or
2 tablespoons bacon fat
Pepper, celery salt

Soak beans overnight in two quarts of water. Cook until nearly tender with the salt pork. Add the vegetables and seasoning one-half hour before serving time.

Cooked vegetables may be used, in which case they are added just in time to be heated before serving. Serves 6.

MAKE HIGH QUALITY FERTILIZERS IN CANADA

Fertilizers are manufactured in Canada on a much larger scale than is generally known. Sulphate of ammonia, ammonium phosphate, superphosphate, cyanamid, organics and mixed fertilizers are all made in different parts of the Dominion in large quantities. The capacity of Canadian plants for the manufacture of these products is much greater than prospective domestic requirements for some time. As the industry is comparatively new in Canada the most equipment and processes of manufacture are in use, resulting in high quality products.

As Canadian crop production becomes more intensified and diversified more fertilizers will likely be used, but the extent to which these products are used in the Dominion is rather small in comparison with other countries. For example the annual requirements in Canada about ... about 200,000 tons. In the United States 3,750,000 tons are used, 1,500,000 in Great Britain, 4,500,000 in France and 6,000,000 tons in Germany.

ORGANIZATION OF JUNIOR GRAIN CLUB 1936

The organization of Junior Grain Clubs in 1936 will be on much the same basis as previous years, according to an advice from the Field Crops Branch, Dominion Department of Agriculture. Membership is open to boys between the ages of 15 and 22 years, inclusive, situated within 20 miles of the club centre. Not more than two boys from the same family are admitted to a club.

In the organization of new clubs it should be understood that all members must agree to accept the same variety of grain. In the case of the Junior Wheat Clubs the varieties to be supplied include only registered Marquis, certified Reward or Red Bobs, three 90 pound sacks. The first step in application is to submit 15 names or more of boys who agree to join the club. A fee of $2 for each member should accompany the application.

Clubs which have operated in previous years may use seed grown on their own plots without paying membership fees. When seed is purchased by members from former club members no membership fee is required. All club members using their own seed should send one pound of cleaned seed to the Dominion Seed Branch, Calgary, for a seed control sample certificate. After the first year, clubs are expected to have a local supply of seed. Should it be necessary to use new seed an explanation must be given. Only club members who have successfully completed one year's club work will be allowed to undertake another project.

Those interested in the forming of new clubs or in continuing the work of former clubs should write immediately to O. S. Longman, Field Crops Commissioner, Edmonton, in order to obtain all information necessary.

17,913 SUBMITTED PROPOSALS UNDER CREDITORS' ACT

OTTAWA, Feb. 18.—Up to the beginning of this month, 17,913 farmers had submitted proposals under the Farmer's Creditors Arrangement Act and 9,179 settlements had been effected, the House of Commons was informed Monday.

Finance Minister Dunning also stated 1,645 settlements were effected without formal proposals.

COW HORNED OUT HIS EYE; WAS BAD ONE

VALLEYVIEW, Ont., Feb. 18.—James Berry wasn't greatly disturbed when a cow's horn gouged out one of his eyes as he was tying the animal up. It was his bad eye, and he hadn't seen out of it in 10 years.

Bean Loaf

1 cups cooked beans
1 cup bread crumbs
1 teaspoon salt
2 tablespoons tomato catsup
1 egg (well beaten)
a little pepper

Mash the beans. Add other ingredients in order given. Bake in a greased pan 30 minutes. Serve hot with tomato sauce. Serves 6.

****

Bean and Corn Scallop

1 cup beans
1 small onion
2 cups canned corn
½ green pepper or pimento

Pick over beans, wash, cover with cold water and soak over night. Simmer until tender.

Fill a baking dish with alternate layers of beans and corn. Sprinkle each layer with salt, onion and pepper. Cover the top with buttered crumbs, and bake a half hour at 375 degrees F. Serves 6.

TO CELEBRATE 100 YEARS RAILWAY SERVICE IN CANADA

Railway trains operated in Eastern Canada for nearly half a century and the railway era was fifty years old when a transcontinental railway first crossed the Dominion of Canada, stated Alan N. Longstaff, Associate Editor of the Canadian National Railways magazine in opening the third series of national radio talks sponsored by the Young Men's Canadian Club of Montreal. The talks are broadcast at week's intervals through stations in the Canadian Radio Commission's network across Canada.

The railway construction era, which brought about Canada's greatest expansion period, should be divided into two parts, Mr. Longstaff stated. The first of these brought about the development of eastern cities and communities as a network of trunk and branch railway lines, superseded the rutted wagon roads which had served the stage coaches and freight vehicles of pre-railway days. The second part, nearly 30 years later, witnessed three trunk railways built across the Rocky Mountains, which brought about the opening and development of Western Canada. In this period also came the tapping of valuable mineral fields.

In July, this year, Canada will celebrate the centenary of her first railway train which ran from Laprairie to St. Johns, a distance of 16 miles over the Champlain and St. Lawrence Railroad, now part of the Canadian National System. Contrasting modern railroading in Canada with that of 100 years ago, Mr. Longstaff stated that Canadian steam roads today operate 5,000 locomotives, 7,800 passenger cars and 200,000 freight cars of various descriptions. They employ jointly 150,000 persons and have an annual payroll of $150,000,000. Canadian products and materials are purchased annually to a value in excess of $[illegible].

Transportation has made the development of Canada possible, said the speaker and with all the new and competing forms of transport, nothing had yet displaced the railway as the every-day servant of the Canadian people. When waterways were frozen, highways impassable and airplanes grounded by unfavorable weather, train crews still handled their passenger and freight trains, day and night, over the steel highways which were the arteries of the nation's commerce.

The railway companies, Mr. Longstaff said, had been chiefly responsible for building up Canada's tourist industry to the peak when it produced $300,000,000 revenue in one year. They had spent large sums in advertising before other agencies turned their attention to this work. Instancing other ways in which the transportation industry assisted the development of Canada, he said that the railways' industrial departments had located hundreds of industries in the Dominion and were responsible for encouraging the investment of millions of dollars of foreign capital in Canada. Agriculture and colonization departments not only assisted settlers in securing suitable land but aided them and other farmers in various ways after their settlement. They aided also federal and provincial governments in transferring unemployed families from city relief rolls to farms where they became producers and assisted in removal of farmers from drought stricken areas to better farming locations in their own and other provinces.

Railroad executives had met the challenge of changing conditions. Passenger trains had been speeded up, schedules revised to meet daylight ... Extension of low-rate excursion fares had brought many travellers back to passenger trains. Door-to-door freight service with pick up and overnight delivery and handling of ... passenger train ... had brought increased traffic. Measures of economy had been ... and all avenues of saving ... explored in the effort to ... expenses without sacrificing ... the public.

In many ways the railways ... stated Canada's development, said Mr. Longstaff. Without efficient transportation there could have been no Dominion of Canada, ... without water transportation Jacques Cartier could never have discovered his New France nor could adventurers have ventured inland from the seacoast.

Case of Forgetfulness

F... met with an accident, but the next day managed to crawl to work.

"Why didn't you stay home for a week or two?" said ... "Weren't ye carryin' an accident policy?"

"I was not, bad cess to me carelessness!" said Riley. "I had left it home in my bureau drawer."

Not Very Few

"Sammy," asked the teacher, "how many make a million?"

"Not many," answered Sammy quickly.

SHOT THROUGH BRAIN INNISFAIL LAD MAKES COMPLETE RECOVERY

Innisfail, Alta., Feb. 8th.—The complete recovery of Elmer McCaghran, 16-year-old Raven, Alta., boy after a bullet had passed through the centre of his brain was described here last night by Dr. C. F. Dorsey of Innisfail, who attended the youth.

The bullet tore into Elmer's head behind the ear, pierced the brain after splitting in two at the skull and stopped at the surface of the brain. Particles of the bullet, thrown by centrifugal force sprayed an inch forward from the main track of the bullet.

The lad, shot accidently December 23rd at Raven by his brother Hershel, who was cleaning a rifle, is in good health. "All the mental functions now appear to be normal," said Dr. Dorsey.

"The remarkable part of the case is that a bullet travelling practically the whole width and depth of the brain should cause so little disturbance of the brain functions," the doctor stated.

Dr. Dorsey expressed the hope X-ray plates of the case and the patient may be examined by medical men at the next meeting of the Alberta Medical Association to be held in Calgary in the near future.

The boy made rapid recovery after Dr. Dorsey and Dr. M. Marmar of Bowden, Alta., both of the Innisfail Municipal hospital staff, performed a trepanning operation Jan. 11, "to relieve the intracranial pressure and also with the hope of being able to remove the bullet if it had penetrated through to the under side of the skull in this area."

"The bullet was lodged too deeply to insure its safe removal without causing other complications," Dr. Dorsey explained, "but the decompression by removal of an area of bone allowing the membranes to expand into the area previously occupied by the removed bone, cleared up the intense headaches and the partial blindness.

"For a few days following the operation there was a paralysis of the right arm which cleared up. A numbness of the right leg present from the time of the accident has now disappeared. All the mental functions now appear to be normal. The boy walks with perfect ease and his general condition is better than before the accident occurred.

"The progress of the case will be watched closely for any subsequent symptoms that may develop in the future."

Dr. Dorsey said the bullet entered the scalp at the level of the right ear canal midway between the ear and the middle of the back of the head. The bullet split and part of it came out through the scalp one inch from the entrance while the balance of the bullet went through the skull and travelled upwards and to the right until it lay near the brain surface of the right upper temporal area, about two inches from the centre of the top of the skull.

RED FLANNELS ARE SOUGHT, YOU CAN BELIEVE IT OR NOT!

The cold spell is making history. On the shoulders of the weatherman may rest the responsibility for being the final factor in taking us back to the "good old days" away back when men wore sidewhiskers and red flannel underwear. Already earmuffs have been revived.

At least one city store reported Tuesday a woman customer had requested red flannel underwear. The clerk regretfully announced it wasn't stocked so the customer was sold the ordinary woolen.

For about a year now dresses have been showing a trend toward the flowing styles of Queen Victoria's reign. But red flannel underwear! Who'd have believed the fair sex would go that far.

And there are other indications too. A survey of several larger stores in Edmonton reveals a considerable increase in the sale of woolen undies during the past two weeks and a tragic slump in the demand for all the pretty unmentionables.

Sweet young things as well as matrons are buying woolen stockings with the same zest they formerly bought the sleek silk apparel.

An angry woman rushed into the registrar's office. In her hand she bore a licence. To the registrar she said:

"Did you, or did you not, issue this licence for marryin' me to Albert Briggs?"

"Yes, I believe I did. Why?"

"Well, what are you going to do about it?" she demanded. "He's escaped." Illinois Central Magazine.

MAN AT 115 LOSES SAVINGS WANTS TO DIE

ST. PAUL, Neb., Feb. 18.—Solomon Franklin Rickner—Nebraska's oldest inhabitant—celebrates his 115 birthday today; and for him, death holds no sting, he says.

It was financial trouble which bred melancholy in the mind of the super centenarian.

"I do not know why I should lose everything," he said, "after working so hard all my life. I have no desire to live any longer."

County authorities recently approved Rickner's application for an old age pension—$30 a month, the maximum.

Tofield, Alberta
W. Worton, Publisher

A NEW HALL FOR TOFIELD—

FOR SEVERAL years Tofield has felt the need of an improved meeting place or community hall. The Variety Theatre, which in its day has given excellent service to the residents here has become outmoded. Still quite useful of course, but for modern requirements too narrow for good amateur stage productions and leaving much to be desired as to the condition of the floor for dancing. Furthermore information is now to hand that the building has been rented for a pool room, the change to be made quite soon. When this change occurs, Tofield will be without a public hall of any size with the exception of the curling club waiting room. To the credit of the curlers it can be said they stepped into the breach quickly. Already a meeting of the executive of the curling club has been held and arrangements made for smoothing the floor and wiring the room for electric lights. Chairs will, we understand, be purchased (with cushions we hope) and the room made into as good a meeting place as possible. As a temporary substitute this is splendid, but as a permanent community gathering place it is not nearly pretentious enough.

Believe it or not, our best wishes have always been and are now with the farmer. From the farms of this province come the greater portion of the wealth created. Even if it sounds like blarney, the statement that the farm population is the salt of the earth is, as far as this province is concerned, literally true. Consequently we feel that if the farm population is so necessary to small town welfare, it should receive every consideration from town residents. In stressing the importance of the farm population there are no reflections cast on the town population. Professional men, business men and others generally play their part well, but the fact remains that in the economic set up of this province as to importance the farm population ranks first.

It would then, seem to be good business on the part of all residents of country towns to try and maintain not only trade connections with the farm population but to foster any other possible connection as well. In spite of the advent of the telephone, automobile and radio, the farm population still lives a somewhat isolated existence. Not nearly so much as formerly of course, but their very business makes a certain degree of isolation compulsory. With houses a quarter, half or one mile from each other contact with any number of neighbors is necessarily limited. Town life is the exact opposite. Certainly there is no density of population but there is contact in store, club or church. This feature, this easy approach to one another by townspeople automatically hands to them the initiative in all kinds of community projects. Community projects, which by the way, should be of equal interest to the townspeople and rural residents alike. There is no suggestion that either farm people or town people give up any community activities they now enjoy, but there is a suggestion that effort be made to stimulate community projects that are interesting and congenial to both. One avenue to closer contact between town and country folk is a good, well equipped and frequetnly used community hall, large enough for all purposes.

With the Variety Theatre now being converted to other uses it would seem that the time has arrived when the citizens of this town should be thinking about the erection of a new and adequate community hall. The wish of course is apparent. Most everyone at Tofield would like to see a new hall erected, but there are few, if any at all, who feel that it is financially possible.

We believe a community hall is not only a great convenience, but actually a revenue producing project to the town generally. The revenue of course is not easily calculated, split up as it is among the business of the town, but it is there just the same. Certainly anything that promotes further social contact, promotes business contact.

The Town of Tofield owns and has invested $5000.00 in Edmonton city bonds. These bonds at the present time are worth $86.00 for each $100 invested and to sell them at the present time would mean quite a loss. Even if they were at par the town could not sell them unless special permission was obtained from the Board of Utilities as their control of this investment was part of the refunding debt agreement made some years ago. Prospects for a new hall do not look particularly bright, but there is one ray of hope. At the present time before the provincial parliament there is a bill fostering the erection of community halls in rural centres. Money can be borrowed by municipalities subject to the approval of the Board of Utilities for this purpose. This benevolent gesture on the part of the government causes one to wonder if, were the Board of Utilities approached with regards to spending this $5000 for the purpose of building a hall whether they would say no.

We are hoping for better times and many generally well informed people believe we are on the eve of economic expansion. If this belief proves to be true, prices of building materials will rise—they always do. To sell those debentures now would incur a loss of $700.00, to wait until they reach par would probably entail additional building expenses of a like sum. The whole problem requires a combination of business wisdom and enterprise in the right proportions. If we have that combination in Tofield we will probably get a hall, if we have not that combination we probabl will not.

CHANGED ATTITUDE IN ARGENTINA

Changed attitude on the part of the Argentine government towards the wheat growers of that country is quite noticeable of late and efforts are being extended to better their lot. The fixing of a minimum price of 90c a bushel as announced last December was but one of the moves made towards this end. Another was the development of plans for a comprehensive elevator system. Bids have been invited on the construction of 14 new public terminal elevators in the port cities at a cost of about $17½ million (Canadian money). A special elevator commission has been appointed to manage the new terminals which will have a capacity of 24 million bushels. The commission is also authorized to prepare plans for the construction of 180 new public country elevators and for the remodeling of existing country storage at an additional cost of about $12,780,000 (Canadian).

It is the intention of the government to develop bulk handling much on the same lines as that followed in Canada and to abandon the sacking of wheat which is expensive and unsatisfactory. The introduction of warehouse and elevator receipts negotiable at local banks and of a comprehensive government grading system involving the payment of premiums for quality, are among the reforms which will follow the development of this new policy.

Provided pending legislation is approved of by the Argentine Chamber of Deputies this new commission will also have control of the production, sale and handling of grain from the first to the last operation and of all institutions or firms dealing in grain. It will also establish the types of grain that will be produced in zones to be determined. Control over shipments of grain is provided by certificates. A register will be established in which every person dealing in grain must be inscribed, failing which no operations will be permitted on the grain exchange or market, and no export permits granted. Until the chain of elevators is in operation all export shipments will be made under the control of the commission.

This government commission will be financed by a tax of approximately 1c (Canadian) for 220 lbs. of grain exported, this to be paid by the exporters and also from all proceeds from inspection fees, dues, and fines. The law also establishes fines and penalties for infractions and gives the right to the executive power, with the advice of the commission, to prohibit the exports of grains that do not fulfill the conditions established.

There may be some delay in the development of the country elevator system due to the necessity of building good market roads, the developing of the use of trucks for the transporting of grain. The average distance from the producing areas to seaports in Argentina is only 150 miles and this has considerable bearing on the building of country elevators. With good roads and motor trucks to the ports available for the transport of grains, the number of country elevators may be restricted.

FAILURE OF S.C. MEANS UPRISE SAYS MEMBER

Failure of Social Credit in this province will mean an uprising of forces held in check so far by the hope of justice, said H. E. Wight, S. C. member for Lethbridge, when addressing the legislature in the throne speech debate Monday.

Failure of Social Credit does not mean the election of the Liberal or any other party.

"It means that what are commonly called the underdogs will show their teeth and that what Russia suffered will look tame compared to what the people will go through," he declared.

Mr. Wight said he was speaking as an engineer, with 15 years' experience in relations between capital and labor.

"I speak being one who knows their hearts, their troubles, their desires, their hunger for the expression of that divine spark of life God gave them. Will we as Christian men, fail them, Mr. Speaker?

"No, we will not. With a leader who has an exceptional training and education for such leadership; who has the experience and background of the man who does things; a man who puts his ideals into motion and creates those ideals into material existence; a man who can hold up his hand and call on divine assistance knowing that this help does come to those that help themselves; with such a leader people of Alberta, we will not fail you," declared Mr. Wight.

The members asserted early in his remarks that: "We have been elected to serve the people and we will. We can pay a dividend and the people know we can and will."

"Could anyone be so absurd as to say a province with the wealth of Alberta could not pay its shareholders a dividend?" he asked.

"Under Social Credit, everyone benefits so why not all co-operate?" he asked. "Even our friends on the other side of the house will be far better off; so like the parent with the wayward child we must force them to take what is for their own good, even if they rebel against it."

The member declared that the government side would support every move or principle brought forward by the opposition for the good of the people of Alberta.

"Every member has been elected by a majority. We all represent these people so let us forget class prejudice and party politics and work for the good of all," he said.

SCHOOL AREA CONSOLIDATIONS WOULD BE DONE GRADUALLY, ABERHART TELLS DELEGATION

Consolidation of school districts will be carried out gradually, one or two at a time, if the proposed legislation by which 3,000 such districts in Alberta would be consolidated into about 50 divisions, is passed, Premier Aberhart told a delegation representing the Alberta School Trustee' association Tuesday.

The delegation was presenting, among 35 resolutions passed at the Calgary convention two weeks ago, one stating unqualified opposition to the consolidation plan.

The bill under which this amalgamation plan would be effected is to be brought down in the legislature next week it is expected.

Premier Aberhart had not previously pointed out specifically that gradual consolidation was his aim; it was believed that the bill would call for operation of the plan throughout the province immediately upon proclamation.

Trustee A. E. Ottewell, of Edmonton, told Premier Aberhart and the cabinet that he did not believe that the Calgary convention had been aware of a plan for gradual effect. It might make some difference in the attitude of the provincial trustees' organization, he said. Trustee F. C. Casselman, Edmonton, said that undoubtedly there were cases in the province where consolidation of districts into divisions would be helpful, if not vital, but he renewed opposition to the scheme on a province-wide scale.

Premier Aberhart said the plan would be effected in a few districts as an experiment and then if it proved successful would be spread.

The delegation, echoing the convention, had asked that in any case action be postponed for one year. Premier Aberhart replied that this would mean simply a year's delay in the experiments.

2ND READING TO SEVEN BILLS GIVEN BY HOUSE

Speeding along with legislation to be taken up in the house, Monday gave second reading to seven more bills.

Those advanced were, an act to amend the Labor Disputes act; to amend the Solemnization of Marriage act; to amend the Brand act; to amend the Improvement Districts act; to amend the Town and Village act; to amend the Alberta Municipal Assessment Commission act to amend the Exemptions act.

Power for municipal councils to impose a minimum tax of $4 for school purposes, is proposed in the bill to amend the Town and Village act. Such action of the council, however, would be subject to approval of the minister of education.

Tax would be collectable at any time after Jan. 1 in each year.

Power would be given the council by resolution to fix the minimum $4 tax for school purposes to be paid by any person on the assessment roll and also to require that every male resident of 21 years who had resided in the town for one month or more and had not been on the tax roll should pay the tax.

Another section of the act empowers the council of a town or village to guarantee loans for the purpose of erecting community halls, subject to approval of the utilities commission.

Another section of the act empowers the council to dispose of land acquired under any tax recovery statute.

Awaiting second reading is a bill to amend the Local Tax Consolidation act, 1935. One section substitutes Dec. 1 for 15, as the last date for making applications to consolidate arrears.

Another section empowers the treasurer to make an estimate of the number of years for which school taxes are in arrears, in case that number is unknown to him.

Receipts of school taxes by the treasury is optional, instead of compulsory, under the terms of another section.

Bill to amend the Timber Areas Tax act, second reading provides, that distresses for the collection of taxes imposed by the act may be made by any person authorized by the minister in writing for that purpose. As the act stands, the only person who can levy such a distress is a sheriff.

DAIRYING NOW RATES AT TOP

WINNIPEG, Feb. 18.—The dairy industry has attained the foremost place in Canadian agriculture, in the opinion of W. H. Forster, president of the National Dairy Council of Canada.

He told the annual meeting of the council here last night that this means "first place in actual returns to any branch of agriculture, first place in the number of producers concerned, and we believe, first place in the number of inhabitants in Canada directly dependent on any one industry for a living."

Seventeen per cent of Canada's total population are engaged in the production, processing and distribution of milk, it was estimated by the council.

TOY BALLOON FLIES 750 MILES IN DAY

NEW SAREPTA, Feb. 18.—Toy balloon filled with gas and released here Feb. 1 was found on the following day six miles from Langdon, North Dakota, according to word reaching here. It was found by Nicholas Bachman, who wrote that when he took it into a warm room it immediately swelled to twice its size.

By air line Langdon is about 750 miles from here, the distance indicating the speed with which the wind travels.

SET 60c AS BASIS 1930 POOL PAYMENT

OTTAWA, Feb. 18.—Payments to farmers for pool wheat of the 1930 crop will be equalized on the basis of 60c a bushel No. 1 northern, Fort William, under legislation to be introduced shortly, Premier King told the commons Tuesday.

CALGARY THUG SELLS TRUCKLOAD OF BEER

CALGARY, Feb. 17.—Charged with robbery with violence, Harold Smith, 23, and Hugh Christie, 25 were under arrest Sunday night following one of Calgary's most unusual crimes. The pair were in bed when arrested.

Frank Erskine, truck driver for Distributers Ltd., was held up Saturday by two men who called him into an apartment. They bound the truck driver, gagged and blindfolded him. They robbed him of $26 and forced him to endorse a pay cheque for $54.

While Erskine was held captive in a clothes closet, one of the men took the truck, delivered its load of beer valued at $40 and collected payments. One of the pair remained in the apartment with Erskine until the other had returned. Then both left after warning Erskine to be quiet. Later the cheque was cashed at a jewelry store and an electric razor purchased.

In the meantime Erskine kicked the closet door open and made his way into an adjoining suite where occupants removed the tapes.

Truck was found late Saturday on a downtown street.

Johnny was enjoying his first ride in a first class coach. To show his joy he sang and whistled unceasingly. Finally a man who was trying to read turned to Johnny.

"Close your mouth or I'll throw you out of the window," he threatened.

"What's the matter with the door?" asked Johnny with hardly a pause for breath.—J. A. Landry

WIT And WISDOM

Random Shots

I shot an arrow into the air; it fell in the distance I knew not where, 'til a neighbor said that it killed his calf, and I had to pay him 6 and a half.

I bought some poison to slay some rats, and a neighbor swore it killed his cats. And rather than argue across the fence I paid him 4 dollars and 50 cents.

One night I set sailing a toy balloon and hoped it would soar 'til it reached the moon. But the candle fell on a farmer's straw, and he said I must settle or go to law.

And that is the way with the random shot; it never hits the proper spot. And the joke you spring, that you think so smart, may leave a wound in some fellow's heart.—Hamline Oracle.

****

Young doctor—"I'm afraid I made a mistake in filling a death certificate today."

Old doctor—"How was that?"

Young doctor—"I absent-mindedly signed my name in the space left for 'cause of death'."

****

A Wise Answer

"Where is Jimmy this afternoon?"

"If he knows as much about canoes as he thinks he does, he is out canoeing, but if he doesn't know any more about it than I think he does, he's swimming."

****

Carelessness

Father—"Why were you kept in at school?"

Mike—"I didn't know where the Azores were."

Father—"In the future, just remember where you put things."

****

"Well, I Nephyr!"

A farmer once called his cow Zephyr
She seemed such an amiable hephyr
When the farmer drew near
She kicked off his ear
And now the farmer's much dephyr.

****

Learned Yesterday

A golf professional, hired by a big department store to give golf lessons, was approached by two women.

"Do you wish to learn to play golf, madam?" he asked one.

"Oh, no," she said, "its my friend who wants to learn. I learned yesterday."

****

Completely Figurative

"Give an example of an imaginary spheroid."

"A rooster's egg."

****

Mike approached a stallholder at Christmas fair and, proffering a coin received three balls.

Taking careful aim, he let fly, smashing a beautiful clock. Grinning broadly, he threw his second ball, knocking to fragments a painted vase. Scarcely able to control his excitement, he threw his third, breaking a biscuit barrel.

Then he exclaimed triumphantly: "Now give me one of those clay pipes."

****

"Can you serve company?" asked the housewife when she was hiring the servant.

"Yes mum; both ways."

"What do you mean?" asked the puzzled one.

"So's they'll come again or stay away."

WAINWRIGHT PRESBYTERY MEETS AT TOFIELD

The Presbytery of Wainwright met in the United Church on Tuesday, 18th of February at 9 a.m. and continued until 11 p.m. with intervals for lunch and supper. Owing to the lateness of the train on Monday the work of the Presbytery had to be carried through with precision and speed.

All the ministers were present and also the laymen from Irma, Holden and Ryley, also Dr. Nicol, Supt. of Missions.

All the reports were submitted and discussed. At the evening sessions splendid papers were given by Dr. Scott on "Mind Health," and by Rev. T. E. Armstrong on "Church Sunday Sport." Dr. Nicol spoke on "An adequate Religion." There was opportunity given for discussion and this public meeting proved beneficial and helpful.

Mr. McCauley presided at the organ.

A splendid supper was provided the members of the Presbytery by the wives of the Board of Stewards.

The Presbytery voted a hearty vote of thanks to the pastor and congregation for their warm welcome and fine entertainment.

Miss Constance Ward, West China, will speak in the United Church on Sunday evening Feb. 23rd.

TOWN COUNCIL HOLD FIRST MEETING

The first regular meeting of the new town council was held in the Town Hall on Monday evening February 17th at 8 p.m. The Returning Officer gave the report of the results of the recent elections for councillors; and Dr. F. F. Law, G. Coutts and M. C. Hammond who had been elected for the next ensuing two years subscribed to and filed their oaths of office.

Standing committees for the year were appointed as follows, Property, rink and cemetery, Councillors Lovell and Coutts, By-Laws and Police, Councillors Coutts and Love. Health and Relief, Councillors Law and Hammond. Fire, water and light, Councillors Hammond and Law. Public works, Councillors Bellamy and Swift. Finance, Councillors Swift and Bellamy.

Councillor Swift was appointed Deputy Mayor for the next ensuing three months.

A By-Law authorizing the town to borrow the sum of $1500.00 on the security of bonds in the reserve fund, was given three readings and finally passed.

Estimates of Receipts and Expenditures for the year 1936 were presented and the secretary instructed to refer them to the Board of Public Utility Commissioners for their approval.

ANGLICAN WHIST AND BRIDGE DRIVE A SUCCESS

The Anglican W. A. sponsored a Bridge and whist drive on Monday evening of this week, a large number attending. Mrs. Malcolm had kindly placed the hotel dining room at the disposal of the committee, the room being comfortably filled. Prizes won were as follows: Ladies first, bridge, Winnie Worton; Gents first, bridge, J. Takabuski; Ladies consolation bridge, Mrs. Stinson; Gents consolation bridge, H. Kendall. Ladies first whist, Mrs. Worton; Gents first whist, F. Mackola; Gents consolation whist, Mr. McSporran, Ladies consolation whist, Mrs. Edwards. Following the cards a delicious lunch was served by the committee.

THE DOMESTIC ANIMALS ACT (Municipalities)

Sale and Redemption of Impounded Animals (Sec. 46)

Notice is hereby given under Section 46 of the Domestic Animals Act (Municipalities) that one red steer with white spots, horns, yearling; one red and white steer with white face, having a red spot on forhead, yearling, horns, no brands visible; was impounded in the pound kept by Oscar Thompson, Kingman on Wednesday, the 29th day of January, 1936. And that the animal was sold on the 13th day of February, 1936, and that said animals may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in the Alberta Gazette upon payment of all fees and costs due to the municipality and the purchaser of said animal.

For information apply to the undersigned.

J. O. A. LETOURNEAU,
Secretary-Treasurer of the Municipality of Cornhill, No. 487. Post Office, Tofield, Alberta.

T. SCHULTZ TO OPEN POOL ROOM IN VARIETY THEATRE

Information is to hand that T. Schultz will shortly open a pool room in the building known for many years as the Variety Theatre. We understand the tables and equipment used in the McBratney pool room will be moved into the building. Mr. Schultz is well known throughout the district.

TOBACCO PRODUCTION REACHES NEW HIGH

Tobacco production in Canada reached an all time high in 1935. The crop last year amounted to more than 65 million pounds and was 48 per cent greater than that of 1934. The tobacco growing industry in this country has made rapid strides over the past fifteen years, especially in Ontario, where 88 per cent of the crop is produced. Other areas of production are located in Quebec and in British Columbia.

The quality of the 1935 crop is reported as excellent. "With an improvement in general economic conditions and a closer co-operation between growers and purchasing companies in the marketing and production of flue-cured and Burley tobaccos, the price situation is much improved over 1933, particularly in Ontario," states the "Agricultural Situation and Outlook" for 1936. Authorities feel, however, that in the case of flue-cured tobacco the probable demand in 1936 does not call for any increase in acreage over that of 1935. Although the acreage devoted to Burley in 1935 was not as large as anticipated, an increase of over 10 per cent in acreage of this type, does seem to be warranted for 1936. Other types of tobacco appear to have reached a satisfactory acreage, based on present consumption figures.

The only items of tobacco and tobacco products to show a decline in consumption in 1935 were plug and snuff. These commodities appear to be somewhat less in fashion for the present at least. Withdrawals of cigarettes from bond for consumption in 1934 were 14 per cent greater than in 1933 and in 1935 this figure was 21 per cent over that of 1933.

Exports of tobacco to the United Kingdom declined in 1935, but the outlook appears to be more encouraging. The British West Indies imported substantial quantities of Canadian dark tobacco; a sharp increase in 1935 being reported.

Figures pertaining to the production and marketing of tobacco are discussed in the "Agricultural Situation and Outlook" for 1936. Published jointly by the Department of Agriculture and Trade and Commerce, this bulletin is available free to farmers and others interested from the Publicity and Extension Branch, Department of Agriculture, Ottawa.

LAST CHANCE TO SEE "THE PATH ACROSS THE HILL" SATURDAY NIGHT

The comedy-drama, "The Path Across The Hill" will be presented by a local caste under the auspices of the Anglican vestry on Friday and Saturday nights of this week.

The unfolding of the play provides food for constructive thought as well as providing much wholesome humor. Attendance at this production will provide a topic of conversation other than the cold weather just past and will produce many a chuckle to return in retrospect for many days to come. At the Variety Theatre, Friday and Saturday this week at 8:30 p.m.

WAKE UP YOUR LIVER BILE—
And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

'The Path Across the Hill' Ably Presented

Those people who were fortunate enough to be able to attend one of the performances of "The Path Accross the Hill," have nothing but praise for the play and its presentation. The entire caste played their parts admirably, indeed it was their excellent presentation of the various characters that gave the play such charm and interest.

The scene of the play was the home of Grandpa Crawford (Rev. Wallis) where, with his granddaughter and grandson, Ruth and Walter Conrad (Miss Forster and John Swift), he was living an uneventful and happy life. The domestic duties of the household were attended to by Zuzu, a colored maid (Edythe Barden) and neighborly interest was maintained by "Grandma Davis" (Mrs. Wallis). Additional interest was created by Lutie(Beryl Edwards) the daughter of a village busy-body. As the play proceeds other characters appear, Dr. Jimmie Reed (Donald Edwards), Salamander Jones (L. McLeay), Robert Post (Reg. McCarthy), Flo Gray (Betty McCarthy).

The story opens up with the problem of Walter, who despite his sister Ruth's admonitions fails to settle down and earn money for college. Zuzu has to catch the 12:30 to the city in order to spend a week with her sweetheart Salamander Jones. Grandma Davis comes in with some cookies for Grandpa Crawford and although Grandma Davis denied all suggestions of proposing somehow they agree to get married. During the love making scene, Lutie manages to get into the room and by hiding under the table hears all the conversation. Unfortunately she sneezes and is taken to task by Grandma Davis, later being tipped by [illegible] not to tell her mother what she had heard. The shrill voice of Lutie's mother is heard calling her and she goes out.

Dr. Jimmie Reed is very anxious to marry Ruth, but she believing it her duty to look after grandpa Crawford will not immediately consent to marriage, though believing herself to be in love. Ruth's aunt invites her to take a long trip abroad, but for the same reason, much against Grandpa Crawford's protests, she refuses.

About this time there arrives from the city Robert Post on a vacation and is directed to the Crawford home by the path across the hill, to get a room. He first meets Ruth and later Grandpa Crawford who he immediately recognizes as a former employee of his father's bank who had embezzled $50,000.00, thereby bringing ruin and a premature death to his father. He is very bitter and threatens exposure. There also returns at this time Zuzu safely married to her Salamander Jones and accompanied by her husband. Flo Gray, Ruth and Walter's cousin from the city also arrives at this time and her modern views on life captivate Dr. Jimmie Reed who throws over Ruth and hastily marries Flo. Robert Post is torn between the desire to avenge his father's premature death and his growing love for Ruth. He goes away to the city, Walter accompanying him, much to the consternation of Lutie who, while young, is very fond of Walter. In the city Walter runs wild and became involved in a bootleg arrest and wires home for $500. Before the money can be sent he arrives home accompanied by Robert Post who he explains paid his fine for him. Robert is still vengeful though greatly in love with Ruth. Just before exposure of Grandpa Crawford is to take place, proof that Ruth and Walter's father who is dead, and not Grandpa Crawford stole the money. In the meantime Grandma Davis and Grandpa Crawford had become happily married and Flo and Dr. Jimmie Reed unhappily married. With the innocence of Grandpa Crawford proven, Robert Post pursues his love making with Ruth who is pleased to respond. Lutie and Walter plan for the future and all ends happily.

The comedy element was well supplied by Zuzu and Salamander throughout the play.

It is too difficult to pick outstanding stars for each and every character was splendidly depicted and deserve praise for their work.

During the intermission Kenneth Baptist and Henry Hicks sang "Baggy Breeches" much to the enjoyment of those present.

KETCHAMOOT

The regular monthly meeting of the Ladies' Aid will be held next Wednesday, March 5th, at the home of Mrs. J. H. Ingram. A cordial invitation is extended to all.

Mr. and Mrs. A. F. Schultz were called to Edmonton one day last week to attend the funeral of Mrs. Schultz's brother, Mr. Fawcett, who had passed away after a few weeks illness following a stroke.

With the temperature around 50 degrees below a crowd of young people attended a card party at the Sears home, Feb. 14th. Some came as far as four miles, eight tables playing. Lunch was served at midnight and all seemed to have a jolly time.

Mr. and Mrs. Oliver Thompson of Kingman were guests of the Nemeland family Wednesday evening of last week.

Mrs. Davison left on Wednesday of last week for Armstrong, B.C. to attend the funeral and look after the business of a friend that her father had raised, he having no relatives in the West. Mrs. Davison will be away for some time.

Mr. Lorne Lee entertained the young people to a card party Wednesday evening, seven tables playing. Lunch was served by the girls of the district. All enjoyed themselves very much.

Mrs. John McGinitie also received sad news last week stating the passing away of her brother at Arkansas, U.S.A. He with his wife and two sons visited at the McGinitie homes a year ago last summer and made many friends in our district. Our sympathy is extended to the family.

Mrs. Jim Johnson is spending a few days visiting in Edmonton.

Mrs. A. F. Schultz left on Wed. for Poe after receiving the sad news of the death of Johnnie Jack. Mrs. Schultz attended the funeral in Edmonton on Saturday. She expects to return home the first of the week bringing little Miss Olive Jack home with her. Mr. Jack was a frequent visitor and had many friends in our district who were shocked and very sorry to hear of his sudden death from pneumonia.

Congratulations A.B.C. on your curling comments, also Mr. Editor on his editorials. The one in last week's issue struck our family very favorably, personally the one of "Little Mary" was the best true story I ever read.

LOCAL AND PERSONAL

Mr. Walter Bellamy left this week for Edmonton where he will visit his brother.

Miss Florence Kendall returned home after visiting at Sunnybrook.

Mr. Bob Whyte of Wetaskiwin spent the week end in Tofield.

Bill Robinson of the Bank of Montreal staff in Vegreville is visiting at the McCauley home.

Mr. and Mrs. George Coutts spent the week end in the city. Mr. Coutts received the sad news of the death of his sister.

Mr. Harold Green visited Viking for the week end.

A number took advantage of the excursion to Edmonton last Friday.

The Jolly Twelve Bridge Club met at the home of Mrs. Stan Takabuski on Monday evening. Honors were won by Marjory Stuart and Winnie Worton.

Mr. and Mrs. McLaughlin and Enid of Wetaskiwin visited friends in town on Thursday.

The Messrs C. Patterson and Wes Taylor visited the city on Thursday.

Born—To Mr. and Mrs. Spangler, a daughter.

UNITED CHURCH NEWS

Miss Constance Ward, missionary of the United Church in West China, delivered a most interesting address Sunday evening on her work among the Chinese.

The congregation was interested to hear of the variety of work our missionaries have to do in the foreign lands.

At the close of the service Miss Ward exhibited a great many curios and photographs. Everyone stayed behind to see them and were keenly interested in the description given by Miss Ward.

The choir of the United Church is preparing a splendid Easter Cantata.

ANNUAL MEETING W.M.S. AT RYLEY

The tenth Annual Meeting of the Wainwright W.M.S. Presbyterial was held at Ryley on Friday, February 21st. Twelve representatives from the other auxiliaries of the Presbyterial attended, the cold weather and heavy roads limiting the attendance to a considerable extent.

The roll call was answered by a verse of Scripture on "Peace". The reports were very good, most of the Auxiliaries reaching their allocation for 1935.

Inspiring addresses were given by Mrs. Firth, Tofield Presbyterial President and Mrs. Washburn of Wainwright, who spoke on the "Kingdom of God" movement. Three minute addresses by Auxiliary presidents gave the highlights in the work of the year.

The guest speaker of the day was Miss Ward, missionary to China. She told of the Government and mission schools of China and of the progress made. In the absence of a minister Miss Ward undertook the installation of officers for 1936. An interesting exhibition of Chinese work and models of a Chinese junk sedan chair and other things evoked much interest. Mrs. Don Ireland of Ryley delighted her hearers with two sacred solos and the Mission Band did their bit by a chorus.

The 1937 Presbyterial will be held in Wainwright. Mrs. Coursier was elected as delegate to Branch Conference at Edmonton, March 3rd to 6th inclusive.

A very pleasing part of the program was the delicious supper served by the Ryley W.M.S. members and very much enjoyed by all.

Mr. Thompson, who was injured by a fall at his elevator at Bardo returned from the hospital on Friday.

BEHIND THE HOG

This week's brain wave: At a cafe after a game, one of the boys said to the waiter, "A little service Billiard cue." I said, "Why Billiard Cue?" and he said, "Oh, that bird works better with a tip.."

****

If the Curler who fails is a failure, Would the curler who quails be a quailer?
If drinking too much makes a drunkard,
Would thinking too much make a thunkard?

****

Every curler has three characters, that which he exhibits, that which he has and that which he thinks he has.

****

The local bank staff and Inspectors stacked up against a local aggregation on Tuesday. It was not our day. We had no weight, no broom, no gallery, it was too cold. In fact it was not our day and I think they outcurled us. They had Machmas, Cowel, Sutherland and Lloyd Smith on skip. We had Rev. Allan, Ed Hardy. Yours truly and Bert.

****

Better get in your curling right away folks, while this weather is on because—When e'er I see upon the stairs, Long rows of mops and brooms in pairs, and watch the curtains fall like sails, and listen to the good wife's wails, I know tis Spring Beautiful Spring.

****

The ladies are going to have a two day bonspeil, and why no., we are sure in favor, after all who works harder than the women. With four sheets of ice and the weather we are going to have next week. We also might collect a few news items. Lets go.

TOFIELD LOSE FIRST GAME IN PLAY OFF SERIES

The first game in the play off series in the Gas Line League was held between Irma and Tofield at Irma on Tuesday night. The night was quite cold and inclined to be snowy, the snow interfering with play to some extent.

The game was keenly contested, Irma winning by the score of 4-2.

In the absence of Harry Bewick who is taking a mechanical course at Calgary, Don Dodds kept goal for Tofield, turning in a sparkling performance. Playing his first senior game—a play off game—he played first class goal throughout the entire 60 minutes.

The series is three out of five, the next game being scheduled to be held at Tofield on Monday, March 2nd. Turn out and support your favorite team.

BONESS ELECTED FOR CORNHILL COUNCIL

The election for division one in the Municipal District of Cornhill held at Kingman on Saturday February 22nd, resulted in the election of Mr. Jacob Boness.

Mr. Boness was opposed by Mr. Wm. Christenson, former councillor. The count was Boness 55; Christenson 41. Other councillors includes W. Glenn, W. C. Morden, Chas. Holmberg, Gilbert McSporran and G. O. Walker.

PRESS WINS ARGUMENT INTER-UNION DEBATE

The first inter-union debate held by the Y.P. Union of the United church was held at Tofield on Thursday last, the topic being "Resolved that the platform is of greater than the press."

Messrs. Ken Tory and H. Branchflower of Wainwright upheld the affirmative while Blake Clutterham and Lois Wilson were their opponents, and the judges after full deliberation of the points as raised by the several speakers, awarded the victory to the team upholding the value of the press.

The next debate in this series is dated for March 18th, when a team will visit Wainwright from Viking.

CARD OF THANKS

Mrs. Ellis Solberg and family wish to extend thanks to all the kind friends for their help and sympathy during their recent sad bereavement. For the floral offerings we are very grateful.

Mrs. E. Solberg, children and their families.

Just Price Definite -- Manning

Regardless of opposition, the government is determined to put its just price plan into effect and merchants who refuse to co-operate will be prevented from doing business in the province, Hon. E. C. Manning, minister of trade and industry told a packed luncheon meeting of the Retail Merchants' association in the main dining room of the Macdonald at noon Wednesday.

Mr. Manning revealed that the government would set up advisory boards, similar to the retail advisory board now functioning, to assist in drafting regulatory codes for wholesale business and also those who "sell their services" to the public.

Mr. Manning said the distribution of goods constituted the most important unit in the economic structure. Retail merchants were most closely connected with distribution of goods. Production was no longer a problem. The machinery of production had demonstrated, he said, that it could produce much more than the public could buy under present conditions.

He thought business men recognized that an economic adjustment was necessary to speed up distribution through putting greater purchasing power in the hands of the people. If new principles were set down, Mr. Manning said, the business men had the ability to put them into effect readily.

On behalf of the department of trade and industry he wished to give assurance of intense interest in the problems of the merchants and their efforts to cope with them. He thought also he could speak for the government in this connection.

Anxious to Co-operate

"We will do everything in our power to extend to you the hand of co-operation," Mr. Manning declared.

The government he said, is anxious to dispell any fears of business men as to what it might do.

"We have no intention of going off half-cocked on any scheme that will upset the vitally important business structure of this province," the speaker promised.

No foolish Scheme

Mr. Manning repeated that the government would not bring in any fanatical, half-baked or foolish scheme that would injure business. There were some, he said, that would misinterpret the motives of the Social Credit government. Some put self-interest ahead of general good and others were antagonistic for no apparent reason, he declared.

He charged that the press "was not always as fair as it might be in reporting the activities of the government."

He promised that the government would carry out regulations brought forward by the merchants for the good conduct of business. But no trade regulations would be sanctioned, he said, unless they were just and equitable to the consuming public as well as the merchants.

No laws would be enacted that would protect either the producer,

Wet Feet Are Dangerous

No doubt about it, wet and cold feet will bring about ills of all kinds, rheumatism, colds and kindred complaints.

PREVENTION IS BETTER THAN CURE

Be protected by wearing suitable foot wear. In wet weather you need rubbers—sure protection from water.

PRICES ARE NOW REASONABLE

We now have a fairly good stock of rubbers for all purposes. Cloth covered, plain, low cut for dress wear. Heavy blutcher style in black and white for heavy duty. High rubber boots for the coming spring thaws. Consistent with quality the prices meet all competition.

Bargain prices in Felt Boots, Moccasins, Heavy Shirts, Windbreakers, Mitts and all heavy winter wear

GOITRE

Place your finger on what you know as your "Adam's apple;" this will be just above the isthmus which joins the two lobes of the thyroid gland lying on either side beneath the muscles of the neck.

This thyroid gland produces a secretion which plays an important part in the growth of the body, and, later, in determining the rate of certain body functions. It may act as the blower or forced draft at one time and as a check draft on other occasions.

Any enlargement of the thyroid gland due to an abnormal condition is called goitre, one of the oldest diseases known. Among men and the wild animals goitres are much more prevalent in certain districts, such as the area of the Great Lakes which are designated as goitre belts. This type of goitre is known as simple or endemic goitre. The word "endemic" means pertaining to a particular locality.

The cause of these goitre belts is generally believed to be a lack of iodine in the soil. The thyroid gland requires iodine if it is to function properly. Iodine cannot be stored in the body, so a very small, but more or less constant intake in the food eaten is required.

The sea provides an inexhaustible supply of iodine. Goitre is rare on the sea coast or among those who eat sea foods. When the soil is deficient in iodine, then the foods grown in such soil are also deficient and do not furnish the body requirements of this element.

In certain places, notably Switzerland, cretins used to be fairly common. These individuals never grew up, either in mind or body. We now know that the condition is due to the absence of the thyroid gland in these children. A modern miracle was the discovery that when children of this type are fed the thyroid gland of sheep they will, in many cases, develop in mind and body as do other children.

In the absence of iodine the thyroid gland enlarges in an effort to make up for its deficiency. The enlargement may do no harm, unless it gives rise to pressure symptoms. If, for some reason the gland should become overactive, then the fires of life are unduly stimulated, the heart beats rapidly, the rate of metabolism is quickened, there is emotional instability and the eyeballs may protrude, which last named symptom gives the adjective "exophthalmic" to describe this particular form of goitre.

Any enlarged or disordered thyroid requires skilled treatment. Iodine, for example, may do a great deal of harm if used by those who have goitre, except as prescribed by and under the observation of a physician. In those regions where goitre is prevalent, iodine may be provided for in the diet, upon the advice of the family doctor, through the use of iodine added to water or food, or in tablet form at regular intervals.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

PROMISES EQUALIZATION

In response to a query from Gordon Ross, Liberal member of parliament for Moose Jaw, who wanted to know what action the government proposed to take on the auditor's report on the 1930 Pool wheat and an order in council passed in October last, Premier McKenzie King stated that the government of Canada proposed to introduce legislation to equalize returns to the Pool farmers for the 1930 crop on the basis of 60c a bushel 1 Northern, Fort William. The Premier said the government believed the producers were justly entitled to the equalization.

The sum of $6,000,000 was mentioned in the despatch from Ottawa and lacking further details it is impossible to explain just what the government proposes to do. The original payment as announced by the previous government totalled $8,000,000 but this included an equalization on coarse grains for 1930 also.

Insofar as Alberta is concerned the equalization on the basis of 60c would provide approximately $2,700,000 to be distributed among 27000 farmers in wheat payments alone. Alberta is not directly concerned in the coarse grain payment if any is to be made. The basis of the request for this payment was the contribution made by farmers interested in the 1930 Pool in the way of turning over their carryover to the government price stabilization operation. Initial payment on the 1930 Pool varied from 70c to 50c price basis. A few Pool members received 70c but the bulk were paid 60c, 55c and 50c. The government's promised action proposes to equalize the payment at 60c. Some delay will likely be involved in connection with legislation necessary in providing funds required in completing distribution of the equalization.

CO-OPERATION

Radio Address by Dean E. A. Howes, University of Alberta

An oft-repeated proverb occurred to me as I started to prepare a radio statement upon co-operation. It was the old proverb about fools rushing in. I admit now that the parallel is not obvious, but I still have the remnant of a doubt as to my wisdom in accepting the task set me. My reason for doubt will appear as I try to set out my observations upon the subject allotted to me.

Suppose any one of my many hearers should step up to me and say, "Do you believe in co-operation?" my answer would be a ready "Yes, I do." However, should he go further and say, "What do you mean by co-operation?" I should choose the words of my reply very, very carefully, because I have a strong feeling that the term often has been bandied about from one to another, in such a loose and irresponsible manner, that it has become a commonplace, carrying little definite message to those to whom it is directed. The fact is that any word or group of words, used too often or too carelessly, soon loses force and direction. All this is leading up to a part of my text, namely that we have weakened the force and significance of a word that should stand for one of life's greatest forces, for one of life's first manifestations. Some of you must have read one or more of Cohen's negro stories. The writer had one favorite phrase—"words you says, but they aint mean nothin'." That is my complaint about the too glib use of the word "co-operation." I shall try to illustrate by concrete examples.

Co-operation in the realm of terminology may come to stand for something very selfish, may be only a movement to secure the enlistment of others, just to further some selfish end. I often smile when I think of how I heard the word used once upon a time. On a certain job I had two men working, a tall man and a short one—we used to call them Mutt and Jeff behind their backs, I am ashamed to confess. One morning, after they had been working together for some time, Jeff came to me with a thinly veiled suggestion that he could get along nicely without Mutt's company on the job. I pressed him for a reason, but for a time all I could get out of him was "Mutt won't co-operate." I sent for the long fellow and we threshed the matter out. Eventually I discovered that Jeff had sought the aid of Mutt in some rather shady performance, the details of which I need not trouble you with now, and the refusal of Mutt to lend a hand had so enraged the little fellow, that he had set out to make trouble. Well just at that time co-operation, as a term at least, was being heard of more than usual in our fair province, and Jeff figured to be right in the fashion. I only tell the story to show that co-operation can apply to some things we do not expect and is therefore not in itself necessarily a term standing for progress and uplift.

Some years later I had another experience that was a bit illuminating as to manipulation of the term co-operation. It was when I was Chairman of a standing committee of our Canadian Society of Technical Agriculturists, a committee appointed to survey the activities of Dominion and Provincial Institutions of Agriculture. May I say in passing that I found comparatively little evidence of the over-lapping that we were told about, and I have the evidence to prove what I say. What I did find out, however was that there was a lot of loose claims as to co-operation and that those using the term did not have in mind just what that term really should stand for. In exasperation I wrote in my first report as follows:

"In the light of replies received it would appear that the word 'co-operation' as applied to the relationship under study is an overworked term for a nebulous idea. One writer used it eleven times in a short letter and not once did he try to explain what he meant. Like charity this word has been employed to cover a multitude of, well, discrepancies and ambiguities. We would respectfully suggest that this word be censored unless accompanied by something descriptive. As one member put his opinion: 'The word "co-operation" listens well. It is a word to conjure with when we have occasion to tickle the ears of a half interested public; but ——' The sting in the whole question of alleged co-operation would appear to be in the practice of one institution announcing a certain policy, proceeding to put it into practice, and then inviting the co-operation of another institution, that had not been consulted previously. The refusal or neglect to accept this invitation couched in such popular phrasing, automatically puts the party of the second part in the position of apparently not wanting to co-operate. This complaint is not one-sided by any means and it well merits some attempt at remedy."

Oh, yes, I laugh at myself when I read this, but I also laugh at the memory of the faces of my colleagues when I read this part of my report. No, friends, I cannot concede the position that because I do not believe in some scheme of yours, I am therefore lacking in the true spirit of co-operation. Perhaps my position may be the correct one upon further analysis.

Then too it must not be forgotten that co-operative effort pre-supposes that we have something to contribute, something to pool if you please, and I am not referring to any particular enterprise when I speak thus. True the will to co-operate may be present and circumstances may prevent the implementing of that will but, as a general thing, the urge pre-supposes action of a positive sort. Herein lies a difficulty. Let us suppose a case: two farmers are neighbors. One is thrifty, industrious and systematic in his farming practice; the other is not so thrifty, not so industrious, not so systematic. Let us suppose that there is some urge to co-operative effort of some sort in that district, and that both of these farmers are willing to take part. One is the type to make a fine contribution, the other is not the sort to make much of a contribution. We can only make a surmise as to what would happen. Should a testing time come, however, I know which one I would expect to stand firm.

Another thing we must understand too is that any sort of a hook-up is not in itself a guarantee of true co-operation. My father used to tell about a certain man who had a willing team of horses—one was willing to do all the work and the other was willing to let him. Here was an ideal hook-up, I submit: same sort of whiffle-tree and traces, same sort of collar and hames, same sort of bridle and reins but, despite all this, that team was a mess because one of the potential co-operators was not actuated by the right sort of spirit. I know that the millennium will be here when all the members of any organization will make a full contribution but that does not prevent us from working toward an ideal. No it is not enough that we have an outer semblance of co-operation. I mean it is not enough that we just go through the motions. To use a teamster's phrase—it is necessary that we all hit the collar.

Now if I were asked to state what, in my opinion, constitutes the greatest obstacle to true co-operative achievement, taking the long view I should be compelled to say it would be the lack of appreciation of that for which co-operation stands. Let me give a concrete analysis. In my opinion the banding of a group of farmers together for the purpose of selling collectively may not be in the long run, co-operation. The banding of a group of farmers together for the purpose of buying collectively I would of course put in the same category. I could go on to describe other forms of group action and in every case I could hang out the warning signal. True, some of these groups are sometimes hurriedly formed, often without due forethought or foundation laying, but there the danger is obvious. The danger that is not obvious lies in the lack of realization that the efforts just described are not of necessity inspired by a true desire for co-operation. At best they are only outer manifestations of co-operation and at worst they only make the road to real co-operation harder to travel. To put it in another way, they may be the results of co-operation, the outer manifestations as I have said; they are not, in the abstract, co-operation itself. Our text goes much further than that.

Now it may appear that the foregoing is the effusion of an old teacher and consists of a multiplicity of "don'ts", a collection of negatives. I do not care what it is called, so long as it is studied. I have a realization that I was not asked to prepare this with the idea that it would consist of a lot of verbal bouquets, and that we would resolve ourselves into a mutual admiration society. On the contrary we must beware of too much self-approval and auto-intoxication. Why all this? Well just because we have a man-sized task ahead of us, indeed many such tasks, and we have no time for self-congratulation more than enough to keep the courage up. And now I come to the climax of my [illegible] as an alternative? Here it is, and I give warning that it has nothing of the [illegible]. In my opinion true co-operation goes far beyond the grouping of people together for the purpose of gain, admirable and commendable as all that may be in itself. To me co-operation appeals as from the heart rather than from the head, but perhaps it should be the product of both. In a country of more even derivation, it could be looked upon almost as a religion, this desire to work together for the good of all. In other words co-operation is of the spirit in the first place and must not be confused with spasmodic efforts toward group action. Let me give a simple illustration. All my life I have been an earnest advocate of studied physical training, and I have tried to practice what I preach, even if I am reduced to long walks and I do not mean golf. Well then, I can say that from the first, I have found out that no exercise is worth much unless there is an enjoyment of that exercise. Does not this illustrate what I have said in connection with co-operation? We must have the real desire for gain, reasonable as that may be. I once said on the spur of the moment and in answer to a question, "True co-operation will be manifested by the farmer who says sincerely, 'What can I put into this?' not, 'What is there in it for me?'" I mentioned our Society of Technical Agriculturists earlier in this talk. Every year when the Alberta members meet I am asked to speak on this very problem as set out in occasional queries as to what the membership means to the individual. I give them the same answer as I have just given here, in effect, "You will not get much out of it if you do not strive to put something into it."

In conclusion I would say that co-operation being so much of the spirit it is in that field we must seek for our inspiration. Now it is not necessary to estimate just what the Good Book always means by the word "love", neither is it necessary to estimate what you or I may always mean. However, we are told "Love thy neighbor as thyself" and we just cannot get away from it. Think that over. In many of our school readers is a little poem which many of you have committed to memory. Let me recite it to you as I close.

Abou Ben Adhem, may his tribe increase!
Awoke one night from a deep dream of peace,
And saw within the moonlight in his room,
Making it rich and like a lily in bloom,
An angel writing in a book of gold
Exceeding peace had made Ben Adhem bold,
And to the presence in the room he said
"What writest thou?" The vision raised its head,
And with a look made of all sweet accord
Answered "The names of those who love the Lord."
"And is mine one?" said Abou.
"Nay not so", replied the Angel. Abou spake more low,
But cheerily still and said, "Well then
Write me as one that loves his fellow men."
The Angel wrote and vanished. The next night
It came again with a great wakening light,
And showed the names whom love of God had blest
And Lo! Ben Adhem's name led all the rest.

WHAT CAN I GIVE

It takes the highest type of courage to be socially-minded in rural life. The oppressive routine of farm tasks leaves little surplus energy for wider responsibilities. The narrower contacts of rural culture as compared to the diversity of city life is apt to discourage farm folk. But what farmers in other countries, against similar odds have done, our farmers can do, but the start must be made in our own hearts. We must say to ourselves, What can I give - not - What can I get.—Dr. H. C. Grant.

AN EDINBURGH PROFESSOR ON SCOUTING

Discussing juvenile "behavior cases" brought before the psychological clinic of Edinburgh University, Prof. James Drever, Ph. D., stated that he invariably asked such boys if they belonged to the Scouts, or any similar organization. If they did not, he recommended that they join a Scout troop. "In the belief that behavior difficulties would be lessened, if not entirely removed, if this advice were followed. The fact was, the Scout Movement supplied those conditions which were most essential for the securing of normal development at a certain stage in a boy's life, and more especially in the circumstances brought about by the course which modern civilization had taken."

'TWAS A BIG WORD FOR A SMALL BOY

The leader of an Australian Wolf Cub (junior Scout) pack announced to a group of small candidates that on next meeting night there would be an Investiture. Shortly after the boys had raced home the Cubmaster was called to the 'phone, and an agitated mother inquired, "What happened? Was Johnny concerned in it?" Johnny had announced an "Investigation."

Far better is it to know everything of a little than a little of everything. —Pickering.

WIT And WISDOM

Some Southern Eloquence

A celebrated white preacher had been engaged to address the congregation of a little Negro church and was being introduced by the colored pastor.

"Sistern and bredders," he began, "it affords me the extremest pleasuh to introduce de speaker of de evenin'. I wants to explain dat while his skin ain't de same color as de odders heah, I assures you his heart is as black as any of yours."—Argentine Magazine.

••••••••

The Heckler Is Heckled

A candidate addressing his constituency was surprised by a voice which, calling from the back of the hall, said: "Well, I don't care what you say, I wouldn't vote for you if you were the angel Gabriel."

Came the reply, "If I were the angel Gabriel, you wouldn't be in my constituency."—Troy (N.Y.) Times Record.

••••••••

Not to Be Outdone

"Down where I live," said the Texan, "we grew a pumpkin so big that when we cut it my wife used one half of it for a cradle."

"Well," smiled the man from Chicago, "that's nothing. A few days ago, right here, two full-grown policeman were found asleep on one beat."

••••••••

True

Professor: "Do the quick thinkers become leaders?"

Freshman: "Well, he who hesitates is bossed."

••••••••

Knowing

"It takes a smart girl to marry the right one."

"Yes, she has to 'no' a lot."

••••••••

A Reminder

Lee Albert, Department Adjutant of Idaho, tells of some "officers and gentlemen" of the movie palaces. Recently he overheard two uniformed ushers, in a super-stupendous-de luxe theatre, engaged in an argument.

Finally an older usher, with much more rank and more gold braid, turned on the boys with frigid severity.

"You forget, gentlemen," he said "You are in uniform."—American Legion Monthly.

BUYING HUBBY'S DINNER—

AS THIS is being written a convention of the Alberta Retail Merchants' Association is being held at Edmonton. Among other things to be considered is the important question of codes for the retail trade. According to literature condemning codes, already printed, it would appear as if the Alberta Retail Association is strongly behind the idea, but before this belief is fully accepted it would be wise to await the outcome of this convention. No doubt many members of the association are in favor, but most likely it will also be found that many others are not.

The idea behind the retail merchants' code proposals is good, namely that of making business conditions and working conditions in the trade better for all concerned. It is proposed to prohibit "loss leaders" unfair competition, mis-representation in advertising and have a government department constantly watching over the affairs of the retail trade in Alberta. This most likely will include a certain degree of price control, call it price fixing if you wish.

There is no doubt that as the retail trade is at present conducted there are many things that require adjusting. Large buyers apparently have an advantage over small ones; the practice of selling certain lines at a loss in order to stimulate sales of other lines at a profit has become very prevalent of late years; and the adroit advertising of some concerns do not always lead to increased confidence. But all these things, it would seem, lay within the sphere of the trade itself. If the trade cannot or will not make the necessary adjustments, we doubt whether a code system would completely do it. It is surprising, sometimes amazing, what force lies behind the desire for free and untrammelled trading.

It is claimed that the demand for codes originates from the retail merchants' association, it is also claimed that the chief opposition to the codes eminate from big business. We are not concerned with taking sides one against the other, but we are concerned with the general economic welfare of the people as a whole. Therefore we would like to point out a phase of everyday economics quite obvious but rarely observed, certainly seldom commented upon.

The buyer always seeks an open market and where he or she has the opportunity of choosing will buy at the lowest price for the same quality goods. No doubt readers will remember the now defunct N.R.A. legislation in the United States. The intention of the N.R.A. legislation was good enough. Prices, wages, living standards were to be raised by the government pouring money into the economic field. A kind of economic irrigation scheme. Long before the demise of the N.R.A., many economists were wagging their heads and claiming RAISING prices would not bring about economic stabilization, which, so they claimed, consists of price equilibrium between various commodities. It was stated that the purse strings of the American nation was to a large extent held by the American housewife and it was impossible for her income to increase as fast as mounting prices. Moreover several millions had no income at all other than relief.

Therefore the American housewife was compelled to buy cheaper goods and less of them. The remedy for many economic ills, so these economists claimed consisted in LOWERING prices. This would allow the masses to buy more with what money they had and help to close the gap between the prices of manufactured goods and primary agricultural products.

There is little in common between the American N.R.A. and the suggested Alberta retail codes with this exception—that the housewife holds the key position in both cases. It would appear that if the Alberta government institute a system of codes of any magnitude, the operation of the code by them is going to cost somebody something. This cost can only be reclaimed by the government by taxation, direct or indirect. If it is by direct taxation it can only be met by increased cost of the goods; then the Alberta housewife will seek a cheaper and more open market, and remembering Alberta is a province and not a nation, in all probability she will, when buying hubby's dinner find it.

NONSENSE?—

People are told that hindsight is better than foresight, a basic fact we should all keep in mind when reviewing past events. In the late summer of 1913 about 300 feet north west of the town hall men were drilling a deep well. They had reached a depth of over 1000 feet and had encountered a quantity of very salt water. The writer knows it was salt because he tasted it. Knowing nothing of its specific gravity he cannot say how salt it was but it tasted salt enough to pickle almost anything.

Quite recently a news despatch from Edmonton announced the formation of a company which propose to operate at Fort McMurray, about 300 miles north of Edmonton. Its special business is to drill wells to a considerable depth where salt water or brine is encountered, pump it to the surface, and evaporate it and sell the salt. The question naturally arises whether we here at Tofield, passed up anything.

If you brew a pot of tea with ordinary Tofield well water you get a dark brown liquid. Brew it with lake ice water and you get a pale amber liquid. If you add a pinch of soda to the ice water you get a dark brown liquid. Conclusion: there is soda in Tofield well water as any person who operates a gas or steam engine knows. Commercially feasible?—we don't know.

BUDGET EXPECTED IN PRESENT WEEK

Believed to contain severe economies, the Alberta government's budget for 1936-37 fiscal year is to be brought down in the legislature this week.

Interest in what it will contain is intense, particularly in view of the hope of R. J. Magor of Montreal, financial adviser to the government, to come close to having a balanced budget.

With the throne speech debate out of the way, the house will deal mainly with legislation in the early part of the week. Several bills are ready for consideration by the committee of the whole assembly which has reported a number already for third and final reading.

This week may also see a start on consideration of bills by standing committees. As Edmonton, Calgary and Drumheller have bills to be taken up, these will likely come before the municipal law committee shortly.

RECALL BILL HELD WHEN "SNAGS" HIT

Snags are being hit by the provincial government in drafting its recall bill to be introduced at the present session of the legislature it was reported Monday.

Some government supporters are reported to be demanding that the percentage of electors necessary to recall a member shall be at least 60 per cent. As others take varying views, the introduction of the measure has been postponed.

One fact that the government is keeping in mind, it is claimed, is that some districts in the south where there are irrigation projects have made strong appeals for government assistance.

In the north, there are rumors of recall threats in some ridings, that feeling have flared already in St. Paul district represented by J. W. Beaudry, Social Credit-er.

It was expected that the recall bill would be introduced in the legislature Monday. But in view of the fact that it still is under discussion, it is believed that it will stand over for a few days.

Dispute has arisen in the Social Credit caucus, too, over whether the bill should specify non-support of Social Credit principles as reason for recall. In the platform of the party before the election, recall legislation was promised on the basis of members failing to carry out the proposals made prior to election," and Social Credit legislation was in mind then.

If these words were inserted in the bill, however, opposition members would be able to raise strong points against it on their own behalf, it is pointed out. Therefore it is expected that the bill will specify, as recall grounds, lack of confidence by the electorate on any grounds.

DENIES 'CODES' INTENDED BOOST RETAIL PRICES

Expressing amazement "at the misconception of Alberta citizens" regarding the object of proposed codes to govern the retail trade in the province, G. Matthews, Vancouver, in addressing the convention of the Alberta Provincial board, Retail Merchants' association of Canada, Tuesday in the Macdonald sharply denied the objective was to raise prices to the consumer.

Mr. Matthews, provincial secretary of the British Columbia association, was one of the main speakers Tuesday at the three-day convention which concludes Wednesday.

W. L. McQuarrie, secretary of the Saskatchewan association brought greetings from his organization. A. C. MacKay, Alberta secretary, outlined the efforts of the association here to formulate a code as provided in the Trades and Industries act passed by the U.F.A. government and put into operation by the present government.

General discussion of the master retail code featured the afternoon session commencing at 2:00 p.m. From the discussion the master code finally will be formulated and will be presented to Hon. E. C. Manning, minister of trade and industry, for consideration.

Dr. R. C. Wallace, president of the University of Alberta, addressed delegates at a luncheon held at noon Tuesday in the Macdonald. He spoke on "Some Phases of Alberta's Resources."

"The people in the street don't know what it's all about," declared Mr. Matthews in referring to the proposed code.

"They have got the idea the merchants are getting together to raise the prices to the consumer—a most unfair and vicious misconception of its objective."

The Vancouver resident declared that "constant propaganda" from Ottawa and Montreal against the present Alberta government was having "an opposite effect on me in making me quite sympathetic toward your premier and his government."

Dealing with the problems of merchants in Vancouver the speaker said they sought to solve two major problems; control of bankrupt sales and wholesalers selling to consumers.

He cited the case of a bankrupt sale being advertised here with a stock worth $40,000 and what purported to be the same stock advertised and sold in Vancouver. Cheap grade articles advertised as first grade articles at greatly reduced prices were sold in some bankrupt sales in Vancouver, he said.

Mr. MacKay declared that "big business has set itself to oppose," the merchants seeking regulation codes.

Ninety per cent of the people in Alberta had been misinformed about the codes and the pamphlet issued under the title of "The Alberta Taxpayer" and distributed in Edmonton recently was a "glaring example of this misrepresentation," declared Mr. MacKay.

He denied as the pamphlet stated, there was an attempt to fix prices or that the provincial secretary would have direct control of business in Alberta.

"There is no desire to injure the consumer in any way," he reiterated.

Mr. McQuarrie stated Saskatchewan people are waiting to see how the "codes venture" succeeds here.

THE TRUE WELFARE OF THE FARMER

It has become apparent during the past few years that there are many who have convinced themselves that the prosperity of the Western farmer is dependent solely upon the price of wheat. It is believed by these good people that if price could be raised all would be well.

It is not denied that price in its own sphere is important, but it is submitted that the following factors are at least equally as important as price and under certain circumstances may be much more important.

A—The number of acres under crop by the farmer. B—The yield per acre. C—the quality or grade of the grain produced. D—The quantity of wheat that is exported annually from Canada. E—The price per bushel at the country elevator. F—The buying power, in terms of goods, commodities and services, of the total income the farmer receives from the sale of his wheat.

The first three items—A, B and C—to a great extent govern the cost of production and therefore are as important as the price received per bushel, for obviously a high price per bushel would be of no benefit to a farmer if his costs of production were even higher. Conversely, a comparitively moderate price per bushel could return a good profit if operating costs were still lower.

Quantity Exported

The next factor, D—The quantity of wheat exported from Canada—is of prime importance—perhaps indeed the most important factor of all governing the farmer's welfare, for this is a controlling influence over the total income farmers receive during the year, and it must be remembered that the farming family lives not upon price per bushel, but upon total income received; and total income is price per bushel multiplied by the number of bushels sold and the number of bushels sold by the farmer in the long run will be in proportion to the number of bushels exported from Canada.

$2.00 per bushel, for instance, would be of little value to our farmers if a small part only of their total crop could be sold.. An appreciation of this factor will show how exceedingly important it is that Canadian wheat shall be sold each year continuously, in large volume, on world's markets.

E—The price per bushel—Looking back over the records of prices from the year 1890 to date, it it found that on the average, over a period of any 10 years, the price returned to the producer from the world markets has been a satisfactory one.

Farmer's Purchasing Power

Now, however, we have for consideration factor F—The buying or purchasing power of the income that the farmer has received for his wheat.

This would seem to be, next to the sale or export of Canadian wheat, the most important problem facing farmers in the West today, for the facts are, as revealed by the Searle Index, that the buying power of the farmers' income today is about 20 per cent less than it was before the war, which means with a price of wheat the same as it was before the war—which is approximately the case today—the farmer's bushel of wheat, or his income, will not command anything like the same quantity of goods, commodities and services that it did. The sadness is that this important factor seems to have been almost entirely forgotten by the farmers of Western Canada. This is doubly sad for the reason that while the price per bushel on the world's markets, to which so much attention has been paid, is quite beyond the power of any individual or group, or government in Canada to influence in any appreciable degree, the reduction in the costs of the "things farmers buy" is mostly decidedly well within the power of the people and the governments of Canada, and this serious handicap bearing so heavily upon our Western farmers could be corrected if sufficient energy and thought were to be devoted to it.

The recent rust scourge that affected such wide areas of the West this past year was spectacular and it excited the whole hearted sympathy for the farmers who unfortunately suffered,—yet it is calculated that the burden upon farmers of the West, caused by the increased cost of about twenty-five per cent on the average of the "things they buy" takes a toll from them each and every year that is as great as the toll taken by the rust during this last year. Truly it can be said, that the high cost of the things Western farmers have to buy is the "forgotten factor" influencing adversely their welfare.

The Searle Index

Anticipating that some day prices automatically would adjust itself, and that in the course of time the attention of farmers and others would become centred on the high cost of the things they have to buy, the Searle Grain Company, three years ago, compiled its "Searle Index," which is an effort to keep account, month by month, of the cost of the things farmers buy as compared with the cost of similar items in 1913-14 before the war—147 items that are in general use in the West have been chosen for the index. Our calculations this last month reveal that the cost of these 147 items on the average stands at 124.9 as compared with 100 in 1913-14, meaning that, as stated above, it costs farmers 24.9 per cent more for goods, commodities and services than was the case in 1913-14. This in turn means that approximately 20 per cent in volume, less goods and commodities are used by farmers than would be the case if prices of the things they buy were the same as they were before the war; or it means farmers have 20 per cent less debt-paying ability. The serious consequences of all this are obvious to an alert mind, for they mean much less employment on railways and by wholesale and retail merchants, less revenue for taxation, less employment in industry and less money available for creditors. And, of course, it means as well—and what is more important—a serious decrease in the scale of living of farmers. Another result that springs from this increase in the cost of things, is that farmers have been unable to maintain in proper repair, or to renew, their equipment and machinery necessary to produce crops. This in turn means that lower yields, of poorer quality, and as well higher costs of production will tend to come about.

An Inquiry Necessary

The serious suggestion is made that farmers might well request the Dominion government to set afoot an inquiry into the details of the exact causes that have brought about the increased prices of many items of things they buy. It is hoped in the meanwhile that the Searle Index will be of some service to those who are attempting to study ways and means of increasing the wealth and welfare of the farmers of Western Canada.—Searle Grain Co. Ltd.

Defined

"Now, can anyone tell me what a myth is?" asked the teacher.

A solitary hand was raised and a voice exclaimed, "Please teacher, it's a female moth."

PROMISES GUARD MINORITY RIGHT IN SCHOOL PLAN

Full protection to the Roman Catholic and French minorities, under the projected act to enlarge Alberta rural school districts, Premier Aberhart said Tuesday.

The premier's statement came after he conferred with a delegation representing the Roman Catholic archdiocese of Edmonton and the Edmonton separate school board. The group was headed by Monsignor Leo Neligan, vicar-general.

The delegation was reported to have told the premier that the proposed draft of the school act amendments did not contain all the provisions which had been expected on preservation of the rights of separate school boards in the rural districts. Several small changes in the proposed act were asked.

Premier Aberhart was reported to have said the arrangements would be made to maintain full recognition of language and religion of the minorities, under the terms of the dominion's constitution.

Lucien Maynard, M.L.A. for Beaver River, deputy speaker and one of the four French members of the house participated in the discussion. Another meeting is planned for the delegation.

FIRE MAKING WITHOUT MATCHES

In a fire-making contest with the ancient Indian "fire bow," Patrol leader Goodwin of the 1st Ste. Anne de Bellevue Scout Troop, Que., secured a flame in fifty seconds. This probably equalled the time required by good Indian fire-makers. The Scouts had made their fire sets of locally secured wood.

British farmers obtain 72 per cent of their income from livestock, 2.10 per cent from wheat, 6.13 per cent from all grains, 3.25 per cent from sugar beet and the remainder from market garden produce, hops, hay and straw.

Although Canada has a relatively small non-agricultural population for the absorption of surplus production, approximately 85 per cent of the agricultural production in Canada is consumed in Canada, with the remaining 15 per cent finding markets abroad.

A tiger in a European zoo has just been fitted with slippers because of cold feet. Nevertheless we shall still go on believing that a leopard cannot change its spots.—Punch.

The fault with most after-dinner speakers, we read, is that they refuse to speak up. The trouble with others is that they refuse to dry up.—Humorist.

Two Catches

Wilkinson saw his neighbor coming along the road with his fishing tackle. "Catch anything, old boy?" he asked.

"Yes, two," said his neighbor.

"Good," said Wilkinson. "What were they?"

"The seven-thirty there and the five-fifteen back," came the reply.—El Paso World News.

"JUST PRICE" PLAN DEFINITE—MANNING

(Continued from front page)

the distributor or the consumer at the expense of the others. One group should not expect protection at the expense of the others.

No Unequal Protection

Regulations, he said, would not protect one branch of either group at the expense of another branch in the same group.

This idea, he said, was all embodied in the Social Credit plan for a just price. Nobody would be permitted to take an exhorbitant profit on anything.

The codes, he said, must be entirely practicable. At present, however, there was no intention of setting a definite price for every article sold, from carpet tacks to automobiles. That would not be practicable. Merchants, he said, need not wait for any commission to sit down and figure out the price for every one of the thousands of articles sold today.

There was no use putting anything on the statute books that could not be enforced, he said.

Plan License Scheme

The government planned to regulate business by a license plan. This, he said, was not a revenue-raising scheme but simply for the purpose of regulation. Under a license plan, any merchant who did not "play fair" or "refused to co-operate" would lose his license and thus be prevented from doing business in the province.

At present there was no way of "dealing with" a merchant who refused to co-operate, he declared.

"But the whole wide world will be open to any merchant who plays the game," said Mr. Manning.

He insisted that under the just price and business licensing plan, the merchant would enjoy better business.

A merchant who refused to "play the game" would first be warned and then, if he persisted in his "refusal to co-operate," would have his license revoked, the minister said.

Mr. Manning said that the temporary advisory board was functioning "very efficiently" to date.

To Set Up Boards

When the committee had completed its preliminary recommendations, it would report to his department, and after due study would report to the government. Similar advisory boards would be set up to cover wholesale business, and those who "sold their services" to the public other than goods.

Mr. Manning criticized those who "weren't interested" in the Social Credit government, and those who were antagonistic to everything the government proposed to do.

We are determined that something must be done, regardless of the attitude of anyone, so we stand resolutely and frankly extending the hand of co-operation," the minister concluded.

GOLD STRIKE MADE CLOSE TO CRANBROOK

CRANBROOK, B.C., Feb. 26.—Coarse gold—in veins an inch wide—has been discovered in the Flathead district in the extreme southeast of British Columbia, hardy prospectors reported here Tuesday night as they hastened into Cranbrook to record their claims. The district is in the Rocky mountain range just north of the international line and west of the Alberta-British Columbia boundary.

LINDBROOK

No one seems to be going out any more than they have to this severe weather; hence scarcity of news.

Congratulations to Mr. and Mrs. Howard Stine on the birth of a baby boy a week or so ago.

The usual crowd took advantage of Friday's excursion to Edmonton. It seems that this excursion is eagerly awaited for every month, and we hope it keeps up all summer.

Weslake S. D. held their annual ratepayers' meeting a little belated, the same as this news is, the correspondent being to blame for that of course. Messrs Tiedeman, Burton and Tucker being elected trustees.

Congratulations and long life, health and wealth to Mr. and Mrs. Harold Weatherill who were married very recently. The groom is well known to all and is the youngest son of the late Mr. Weatherill and Mrs. Weatherill of Tofield. The bride was Miss Margaret Bates, youngest daughter of Mr. and Mrs. Bates of Hastings Lake. The young couple will reside on their farm near Tofield.

Mr. and Mrs. Jas. Bracegirdle attended the funeral of Mr. Johnnie Jack of Poe, being neighbors for several years.

Divine Service was held at the School here Sunday afternoon, Feb. 9th. The service was conducted by the Rev. A. Wallis of Tofield and despite the weather, fairly well attended. It is proposed to hold these services monthly, on the first Sunday in the month, but the next will be held there on Sunday March 8th at 2:30 p.m. Everybody welcome.

LAKESHORE

Mrs. Bethel was pleasantly surprised last Friday afternoon when a number of relatives and friends gathered at her house in celebration of her birthday which was that day. Bridge was played and Mrs. W. E. Seale and Mrs. T. D. Ferguson were highest scorers with Mrs. Graham and Maggie Wood close seconds. A dainty lunch was served after the play. Many happy returns of the day, Mrs. Bethel.

We regret to say that Wesley Weeks is ill with an attack of Scarlet Fever. It is reported as a mild attack and to date no other cases have appeared in the district.

A crowd of friends and neighbors gathered at the Weatherill home last Thursday evening to extend best wishes to the newly-weds, Mr. and Mrs. Harold Weatherill.

Mrs. Phillips entertained Mrs. Graham, Mrs. Francis and Mrs. T. D. Ferguson on Thursday afternoon of last week. Mrs. P. and Mrs. G. demonstrated again that they are practically unbeatable at bridge.

SEA LION FOUND IN WHEAT FIELD IS SENT HOME

CANBY, Ore., Feb. 26.—A 1200 a wheat field here Tuesday after pound sea lion ran hard aground in swimming 130 miles up the Columbia and Willamette rivers. Game commission deputies hoisted him with block and tackle onto a truck and headed him back toward the Pacific ocean, which he abandoned two weeks ago.

Last week the big fellow appeared in Portland harbor, 100 miles from the ocean. He went on up the Columbia to a dead end at the Oregon City falls. Repeatedly he floundered up the fish ladder but fell back. Finally he made it.

VIKING WAS COLDEST SPOT IN CANADA

While Edmonton was bragging about a low temperature of 51 last Sunday, the Viking Meteorological Station made that look somewhat tropical in comparison. It was actually 60 below zero in Viking in the early hours of the 16th of February. Starting last Wednesday with a low of 51.4 it hit 51 again on Thursday, then 55 on Friday, 60 on Saturday and 60 on Sunday. While it seems almost unbelievable that such a low temperature could be recorded in Viking the figures are "official." The instruments are supplied by the Government, are of the highest grade thoroughly tested by over nine years use and over 3000 daily records. Mr. Collier explains that there are two thermometers, a Maximum and a Minimum, and one instrument forms a constant check for accuracy upon the other. Dozens of citizens report the unusual experience of hearing their breath, as the moist air left their mouths, the particles of ice crackled against each other. To have passed through such a low temperature will be something for the boys and girls to tell their grandchildren, for never again will we be likely to get such a freak result of winter.

NOTICE OF PREPARATION OF ASSESSMENT ROLL

Town of Tofield

Notice is hereby given that the Assessment Roll of the Town of Tofield for the year 1936 has been prepared and is now open for inspection at the office of the Secretary-Treasurer from 10 o'clock in the forenoon until 4 o'clock in the afternoon on every day which is not a public holiday, except Saturday, and on that day from 10 o'clock in the forenoon until 2 o'clock in the afternoon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll or to the assessment of any property or to the assessed value placed upon any property, must within thirty days after the date of this notice lodge a complaint in writing with the secretary-treasurer.

Further notice is given that the assessment of lands and improvements made in 1935 has been adopted and shall be valid in all respects for the year 1936, except in case or cases where improvements have been added or removed; and except in the latter cases no assessment notices will be mailed. This shall not effect the right of appeal.

Dated at Tofield, this 26th day of February A.D. 1936.

J. W. CHAPMAN,
Secretary-Treasurer

TENDERS WANTED.

Tenders will be received up to Feb. 29th for the purchase of the buttermilk output for the two year term ending March 20th, 1938. Lowest or any tender not necessarily accepted.

THE TOFIELD CREAMERY,
W. Eldred, Manager

The Bank of Montreal was visited by the inspectors for a few days this week.

A grandfather was cosily sleeping in a comfortable arm-chair beside the fireside, snoring audibly. His little grand-daughter wandered into the room and began to twist and turn the buttons on his waist-coat. She was discovered by her mother who asked the reason for her so doing. "Please Mummy," answered the wee child, "I am trying to get a new station."

WAKE UP YOUR LIVER BILE—
And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else.

Locals Win From Irma Monday Night —Score 9-7

Playing good hockey and evening up the series with Irma, the Tofield senior club defeated the Irma club at Tofield on Tuesday night by a score of 9-7.

The first period was the best hockey of the night and both teams stepped into high gear from the face off. Fast skating, snappy passing combined with smart goal tending featured this period. The ice was a little heavy and in the second and third periods the hockey was ragged at times while at other times good hockey prevailed. Harry Bowick played a stellar game in goal, stopping a large number of ordinary shots and some that were really sensational saves.

The first period opening fast soon found Irma with a one goal lead, R. McGuire scoring on a pass from F. McGuire. Soon after Les Glover who was making some dangerous rushes evened the count. Tofield then went into the lead on a combination play by Spratt and Bowick, Spratt netting the counter. Play was very fast at this stage. Tofield made it a two goal lead when Worton scored from a face off on left wing. Irma came right back and scored, Swaline netting the rubber. The period ended 3-2.

The second period opened rather ragged, both teams showing the effort of the fast pace of the previous period. Tofield opened the scoring on a hard drive from left wing. Irma quickly cancelled this, Swaline and Morrison combining for a goal Swaline being the marksman. Tofield regained their two goal lead when Bowick beat the Irma goalie, and increased it to a three goal lead when Les Glover netted the rubber. Towards the end of the period the hockey was better, Irma desperately trying to break down the lead and Tofield endeavoring to maintain it. The period ended 6-3 for Tofield.

The third period opened up with Tofield strictly on the defensive and Irma playing every man up. Irma scored two goals in rapid succession Morrison scoring the first and Lawson from Morrison the second. Within one goal of tieing the score Irma threw everything into the attack. But Tofield again increased their lead to two when Bowick shot and the puck glanced of an Irma players stick into the net. For the second time in the game Tofield went three ahead when Worton bringing the puck from behind the net worked it round the post over the line. Lawson and McGuire for Irma then combined to score, Lawson netting, this being quickly followed by a goal by Morrison and again Irma were within one goal of tieing the score. Play swung back and forth and the period drawing to an end the Tofield fans heaved a sigh of relief when Bowick scored for Tofield regaining the two goal lead. The period ended with the score 9-7 for Tofield.

The game was clean, three penalties being handed out two to Tofield and one to Irma.

Line-up :Irma—goal, Yeoman; defence Sharky and Martin; Forwards, Morrison; Lawson; Swaline; R. McGuire; F. McGuire; Smallwood.

Tofield—goal, H. Bowick; Defence L. Glover and N. Glover; Forwards, Spratt; Worton; J. Bowick; Allan; McCauley; Swinton; Martin.

Ken Hilliker of Viking was the referee.

TO ASK GOVERNMENT TO SHARE 1930-31 CROP PAYMENTS

Now that the Dominion Government has decided to apply the principle of a minimum price to a portion of the wheat crop 1930-31, the principle should be extended to all farmers who sold wheat during that year, according to a statement made by Mr. Law, President of the United Grain Growers Limited last week. Mr. Law's statement was as follows:

"According to announcement which has been made at Ottawa, the Dominion Government has decided to apply the principle of a minimum price to a portion of the wheat crop of 1930-31 and give to a portion of the farmers who sold wheat that year the benefit of a minimum price of 60c a bushel. United Grain Growers has decided to call the attention of the Government the desirability of extending equal treatment to all western farmers and of applying the minimum price principle to all the wheat crop of that year. That would mean giving those farmers who sold their wheat on the open market those months when the price ranged between 50c and 60c a bushel the minimum price of 60c. Customers of this Company who are in that position look to us to make representation on their behalf to the Government and a number of them have already called on us to do so. Undoubtedly the feeling will be very strong that there should be no discrimination and that the equality of treatment should be provided."

LOCAL AND PERSONAL

Mrs. John Lee of Edmonton is spending a few days at the Cap Lee home here.

Two cases of scarlet fever developed last week and the school board thought it advisable to close the lower rooms in the school.

Miss Wingrove and Miss Stuart are visiting in Edmonton while the school rooms are closed and Miss Forster at her home in Calgary.

Miss Annie Chopka is back at work at the hotel after a months holiday.

Mr. Courtright of Stettler arrived in Tofield this week, taking a position at the Crown Lumber Co.

Miss Florence Kendall spent the week end in Edmonton.

Glenn Woods, Wes Taylor and Graham Allan and Bud Hannan attended the hockey game in the city on Saturday evening.

Harry Bowick returned on Sunday evening from Calgary after taking a short course in welding in the city.

Mrs. Adams of Calgary spent the week end at the Letourneau home.

The Misses Viola Lee and Edna Lindsay spent the week end in Edmonton.

The Jolly Twelve Bridge club met at the home of Mrs. Chapman on Wednesday evening. Honors were won by Mrs. Yakabuski and Thelma Jobb.

Bill Robinson returned to Vegreville this week end after spending a week's holiday in Tofield.

We regret to report that Mr. Rufus Wilson is quite ill with la grippe. We wish him a speedy recovery.

Miss M. Rodig spent the week end visiting at Viking.

The Misses Ruth McLaren and Helen McCathy of Viking were visitors here on Sunday.

A successful dance was held by the hockey boys on Tuesday evening. The hall was kindly loaned to the boys free by Mr. T. Schultz, for which they extend thanks.

OBITUARY

The death of Myrel Jacobson occurred on March 3rd, at the home of his parents 7 miles north of Ryley.

The funeral service was held in the home because of sickness on March 4th. The Rev. D. K. Allan officiated.

He leaves to mourn his loss, his parents Mr. and Mrs. John Jacobson, Theodore a brother and Thelma and Beula sisters, and a large number of near relatives.

The sympathy of the community goes out to the family in their sad bereavement.

CARD OF THANKS

May I, on behalf of the Anglican Vestry, take this opportunity of thanking all those who helped us in any way with the production of the play "The Path Across the Hill."

The members of the cast for their sacrifice of valuable time, and their unstinted efforts to make the most of their separate parts; to all those who loaned properties; to Bert Calvert for his usual kindness in "making up" the characters and the ladies who served the lunches for the social end of the business.

Again many thanks.

Rev. A. Wallis

ROOMERS WANTED—Four large furnished bedrooms to rent in private home. Also good garage.—Apply to Mrs. F. M. Webb, opposite Anglican Church. Phone 42.

FOR SALE— Improved strain Red Bobs 222 seed wheat; second generation; certified pure; field inspected; government grade No. 3; germination 94 in 12 days; free from weeds and wild oats. Same strain as that taking first prize at Toronto exhibition. Government growing period of this wheat practically the same number of days as garnet. One dollar per bushel up to 100 bushels, over that 90c per bushel. Apply to R. C. Phillips, Tofield. Phone 808.

BROME—Grade No. 1, Field Inspected, Couch free. Control certificate No. 75-4350. $8.25 per hundred pounds, $7.75 in lots of five hundred or more. Apply Geo. G. Abernethy, Tofield.

LOST—On Thursday, February 27th, a leather coat with fur collar. Between Tofield and Shonts. Finder please leave at Mercury Office. Suitable reward.

KING EDWARD HOPES FUTURE WILL BRING PEACE, UNDERSTANDING

His Majesty King Edward VIII, on Sunday delivered his first broadcast message to the people of the British Empire since he came to the throne and assured his vast audience he would endeavor constantly to promote the well-being of his fellow-men. The King spoke for a period of ten minutes slowly and distinctly and Tofield "listeners-in" heard his words almost as clearly as if they had been in the same room with him. It was His Majesty's 70th appearance before the microphone but his first since becoming head of the empire. Deep gratitude was expressed by the King for the tributes which had been paid to his father, King George V by people all over the world. It was his hope that the future would bring peace and understanding throughout the world. Edward VIII sent his greetings "as King Emperor" to the princes and people of India. He said: "The associations in peace and war between the British and Indian people have been long and honorable and the example set by Queen Victoria, King Edward VII and King George V lays on me as their successor a solemn trust to maintain and strengthen those associations."

His Majesty said in part: "It falls upon me to succeed him and to carry on his work. I am better known to you as Prince of Wales—as a man who during the war and since has had an opportunity of getting to know the people of nearly every country under all conditions and circumstances.

And although I now speak to you as the king I am still the same man who has had that experience and whose constant effort it will be to continue to promote the well-being of his fellowmen."

Probably one of the largest audiences in the world heard the message. It was heard by millions in Great Britain and in all parts of the empire and in many foreign countries.

MAJOR DOUGLAS HAS SENT RESIGNATION TO ALBERTA GOVERNMENT

Many daily papers carry banner headlines announcing the resignation of Major C. H. Douglas, British economist and originator of Social Credit as chief reconstruction advisor to the Alberta government. One daily says in part:

"Immediate upshot of the resignation was "indefinite" postponement of government introduction of Social Credit enabling legislation, which had been planned for the house session Tuesday. A caucus of government supporters was called at which plans for the next move will be discussed.

Premier Aberhart declared the development would not affect his aim for an Alberta Social Credit plan.

Break between the world's first Social Credit administration and the economist followed a long and confusing series of communication between the Briton and Premier Aberhart.

Dissatisfaction over the government accepting the reconstruction advice of R. J. Magor, economist to which the Briton refers sarcastically in a statement issued in London, is believed to have led to his resignation.

In his announcement of his plan to terminate his contract with Alberta government, Major Douglas declared that it is useless for him to come to Alberta under prevailing conditions, saying that no steps toward Social Credit had been taken here and claimed that even though the province is "insolvent" Social Credit would be possible.

In London Major Douglas claimed he had made suggestions to the government which had not been followed. What these suggestions were was not explained.

NEW ZEALAND HAS ABUNDANT WHEAT GROWTH

MONTREAL, March 3.—Although Canada was thought to be a good wheat-producing country, New Zealand grew 36 bushels to the acre compared with the Dominion's 17, Rev. C. W. Gordon (Ralph Connor) of Winnipeg said in an address here last night.

The reason for New Zealand's abundant growth of wheat, said Dr. Gordon in describing his recent visit to that country, was not only the wonderful soil and climate but mostly the people's love of the soil. "That is the trouble with Manitoba," said the speaker, "it is the same with all its products, we don't love our country."

AUCTION SALE SATURDAY

On Saturday of this week at 1:30 p.m. J. D. Hannan of Camrose will cry an auction sale of household effects for Mr. A. Pelot at his residence at Tofield.

Mr. and Mrs. Pelot are leaving immediately for California where they will in future reside. They have been residents of this district for the past 15 years and their friends, though sorry to see them go will wish them success and happiness in their new home.

VARIETY THEATRE NOW OPENED AS POOL HALL

After many years service as the town theatre and meeting hall, the building at the extreme south end of main street has this week been fitted up as a pool room. Tables have been installed and it is only a matter of days before lights and other equipment necessary for the operation of a pool room will be on hand.

T. Schultz the proprietor is ready to welcome all and sundry desiring recreation of this type.

ACKNOWLEDGEMENT

On behalf of A.B.C. and himself, the editor acknowledges with pleasure the congratulations extended by our Ketchamoot correspondent regarding recent writings. We also acknowledge with appreciation the many congratulatory expressions verbally given regarding "Little Mary" and other recent editorials.

CONSTITUTION BILL GOES TO PROVINCES

MONTREAL, March 4.—Instructions have been given to prepare a draft bill providing for amendment of the British North America act by Canadian authority alone and, when approved by the inter-provincial conference to be sent to the various legislatures for discussion and suggestions. Premier Taschereau made this declaration Tuesday after his return from Ottawa. Opinion in Ottawa, said the premier was that there would be no objections in Britain if it were found it was general Canadian will that change should be made.

Playing on soft ice at Irma the Tofield hockey team were defeated by a score of 10-1. The next game will be held on Saturday evening at Tofield.

FREE PICTURE SHOW ON WEDNESDAY NEXT

An entertaining and instructive talking picture show will be presented at the curling rink, Tofield on Wednesday March 11th at 1:30 and 4.30 p.m.

While primarily the production is to inform the public regarding the merits of the John Deere tractor the script and filming includes a real "human interest" story. A story the details of which might easily take place in your own home. Where this film has previously been presented it has brought forth much favorable comment and all are urged to respond to the genial invitation given to attend.

The show is being sponsored by M. C. Hammond, John Deere agent for this territory.

Wet Feet Are Dangerous

No doubt about it, wet and cold feet will bring about ills of all kinds, rheumatism, colds and kindred complaints.

PREVENTION IS BETTER THAN CURE

Be protected by wearing suitable foot wear. In wet weather you need rubbers—sure protection from water.

PRICES ARE NOW REASONABLE

We now have a fairly good stock of rubbers for all purposes. Cloth covered, plain, low cut for dress wear. Heavy blutcher style in black and white for heavy duty. High rubber boots for the coming spring thaws. Consistent with quality the prices meet all competition.

Bargain prices in Felt Boots, Moccasins, Heavy Shirts, Windbreakers, Mitts and all heavy winter wear.

E. W. ROGERS
Gents' Furnishings for Work and Dress Wear.

HEALTH by [illegible]

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

PLEURISY

Beneath the ribs lies a two-layer membrane forming a sac which encloses the lungs. Pleurisy is an inflammation of this membrane. When an inflamed surface is rubbed, it hurts and when two inflamed surfaces rub together there is real pain—pain that is sharp, stabbing, sometimes agonizing—the chief symptom of pleurisy.

The onset may be gradual; there is a sense of weakness, loss of weight, often a dry cough and sooner or later a pain in the chest which may first be noticed in the early hours of the day, even rousing the patient from a sound sleep.

A sudden onset with a chill, associated with a comparatively high temperature, cough and severe pain, is the beginning of an acute pleurisy. The pain may be in the front or back of the chest; in either case it is severe.

Pain is relieved by strapping the chest with adhesive plaster to hold the diseased side quiet and so to prevent the rubbing of the inflamed pleura which causes the pain. Fluid may form and the collection of fluid in the pleural sac ends the pain by separating the inflamed surfaces.

Usually after a time, the fluid is absorbed, but unfortunately in a few cases pus is formed; this condition is called "empyema"—pus in the pleural cavity. The pus is released by operation.

Pain in the chest may be due to causes other than pleurisy. As we have seen there is dry pleurisy, pleurisy with effusion, and pleurisy with pus (empyema). Every sufferer from pleurisy requires medical care. This is true for mild and dry pleurisy as for the acute and severe forms.

Just as a pain in the chest is more often not pleurisy than it is pleurisy, so the pleurisy itself may be due to any one of several causes. There is, however, only one way to treat pleurisy, and that is to look upon it as a warning that tuberculosis is probably present in the body.

This is not intended to alarm the sufferer from pleurisy; rather it is a warning which should be welcomed for if it is, and proper care is taken the chances are all in favor of prevention of the development of tuberculosis. This means that pleurisy should be treated by a long period of rest under a routine similar to sanatorium care. Then follows a hygienic life, under medical supervision, which provides sufficient rest, good food, exercise, fresh air and sunshine.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

CANADA SELLS BRITAIN SILK STOCKINGS

LONDON, England, March 3rd.—Milady in Britain when she goes out to buy her pure silk hosiery looks with favor on the Canadian article which has made a name for itself in the British market on the grounds of quality and elasticity. Of some 150,000 dozen pairs of silk stockings which it is estimated were imported into Great Britain last year, Canada supplied well on to half that quantity, according to the Industrial Department of the Canadian National Railways. Full fashioned silk hosiery is where the Canadian stockings makes its appeal while the decorated heel, the swagger toe, a fancy top and shading color and all the other gadgets and adornments which are dear to milady's heart are added attractions and bring higher prices and larger sales as long as the feature is new.

CANADA'S OLDEST EXPORT

KINGSTON, Jamaica, March 3.—Canada's oldest export trade is codfish to the West Indies. The Basques, Normans and Bretons were catching codfish in the New World, curing it and exporting it to the West Indies prior to 1500. The fish was dried and salted on shore, then shipped to France from whence it was sent to the West Indies. These fisheries were responsible for much of the voyages of discovery to the New World. For well over three hundred years codfish has been an article of diet of the islands of the West Indies and has become a staple diet of the natives.

The prosperity of the islands could be measured by the quality of the fish imported—when sugar, cocoa and cotton were selling at high prices the slaves were fed on the better quality of fish to keep them in good physical condition. In times of depression the cheaper types of dried codfish were consumed and this still holds good. Today Canada supplies about 25 per cent of the market which includes also British, French and Dutch Guiana, the best market for Canadian codfish being that of the island of Trinidad, principally from Nova Scotia, according to the Canadian National Steamships which company maintains a line of steamers providing direct connection between Canada and islands of the West Indies, and British Guiana.

NEW BUDGET INCLUDES SALES TAX

Imposition of a provincial sales tax of two per cent on "ultimate purchases of commodities, which means consumers, was announced Monday by Hon. Charles Cockroft's budget speech in the legislature.

This tax, the provincial treasurer indicated was planned to meet the cost of unemployment relief for which $1,437,000 was estimated in the budget. A gross revenue of $2,000,000 would be found in the tax, it was declared.

The tax is expected to affect every man, woman and child in the province and three-quarters of the retail trade.

"Certain Exemptions"

Mr. Cockroft said that under the sales tax, "certain exemptions will be allowed," and it is expected that legislation will be introduced in the house within the next few days to specify the character of these exemptions.

Present figures would hint that about 75 per cent of commodities will be taxed. In 1931 for instance, consumers sales in Alberta totalled $121,000,000 according to the dominion bureau of statistics. A two per cent levy on this whole figure would yield $2,480,000 gross revenue.

In the fact that Mr. Cockroft estimated gross revenue at $2,000,000 lies the suspected hint that a quarter of retail sales will be tax-free.

But it is emphasized that any attempt yet to conjecture the scope of the tax or the classes of goods to which it will apply is largely guesswork.

PASTURE GRASSES FOR PRAIRIE FARMS

There are three species of perennial grasses well adapted for pasture in the Prairie Provinces. These are brome grass, crested wheat grass and slender wheat grass, also known as western rye grass. A choice of these should be governed chiefly by a consideration of the purpose for which the grass is grown, the soil type, and moisture conditions, says Dr. L. E. Kirk, Dominion Agrostologist. Broadly speaking, crested wheat grass is well adapted to the brown soil zones, while brome grass and slender wheat grass are better adapted to the dark brown and black soil areas.

Crested wheat grass has been grown in a small way in western Canada during the last few years, but only now is it coming into general use. While the seed is still comparatively expensive its production is being increased very rapidly, about 300,000 pounds having been produced in 1935. Crested wheat grass promises to provide a much needed perennial hay and pasture crop for the semi-arid sections of the West. At the University of Saskatchewan at Saskatoon, crested wheat grass has yielded at least as much as brome or slender wheat grass over a six-year period, and in the very dry season of 1931 it produced twice as much as either of these. It is high in feeding value, withstands grazing well, does not become root-bound, provides feed in the early and late parts of the season and produces seed abundantly.

Probably the most satisfactory hay and pasture crop for the Park Belt and adjacent areas is a mixture of Brome grass and alfalfa. This mixture produces a superior quality of hay and the yield is likely to be greater than either crop by itself. Brome grass and alfalfa is highly recommended for all parts of western Canada where the alfalfa crop grows successfully.

7-YEAR-OLD BOY PUTS OUT FIRE

KAMLOOPS, B.C., March 3.—Seven-year-old William Lingren worked like a man when the roof of the Lingren home caught on fire. He used bare hands in sub-zero weather to pile snow on the flames until they were extinguished.

Up to Date

Young Jimmy was pushing his baby sister's perambulator down the street.

"Hey, Jimmy," called his buddy from across the street, "do you get paid for that?"

"Naw," replied Jimmy disgustedly, "this is a free wheeling job."—Bee-Hive.

THE SINGING NEWSBOY

WINNIPEG, Man., March 3.—Chicklets has arrived! In case you don't know who Chicklets is, vaudeville posters refer to him as the "Singing Newsboy."

A short time ago he got his chance in Montreal vaudeville and night club work and immediately made good. A long and successful career is now in front of him.

Seventeen years ago he was born in Winnipeg at 222 Atlantic Avenue, of Russian parents. He was given the name of Morris Zamik. There were eight boys and two girls in the family and they obtained their early education at [illegible] School.

For the last two summers Morris worked on the Canadian National trains between Winnipeg and Grand Beach, selling newspapers, candy and peanuts etc. Such a smiling personality had the lad that he was soon very popular with the commuters and he was nicknamed "Chiklets."

He used to go up and down the cars selling his peanuts, singing to himself, and the passengers quickly took advantage of it. The more he sang for them the more peanuts and candy they bought so he worked up a smart business.

He left home with the consent and good wishes of his parents before Christmas for the East to try his luck on the stage and writes his mother every week.

He had a hard time breaking in but appears to be headed for big time now. His favorite song is "Wagon Wheels".

POTATOES

"Potatoes and two other vegetables every day" is a recognized dietary rule. Potatoes are valuable from a nutritive standpoint and, therefore, are an economical food. They contain vitamines A, B, C and G. They are known as a "starchy vegetable" but it must be remembered that three-quarters of their bulk is water and that the protein contained is easily digested and of high nutritive value. The mineral contained is relatively large in proportion to other foods. The following unusual ways to serve potatoes have been prepared by the Fruit Branch, Dominion Department of Agriculture:

Belgian Baked Potatoes

Wash, pare and cut as for french fried potatoes; lay on a greased pan, sprinkle with salt and pepper. Dot with butter and bake.

Potato and Cheese Puff

2 cupfuls of hot mashed potatoes
3 egg yolks
two thirds cupful grated cheese
2 egg whites
½ teaspoon of salt
⅛ teaspoon of pepper
⅓ cup of milk (approximately)

Beat the egg yolk and blend with the potatoes, seasonings, milk and cheese, reserving 2 tablespoons of the cheese. Fold in the stiffly beaten egg whites and sprinkle the remaining cheese on top. Bake in a moderate oven until very light and serve at once. Serves four.

Potato Biscuits

1 cup of mashed potato
1 cup flour
4 teaspoons baking powder
½ cup milk
½ teaspoon of salt
1 tablespoon of butter
1 tablespoon of lard

Sift dry ingredients and add to the potato. Mix well, melt fat and add to milk. Mix with dry ingredients. Pat dough on a floured board to ½ inch in thickness. Cut in biscuit shape and bake on greased pan for fifteen minutes in a hot oven.

Potato Casserole

Slice eight cold, boiled potatoes. Fry two small onions, thinly sliced, in 3 tablespoons of butter until golden brown, add two tablespoons of flour and cook until frothy. Gradually add 2 cups milk and cook until thick. Add salt and pepper and 3 tablespoons pimento, cut in strips and one-half cup chopped meat. In baking dish place a layer of potato and then of sauce and continue until all ingredients are used. Cover with buttered crumbs and bake in a moderate oven. Sprinkle with paprika and serve. Serves 6.

Potato and Carrot Soup

4 medium-sized carrots
1 small onion
4 medium-sized potatoes
½ cup stewed tomatoes
pepper
3 stalks of celery or celery tops
1 quart of milk
salt

Cut the carrots, potatoes, onion and celery into dice and cook until very tender. There should be scarcely any water left when the vegetables are cooked. Mash, add tomatoes, milk and seasonings. Reheat before serving. Serves 6.

The Cat's Prerogative

Neighbor. "Oh, Mrs. Brown, we're going south for a few months. Would you mind feeding the cat until we get back? But please don't put yourself out."

SERVED 10 DAYS FOR KILLING HUSBAND, DETROITER GLAD IT WASN'T IN CANADA

DETROIT, March 2.—"Gee," said Mrs. Delphine Klechammer, back home after serving 10 days in jail for killing her husband, "in Canada they'd have hanged me."

For a moment the thought left her speechless. Then she began to laugh, weakly. It was a good joke.

A tiny little woman with smooth complexion, bright eyes and streaks of gray in her dark bobbed hair, Mrs. Klechammer stood in her suite at the Delphine apartments, now solely hers due to the demise of her husband, and expressed [illegible] stimulated by the arrival of a Canadian reporter.

"They hang women with 10 children there—what chance would I have had?" she asked. "I wouldn't have had a chance."

On the night of Dec. 23, 1935, John Klechammer picked up a teapot to throw at his wife. Both had been drinking liquor. Mrs. Klechammer ran into her bedroom, got a revolver and pointed it at her husband who had followed her. The gun discharged and Klechammer died.

At her trial on a charge of murder before Judge Arthur E. Gordon and a jury, Mrs. Klechammer testified that most of her married life had been devoted to "shoveling coal and drudgery about the apartment." She was rebelling against being a drudge and the constant beatings by her husband. The sentence was 10 days in the House of Correction and probation for five years.

15 B.C. RAILMEN KILLED AS TENDER ROLLS BACK UPON ENGINE OF TRAIN

REVELSTOKE, B.C., March 2.—Fifteen men are known dead, one is missing and five are injured as the result of a tender rolling back on to a locomotive near Downie, east of here, early Monday.

The crew which had been working to place the tender back on the track after it had been derailed by a slide were crushed against the engine.

The accident occurred at 3:30 a.m. on the main line of the Canadian Pacific railway.

The dead:

Hans Haug, trainman; J. R. Roland, telegraph operator; G. Dardy, laborer; S. Hidamo, laborer; T. Yamaguchi, laborer; H. Magamury, laborer; all of Revelstoke.

Charles Johnson, section foreman of Twin Butte, B.C.; Hidamo; Yamaguchi and Magamury were Japanese and members of an extra gang working on slides.

The injured:

D. D. Cowar, divisional master mechanic, condition serious; P. Shaffer, locomotive engineer; G. B. Alexander, divisional engineer all of Revelstoke; V. Piccorelli, section foreman, [illegible] B.C.; L. Witala, sectionman, Twin Butte, B.C., and S. Mitsumi and J. Mkrutu, Japanese laborers.

NON-POOL MEN WILL NOT BE COMPENSATED

OTTAWA, March 3.—The government has refused to compensate non-Pool wheat growers who sold their 1930 wheat at less than 60 cents (basis Number one Northern Fort William). The sub-committee of the cabinet dealing with wheat has telegraphed its refusal to the prairie wheat growers who made the request, Trade Minister Euler, chairman of the sub-committee, said Monday.

Decision was also reached to refuse the proposal that farmers who last year sold their wheat below the guaranteed price of 87½ cents before the guaranteed price came into effect be compensated for losses thus suffered.

When the crop year opened in August, 1930 wheat was selling at 92.6 cents. By September it had dropped to 78.1 cents. In October it was 72.5 and when the government took over the Pool wheat in November the price was 74.4. In December it was down to 55.4 cents and in January 1931, it went down to 53.9 cents. The remainder of the crop year the price ranged from 58 to 60 cents.

As a result of the continued falling market, many farmers who sold to the pool received only an initial payment of less than 60 cents, while those who turned in their wheat early received 60 cents or more.

Recently the government decided that all who turned their wheat in to the pool should receive at least 60 cents on the basis of number one northern at Fort William. It is estimated it will cost the Dominion treasury $6,000,000 to pay those pool farmers who got less than 60 cents.

Members of parliament from the prairies have received many communications from non-pool farmers declaring they sold their 1930 wheat at less than 60 cents and asking they be treated the same as the pool farmers. The non-pool farmers sold their wheat to commercial companies and those who sold early got more than 60 cents.

Western members have figured it would require $3,000,000 more to bring up to 60 cents receipts per bushel of non-pool farmers who sold after the price broke.

The claim that farmers who sold their wheat last August before the guaranteed price of 87½ cents was declared by the government should be reimbursed was based on the contention delay of the government in declaring a guaranteed price was no fault of theirs. Often farmers had financial commitments which forced them to sell their wheat as soon as harvested.

Witless Type

"The main ballroom of the Ritz-Carlton was the setting for a large tea dance given yesterday afternoon by Mr. and Mrs. —— to introduce to society their helium ferns and tall palm trees daughter." New York paper.

****

Some of the tourists who visit Palestine have queer notions. One lady said:

"Well, now, if only I'd known that Palestine had so much to do with the Bible, I surely would have brought a copy along!"

****

A Negro servant of the rather worldly variety remained away from his duties without excuse, only to show up one morning with the apology that he had been initiated the day before as one of the deacons in his church.

On being reminded of his seeming unfitness, he stated that "the rough element in the congregation just naturally demanded representation."

THE NEW BUDGET—

WHILE THE chief features of the new Alberta budget, including as they do, a sales tax, increased income tax and increased supplementary revenue tax, are causing surprise akin to consternation among the citizens, there is no good reason to become panic stricken. A budget of this kind was inevitable. It is the kind of budget one would expect from an ultra conservative administration and is simply a vivid example of cause and effect.

Among the numerous comments upon the new budget is a table giving yearly figures of Alberta's debt from 1905 to 1935. From 1905 to 1908 the province had no bonded debt at all but from 1908 onwards the debt increased at an average rate of $5,000,000.00 per year, the bonded indebtedness of the province today being between 150 and 160 million dollars. The interest payable on this large sum is of course a terrific drain upon the wealth produced yearly by the province, representing as it does approximately fifty per cent. It would almost look as if Alberta citizens had sold themselves into bondage. However, there are other ways of looking at the Alberta debt problem. In 1908 the province was in a semi-pioneer stage, people were flocking into the country and in common with the very earliest settlers, began demanding public improvements. The government of the day could not or would not increase taxation sufficient to pay for them, and political expediency demanding that, in part at least, these improvements be provided, there was nothing left to do except borrow the money. The particular banner under which the government was sitting made no difference, it was the same electorate, always demanding more in the way of public works than they could immediately pay for, and political strategy changes little with the passing of the years.

The real problem that lies before the Alberta electorate to-day is one of analysis. The new budget is ample evidence that taxation is on the increase—the question is, are the corresponding improvements worth it? It is not possible for the average citizen to accurately judge public improvements against taxation, but one illustration will make clear our meaning. In quite a number of years following 1905 anyone from Tofield wishing to go to Edmonton by road found it a two day journey, now it can be, and often is done in a single evening. Is the gravelled road worth anything to you? Because in part at least that is what you are paying for when you pay your taxes. Railroads, highways, telephones, health services and a dozen and one other things an impatient electorate clamor for are provided for by an all too lenient government with the result that debt naturally piles up. Borrowing money for public improvements require almost omniscient qualities, but more often then not enthusiasm and inexperience reign in the place of caution and experience. In 1934 or 1935 the electrification of a fairly large area in Great Britain was being considered. After much study it was announced that, assuming the normal set of economic conditions in the territory would continue, the venture would be a success if the capital necessary could be procured at a certain rate of interest, but an increase of 1½ per cent in interest rates would entail certain loss on the venture. The exact rate of interest for the moment we have forgotten.

The new budget with its increased taxation will not ruin the country. The levying of taxes is a very old and also a very fine art, it can be overdone to the point of defeating the end in view, that of collecting sufficient money. But this budget undoubtedly was arranged by a past-master in the art of taxation, just sufficient squeeze to extract a little more revenue, but not sufficient to crush the object squeezed.

TALKING ABOUT THE WEATHER—

There may have been longer periods of severe cold weather than we have had this winter, but few people can remember them, and the weather bureau confirms the belief that, taken by and large, this has been the worst season in many years. There have been lower temperatures, but seldom such prolonged cold spells and such a succession of cold waves.

The amateur weather prophets and the long range forecasters are putting forward the usual variety of explanations which don't explain, and predictions which are more likely to be wrong than right. A favorite explanation for unusual weather conditions is that sun spots have something to do with them. But the theory that the 11-year cycle of sun spots affects terrestrial weather, whether favorably or unfavorably, has not been borne out by the records of the weather bureau, which have been kept continuously in all parts of America since 1871.

Some weather prophets are beginning to predict that 1936 will be like 1848 which used to be referred to as the year without a summer in the northern states. Another school of thought holds that a severe winter is always followed by a hot summer. The fact is nobody knows enough about the weather and the causes of its violent changes to forecast it for more than a week or so ahead. Nevertheless, the weather is, always has been and always will be the most interesting topic of conversation.—Ex.

SOCIAL CREDIT ROAD BUILDING, SAYS ABERHART

With a balanced budget in view, the Alberta government is paving the way to Social Credit, Premier Aberhart declared Monday in commenting on the budget brought down in the legislature during the afternoon by Hon. Charles Cockroft, provincial treasurer.

"Economy and efficiency have been our chief aims in drawing up this budget," the premier said. "We must exercise economies at every possible turn, and to do that we must have full efficiency."

With a deficit of $2,549,044 in prospect he said, balancing of the budget now depends on refunding of the province's bonded debt. But he added, the government is expecting the next move in this regard to come from the bondholders.

Meantime, the government was awaiting reaction from the provincial treasurer's announcement of taxation increases expected to realize an extra $3,225,000 including the broadened scope of the fuel oil tax to produce $200,000 and the annual driving licenses for motorists to produce $150,000.

Last-minute addition to the budget speech, a statement that "the government is fully cognizant of the serious situation confronting our municipal bodies incident to relief and proposes to confer immediately with them with a view to finding a solution of this problem," was calculated to bring forth new co-operation from cities and municipalities.

George H. Van Allen, Edmonton Liberal adjourned the debate on the budget but is not expected to resume the debate until next Wednesday, Tuesday being spent on legislation already before the house.

All the galleries in the house were packed with spectators eager to hear the budget speech.

Mr. Cockroft spoke for three-quarters of an hour and never faltered.

S.C. Unmentioned

He made no mention of Social Credit, and this fact drew comment from Social Credit supporters as well as from Oppositionists. Neither was there provision in the estimates for expenses of instituting Social Credit administration.

"There is no need for setting aside money for establishment of Social Credit," Premier Aberhart declared later in answering questions.

"We need no money in instituting our plans, apart from the regular costs of government."

"Do you say that you could launch Social Credit, and make it operate on these estimates?" he was asked.

"Certainly" the premier answered. "We do not use money for Social Credit; we use the province's credit itself, and it doesn't enter into the estimates."

He would make no statement however as to when he would be able to make Social Credit operative in Alberta.

"Our first problem" he said, "was to set the province on a firm financial basis. That is what we have tried to do in this budget. When we get a solid foundation, we will be able to go ahead with Social Credit."

The government has no plans at present for initiating another move toward conversion of the provincial debt, he said.

May Send Letter

"We may send out to our bondholders through investment dealers, another letter like that which we issued in December," he said. "We have not decided yet.

"But we do consider that the next definite move must come from the bondholders themselves, possibly through some organization which they might form. We can do nothing yet at Ottawa, and therefore I have no plans at present to go to Ottawa to seek refunding."

It was indicated meantime that R. J. Magor of Montreal, special financial adviser to the Alberta government will remain here for a few weeks more in order to perfect the organization in various departments provided for in the budget.

Mr. Magor himself indicated that his plans are indefinite; he may go east for a time, and then return to visit various parts of the province and line up the financial structures of government interests including school districts, hospitals and relief allowances and municipal grants.

MAGOR ONLY DOING DUTY, HE ASSERTS

Informed of the action taken by Major Douglas and the latter's attitude toward his work as financial adviser to the government, R. J. Magor, Montreal financial expert had only a brief comment to make.

"I have only endeavored to do what the government invited me to do. It has been ordinary routine work for me and I have done it as a form of service I have been giving for years past," he said. "There was no confusion with the work or functions of anyone else and any connection that may have developed is entirely incidental. I have simply done my duty as best I could and endeavored to do what the government invited me to do."

D. M. Duggan, Conservative leader was not surprised at the turn events have taken.

"It was apparent some time ago and my only surprise is that Major Douglas waited so long. It was evident from his first appearance before the legislature and upon his return to Alberta last year that he had little to offer us and as far as I could see there was no object in his remaining as reconstruction adviser to the government, especially as the past few months clearly indicated that he was not prepared to face the situation now that a Social Credit government was actually in the saddle and that he could make no contribution to our problems."

Is Einstein Wrong?

"A SIMPLE little thing," declared Prof. W. B. Cartmel, of the University of Montreal, sitting in the book-strewn study of his Westmount home where, for some months past, since his retirement from the Northern Electric Company, as mathematical expert, he has worked out the highly complicated mathematical formulas by which he attempts to disprove the Einstein theory of the non-existence of ether and the constant speed of light.

Addressing the American Physical Society in New York recently, he took his audience by surprise when he showed them that the slight difference observed between the velocity of light in the two beams reflected upon the interferometer in the original telescope experiment many years ago was not an error as Einstein maintains, but was just what should be expected, and indicates an "ether drift" and proves Newton's third law correct and logical. "In any case," says the genial professor with a merry twinkle in his eyes, "they have got to 'show me' by better proof than they have yet brought".

BRITISH ANTI-SUBMARINE MANOEUVRES BROUGHT UP ITALIAN CRAFT OFF MALTA

OXFORD, England March 3.—(C.P. Havas)—Admiral Sir Roger Keyes said in an address Monday night that Italian submarines started "popping up like corks" off Malta during British anti-submarine exercises some time ago.

The exercises were held off the British base in the Mediterranean after the fleet had been reinforced in that area.

"Around Malta our people started submarine exercises," said Sir Roger. "They only used small charges but, believe me these can be very awkward. Soon after the exercises started, Italian submarines started popping up like corks.

"Their commanders expressed surprise that they were near Malta, saying they thought they were off Tripoli. The British public did not know anything about this, but it was well known to the staffs of Germany, France and Italy so there is little harm in my mentioning it."

FATHER NORSE WRITINGS DIES

MADISON, Wis. March 3.—Rasmus Bjorn Anderson known as "The Father of Norse Literature in America" died here Monday. He was 90 years old January 22.

Professor Anderson was one of the first historians to champion the claim that Lief Ericksen discovered America. He published 60 books that established him as an authority on Scandinavian history.

He advanced the theory that Ericsson arrived on the North American continent 492 years before Christopher Columbus. He supported his contention with photostatic copies of correspondence between the popes and ecclesiastics in Norway, dated in the thirteenth century.

Will it Come to This?

"Johnny," said the city mother, "run down to the grocery store—"

"O K Mom."

"And get me some oranges and half a dozen potatoes."

****

His Choice

The young man had been looking through a collection of Christmas cards for some time, yet he seemed uncertain as to what he should buy.

"Here's a lovely sentiment," said the lady assistant, helpfully. "To the only girl I ever loved."

"Splendid!" he cried, "I'll take six of those, please."—Argentine Magazine.

****

Rights

"Chairman Banks is accused of balloting when his lodge voted to give him a necktie."

"It's his duty to vote in case of a tie!"

****

Light Colors Preferred

First Mechanic: "Which do you prefer, leather or fabric upholstery?"

Second Mechanic: "I like fabrics; leather is too hard to wipe your hands on."—Chelsea Record.

****

Touching

Two members of a club began to exchange confidences. "Do you know," said the young man, "my wife is absent on a pleasure cruise and she writes me from every port she touches."

"You're lucky," replied the older man. "My wife is also on a pleasure cruise, but she touches me from every port she calls at."

Here and There

Vancouver [illegible] the Golden J[illegible] of its founding [illegible] the features [illegible] sports events of [illegible] pageants, a special [illegible] of Shakespeare's [illegible] Night's Dream [illegible] a performance [illegible] Indian village [illegible] special decorations [illegible] tions all over Vanc[illegible] brations will reach [illegible] the first ten days of J[illegible]

At the annual Burns [illegible] held at the Empress [illegible] toria in February at which [illegible] 300 Burns lovers took part, the royal Scotch haggis was brought over from Vancouver and was carried in steaming hot on a silver platter by Miss Gwen [illegible] and piped around the Empress dining room by Pipe major Donald Cameron. Greetings were received from South Africa, Australia, the United States and London England.

Stating emphatically that success depends on luck, Captain Charles M. Hudson, D.S.O., and Bar, R.N.R., commander of Q-boat for two years of the war, had a hard job convincing the Active Club International at Hotel Vancouver recently of the entire truth of the statement. They thought that skill, courage and foresight had something to do with success after hearing some of his adventures.

Recently the Royal York Hotel, Toronto held a Cherry Pie Contest with open to everybody and gave ten prizes in order of merit and the [illegible] housewives of the Queen City were all agog. The judges of course had their work cut out for them, or may be they did a bit of cutting for themselves.

"It is a pity every British Columbia business man can not find it possible to visit the Far East, [illegible] Japan [illegible] C. A. DEVELOPMENT OF RESOURCES IS FORECAST

Forecasting extensive development of Alberta's natural resources in 1936, including the salt and tar sands deposit of the north and petroleum and natural gas leases in the south, Hon. Charles Cockroft provincial treasurer, in delivering his budget speech in the legislature on Monday stated that in the calendar year 1935 Alberta coal production totalled [illegible] tons an increase of [illegible] tons over 1934. The value $14,05[illegible] was an increase of $[illegible] compared with the previous year.

Lumbering on Increase

Lumbering also showed an increase being valued at $612,000.

Commercial fishing resulted in a total production of 12,9[illegible] pounds valued at $233000.

Production of crude oil and naptha totalled 1261750 barrels valued at $2,856000 a decrease in production of 2100 barrels and in value of $175400 compared with 1934. Consumption of natural gas amounted to more than seventeen million thousand cubic feet, valued at $345000.

Total Value

Total value of production from natural resources in 1935 was $1[illegible] as against $16722000 for 1934 and increase of $1375000.

"The new regulations put into effect by the lands and mines department have already resulted in a renewed interest in the development of these resources and the government intends to encourage and assist the development in every way." he said.

ONE IN EVERY TEN NOW ON RELIEF IN CANADA

Ottawa, Feb. 26.—The number of persons in Canada receiving relief at the end of December 1935, was 1,200,420 equal to one-tenth of the entire population a return tabled today in the House of Commons disclosed.

Throughout the year the figure remained approximately at the 1,200,000 mark although in September and October it dropped down to 969742 and [illegible] respectively.

In the dried-out areas of the western provinces relief was distributed throughout the year to about 175,000 persons every month. A decided drop occurred in September and October when the recipients numbered 16664 and 25505 respectively.

The return showed an average of 3000 war pensioners also were receiving relief from the pensions department. With their dependents the total approximated 30000 every month.

The number of single, homeless unemployed men in relief camps varied widely from 8210 in May 1933 to 27,070 in December of that year. In December last the number was 19282 according to a preliminary survey of the labor department.

BIG MEALS ENEMIES OF WEAK HEARTS

CHICAGO, March 5 — Big meals were named Wednesday in the journal of the American Medical Association as the No. one enemies of weak hearts.

Heavy eating is a major "precipitating cause" of death from coronary thrombosis or heart block Dr. Cadis Phipps of Boston said in a study of fatalities from this ailment.

MILLIONS ABJECTLY PERMIT THEMSELVES TO BE STRIPPED OF SECURITY SO FEW MAY HAVE WEALTH AND POWER

These are gala days for the armament factories and shareholders are waxing fat. Speculation and profiteering in aircraft and other allied industries are making fortunes over night in London. The traffickers in death are flourishing. All this jubilation must serve to chill the fine edge of patriotic zeal. The young man on the street, facing precarious existence knows that he is the prospective victim and that the wealth is being piled up by the few, on the presumption that he will shortly be conscripted to kill other young men for the sum of $1.10 a day or less. It scarcely matters of what nationality the other young men may be or what cause may be involved. Anything can be made to sound high and noble for the ultimate purpose of war and armament makers are described as the "true internationalists."

The actual killing of men is a costly process—in wartime. Perhaps that also is a part of the game. It is estimated that it cost $25,000 for every man slaughtered in the Great War. This however does not mean that any man's life is worth $25,000 to his country. It merely means that as a target for shot and shell, that sum of money was expended on munitions to "kill" him. When dead, the soldier represents an expenditure of $25,000 on the part of opposing forces who have probably purchased their ammunition from the country for which the young man thinks he has been fighting.

Yet all these nations plunging madly into the sea of war purchases are poor, so poor that they haggle over subsistence for great numbers of their citizens, so poor that money is lacking for adequate health and school facilities, for peace time industries and for happy homes and comfortable jobs. They are so poor they can't pay their debts on the last war. Probably if all the facts were exposed it is the armament's ring that owns the world and the conviction that any soldier is fighting for any specific country is fiction carefully nourished so long as human victims are necessary.

It is an extraordinary world in which millions abjectly permit themselves to be stripped of everything secure and beautiful in order that hundreds may accumulate incredible wealth and power.

If any proportion of the sum which is being expended on munitions were used to effect redistribution of territory and compensation amongst injured nations that would at least be an honest attempt to make life worth living for God's children.

The last world war cost $337846180657. Was any part of that money conscripted. If that total sum had been pooled it would have given a comfortable [illegible] on a five-acre plot for every family in Great Britain; United States; Canada; Germany; France; Belgium and Russia. But it would not have boomed munitions.—High River Times.

$100,000 CONDENSED MILK PLANT WILL BE BUILT AT RED DEER

RED DEER March 5.—The Central Alberta Dairy Pool will build a $100,000 up-to-date condensed milk plant in Red Deer according to an announcement made here on Wednesday. Details of the building and when construction will start have not been made public yet.

A site for the factory has been chosen on the north side of the Red Deer River in North Red Deer and about 3 acres of land have been bought. The building will be close to the river and the very best and most modern machinery will be installed. The total investment will be around $100,000 it is said.

CANADIANS AND THEIR INDUSTRIES—AND THEIR BANK

· FISHERIES ·

JIM: "Bill, do you ever get tired of handling fish, fish, fish, all the time?"

BILL: "Yes, Jim, but it helps me to keep goin' when I think of the thousands of folks we're helpin' to feed!"

JIM: "That's right—fish is important and we're in a fine big business."

BILL: "Wasn't always big, though. The Chief was tellin' me the other day about how this company started. It seems funny, now. He and his partner figured they would do a whole lot better if they could keep their fish fresh for all-year sales. They went to the Bank of Montreal and borrowed on their personal securities to build a [illegible] plant. Of course they soon paid back [illegible] saw what a good thing this business was goin' to be and bought stock in the company. Now look at the business! But the Chief admitted to me, confidentially, of course, that if it hadn't been for the Bank of Montreal, they couldn't have succeeded, and he said it was the same way with a lot of the other fishery concerns."

JIM: "A good story, Bill, and I know it's true, because the Chief told me, too. I reckon he tells 'most everybody, because he likes to talk about his Bank. It's my Bank too. I have a savings account there."

BILL: "Have you, Jim? So have I!"

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else.

Chatter Among the Atoms

(FROM THE C.I.L. OVAL)

This is the story of a young lady, smartly attired in a red rayon dress, and a brown suede hat, seated in a shining new automobile, and all unconscious of the whispering of atoms going on around her.

The material of her dress, the dyestuff that coloured it and the dyestuff in her hat, the synthetic resin of the dashboard, the lacquer on the car, the gasoline in the tank, the rubber in the tires and the gears in the engine, were whispering away inaudibly, as only atoms can.

You see they all had something in common, they all had carbon in their systems. The cylinder head had carbon in it, too, but it was free carbon, not bound up in chemical rings and chains by organic chemists, as in the case of the other atoms. And talking of rings, the young lady was confidently expecting to have a diamond ring slipped on her finger that evening, and that would be free carbon bound in a ring, too, because diamonds, as we know, are absolutely pure carbon in its crystalline form.

It was just the purest coincidence that these members of the carbon family came near enough to "short-wave" their thoughts to each other. The last time they were together was several millions of years ago in a tropical forest, when they lived together in the leaves of a giant bao-bab tree. Since then, they had lain buried under volcanic ashes and glacial drift, and had very gradually turned into coal. In the general upheaval they had become separated, and never thought to meet again. And they never would have done if they had had the misfortune to be dug up a hundred years ago, because in those days there were no Organic Chemists, and people burnt coal for the heat it gave out, and the carbon just went up in smoke and was never heard of again.

But during the last century those who studied the carbon family came to know their possibilities, how, if they were treated more gently than by burning, and if they were married to other elements, and intermarried in different ways, they produced very useful offspring. And the main benefit that the dabblers-in-the-ways-of-carbon got out of all this was that they were called Organic Chemists.

Now let them tell their own story in their own wave-length, as they spin in their atomic orbits:—

Carbon-in Rayon (rustling): They turned me into coke, then into carbide down at Shawinigan Falls. Soon afterwards they poured water on me, and I turned into gas. Before long I felt an acid taste in my mouth, like vinegar, then they took water from me and married me to some Northern Ontario cellulose, and here I am. Rayon they call me, and I am feeling a lot smarter than a bao-bab leaf or a chunk of coal.

Carbon-in-Dyestuff (blushing): I wasn't too proud of being coal tar. Things looked pretty black for us until those dyestuff people joined us in rings and married us. We have been in the red ever since and we rather like it.

Carbon in Bakelite (stiffly): It was quite an accident when we were made into Phenol and stewed with formalin, we got rather thick and set hard when we were baked. But though nobody knows much about us, we are none the less very useful as mouldings, and much more useful than the wood of the bao-bab tree. We are prettier with a little pigment in us before we set.

Carbon-in-Lacquer (softly): They call us a plasticizer, and we rather like it. Helping this lacquer to "flow" and not be so brittle, reminds us of the time, 'way back in the past, when we were sap in the old bao-bab.

Carbon-in-Tires (stretching): Talking of sap, the sap of a rubber tree isn't much use for tires unless it's treated with chemicals. That's why we're put here; we make the rubber resilient and lasting, but please don't ask us to pronounce our names. Call us accelerators and anti-oxidants for short.

Carbon-in-Gasoline (liquidly): We got here through a new discovery that a drop or two of the high-sounding family they've married us into, in a tankful of old-fashioned gasoline, stops gum from forming. We never could stand gum even in the bao-bab days.

Carbon-in-gears (grinding teeth quietly): We were hitched up to iron to make it case-hardened. To do it they had to treat these gears with cyanide. It was a rather poisonous experience while it lasted, being turned from coke into cyanide, but we're all right now.

Just then the young lady received her ring, and the car started, so the organic chemicals had to stop talking and get on with their work. But there are lots of others doing useful work, and the Organic Chemicals Division, C-I-L's newest, knows all about them and can tell you what they might say to each other if and when they met.

KETCHAMOOT

Threshing has started up in the Farmington district. As yet we have not heard of any grain being ready here but there are quite a number to finish threshing.

Mrs. G. E. Owen moved back to farm in our district last week. Joe Sutton has the land rented.

Mr. Thompson is back on the job at the Bardo elevator after a month's absence, the results of injuries.

Some twenty-five passengers took advantage of the cheap rates the latter part of February at the Bardo station. Among those from our district were Messrs Chas Whilliams; A. F. Schultz; C. Coombes; Stanley and Charley Sears.

Mr. Harold, relief agent at the elevator in the absence of Mr. Thompson returned to Edmonton Saturday of last week.

Mrs. Roger Ray and family spent Saturday at the home of Mrs. Ray's mother, Mrs. Pete Lee.

Congratulations to Mr. and Mrs. Torrie on the birth of a son on Feb. 24th at the Lamont hospital.

Messrs Schultz; C. Whilliams; J. H. Ingram and Albert Sears were business callers at Kingman Tuesday.

Miss Astrid Moline of Shonts is visiting her aunt Mrs. C. A. Ingram.

Mrs. L. Carlisle and daughter Selva, Mrs. Earl Carlisle and children visited at the Berreclough home in Bardo district on Friday of last week.

Mr. and Mrs. Geo. Lawson, son Martin and Lorne Lee and Adolph Weder were guests of Mr. and Mrs. Roy Lee on Sunday.

Mrs. Joe Sutton is entertaining the Social hour club at her home on Thursday of this week.

Mr. and Mrs. C. A. Ingram; Mrs. Sears, Hazel and Albert and Mr. Harold were guests of Mr. and Mrs. Whilliams Friday evening of last week.

Several of the young people of the district are busy practicing a play, "Here Comes Charlie." Those taking part are Misses Gertie and Kathleen Ingram; Ethel Coombes and Margaret Mitchell; Jimmie Ingram; Leo Ovweldson; Russell Schultz; Frank Hull jr. and Lyle Coombes.

Mrs. J. H. Ingram entertained the Ladies' Aid at her home Wednesday afternoon of last week. Eleven members and a number of visitors were present. The president, Mrs. McCowan conducted the meeting. Mrs. Brick favored with a solo. A social hour was spent after which the hostess and daughters served a delicious lunch.

Mr. Tollofson shipped two cars of baled straw last week.

Mr. Wendall Wiley is working at the Henry McGinitie home.

Mr. Frank Hull jr. has been at the home of his grandfather, Mr. Hull for the past few months.

LINDBROOK

Everyone here is very pleased with the break in the weather. Cattlemen and sheep men here are particularly pleased as a week or so ago it looked very serious for them and their flocks and herds. The only ones who may not be so pleased are those with heavy hauling to do, the roads getting to be bare and icy.

Mr. W. Glenn was returned as councillor for this district by acclamation.

Mr. Glenn had what might have been a serious accident the other day, in fact it was bad enough as it was. It seems that whilst his sleigh was at the mine in Tofield being loaded with coal and he standing at his horses' heads they took a fright and bolted knocking him down and the sleigh passing over his legs. This kept him indoors for awhile but we are pleased to hear that he is coming along O. K. and with no bad results from the mishap.

Dr. Law was out here last week inoculating the school children and any adults who felt like having a shot; we believe it is against diptheria.

Divine Service was held in the School last Sunday and quite a nice congregation assembled. The Service was conducted by the Rev. A. Wallis of Tofield

LOCAL AND PERSONAL

Thos. G. Dark, eyesight specialist will be at the Tofield hotel on Wed. morning March 18th, until 11:30 only. All work guaranteed

Sid Worton of Wainwright spent the week end visiting at his parents home here.

Miss Muriel Malcolm spent the week end in Edmonton.

Mr. R. Whyte of Wetaskiwin spent the week end visiting his home here.

Mr. Courtright of the Crown Lumber Co. staff, spent the week end in Edmonton.

Mrs. Moan of Edmonton spent a few days in Tofield last week.

Mrs. Norman Scott spent a few days in Edmonton. Little Norma Scott sang over "Farmers" program on Friday afternoon.

Mrs. N. Kendall was pleasantly surprised on Tuesday evening when a number of her friends dropped in in honor of her birthday. Bridge was played throughout the evening.

Mrs. Bert Lovel is attending a lodge convention in Calgary.

Selma Nomeland spent a few days visiting Hilda in town last week.

Come to the St. Patrick's Tea at the United Church Manse on Saturday, March 14th at 3 o'clock. "A Fortune with every cup of Tea."

OYSTER SUPPER AND BINGO

The C. W. L. will sponsor an oyster supper and Bingo on Tuesday, March 17th in the St. Francis Hall. Supper starts at 5:30. Admission 35c.

LAKESHORE

Mrs. A. N. Booth is visiting at the Bert Swift home at Falls.

Mrs. L. H. Graham entertained the wives of the School Trustees on Monday evening while the Trustees held a business meeting. These were Mesdames Ferguson, T. E. Seale and Murray.

Reuba Phillips was pleasantly surprised on Friday evening when a number of neighbors gathered at his home in honor of his 40th birthday which occurred on that date. Honors at bridge went to Mr. and Mrs. J. H. Johnston while Mrs. Graham and daughter Mildred won consolations.

Mr. and Mrs. T. A. Jones gave another of their enjoyable house dances on Friday evening.

Twins seem to be the prevailing style in calves this spring. Lloyd Wood, R. C. Phillips and T. D. Ferguson are all boasting of bossies who have given birth to twins within the past month.

A shower was held at the Noland home last Thursday for Mrs. Weathervill, a recent bride. A large number of ladies were present and the bride was the recipient of numerous lovely gifts and good wishes for a lot of happiness. A lovely lunch was served by the hostess.

The bridge bug has been active in Lake Shore lately and several games have been played during the last two weeks. Guess we spoke too soon, Mrs. Graham and Mrs. Phillips aren't unbeatable after all. Mrs. Wood and Mrs. Johnson demonstrated this last week but the ladies of the first part staged a brilliant come back a few days later so they still think they are pretty good.

Mrs. W. E. Seale and Mrs. T. D. Ferguson took the short end of the count in a game on Tuesday at the home of Mrs. Wood. Mrs. Wood and Mrs. Johnston winning by a small margin.

COMMUNICATION

Our Senior Hockey Team is worthy of congratulations for the fine brand of hockey they displayed and for their achievement in reaching the finals of the Gas Line League. They have played during the whole season determinedly and consistently. When one considers the long trips they have made to fulfill engagements in most trying weather and circumstances, Tofield ought to be proud of the "boys" who sacrificed so much to uphold the honor and prestige of the town in the hockey world.

Few teams play under more disadvantages and with less moral and financial support. But the "boys" love the game and we heartily congratulate them on their splendid showing for 1935-36.

D. K. Allan.

Irma Gas Line League Hockey Champs

In a hard played game on Saturday night between Irma and Tofield, Irma emerged victors by the score of 4-2. This victory makes them 1935-36 champions of the gas line league including Wainwright; Irma; Viking; Holden and Tofield. The play-off series was the best three out of five, and Saturday's game was the fourth of the series Irma having previously won two and Tofield one.

On the night's play Irma was deserving of their win. The game was really decided on the first two goals scored by Irma early in the first period. These goals were "lucky" inasmuch as Tofield was setting the pace and for the first five minutes of the game was playing faster and better hockey than the visitors. After Irma scored their second goal they became masters of the situation and remained so throughout the game.

The first period opened fast, Tofield pressing hard and giving the Irma goalie plenty to do. Irma found difficulty in getting it out of their own territory for the first few minutes. Then a rush down the ice, a shot on goal which Bowick turned aside. Back in Irma territory for another few minutes struggle and another rush to the Tofield end, this time with a pile of players milling around the goal. In the melee Irma scored the shot coming from Morrison hitting a Tofield players pads and bouncing in. Somewhat taken aback by this Tofield made desperate efforts to get the equalizer but were unable to get the puck past the Irma goalie. Within five minutes of the opening of the game and on Irma's third rush down the ice F. McGuire scored for Irma on a pass from his brother. From this point on the game opened up with end to end rushes Irma having a little the best of the play. Towards the end of the period ed on a pass from Lawson.

The second period resulted in only one goal being scored Irma getting the counter. At times the game was fast and rough and at other times it slowed up considerably. The home team kept trying hard but were unable to break through for a goal while about midway through the period Irma added another to make it 4—0.

The third period found Tofield playing all men up and forcing the play. Faced with a four goal deficit it was a herculean task to climb out. Holding their opponents scoreless Tofield scored twice Jack Bowick and Spratt being the marksmen. The outstanding feature of the third period was the marvelous save by Bowick in goal. Irma broke away with all Tofield men up the ice, two Irma men going down. Bowick came out

APPENDICITIS

Whatever may be the explanation, there seems to be no question but that appendicitis is becoming more common. Appendicitis is responsible for more deaths than result from all the communicable diseases put together. The 1,377 deaths from appendicitis in Canada during 1934 exceed the maternal deaths, the deaths from diabetes or the fatalities arising from motor car accidents.

The appendix is the most common site of infection within the abdomen. This useless appendage in the human is situated at the beginning of the large bowel in the lower right of the abdomen. When for one reason or another, the appendix becomes obstructed the inflammation which results leads to tension which may progress until the appendix ruptures.

The appendix is a blind tube with a narrow lumen. It becomes obstructed very readily. When the appendix ruptures into the abdominal cavity, this causes a peritonitis or inflammation of the membrane peritoneum, which lines the abdominal cavity and the organs situated in that cavity.

Appendicitis occurs at all ages. It is more common in children and young adults, but it is a greater menace to life after forty years of age. The onset of an acute attack is marked by pain, nausea and usually vomiting.

The pain in the abdomen to begin with is usually rather general, but as it continues it becomes more severe and localized over the site of the appendix where there is also a tenderness and rigidity of the abdominal muscles. At this stage there is some fever, the patient lies quietly on his back often at this stage with the right knee flexed, this being the most comfortable position.

A sudden cessation of pain at this point is a danger signal for this may be a "treacherous period of calm" due to the relief of pressure as the appendix ruptures to be followed by a more serious condition—peritonitis.

Just how serious the condition becomes depends upon the location of the appendix, how long the attack has lasted (usually the longer the better, as this has given nature time to limit the spread of infection in the peritoneum through creating a barrier of adhesions—and lastly, to the extent that laxatives have been used to defeat this protective measure. The vast majority of deaths occur in cases where the appendix ruptures or perforates.

Deaths from appendicitis will decrease when the use of laxatives for abdominal pains is discontinued, and when the doctor is called to deal with abdominal pains which persist. At the proper time an operation for the removal of the appendix is comparatively simple and safe.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

SPRING VERSUS FALL PLOUGHING FOR WHEAT

(Experimental Farms Note)

Some ten years ago, most of the farmers located on loam or sandy soils in northwestern Saskatchewan endeavored to do as much fall ploughing as time would permit. This form of tillage was considered good practice both from the standpoint of weed control and distribution of work. In recent years however the amount of ploughing done in the fall has rapidly decreased.

An experiment has been in operation at the Dominion Experimental Station, Scott for the past twenty-one years to test the value of spring versus fall ploughing for wheat. The test was conducted on duplicate one-fortieth plots. Results show that spring ploughing has outyielded fall ploughing by two and one half bushels per acre for that period. While the yield difference was not great it is significant that spring ploughing returned higher yields in seventeen out of twenty-one years.

Since there is usually more ploughing done in autumns of over average precipitation, the yields have been studied in relation to the previous fall moisture. In nine out of twenty-one years the fall precipitation was considerably over the average but only twice during these nine years did fall ploughing outyield spring ploughing. The other two years that fall ploughing [illegible] following average fall precipitation. It has been observed that fall ploughed land was usually drier at the time of seeding than spring ploughing. Even though the soil may be quite lumpy at the time of ploughing it does not hold the snow as well as stubble. Furthermore, the lumps are usually broken down in the spring thus making fall ploughed land more susceptible to drifting than spring-ploughing—a highly important consideration.

Results of this experiment indicate that spring ploughing is more profitable than ploughing in the fall under soil and moisture conditions similar to those prevailing at Scott, provided that the work can be economically done. On heavy clay soil, double discing stubble has given better results than ploughing either in the fall or in the spring.

GREAT BRITAIN GOOD CUSTOMER OF CANADA

LONDON, ENG. March 9.—Canada was the leading source of supply of wheat to Great Britain in 1935, also for wheat meal and flour; oats and oat products; raw apples; canned lobsters; hardwood; patent leather; copper; zinc, aluminum; was in second place for bacon, hams; cheese; lead, rubber boots and shoes; third for barley, raw pears, fresh and frozen fish; canned salmon, softwood lumber; fourth for newsprint, mechanical woodpulp; cardboard; railway ties; butter, fifth for tobacco; according to the Industrial Department of the Canadian National Railways.

WHEAT BREAD IS GOOD FOOD

The life of the new wheat plant may be divided roughly into three stages: first; the seedling stage, when the young plant lives upon the reserve food supplies provided in the seed; second; the growing stage, when the plant draws from soil and air those materials which are necessary to the production of roots, stems leaves and head; and third; the fruiting period, when the plant transfers to the fruit or grain certain materials that it has previously accumulated, plus starch which it elaborates during this period. This third stage is indeed a critical one in the life of the wheat plant, since what occurs has a large bearing upon the usefulness of wheat as a food.

About 30days before harvest the wheat plant flowers and begins the formation of the grain. The first major process includes the production of a sack or envelope which is ultimately to become the bran coat of the grain. Into this sack is loaded the other two major structures of the grain (a) the germ or embryo, and (b) the endosperm or starchy and glutenous food reserves.

Now we must bear in mind that in this process the wheat plant is concerned only with the propagating of its kind, and not at all with the nourishment of the human race.

Let us therefore, note what the wheat itself is doing during this critical period of grain formation in its effort to produce fruit or grain. Into the pericarp or fibrous brany sack, it proceeds to load protein materials and minerals that have been accumulated and stored in other parts of the plant previous to blossoming. At the same time the green parts of the plant are actually engaged in manufacturing sugars which are transferred to the grain, and these are built over largely into starch. Accordingly both protein and starch-forming materials are flowing into this sack at the same time. Completely formed protein is not built up immediately, however; this process is incomplete until the approach of ripeness.

About the time that the first tinge of yellow appear in the plant, a curious and interesting change in the process of grain formation occurs. This change in color, accompanied by a fall in moisture content warns the plant, as it were that it must promptly complete its task of developing its fruit. Accordingly the transport of material to the grain stops at about the stage when its moisture content falls below 40 per cent and the protein forming materials present are rapidly built into gliadin and glutenin, which jointly are referred to as "gluten". It is here in the laboratory of the ripening wheat plant that our flour is laid down.

The completeness with which this gluten formation occurs together with the ratio or proportion of gluten to starch that then exists has no small bearing upon the usefulness of the grain to the humans who contemplate consuming it for food. These gluten proteins, gliadin and glutenin are curious substances and their like is not encountered elsewhere in natural foods. When wetted with water, they exhibit a definite attraction for each other—an attraction that can be explained on a basis of certain electrical properties. The complex which results possesses an ability to stretch and expand without rupturing that is not equaled by other natural plant materials. Its usefulness in the production of leavened wheat bread is too well known to justify further elaboration.

When the wheat plant has completed its effort to perpetuate its kind by producing a seed, man comes along and takes away the fruit of its efforts and proceeds to divert it to uses as human food. In its raw state wheat grain is not singularly attractive, however. It is still surrounded by a coarse, fibrous husk or bran which bears much the same relation to the nutrient material within that the [illegible]. After centuries of effort, ingenious millers finally developed the roller milling process, which is fairly successful in making this separation.

SCOTS STILL LIKE THEIR PORRIDGE

GLASGOW, Scotland March 9th.—There has been no falling off from the national dish of Scotland, oatmeal porridge upon which so many braw Highlanders have been raised, judging by the latest estimate of the cereal crop in Scotland, 1935 showing an increase in production of oats over the previous year. Estimate for 1935 is [illegible] tons as against 645000 tons for 1934 according to the Agricultural Department of the Canadian National Railways. Last year there was a shortage of home-grown oats and Canadian oats were imported to make up the deficiency to the extent of 67 per cent of the total 150,766 cwt. Oats is the principal cereal crop of Scotland.

VALUE OF CANADIAN FARM LANDS

The average value of farm lands in Canada, improved and unimproved together with dwelling houses, barns and all other farm buildings is reported by the Federal Bureau of Statistics as being $24 an acre in 1935. The value of farm lands in the respective provinces together with value in previous year is given herewith:

Province	1935	1934
Prince Edward Island	$31	$34
Nova Scotia	31	27
New Brunswick	25	24
Quebec	41	34
Ontario	42	41
Manitoba	17	17
Saskatchewan	17	16
Alberta	16	16
British Columbia	58	60

DOES BEEKEEPING PAY IN THE NORTH?

(Experimental Farms Note)

Successful beekeeping in the North on commercial lines will depend on the amount of nectar available as well as on the experience of the operator. Sweet clover makes ideal bee pasture and is well adapted as a forage crop and soil improver. Cropping plans should include the sowing of a considerable-sized patch near the apiary. Fireweed when present, is a productive but irregular source of fine honey. Wintering either outdoor or in cellars, is not more difficult than in other areas where beekeeping is well established.

As a sideline on a small scale the experience of the Dominion Experimental Sub-Station at Beaverlodge, Alta, would suggest that half a dozen or more colonies would produce over a period of years sufficient returns to cover the investment and allow reasonable returns for the work involved.

The novice will profit from the experience of successful operators. It is suggested that he start with one colony or one or two packages. From these he can increase his apiary by division or purchase as he is inclined. Some advocate the destruction of the bees in autumn but the majority are inclined to carry their bees through the winter, especially if a suitable cellar is available.

Bulletins on beekeeping are available from the Publicity and Extension Branch of the Dominion Department of Agriculture, Ottawa. Those interested may receive Apiary Reminders monthly from their nearest Experimental Station.

ADVERTISING

Tell me not in mournful numbers
  Advertising doesn't pay;
For the man's "non compos mentis"
  Who would such absurd things say.
Life is real, life is earnest
  And the man who hopes to rise
To success in any calling,
  Must expect to Advertise
In this world's broad field of battle,
  In the conflict of real [illegible]
  Advertising is the [illegible]
  Of achievement in the [illegible]
Lives of rich men all remind us
  We can make our lives sublime,
And by liberal advertising,
  To the highest summit climb.

—British Printer, 1888

An explorer reports that he has discovered a bean in Southern Asia that grows at an astounding rate. The usual procedure is to place the bean in the ground and then jump clear.—Humorist

"RELIEF" RECIPIENTS ESCAPE SALES TAX

New provincial sales tax will not be charged to relief recipients and "the necessities of life will be exempted," Hon. E. C. Manning said Monday in the budget debate in the legislature.

"The tax will fall most heavily on those in a position to purchase the luxuries of life. The tax is of course, increased in proportion to the ability to pay" he said.

A wage tax such as allegedly advocated by the opposition to replace the sales tax would be imposed on those at the present time exempt under income tax regulations, Mr. Manning said in alleging inconsistencies in opposition criticism.

"The proposed sales tax will not work hardship of this nature" he said.

Provincial application of the accepted principle that social services are the responsibility of the largest possible unit lay behind imposition of the new social service tax which is to replace the suplementary revenue tax he declared.

"The nature of this year's budget was necessitated solely by conditions produced by the old financial system whose only remaining supporters in this legislature are the six members on the other side of the house. Mr. Manning said.

BAT STOPS SERVICE IN WINDSOR CHURCH

WINDSOR, March 9.— Women shrieked and Temple Baptist church was a scene of confusion for 20 minutes or more Sunday night as a bat decided to attend vespers.

Fluttering eerily about the head of Owen C. Gray of Detroit, special speaker the chiropterous mammal drew frightened cries from women members of the congregation of several hundreds, caused excited churchgoers to duck. The speaker gave up in despair.

"I guess we'll have to chase that creature out," he said. "I can't compete with such a heckler."

Men of the congregation rose and unsuccessfully pursued the bat, which fled to the balcony. Finally the congregation resorted to strategy. All lights in the church were doused, while the lamps in the corridor were turned on. The bat departed for the illuminated area.

It was followed by several men. From the corridor came sounds of scuffling swatting and grunts. After a few moments they ceased. The men gravely returned to their pews and Mr. Gray resumed.

TIGHTENING UP TRAFFIC LAWS URGED

CALGARY, March 9.—More rigid enforcements of the Vehicle and Highways Traffic Act "to protect those who wish to use the highways in a proper manner," was recommended by a coroner's jury here Saturday night at an inquest into the deaths of William Oliver Smith and Samuel Miller.

Killed Instantly

Smith, killed almost instantly when the automobile he was driving skidded and rolled almost 300 feet and landed in three feet of water in a ditch, came to his death from injuries received while driving in a reckless manner the jury decided.

Miller a passenger in the car, who died in hospital in Calgary last Thursday died as a result of shock and bronchial pneumonia, the verdict said.

Travelling Fast

It was believed the automobile was travelling at high speed when it struck a soft spot in the road and began to skid.

The jury recommended "this matter be drawn to the attention of the Attorney-General of Alberta (Hon. John W. Hugill) with a view that the Vehicle and Highways Traffic Act be more rigidly enforced to prevent such accidents."

NEWFOUNDLAND'S FAMOUS "WOODEN WALLS" OFF TO ANNUAL SEAL SLAUGHTER

ST. JOHNS, Nfld. March 9.—The "Wooden Walls" of Newfoundland sailed off to the ice floes Saturday for their annual slaughter of the seals off Labrador.

Traditional revelry marked their departure amid the screaming sirens, cries of "bloody decks to ye, byes and prayers for Godspeed pass through the narrows at the mouth of this bottle-necked harbor.

The scarred Beothic once carried the flag of the fleet's 80-year-old commodore, Captain Abram Kean the only man who has brought home 1,000,000 seals in his lifetime and the veteran of veterans among the 1600 men going north this year.

For the second year in succession the old Ranger, carrying 180 men left several days earlier than the fleet to try her luck on the Gulf of St. Lawrence shores. Sailed by Captain R. Babcock she is the only sailing sealer in Newfoundland. Others are steam-propelled.

"All the ships expected to be within striking distance of the pack before the season opens, March 13. With the coast unusually free of ice this year they anticipate rapid progress northward.

WAR AND THE CANADIAN WEST—

THE DAILY papers for the past few days have featured headline stories regarding the immediate prospect of an European war breaking out. Hitler's determination to again have the territory along the Rhine occupied by German soldiers, together with the quick response by France pouring in soldiers on her side of the famous river, have as one dispatch stated made the Ethiopean affair insignificant in comparison. The vast sums of money being spent on the naval, military and air services by Great Britain also cause one to wonder how long the simmering pot of international Europe can be prevented from boiling over.

It is quite safe to say that no person knows, even those diplomats of the different governments who are directly in touch with the different centres of Europe. All any individual or group of individuals can do is to express an opinion which though honestly enough given, is most likely to be little better than a guess. The opinion of the Mercury is that there is no immediate danger of an European war. Britain does not want it; France does not want it; and considering the tremendous risks involved it is doubtful if Germany wants it. Germany wants recognition, power, prestige, room for expansion and in no small measure escape from the penalties of the great war, but it is very doubtful if at this time Germany desires conflict.

All through the ages, times of war have been times of prosperity for the agriculturist. But almost invariably this prosperity has been of a very temporary nature. The war of 1914-18 is still fresh in our memories, the upward soaring of prices with, as the years passed, the inevitable reaction and downward trend. The depression may be a thing of the past now, but it is still close enough for us to remember the economic ravages it caused, and to a very great extent these were as truly "war casualties" as were the myriad casualties, physical and economic of the war itself. There is of course no comparison between the physical and economic casualties of the great war. The loss of life, limb and loved ones have nothing in common with the loss of money, but the truth of the matter is that the two go hand in hand, and are the inevitable offspring of the war god.

If ever the nations of Europe stand to gain by war, certainly those nations on the American continent stand to lose. The people of the United States are rapidly becoming anti-war minded and it would be good business for the people of Canada to give heed to this tendency. It is not the view of the conscientious objector; it is not the view of the pacifist; it is not even the view of the grief torn mothers, as potent as this is, which we present; it is the view of cold common sense. It is the view of profit and loss, if you like, but profit and loss concerned with other things than mere money. It is profit and loss as applied to happiness, contentment, neighborliness, freedom, tolerance and goodwill between all peoples. The war god destroys these things, nay, worse, breeds their opposites. War with so many men killed, so many men wounded, almost finds its parallel in every day life—the highways of the world are contiually taking their toll of human life. But here there is no hate engendered, grudges nursed and plans of revenge thought out. Instead there is unanimous desire and effort to reduce risks and casualties and to make the roads safe for drivers.

So you see it is not only a question of loss of life—lives are being lost and gained all through time, but it is a question whether the world is to go forward or backward. War is an obstruction to the progress of mankind, and if another major war comes it is safe to say that for this country, no matter what the temporary effect may be, the ultimate effect will be one of loss.

FADS AND FANCIES OF SPRING—

STRANGELY ENOUGH up to the present there has been no outstanding craze this spring. For several years past some brand new brain wave hit the country hard enough to make it sit up and take notice. We have had Tom Thumb golf, Yo-Yo, chain letters, and having run through all three of them, somebody surely will rise to the occasion and furnish the country with a brand new spring diversion.

To the younger generation no original brain wave is necessary. The good old game of marbles, a combination of luck and skill, emerges each spring with its lustre undimmed. Marbles for boys, combined with "hop-scotch" for girls can be termed the orthodox juvenile spring games, which somehow or other persist through the years. This is rather strange too, because as we remember marbles, it was a game in which one player lost and the other won marbles. It hardly seems possible that by this time somebody has not designed a spring game where all are winners and there are no losers.

A Texan has combined 10 garden tools in one, but it still isn't perfect as long as you have to go out and operate it.—Jackson Daily News.

QUICK WORK FOR A SNAKE BITE

Preparedness for snake bites is one of the precepts of South African Boy Scouts. So when Scout Brian Pringle, of Durban running along the river bank at Klipdrift was bitten twice in the leg by a poisonous snake, his Scout chum knew what to do. A lace from his shoe made a quick tourniquet, he sucked the poison from the wounds and with assistance from the nearest homestead, Pringle was hurried to a hospital.

MAY RESUME BRITISH SCOUT MIGRATION SCHEME

Prior to the discontinuance of emigration, following the advent of the business depressin upwards of 4000 English Boy Scouts had migrated to the colonies, chiefly Canada and Australia. Many of these went out through the Migration Department at Imperial Headquarters of the Boy Scouts Association after undergoing some preliminary training in agricultural pursuits. A number of those coming to Canada distinguished themselves by winning scholarships at different provincial agricultural schools. In response to many inquiries tentative plans are being made for a resumption of this Scout migraton, especially to Australia.

"ARE YOU REALLY THE NEW KING?" LITTLE TOT ASKS

GLASGO, March 6.—His Majesty the King climaxed a visit to the new liner Queen Mary, Thursday with a tour of an overcrowded slum district during which he was asked by a five-year-old boy, "Are you really the new King?"

His Majesty patting the little questioner on the head, replied "Yes little man, I am."

The King visited six flats and inquired especially as to the question of overcrowding. He knocked on the door of each and asked, "May I come in?"

One tenant told the King she and six other adults and one child occupied two rooms.

PACKING PLANT TO COST $1,000,000 TO BE BUILT IN EDMONTON IN SPRING

Expenditure of $1000000 to erect a full-equipped packing plant in North Edmonton and give permanent employment to between 250 and 300 persons as soon as the plant is completed has been ordered by Canada Packers Ltd. according to a joint announcement issued on Friday by the city commissioners and Percy W. Abbot, K.C. representative of the company.

The contract for the job has been awarded to the Bird Construction company of Moose Jaw and work will get under way as soon as weather and ground conditions permit—presumably some time next month.

The city will spend about $25,000 to divert Rat Creek gravel roads in the vicinity of the plant and extend utilities. The city also will give the company a fixed assessment for five years beginning January 1, 1937 of 25 per cent of the actual value of the improvements.

The plant will be interested in foreign trade rather than domestic business and ultimately when in full operation 400 persons will be employed it was stated.

No information as to the amount of the actual contract was available here but Mr. Abbott said that the total expenditure, including machinery reach $1,000000.

The contract specifies that Edmonton men shall be employed on the construction with the exception of a few key men to be named by the company.

A great amount of labor will be afforded although Mr. Abbott was unable to estimate the size of the building crew that will be taken on.

"Sufficient men will be employed in order to complete the building in the speediest possible time. It is expected that the plant will be in operation by fall," Mr. Abbott said.

The plant will be located in Dwyer subdivision on the Fort Trail, south of the subway. It is bounded on the west by 79 st. the approximate location between Swift Canadian and the Burns and company plants.

This is the enterprise that was planned for last year but deferred for various reasons. It will be undertaken this year on an even greater scale than was originally planned, the principals have revealed.

The city commission board expressed pleasure over the development.

In an official statement the board stated: "The new undertaking will afford opportunity for a large number of Edmonton unemployed and with the establishment of a new packing plant [illegible] the commissioners lost no time in entering into negotiation with the company relative to extension of utility services—the grading and gravelling of certain adjacent streets as well as furnishing the required site for the new industry at a reasonably low price. It was also arranged that the provisions of the charter as regarding a modified assessment on the building for a limited term of years, should be given as a further inducement to the company to locate in Edmonton thus bring an increased payroll and providing much needed employment for those meantime out of work.

"Under the circumstances it is felt that the establishment of another packing plant by an outstanding concern here will of itself enhance the interests of the livestock producers of the district and act as a stimulus to improved business conditions generally."

SAYS CAPITAL IS CLAMORING ENTER ALBERTA

Capital is clamoring for an opportunity to invest money in Alberta, the only province which is in that category, declared Hon. W. A. Fallow minister of public works, railways and telephones when continuing the budget debate in the legislature Friday.

The minister, first member of the treasury benches to enter formal debate on the budget since it was introduced in the house, denied the charges made by opposition speakers that there had been a flight of capital from Alberta since the Social Credit-ers assumed the reins of government.

"I want to say Mr. Speaker that in the few short months in which it has been my privilege and pleasure to serve the interests of the people of this province that I have been offered, seriously for immediate investment in Alberta, more money than there is in the whole dominion," said Mr. Fallow.

Mr. Fallow added that his colleague Hon. C. C. Ross, minister of lands and mines also had been offered for immediate investment in Alberta more money than there was in the dominion.

"The investors of capital have no hesitation in assuring us that they feel quite satisfied that the Social Credit government of Alberta is determined to give the people of this province honest and efficient government and to develop the potential wealth of the province in the interests of the people of Alberta and not in the interests of the financial racket," said the minister.

Dealing with the demands of D. M. Duggan, Conservative leader for government curtailment of expenditures the minister suggested that what the leader proposed was to take more money from the widow and orphan, from the sick and infirm and from the aged and feeble.

"In other words his only remedy is to take money away from the defenceless and the down-and-out," said the minister.

"That is the only way any Conservative government ever suggested the means by which they would balance their budget. To the end that capital may not go unrewarded and Shylock may have his pound of flesh I am proud, Mr. Speaker to stand in my place and on behalf of this government, proclaim to the world that this government will never try and balance the budget by such inhuman methods," said Mr. Fallow.

ALLEGED SPY DARE NOT ANSWER QUERY; FEARS HIGH TREASON CHARGE IN GERMANY

LONDON, March 6—Dr. Hermann Goertz charged with supplying a sketch of a British air field to the German secret service, testified Friday he "dare not answer" questions concerning Nazi "higher-ups" because I'd be tried for high treason in Germany.

His declaration which caused a sensation in the crowded courtroom, followed a strenuous denial he "had any idea of supplying that sketch to anybody in Germany." Goertz admitted making a sketch of the Manston airdrome but insisted it was material for a novel.

Under a barrage of questions, he admitted having seen a man named "Colonel Dressler" and other apparently important Nazi officials. Pressed for further details of the identity of the officials, Goertz glanced nervously around the courtroom and answered:

"Excuse me, I am in a very difficult position."

"You mean it might be dangerous for you to say just exactly what he is?" the judge asked in reference to "Colonel Dressler."

"Yes" answered the witness. "I would not try to defend myself here if I thought I'd be tried for high treason in Germany. I cannot dare to answer. It is impossible for me."

The prosecution did not press the question.

Goertz was still on the stand, his blandness shaken when the court adjourned Monday.

"BIGGEST" OIL RUSH SEEN FOR ALBERTA

One of the biggest rushes in connection with oil and gas development in this province is looming in the opinion of officials of the provincial lands and mines department. Since January 1, some 310 applications for oil leases have been filed at Calgary and Lethbridge branch offices. These cover thousands of acres of potential oil lands.

The area covered by the applications is outside of the 150,000 acres of government-owned land thrown open for development under new departmental regulations brought into effect some months ago.

CROW SEEN IN EDMONTON; MAY BE SIGN SPRING IS HERE

Sighting the first crow of the year is claimed by Harold Wheeler of 9665 86A ave. However, with the efforts of Professor William Rowan of the University of Alberta, to deceive crows as to seasons this may or may not be an indication that spring is approaching.

LEAGUE SEES GRAVE WORLD CRISIS LOOMS

GENEVA, March 7.—League of Nations circles declared Saturday that Adolph Hitler's denunciation of the Locarno treaty has precipitated a grave political crisis which makes the Italo-Ethiopian war insignificant in comparison.

League officials predicted an early extraordinary session of the council—possibly together with the assembly—in a great world peace conference called in an attempt to draft a substitute for the Versailles as well as the Locarno treaties.

Officials do not consider the situation as hopeless although they would not conceal their opinion that re-occupation of the demilitarized Rhineland causes a crisis which will require the calmest attitude particularly on the part of France and the Little Entente combination of Czechoslovakia, Yugoslavia and Rumania.

League circles declared themselves interested in Hitler's announcement that German will return to the League fold when the proposed new security system has been achieved. Negotiations for such a system, officials said will be long and delicate.

Some circles forecasted a French appeal to the council against the re-occupation of the Rhine zone.

BABY TRAVELS ACROSS OCEAN TO NEW HOME

VANCOUVER, March 7.—Six thousand miles of travel part of which included a solo jump across the Atlantic on the liner Andania, left only smiles on the chubby face of one-year-old David Ian Bland, who arrived in Vancouver over Canadian National Railways this morning to find a new home in Canada.

Grandson of Sir Arnold Rushton, onetime Lord Mayor of Liverpool, England David has been adopted by his uncle and aunt Mr. and Mrs. Gerald Rushton of Vancouver. He crossed the ocean unaccompanied and was a popular passenger. At Halifax he was met by his new mother with whom he made friends immediately.

Over in England they are trying to find the inventor of the collar button. Over here the button is more often the object of search.—Detroit Free Press.

ALONE FOR SEVEN DAYS MAN'S LIFE HUNG IN BALANCE

WILLIAMS LAKE, B.C. March 7.—From his hospital cot here Dan Crawley Friday told his story of feet and legs frozen up to his knees and the crude "jack-knife" surgery with which he attempted to save his life as he waited for help alone in his trapper's cabin in the wilderness 45 miles from Blue River, B.C.

Crawley's partner Ted Vachon, trekked the 45 miles to Blue River to seek aid and Pilot R. L. "Ginger" Coote flew Thursday to the lonely cabin in the North Thompson River Valley Region. Coote brought Crawley to the hospital here and physicians say he will recover.

Crawley was alone for seven days, however and during that time his life hung in the balance. Gangrene set in and with his jack-knife he cut away parth of both feet to prevent its spread.

"I was out on my trapline when I discovered my feet were frozen," Crawley said. "It was Feb. 5. By the time I reached the cabin my legs were frozen up to my knees.

"Ted Vachon and I tried to thaw my legs but in spite of everything we could do gangrene set in.

"Then Ted set out for Blue River. It took him six days to negotiate the 45 miles. During his absence I was fireman, cook, nurse and doctor and general housekeeper and did not know what was going to happen.

"You can imagine my joy when I heard the whirr of a plane landing. Then 'Ginger Coote' his mechanic, Jack Churchyard and Ted came to the cabin and packed me down to the plane.

The flight to Williams Lake was accomplished without difficulty.

"I am pretty sure I will have to part with the toes of the right foot and the heel of the left, however. I had to cut pieces from them with my jack knife to save my life before help [illegible]

COUPLE WITH $11,780 IN BANK SENTENCED AS RELIEF CHISELERS

PITTSBURGH, March 4.—A Pittsburgh father and mother today face three years in jail—because it is charged they "chiseled" $700 from the Allegheny Emergency Relief Board while they hoarded $11,780 in the bank.

"You chiseled every last dime you could," declared Judge Ralph H. Smith before passing the maximum three-year sentence against Mr. and Mrs. Thomas O'Toole in addition to a $500 fine each in order for restitution of the relief funds.

In their own defence the O'Tooles who have four children and own a $4000 home in the Oakland district said he applied for relief only in order to get work.

Mrs. O'Toole before her marriage had earned and saved much while a domestic in a wealthy household according to relatives. The husband was a motorman for the Pittsburgh Railways Company. They were thrifty did not own an automobile and seldom went to the theatre, relatives [illegible].

But Mr. O'Toole lost his job during the depression and in November 1932 applied for relief.

"At first we did not apply for relief," he testified "but when we found the only way to get a job was to get on relief we decided that was the best thing to do."

J. JOHNSON PASSES AWAY

Pioneer hotelman of the Edmonton district and member of the Northern Alberta Pioneers' and Old Timers' association James Johnson, 83 of Tofield died in Edmonton late Thursday.

Deceased went to the Edmonton district in [illegible] first homesteading in Tofield. Four years later he started in the hotel business by operating the old Queen's hotel in Wetaskiwin. In 1902 he built the Arlington hotel in Millet. His first residence in Edmonton in 1907 when he worked as surveyor and later on as auctioneer. He started other business ventures in Clover Bar and [illegible] finally retiring to his farm in Tofield in 1931.

Mr. Johnson was born in Dalsland, Sweden in May 1853. Besides his widow he leaves one daughter, Mrs. Joseph Driscoll of Edmonton and one sister Mrs. F. Jens Schmidt of Consul, Saskatchewan.

The funeral was held at 2:00 p.m. on Monday from the Howard and McBride chapel, with Rev. H. Mcleod officiating. Interment will be in the Edmonton cemetery.

CANADIANS AND THEIR INDUSTRIES—AND THEIR BANK

• FISHERIES •

JIM: "Bill, do you ever get tired of handling fish, fish, fish, all the time?"

BILL: "Yes, Jim, but it helps me to keep goin' when I think of the thousands of folks we're helpin' to feed."

JIM: "That's right—fish is important and we're in a fine big business."

BILL: "Wasn't always big, though. The Chief was tellin' me the other day about how this company started. It seems funny now. He and his partner figured they would do a whole lot better if they could keep their fish fresh for all-year sales. They went to the Bank of Montreal and [illegible] on their personal securities to build a [illegible] plant. Of course, they soon paid back the loan, because a lot of folks saw what a good thing this business was goin' to be and bought [illegible] in the company. Now look at the business!

But the Chief admitted to me, confidentially, of course, that if it hadn't been for the Bank of Montreal, they couldn't have succeeded and he said it was the same way with a lot of the other fishery concerns."

JIM: "A good story, Bill, and I know it's true, because the Chief told me, too. I reckon he tells 'most everybody, because he likes to talk about his Bank. It's my Bank, too. I have a savings account there."

BILL: "Have you, Jim? So have I."

LOST—On Thursday, February 27th, a leather coat with fur collar. Between Tofield and Shonts. Finder please leave at Mercury Office. Suitable reward.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name. Stubbornly refuse anything else.

FORMER ADMIRAL OF FLEET, EARL BEATTY, DIES IN LONDON

London, March 11.—Earl Beatty, 65, former admiral of the fleet, died late Tuesday night. He had been ill for several weeks.

Death came to the war-time naval hero at the London Home for the Aged where he had been under treatment. His son, Viscount Borodale, and a doctor and nurse were at the bedside.

Beatty's condition became serious after he attended the funeral of King George.

The admiral predicted his death last November after he had left a sick bed to attend the funeral of Earl Jellicoe.

"So Jellicoe is gone," he said then. I feel I'll be the next to be summoned. I don't think the call will be long. I'm tired, very tired."

Among those who attended Earl Beatty during his last illness were Lord Horder, physician to the King, and Sir Maurice Cassidy, the heart specialist who was called in during the fatal illness of King George last January.

Beatty was one of the few remaining Great War leaders still alive in Great Britain.

His death within four months of that of Admiral Jellicoe removed the two outstanding figures in the navy during the war. Jellicoe was in command of the grand fleet in the North Sea from the time the war broke out until the end of 1916. Then he was succeeded by Admiral Beatty.

Beatty was placed on the retired list as an admiral of the fleet on Jan. 17 last, when he reached the age limit of 65.

FOR SALE —GRAIN CLEANER Combination Mill, will separate wild and tame oats from wheat or barley, also wild from tame oats to your entire satisfaction. Bring in some grain and we will show you. M. C. Hammond, Tofield.

FOR SALE OR TRADE—Seventeen pure bred Barred Rock pullets, now laying. Apply in first instance to Mercury Office, Tofield.

HAS HAND HURT BY SAW

While sawing wood at a farm north of Tofield on Wednesday afternoon, Irvin Phillips met with a painful accident when in some manner or other his hand ran foul of the saw. One finger was almost severed and others badly cut. He was brought into town where Dr. Law gave him medical attention.

LEAP FROM WINDOW FOUR ESCAPE FIRE

Mrs. Floyd McLachlan and two boys, 10 and 7 jumped from a second floor window and the older boy caught a few-months-old child tossed into his arms when fire gutted the store and home of the McLachlans, of Rose Creek.

No persons were injured in the blaze.

Mrs. McLachlan, walking downstairs with a lighted lamp stumbled and the lamp crashed to the bottom of the stairs setting fire to the building. The blaze cut off the exit via the stairs.

The boys, children of a Mrs. Victory were on the second floor and they jumped from a window. Mrs. McLachlan then tossed her own baby to the older child, then jumped herself.

Mrs. McLachlan didn't have time to get $300 in cash concealed in a mattress.

Hockey Team Given Banquet at Close of Season

On Thursday evening last, a number of the girls gave a banquet in honor of the Tofield senior hockey club. There were between forty and fifty young people seated at the tables, and everyone enjoyed themselves greatly. The tables looked very pretty, being done in blue and white, the hockey boys colors. Miss Muriel Malcolm said grace after which the crowd partook of all the good things on the tables. After the supper, Miss Rose, the chairman, called on Bill Werton, manager of the hockey team, for a few words. Bill thanked all those who helped to provide such a lovely banquet and all past favors. He expressed the desire and hope, that next year the Gas Line League cup will be in Tofield. Les Glover, the captain of the team was then called upon, who also thanked all those who had helped the team during the year. Bud Hannan, who acted as referee for the boys also said a few words. A good number of the boys including the secretary treasurer, Charlie Edwards, gave short speeches. Charlie said being treasurer was no fun, for as soon as you got some money, somebody was always ready to take it. A short sing song was then had, after which Donald, Dennis and Eric Edwards and Mr. Matchman rendered a quartet. The boys made up the song they sang, the words appearing below:

Miss Jean McLeod gave a reading and Donald Edwards sang "The Days of the Forty-nine". Tables and dishes were then cleared away and dancing was taken up until midnight. The music being supplied by the Tofield Rangers.

The girls wish to thank all those who so kindly helped in any way to make this banquet such a success.

Oh, we've got a town that's progressive,
It's known for its sport near and far,
For especially the boys who play hockey,
We should praise them each one as a star.

SHOWER HELD FOR THELMA JOBB

On Wednesday evening of this week Mrs. Clutterham entertained the [illegible] and other friends in honor of Thelma Jobb, bride of next month. Bridge was played and honors were won by M. Stuart and R. Wingrove. After bridge Thelma was given a string to follow which led her to a basket of many lovely gifts. Many good wishes were also extended to Thelma for her future happiness. Mrs. Coutts won the "bean" contest, also receiving a nice prize. A delicious lunch was served by the hostess.

COUNCIL MEETING

A regular meeting of the Town Council was held on Monday evening, March 16th, present were Mayor Bruce, Councillors Coutts, Bellamy, Hammond, Swift and Lovell.

Tax rates were set for the year in a by-law which was given two readings. Rates will be the same as last year on both property and business tax assessments, that is a total of 60 mills for municipal and school purposes. The new social service tax which is to replace the supplementary revenue tax will probably require a levy in Tofield of one mill on land assessments only.

The town passed a resolution, to be forwarded to the Utilities Board in which it is stated that the council considers that any new arrangements for payments of debenture principal and interest should not exceed the sum of four thousand dollars in any one year.

A resolution was also passed opposing the action of distributors of talking picture films in declining to supply travelling showmen, such as have been coming to Tofield for a number of years, with their films. This has been forwarded to the Provincial Secretary and the local M.L.A. Dr. J. L. McPherson.

A statement of receipts and expenditures for the month of February was read and ordered to be incorporated in the minutes of the meeting. A number of accounts were ordered paid and a large quantity of routine business dealt with.

Allotment of various town pastures and the rents to be paid for each was made. It was decided to rent the pasture rights on the fair grounds, subject to the use of the grounds for sports etc.

LAKESHORE

We regret to have to report that the T. R. Murray family have been victims of the flu which seems to be prevalent in the district just now.

A most enjoyable dance was held at the Herman Tiedeman home last Friday.

Lynn Phillips and Miss Winnie Stoddart were Sunday visitors at the Owen Eaton home.

Also and alack! "Pride goeth before a fall" "He who laughs last laughs best" or what have you. Mrs. Graham and Mrs. Phillips are two thoroughly chastened women and Mrs. Johnson and Mrs. Wood did the chastening on Tuesday at the home of Mrs. Phillips. However, "Truth crushed to earth shall rise again" and "necessity is the mother of invention" etc. etc., so maybe next time ....

Miss Bessie Walker has also been a sufferer from the flu, but is convalescing at present.

Mrs. T. E. Seale, Mrs. W. E. Seale and Mrs. T. D. Ferguson called on Mrs. McConnell on Wednesday. Unfortunately Mrs. McConnell was absent so they visited Mrs. Wood instead.

CORRECTION

In our report of the accident to Ivan Phillips which appeared in last week's Mercury, it was stated, that in some manner or other, Ivan's hand came in contact with the saw. This is not correct as the saw was not running the time the accident happened. Ivan's injury was caused by the pulley on the engine breaking a flying piece hitting his finger causing injury to and amputatin of one finger. The engine was idling at the time, the belt running the saw not being on, when someone touched the gas control causing the engine to race; the pulley broke with the above mentioned unfortunate result. Ivan does not want people to believe that he cannot saw wood without keeping his hand clear of the saw. [illegible] this [illegible] correction. Here's hoping for a speedy healing Ivan.

A headline reads: "Dog bites Woman in Dressmaker's Shop." Evidently he wanted mmlin.

MUNICIPAL DISTRICT OF CORNHILL NO 487

Tenders Wanted for Road Maintenance

Sealed tenders will be received at the District's office, Tofield, up to midnight, Thursday, April 2nd, 1936, for the maintaining of road commencing from the N. E. corner of the N.E. quarter of Sec. 36-52-19, W4M, through Tofield south through Kingman and on to boundary of Cornhill Municipal District, total mileage [illegible].

Municipal district will supply large Adams Maintainer, tenderer to supply tractor, fuel and labor.

A retainer of $50.00 will be held from the cheque as a guarantee of completion of work.

Lowest or any tender not necessarily accepted.

J. O. A. LETOURNEAU,
Secretary-Treasurer.
Box No. 128, Tofield, Alta.

TENDERS WANTED

Tenders for School House, Amisk Creek S. D. No. 799. Sealed tenders will be received by the Board of Trustees of the above school district at the office of the Secretary-Treasurer up to noon April 15th, 1936 for the erection of a one roomed Frame with Stucco school building after Plan No. C.E.-8. Plans and specifications may be obtained from Secretary-Treasurer on payment of a deposit of $5.00. Plans must be returned within 48 hours and deposit will then be refunded. A marked cheque for five per cent. of the amount of tender must be enclosed with each tender as a guarantee that same is bona fide. No tender will be considered without this cheque attached. The lowest or any tender will not necessarily be accepted.

Separate tender for Stucco and Plaster.

MRS. E. A. MOEN,
Secretary-Treasurer, R. R. 3, Tofield.
Amisk Creek S.D., No. 799. Nearest station, Shonts; miles distance 1½

KETCHAMOOT

The first signs of spring has arrived, gophers were seen Sunday, the pussy willows are coming out and the snow is going fast.

Mr. and Mrs. Harrison and family were Sunday dinner guests of Mrs. Henderson and son Jason.

Miss Astrid Moline, R.N. who was visiting at the home of her aunt, Mrs. Ingram was called to Ryley on a sick case.

Mr. Sam Stirrett spent a few days in Edmonton last week, being under the doctors care.

Mrs. William Ingram visited at the McMullen home on Tuesday.

Mr. and Mrs. Jim Johnson are having a sale on Thursday this week. We understand they are going to the coast to live.

Miss Selma Nomeland visited a few days last week with her friend Mrs. Oliver Thompson of Kingman.

Mrs. Joe Sutton entertained the Social hour club at her home Thursday of last week. Six members and six visitors were present. A pleasant afternoon was spent.

Mr. Joe Sutton was making the round last week sawing wood and chopping grain.

Mrs. G. R. Owen went to Edmonton Saturday to stay at the home of her daughter Mrs. Croney in the absence of Mr. and Mrs. Croney who are away on a trip to Seattle, Wash.

Mr. and Mrs. Sears and sons, Stanley and Charley were guests of the Nomeland family Friday evening.

Mrs. L. Carlisle visited Mrs. Stanley George at her home Thursday and Friday of last week.

Mr. and Mrs. Albert Sutton and family were guests of Mr. and Mrs. Chas. Whilliams Monday evening.

Mrs. M. McConnell is visiting her friend Mrs. J. Appleby.

AMISK CREEK

The ratepayers and trustees held a meeting to discuss the possibility of building a new school. Inspector Robertson was present at the meeting. They decided that a new school would be built as soon as the frost is out of the ground.

The Ladies' Aid held their monthly meeting on March 3rd, at Mrs. A. Patterson's home. Nearly all the members were present and also many visitors. Mrs. A. Patterson was elected president for the coming year.

Mrs. R. O. Berg spent a few days in Edmonton visiting her daughters Lilly and Ruby and her brother, N. Sand and family.

The measles kept the children from school for a couple of weeks, but we are glad to report that they are all well now and back to school again.

Hazel and Merl Hillerud, Hilmar Moen and Erling Sand were visitors to the city. While there they attended the Ski Tournament and the Aberhart meeting.

A shower was held last Saturday afternoon at the E. A. Moen home in honor of Miss Ida Anome, whose marriage will take place shortly. Over fifty guests were present and the bride elect received many nice and useful gifts, also many good wishes for the future. A delicious lunch was served by the hostess.

Mr. and Mrs. P. O. Flaaten entertained the young people at a social last Saturday evening. Between thirty and forty guests were present. Games were played the first part of the evening and at midnight lunch was served. After lunch a short program was put on. The guests all departed for their homes reporting a good time.

Mr. and Mrs. C. Erickson attended the funeral of the late Mr. Christenson of Holden. Mr. Christenson was Mrs. Erickson's great uncle.

Miss Astrid Moline has been nursing at the Jacobson home, north of Ryley. Mrs. Jacobson has been very ill with pneumonia, but the last report was that she was improving.

The Wollen brothers, Chris and Lars from Viking were visitors at the Berg and Flaaten homes one day last week.

Mrs. G. Songstraw, nee Lena Anderson, and young son have been visitors at the E. A. Moen home for

LOCAL AND PERSONAL

Mrs. M. S. Bristle of Holden visited at the Thomas home last week.

Miss Ruth Pauls of Edmonton is visiting Lois Thompson for a few days this week.

Mrs. Hammond visited the city on Monday.

Mr. Graham Allan is spending a few days visiting friends at Wetaskiwin.

Mr. McSporran spent a few days in Tofield last week.

Mr. Burroughs of the Crown Lumber Company staff here received word that he was transferred to Consort. He expects to leave Friday. Mr. Birk will take Mr. Burroughs place here as manager.

Mr. and Mrs. Rev. Wallis are attending the Anglican convention in Edmonton this week.

Mrs. Bill Chapman entertained a number of friends on St. Patrick's day.

Mrs. Bert Calvert visited the city this week.

Miss Selma Nomeland, Julius Larbekke, Doc Simpson and Toby Nomeland visited the city on the 17th.

Miss Florence Kendall was a visitor to the city last week.

The C.W.L. held a very enjoyable oyster supper on St. Patrick's evening. Bingo was played after supper.

Mr. Bert Swift of Falls has gone East to visit his parents for a short time.

On Monday evening a number of young people chivareed Mr. and Mrs. Harold Greene.

Miss Gwen Firth returned home on Tuesday evening after spending a six week's holiday visiting in California and Vancouver.

Mr. A. P. Moen, Mr. E. McClyment and Mr. J. Ferguson are serving on the jury this week.

MANY WILL JOURNEY TO VIMY

VANCOUVER, B.C., March 16.—To facilitate the transportation of the hundreds of pilgrims who will journey to Vimy next July and witness the unveiling of Canada's war memorial on the battlefields, the steamship companies concerned are requesting definite information on the number of advance bookings early in May, according to the officers of the Canadian National Railways.

More than 3,000 war veterans and their dependents have made deposits on their passage already. Nearly 350 of these are from British Columbia. Such a mass movement requires considerable advance planning on the part of the transportation agencies [illegible].

Canadian National Railways is planning a special train service to the Port of Montreal where the sailings take place July 15 and 16. Special cars have been set aside for Vimy pilgrims from the Pacific Coast and these are expected to be consolidated into a "Vimy Special" as more pilgrims join the movement eastbound.

POLICEMAN WINS LONG FOOT-RACE

ATHABASKA, March 16.—Policeman and fugitive went round and round here Saturday when Constable McKay, R.C.M.P. and Joseph Miller staged a merry race in and out of an auction crowd, changed their route to the straightaway of a road and ran it out for a mile until the officer caught up.

Three jugs of moonshine allegedly handicapped Miller in the race, much of it through mud and water. The auction crowd watched the finish from a distance, and then went back to their bartering.

a few days.

Miss Doris Glasinger, our teacher, spent Saturday and Sunday at her parent's home east of Dodds.

Mr. J. Annoho visited the city on Wednesday of last week.

Mr. and Mrs. E. A. Moen and Mrs. G. Songstraw and small boy motored to Edmonton on Sunday.

Mr. A. Moen from Bardo visited at the P. O. Flaaten home Sunday and Monday. He made the trip on his skis.

'FLU' EPIDEMIC SWEEPING EDMONTON, 5 DEATHS OCCUR

With five deaths this month closely resembling those of the 1918 'flu epidemic, Edmonton is in the grip of an epidemic of influenza, pneumonia and various communicable diseases. All hospitals are full to near capacity, the isolation hospital is being forced to accomodate more than normal capacity, and hundreds of citizens of all ages are confined to their homes by an abnormal onslaught of disease.

More than 700 cases of communicable disease, apart from influenza and pneumonia, have been reported in the past five weeks and cases of rubella alone have passed the 400 mark Thursday.

Dr. R. B. Jenkins, city medical health officer, told the Journal that he personally had investigated two of the five deaths mentioned this month and found they were practically identical in every respect to the fatalities of the 1918 'flu epidemic. He issued a warning to parents and others to exercise extreme caution in treating cases of influenza.

"Persons suffering from influenza should stay at home and in bed. This is very important both for their own sakes and for the protection of the public," Dr. Jenkins said.

The five deaths listed in the vital statistics branch as being due to "influenza-pneumonia" are apart from those deaths caused by ordinary pneumonia.

Dr. Jenkins said there seemed to be some indication of abatement Thursday, and it was hoped that more temperate weather would be accompanied by a letup in the high prevalency of sickness.

AMBULANCE COT IS SUPERFLUOUS FOR THIS CHILD

REGINA, March 19.—Phoebe June Lennox, aged six, brought by aeroplane from Ormiston for an emergency appendectomy refused to allow attendants to put her on a cot in the waiting ambulance here.

"Oh, thanks, I'll get out myself," she said, clambering out of the aeroplane cabin. She refused to lie down on the ambulance cot and insisted on riding to the hospital with the driver on the front seat.

OTTAWA TO AID IN SETTLEMENT OF FARM LANDS

OTTAWA, March 19.—Keen interest was shown Thursday in the government's intention of renewing and broadening the Relief act which expires March 31 and providing among other things for rehabilitation and agricultural settlement as well as unemployment relief.

Notice of the step is contained in a resolution appearing on the commons order paper in the name of Labor Minister Rogers.

The next act will call for payments out of consolidated revenue fund to assist in settlement on the land, with development of natural and other resources.

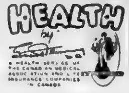
E. W. ROGERS



A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

CARE OF THE MOUTH

The teeth are part of the body and as such they reflect, to some extent, the health of the body as a whole. Particularly are they affected by the condition of other parts of the mouth, namely the gums and jaw bones. Healthy teeth will not be found set in diseased bones or surrounded by gums that are full of pus.

As is the case with other parts of the body, proper use of the teeth improves the health of the mouth. The act of chewing, particularly of the coarser foods, cleans the teeth and massages the gums. There are however sheltered points which are not kept clean by mastication and which may easily escape the toothbrush.

Such points become covered with a [illegible] material from the [illegible] which particles of food stick. The sugars and starches in the food are broken down by bacteria which are always present in the mouth and lactic acid is formed. The acid if allowed to collect eats into the tooth structure and dental decay occurs.

Despite the claims advanced for certain products the mouth cannot be sterilized—bacteria cannot be eliminated from the mouth. The mouthwash cannot replace the toothbrush as a cleansing agent any more than perfume can take place of soap and water.

Sugars and starches cannot, nor should they, be eliminated from the diet. There is much to be said, however, in favor of raw fruit rather than a sweet to finish the meal. In all cases we have to rely upon the proper use of the toothbrush to reach those points where food collects between rather than on the exposed surfaces of the teeth.

The dentifrice, such as precipitated chalk, is used to aid in the mechanical cleansing of the teeth without causing damage to the enamel at the same time. Alkaline dentifrices cannot keep the whole mouth alkaline. It is not the general acidity of the mouth which leads to decay but the acid which is concentrated at one point.

The value of any dentifrice depends upon the efficiency of the toothbrush which applies it. The mouth-wash is a rinsing solution, not a therapeutic [illegible] or antiseptic treatment. A [illegible] of salt in a pint of water [illegible] added a pinch of baking [illegible] a good mouth-wash.

The mouth should be kept clean as a preventive measure and by periodic [illegible] the family dentist a [illegible] should be maintained [illegible] health of the mouth.

[illegible] health [illegible] Canadian Medical As[illegible] 184 College St., Toronto [illegible] personally by letter.

LOST—On Thursday, February 27th, a leather coat with fur collar. Between Tofield and Shorts. Finder please leave at Mercury Office. Suitable reward.

HOPE TO SAVE $7,000 PER DAY IN INTEREST BY PERCENTAGE SLASH

Legislation to call in all present issues of Alberta bonds and to replace them by new issues waiving interest of 2 75 [illegible] per cent will be introduced within the next 10 days in the Alberta legislature it was announced Monday by Premier Aberhart.

By this means he said the government will bring about compulsory conversion of the $160,000,000 provincial debt and save something over $7,000 each day in interest charges.

At the same time the premier said, the government is studying possibility of invoking legislation to cut present high interest charges on mortgages for individuals. Power of the provincial government to this end is being investigated he indicated.

Simultaneously Premier Aberhart announced that the legislature session will continue throughout this week and most of next with prorogation instead of lengthy adjournment the government's defined aim now.

"We can't let this refunding proposition run along for another year," said the premier. "We have come to the point where we must cut down the province's burden of interest charges. Therefore we're going to continue with the session until we can get everything cleaned up and then we'll prorogue."

It was indicated in high quarters meanwhile that the refunding legislation has not been drafted yet but that the government's law officers are studying the proposal.

"We have waited since December for some reply by the bondholders to our suggestion that they accept reduction of interest," Mr. Aberhart said. "There has been no answer at all. So we're forced to go ahead with compulsory conversion.

"But there is absolutely no intention of repudiation of our debts. In fact, it is to prevent necessity of repudiation that we are planning the refunding system."

GERMANY REFUSES TO PLAY SECOND FIDDLE, HITLER ANNOUNCES TO CHEERING CROWD

MUNICH, March 16.—Chancellor Hitler assumes sole responsibility for Germany's foreign policy.

As 300,000 persons cheered his words, Hitler Saturday night called for a vote of confidence March 29 when Germany goes to the polls and declared:

"I asked you for your confidence when we withdrew from the League of Nations. You know why we withdrew. They did not give us the same rights as others. It is impossible for us to play second fiddle.

"Now I am asking again for your confidence. Between now and March 29 I will take the responsibility for what I have recently done."

Hitler declared one of the difficulties he faced as Reich-fuehrer was "to make clear to the rest of the world that this is a different Germany to that of former days."

"That nations," he said, "still think they can do with us what they please. I am suffering from the contempt which my predecessors brought upon Germany. We must succeed in making Germany free again."

AVERS BATTLESHIP STILL RULER OF SEA

LONDON, March 17.—The battleship remains supreme at sea, and is an essential part of the fleet, Lord Stanley told the commons Monday in introducing the naval estimates.

"Our experiments lead us to believe that though damage may be done and individual ships put out of action by bombs from the air and below the surface battleships will not be made impotent by air attack and will remain supreme at sea," Lord Stanley said.

Under attacks by anti-aircraft batteries had been intensively developed.

Somerset de Chair, 24-year-old son of Admiral Sir Dudley de Chair, said he hoped he was not betraying a great naval secret, but it was a fact that Britain had an almost foolproof [illegible] anti-submarine device operated on the system of the reflector [illegible] a submarine came within torpedo range of a ship it would be in danger of instant destruction.

BEGORRA HERE'S EPIC OF CASSIDY'S CAT, SCRATCHES OUT LICKS JUST LIKE THAT

St. Patrick's day was a very fine day for Mr. Cassidy's cat. With a bowl of cream and a succulent herring it can celebrate its release from a brick dungeon that came very close to being a tomb costing all nine of Tabby's reputed lives.

Can a cat scratch its way through a solid red brick chimney? Certainly not you say? Well you're wrong because Mr. Cassidy's cat, a dogged, fighting Irish cat if there ever was one did it, incidently providing a "natural" for a St. Patrick's day story.

Here's how it all happened:

Several days ago a cat belonging to Herbert Cassidy, engineer of a [illegible] block, went A.W.O.L. Mr. Cassidy and family imagined it had strayed out of the building. They reconciled themselves to the loss of a pet.

Actually the cat had gone a-straying. It wandered out of the ninth floor penthouse where it lived with the Cassidy family, walking across the roof and decided to jump to a projection which, evidently it imagined was solid. As a matter of fact it was a disused chimney and, whoosh! the cat catapulted from the ninth to the fourth floor in nothing flat.

For 11 days and 11 nights it was confined to the bottom of a disused chimney. But it wasn't idle in this time despite gnawing pangs of hunger, with its claws it went to work on the brick walls.

Over the week-end, David Murdoch, assistant janitor, and John Williams, caretaker, heard a plaintive mewing on the fourth floor. They removed the baseboards and there was Tabby. Its claws were worn to the pads but it actually had scratched a hole in the brick chimney large [illegible] head and one paw through. Talk about Bruce and his [illegible] Mr. Cassidy's cat makes [illegible] look like a piker when it [illegible] perseverance.

BERLIN, March 16.—Reichsfuehrer Hitler, declaring Germany's armies "can never be conquered," conferred [illegible] regimental flags by decree [on] his armed forces Monday on the [first] anniversary of Germany's re[illegible] defiance of the Versailles treaty.

Released from the dungeon Tabby strutted out pitifully thin but extremely proud, with tail erect.

Incidently the flue where the cat was confined was used by the Journal plant to carry fumes from the stereotype room before it moved to its present building 18 years ago.

DUGGAN ATTACKS S.C. MEASURES AS USELESS BILL

As "useless, meaningless, disappointing, already covered by existing laws and self-contradictory," Premier Aberhart's Social Credit measures bill was assailed in the legislature Monday by Conservative Leader D. M. Duggan.

The premier brought the bill in for second reading and launched the explanation of it. Mr. Duggan was first to follow him, and at the end of a stormy half-hour, adjourned the debate for the day so reserving the floor for the resumption Tuesday.

The Conservative leader applied the word "deception" to the bill, withdrew that at the premier's protest, and substituted "unintentionally deceptive," refused to withdraw that, until, appealing from Mr. Speaker's order he was smothered under a 52-5 vote of the house.

"Camouflage" also was applied to the bill in an interjection by Liberal L. A. Giroux and although Mr. Duggan remarked at the time that "I don't know that I'd call it camouflage," he was called to order by the premier and said that if he had used that word he would withdraw it too.

The bill provides for establishment of royal commissions to "examine into, consider, investigate and formulate proposals" aimed at establishment of Social Credit in Alberta and "increase of purchasing power of the consumer by means of social dividends compensating discounts or by any other means, and the payment to the producer of any commodity of a just price, and the allowance to any dealer in a commodity of a fair commission on turnover."

The premier used the word "experimentation" in outlining the proposed commission's powers. Reminded privately later that this word does not appear in the bill as presented, he said that he would understand the phrase "formulate proposals" to mean experimentation. No one on the opposition side has questioned this point yet.

"This bill is one of the most important pieces of legislation which has been brought down in the house this session," the premier said. "It is the measure to which the large majority of the voters of this province have been eagerly looking.

"This is an enabling bill. It is not intended to be a complete Social Credit plan. That piece of legislation will be ultimately presented in the house when the proper time comes. By the enactment of this present bill, the government will be empowered to take the steps necessary to the introducing and implementing of Social Credit principles."

He declared later that the bill would not involve expenditure of money.

"It is not a money bill," Mr. Aberhart asserted. "The introduction of Social Credit will not require the expenditure of money beyond the ordinary expenses of the government. In other words we have the machinery necessary to introduce at the beginning at least, the various stages necessary in its development to a complete new system. The introduction of Social Credit will involve the use of the country's credit without monetizing it."

Mr. Duggan prefaced his attack with an assurance that "we are just as anxious, in this quarter of the house to evolve remedies for the present economic stress as are those in any quarter of the house, and we shall put no stone in the way of the government in its efforts to alleviate suffering among the people of this province."

There was faint applause on the Social Credit side of the house.

"But," Mr. Duggan continued, "this bill is a very serious disappointment to us. It is not a bill at all; it is merely a resolution. I have a mind to refer it to legal authorities. The preamble and the main body of the bill conflict with recognized practice in the formulation of statutes.

"And this bill contains inaccuracies, serious contradictions within its own structure. When we propose to embody a bill in our statutes, surely it should at least be in general harmony.

The Conservative leader cited the statement in the preamble that "productive capacity is unlimited" and declared this to be "absolutely untrue; there is definite limitation of capacity in almost all fields.

The statement, too, that "the present monetary system is obsolete" is also untrue the Conservative leader declared. "It is true that it may be seriously impaired," he said, "and that it doesn't fully meet the needs of the present day. I am not one of those who claim that it is all that could be desired. But it is not obsolete. The world could not do without it today."

He quoted a report of a London banking commission to show that bankers themselves admitted the present system is abused.

"But," he injected, "when we come to discussing the matter of monetary reform, we should remember that it is a federal function. It is all right to let the preachers of monetary reform preach their heads off, but we ourselves would be better advised to focus our attention on matters within our competence."

He had been hopeful, Mr. Duggan said, that Premier Aberhart would agree to elucidate his ideas on Social Credit. He would not agree to debate the subject with a man of such wide knowledge, on that subject, as the premier, Mr. Duggan said but he had expected that the premier would be willing to explain his principles and his theories to those on the opposition side who were lacking in education—on that subject.

"If we continue to provide social facilities for our people—health services aid for the underprivileged and maintenance for the aged—out of provincial funds which means the state's credit that is what might be called Social Credit and we already have it" he said.

Work, Work, Work!

"What's the matter?"

"Oh, nothing but work work work —from morning till night!"

"How long have you been at it?"

"I start tomorrow."

LOOKING AT BOTH SIDES—

Quite recently His Majesty King Edward VIII. visited the city of Glasgow and toured a section of the slums and the magnificent new liner Queen Mary. Even a king who has looked upon a great many of the wonderful sights the world contains, could not help being impressed with the wonderful things he saw on the new ocean queen. After examining many of the marvels of this great liner, he asked:

> "How do you reconcile a world that has produced this mighty ship with the slums we have just visited?"

The question is potent with meaning, and no person has better summed up, in the form of a question, the great problem that lies before the human race today. Lord Melchett, reporting the statement at a dinner of the Institute of Metals in London, said:

> "That is the problem we have to solve, and it is useless to go out and solve scientific problems if we cannot solve that."

Perhaps, perish the thought, human nature being what it is, the question cannot be satisfactorily solved. Civilizations, with wonders peculiar to their age and time, have risen before and have passed from the scene. Can this civilization in which we are living do what others have failed to do, live in harmony as between nations and individuals and continue to progress educationally, scientifically and socially?

It should not be impossible, yet down through the ages mankind has struggled with this great problem. We doubt if the answer is to be found in the dogmatic tenets of any particular school of thought, but rather we are inclined to believe that the answer is to be found amid the surging hearts of humanity. Less thought of self and more of one's neighbors, less personal glorification and more thought for the common weal, less striving to surpass one's associates and more reaching out a helping hand to help them keep up with the procession, would help.

Perhaps idealism carried this far would mean a slackening of inventive progress, might even mean the equivalent of not having a marvelous liner, Queen Mary. Certainly inventive genius as applied to mechanics have outstripped that as applied to social living, otherwise slums such as King Edward saw and the Queen Mary would not be lying side by side.

BIRDS—AND BIRDS—

DON'T EVER tell your best friend that he has no more brains than a chicken, for if you do, there is now evidence that you will be handing him a compliment. Chickens not have brains? Why they have shown an economic sagacity that would make some of us blush with envy.

Along a strip of land through which runs the boundary of Holland and Germany, the hen population have fully learned how many beans make five and what's more, increased their learning to wheat kernels and midlings. In the land of windmills and quaint costume wheat is cheap, at least cheaper than in the land of Her Hitler and the swastika, and strangely enough, so are eggs. Now, any busybody of a hen would be wise enough to take advantage of a situation like that, so with the economic wisdom of the ages condensed as it were into a small space of bobbing vitality, several thousand hens, more or less, vigorously scratched in Holland, and crossing the road laid eggs in Germany. This was the acme of wisdom and these hens would have found a place with the immortals, but, horror of horrors, Dutch thrift and German thoroughness decreed that Dutch wheat could not make German eggs. You see, there is a tariff on eggs entering Germany and even though they were manufactured in transit and deposited upon arrival, Old Biddy and her gang gave the officials on the German side and the hen owners on the Dutch side a weighty problem of law to decide and the decision—plus a fine for the hen owners—was that Dutch hens must be patriotic and lay where they scratch and German hens must be nationally industrious and scratch where they lay. This incident proves for all time why a chicken crosses the road.

California the land of sunshine and orange groves, have, so the news reel of the movies show us, solved the problem of the crow menace. Too many crows? say the wise men of the golden state, nonsense. We will soon fix that, we will have them EATEN. So crow hunting parties were organized and bags of crows shot, plucked, cleaned and roasted, were served at hotels, clubs, restaurants and street stalls. The picture showed the chefs preparing them, prominent dining rooms serving them and people eating them.

No more need Tofield district residents go hungry for fresh roasts in summer for the familiar caw! caw!! caw!!! will sound like an invitation to dinner in a Californian restaurant. The familiar song "Papa crow sat on a limb; Mama crow sat next to him; will have to be revised to "Papa crow is in the oven: Mama crow beside him lovin'. Anyway we have to hand it to the Californians for giving Albertans a "break". With the British market willing to pay good prices for our tame chickens and the game laws forbidding open season on the wild ones, we can fall back on the plentiful crows and feast aplenty.

PROVINCE ASKS COMPANIES CUT GASOLENE PRICE

Reduction in consumer prices of gasolene in Alberta was predicted Wednesday after a conference at the legislative buildings between the provincial cabinet and representatives of all major oil companies operating in the province.

Hon. E. C. Manning, minister of trade and industry, announced after the conference that the government had made suggestions which the oil men will present to their companies. These suggestions, said the minister are aimed at steps which would make it possible to reduce gasolene prices soon.

In high quarters, it was declared, that if the companies themselves cannot reach a plan by which prices would be cut voluntarily, the government intends to introduce legislation which might result in decreased costs to purchasers.

The conference was held behind closed doors, but it was reported later that the oil company representatives had reminded Premier Aberhart and his cabinet that a reduction in the present government tax on gasolene would automatically reduce the cost to consumers. To this the government was said to have retorted that in Ontario where the government tax is similar to that in Alberta the price of gasolene to consumers is at least eight cents a gallon less.

MR. JUSTICE HOWSON ASSUMES POSITION

Before a packed court room Mr. Justice Howson was sworn in as a supreme court judge Monday by Chief Justice Harvey in appeal court.

Immediately after the ceremony the new jurist took his place on the appeal court bench to fill temporarily the vacancy caused by Mr. Justice Mitchell's absence.

At the conclusion of the ceremony Mayor Clarke was introduced to the appeal court judges and formally took his place as a King's Counsel in the inner bar.

PROVINCE CONSIDERS PAVING 1,000 MILES

Paving or hard-surfacing of 1,000 miles of main highways in Alberta and grading and gravelling of an extensive mileage of market roads is being considered by the provincial government, it was announced on Monday by Hon. W. A. Fallow, minister of public works.

Without divulging details of financing the project it was revealed a five-year program would be carried out under this extensive road improvement plan. Actual work under the scheme is expected to be under way by June, the minister said. It will be conducted as a "purely government responsibility."

PROVOST BOY, 5, WANTED TO BE A MAN, DEATH FOLLOWS EFFORTS TO START FIRE

PROVOST, March 16.—"I wanted to be a man; that's why I did it." 5½-year-old Wilfrid Todd murmured to his nurse in the Provost hospital, then died, victim of burns suffered when he used coal oil to start a fire in the kitchen range in his home.

The child, awakening before his widowed mother and 15-year-old sister went to the kitchen and decided that he would start the stove in preparation for the morning meal. There was a terrific explosion and the terrified boy, his night clothes flaming ran to his room, jumped into bed and pulled the bed clothing over him.

Mrs. Todd was burned severely in putting out the kitchen fire, then turned her attention to the boy.

The sister ran to a neighbor's home to telephone for help, and a snowmobile was rushed out from here. The child died in the hospital a few hours after his arrival, and as a doctor and nurse were working over his burns which extended from head to foot.

"Good night," he said to his nurse as death reached.

The funeral was held here Saturday.

A HORSELESS CARRIAGE? NO! A HORSELESS TOWN!!

PRINCE RUPERT, B.C. March 16 —Prince Rupert is no longer a "one horse town." In fact this is a "no horse town" since Lottie doesn't live here any more.

Lottie was the last equine left in Prince Rupert. She was a familiar figure for years on local streets as she trudged along with Valentin's milk delivery.

However the years have been creeping up on good old Lottie so a few days ago she was placed aboard a train and shipped to Woodcock where she will spend her declining days doing odd jobs on W. C. Little's farm.

Johnny Walker, Prince Rupert's only horseshoer, says he is going out of that kind of business and will have to apply himself to the more up-to-date forms of blacksmithing.

WHEAT TRANSPORTATION COST

An interesting compilation of the costs of shipping wheat from the country elevator in Alberta to British ports via Vancouver has been prepared by E. A. Ursell, Fort William, statistician for the Board of Grain Commissioners. In preparing this data the approximate average charges are used. The figures are as follows:—

	Per Bus. c
1. Handling at Country elevator (including insurance against loss by fire and storage for 15 days); official inward inspection, weighing and registration fees; and selling to exporter on Vancouver market	2 75
2. Railway freight rate from average western point shipping via Vancouver-New Westminster terminal elevators	13 5
3. Handling at terminal elevator (including insurance against loss by fire or explosion and storage for 15 days); official outward inspection, weighing and registration fees and loading into vessel	1 5
4. Approximate average cost of freight and insurance, (marine and outturn) between Vancouver and British ports, (including fobbing charges at Vancouver)	11 75
Total approximate cost between producer and c. i. f. British ports per bushel of Wheat	30 5c

ADJUSTMENT TO 1930 WHEAT POOLERS

"The government's action in providing an independent audit was a matter to be welcomed by the Pool people who were asking for only what they consider due them; and to the taxpayers of Canada from whose pocket the settlement must come. The government's adjustment as announced by the Prime Minister has been welcomed in the West as fair and equitable. Legislation will be introduced at an early date to authorize the payment of the adjustment moneys thereby settling finally an obligation and an unhappy situation."—Extract from Canadian Liberal Monthly, February issue.

AGRICULTURE IN JAPAN

The total number of agricultural households in Japan is estimated at 5,600 thousand aggregating a rural population of about 30 million. As can be imagined, the crowding of the rural area is terrific and Japan's farm lands are the most densely populated in the world figuring out to about half an acre per person. As a consequence, Japanese farmers follow most intensive systems of agriculture—literally spade farming. The rapid progress of industrialization of Japan has absorbed many people from the rural districts but not in sufficient numbers to relieve the pressure against the land. This factor forms one of the basic causes of Japan's agricultural troubles, the United States Department of Agriculture points out.

Land prices in Japan are very high. In 1924 the price of an acre of rice land was as high as $483. Following is the prices for land per acre during the year's mentioned:

1929	$1,230
1931	820
1932	405

Even the low 1933 price is twice as high as in densely populated European countries.

The average rent for the medium quality one-crop field is often 55 to 60 per cent of the crop. In two-crop fields the rent is from 60 to 65 per cent. A rental amounting to more than half of the crop is particularly significant in the light of the fact that the Japanese tenant farmer does not simply offer his labor to the landlord for the cultivation of the land and receive a share of the crop, but owns his cattle and implements and buys his own seeds and fertilizer.

The United States Department of Agriculture points out that one of the weaknesses of Japanese agriculture, in addition to concentrated holdings and high rents, lies in the fact that farmers confine their efforts to one crop, that is, the production of rice. The growing of mulberry trees for silk production is the main secondary agricultural activity but the supplanting of real silk by artificial silk has caused heavy surpluses to accumulate and a drop in prices from $5 to $1.75 a pound. This has been ruinous to Japanese agriculture and probably responsible to a large degree for the recent internal trouble in that country.

Japanese farmers are burdened by terrific debts and taxes. The total farm debt is estimated at around $3 billion and the average rate of interest 10 per cent per year. About 70 per cent of the farms in central Japan are in debt. The average indebtedness per farm is about $300, Canadian money. According to a recent investigation the total debt of $2,800 farms in the province of Akita amounted to nearly $30 million. The fall in the price of agricultural commodities rendered it impossible for the farmers even to pay interest on their debts while the fall in the value of farm lands would have bankrupted the country banks had they foreclosed on the farms immediately as loans fell due.

The taxation system bears more heavily on land than on the new mobile wealth of trade and industry. The per capita taxes on the farmland owners are roughly double those of business proprietors. When in the last decades of the nineteenth century Japan embarked on a policy of industrialization the country was then largely agricultural. So then agriculture had to bear the cost of taxation to pay for the cost of industrialization. The agricultural economy of the country stood this burden because at that time the prices of food products were at high levels. Since the post-war decline of the country's agricultural economy Japanese agriculture is hardly in a position to support any longer the country's industrial programme. Yet it seems that the long established practice of favoring industry against agriculture still continues.

The above material is obtained largely from a survey of the situation by the U. S. D. A. In the light of the recent trouble in Japan these facts are quite interesting. The Japanese army is recruited largely from the agricultural areas. The soldiers whose knowledge of the terrible position of their parents and relatives has developed animosity against the great industrial rulers whom they regard as greedy and linked with the politicians in devious deeds and consequently traitors to the Empire.—Wheat Pool Budget.

CREDIT LOWLY MAGGOTT WITH SAVING LIFE OF CALIFORNIA SURGEON, VICTIM OF CANCER

CHICAGO, March 16.—A new therapeutic use for the lowly maggot as surgeon in a skin wound—was disclosed Sunday in the archives of dermatology by three Los Angeles physicians.

They were credited with saving the life of a California surgeon, victim of cancer, in a report made by Drs. G. Mosser Taylor, Nelson Paul and Samuel Ayres.

Although use of maggots to remove bone abscesses has long been established, the three physicians called theirs the first instance where they were applied to a skin case. Orthodox surgery, dressings, and violet rays had proved unavailing for their patient, a former medical missionary, they related. But the treatment by maggots removed the diseased tissue and the wound healed.

They described the course as extremely painful to the patient, requiring frequent periods of rest. The larvae were applied to the ulcer in a cage of sponge rubber and wire cemented to steel "window" held around it by a plaster of paris cast.

WIT And WISDOM

One Carries Two

"Mammy, what's this hyer 'white man's burden' thing?"

"Well, since de 'pression set in, hit's been two other white men, I guess."

* * *

Perfect Combination

"I hear Alice is married; did she do well?"

"Oh, yes—her husband has a dress suit and her mother-in-law runs a rooming house."

* * *

No Mental Load

"I want a book to take home with me."

"Yes, sir; something light?"

"It doesn't matter, I have my car outside."

* * *

Cause

Daughter: "Father went off in a good humor today."

Mother: "That reminds me, I forgot to ask him for some money."

* * *

Proved Its Worth

"Did you receive many Christmas cards, Miss Brown?" asked the thrifty young man.

"Oh, yes quite a lot," replied the young lady, "and there was an unsigned one which I thought particularly dainty and artistic. I'm sure it came from you."

"Indeed!" he exclaimed, delighted and highly flattered, "and what makes you think that?"

"Because I sent it to you last year."—Toronto Globe.

* * *

Word a Day

"Father," said the small boy, "what is a demagogue?"

"A demagogue, my son is a man who can rock the boat himself and persuade everybody that there's a terrible storm at sea."—Washington Star.

* * *

Perfectly Safe

"But, darling you're using the pen without any ink."

"Yes, Mummy, this letter is very confidential."—Toronto Globe.

PRODUCTION AND COST OF WEANLING PIG

"How much does it cost to produce a weanling pig?" This question is asked of the Dominion Experimental Station Lacombe scores of times each year. Fortunately the Experimental Station is in a position to give a definite answer, as experiments carried on for years have unearthed a wealth of information on this important question.

The results of these experiments show that approximately one ton of chop for each twelve month period is required to carry a sow raising one litter a year, while 2500 pounds of chop will carry a sow raising two litters a year for the same period. These figures also cover the feed consumed by the young before weaning.

At present prices good grain mixtures for swine are worth about three-quarters of a cent per pound. At this charge it would cost approximately $15.00 to feed a one-litter sow for a year; adding this to the overhead charges of $10.00 the cost to produce one litter is $25.00 or, for an average litter of seven $3.57 per pig.

The cost of grain for a two-litter-a-year sow is $18.75 and the overhead $13.33 making a total of $32.08 which for a total of fourteen pigs, makes the cost per pig $2.29.

In other words, with the same conditions under which one litter per year is produced it is possible to produce two litters for $7.08 so that the second litter from a two-litter-a-year sow actually costs only $7.08 or $1.01 a pig.

There is still another plan—breeding for three litters every two years. The total feed cost for a sow under this plan is $33.75 for two years, and the two-year overhead $23.33 giving a total cost of $57.08 for twenty-one pigs. In this case the cost of each pig is $2.72.

As many pigs will not regularly produce two satisfactory litters a year the Lacombe Station favours the practice of raising three litters every two years or six litters a year from four sows.

"Overhead" includes interest on investment in breeding stock buildings and equipment and cost of service fees and feed supplements. —Dominion Experimental Station, Lacombe.

C N R OFFERING COAST EXCURSIONS

WINNIPEG Man March 16 —Bargain fare excursions from the prairie provinces to the Pacific Coast good from April 3 to 11 taking in the Easter week-end are announced by the Canadian National Railways. Fares for this spring trip westward will be a cent a mile in coaches, a cent and a quarter in tourist cars and a cent and a half standard from Port Arthur to British Columbia points.

Similar fares are offered from British Columbia to destinations in the prairie provinces east to Port Arthur.

Stopover privileges will be granted at Jasper and west on westbound tickets sold from Alberta to Port Arthur and at Jasper only eastbound tickets sold in British Columbia. Eastbound fares are good from April 4 to 11 inclusive.

Tickets will be good going and returning via the same line and route in each direction and will not admit of circle tours or side trips. With Easter falling on Sunday April 12 these excursions bring a welcome break after the long winter.

WAKE UP YOUR LIVER BILE—
And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

GROWING FLAX IN CENTRAL ALBERTA

A very early variety of flax should be used in Central Alberta. The sorts which have been proven both earliest and highest yielding at the Dominion Experimental Station, Lacombe, are (in order of merit) Red Wing, Premost and Bison. All of these are good varieties; however, as seed of the first two is rather scarce it may be necessary to use Bison. As Bison is a larger-seeded variety than the others weed seeds may be more easily cleaned out of it.

Flax is not as quick on the getaway as some of our weeds, and cannot compete with them. To ensure a crop it is always wise to seed it on reasonably clean land—preferably summerfallow.

At the Lacombe Station this crop is seeded at the rate of two pecks per acre, between the first and tenth of May. It is not as susceptible to spring frost injury as is generally believed; and in the last fifteen years the crop at Lacombe has been frozen only twice in the spring.

An old practice was to seed flax on land which had just been broken, and it was found that this land would seldom produce a good crop for the next year or two, which gave rise to the belief that flax is hard on the land. However, this belief has no sound basis; it was the cultural method, not the crop, what was at fault. Experience has shown that it does not pay to sow flax—or any other crop—on land which has been broken earlier the same spring. Flax is actually no harder on the land than any other cereal.

The Lacombe Station recommends that flax be seeded alone, and not in any mixture.

Flax seed may be secured from the seed houses in all the Western cities.

FOR SALE—Abundance oats, germination 90 per cent some wild oats. Machine run 25c, cleaned 35c. House 16x24, four rooms. Hardy fruit trees. Cash. Apply Maurice McGinitie, Tofield.

For Sale: Regal field inspected smooth Awned Barley. A product of the University of Saskatchewan. Recommended by this institution as a high yielder. Government germination test, machine run sample 98 per cent in ten days. Also a quantity of second generation Trebi Barley. Germination test 98 per cent in ten days. Cleaned ready for the drill. C. J. Kallal, Phone 918.

FOR SALE—O.A.C., 21, Malting Barley, Machine run. Government Test 74 Apply A. J Williams, Tofield, Alberta.

FOR SALE —Victory Seed Oats. Germination test 92 per cent. Free from wild oats. Phone R410.—A. F. Schultz, Tofield. 4t

FOR SALE OR TRADE—Seventeen pure bred Barred Rock pullets, now laying. Apply in first instance to Mercury Office, Tofield.

New Swagger Suits
$12.50

Vol. XVII., No. 8 — Thursday, March 26th, 1936 — $2.00 Per Year. To U.S.A. $2.50

Tofield Unit Joins Delegation to Minister of Public Works

On Friday last Mayor Brace, Councillor Swift and Secretary Chapman, representing the Tofield Town Council and A. L. Smith and W. Worton representing the Tofield and District Board of Trade joined with a delegation from the districts north of Vegreville highway and interviewed the Minister of Public Works, Hon. Mr. Fallow.

The main object of the delegation was concerned with the construction of a highway from Edmonton to Cold Lake, but the Tofielder's interest rested with the gravelling of the road running north from Tofield to the Vegreville highway.

A. L. Smith was the spokesman for the Tofield group and outlined the situation as it concerned the people living immediately north of Tofield and the town itself.

The Minister gave about an hour of his time to the delegation and while not promising anything was courteous and attentive.

He said he favored building roads running north and south which could be used as market roads rather than building highways running east and west over which cars could travel at excessive speeds.

Finally a committee was formed from the whole delegation. A. L. Smith being appointed the Tofield representative upon it.

SAMUEL AUGUST HALLBERG DIES AT CHILLIWACK

On Tuesday of last week, Samuel August Hallberg passed away at Chilliwack at the advanced age of 92 years.

Mr. Hallberg lived at North Oyster for years before he left for Chilliwack and he had a very interesting life.

Born in Sweden, he left home at 18 years of age and emigrated to the United States, and located at Chicago where he served three years with a Veterinary Surgeon.

After that he went to Minnesota and got a half-section there of hickory and oak timber, this he cleared and made into farming land.

He married Charlotte Carlson of Murdock, Minn., in 1874.

The west called him in 1882 and so he journeyed in a covered wagon along the hazardous "Mullen Trail" to Spokane, Wash., by way of the Dakotas, Montana and Idaho. There he freighted in material for Fort Spokane, 60 miles from the city of Spokane.

His family arrived by rail in the Spring of 1883 and they homesteaded at Fruitland, 10 miles from Fort Spokane.

The late Mr. Hallberg was a lover of horses and he bred quite a number. In 1893 he heard about the wonderful range land in Alberta so he selected his best brood mares, and with his sons drove overland to Vernon, B.C. from there he shipped them C.P.R. to Strathcona (now Edmonton south) and homesteaded 36 miles east of Edmonton which was his home and ranch for 18 years. He pulled stakes in 1911 and shipped a carload of settlers effects to Old Wellington and finally arrived at North Oyster, where he was well known and made many friends.

To mourn his loss he leaves his wife, four sons, Abel of Vancouver, Elmer of Ladysmith, Frank of Merritt and Harold of Namaka, Alta., and four daughters, Mrs. Wm. VanBuskirk and Mrs. H. Broder, both of Seattle, Mrs. W. A. Clemenson of Nova Scotia and Mrs. Joe Trudell of Yellow Point, Ladysmith.

MUNICIPAL DISTRICT OF CORNHILL NO [illegible]

Tenders Wanted for Road Maintenance

Sealed tenders will be received at the District's office, Tofield, up to midnight, Thursday, April 2nd, 1936, for the maintaining of road commencing from the N. E. corner of the N.E. quarter of Sec. 36-52-19, W4M, through Tofield south through Kingman and on to boundary of Cornhill Municipal District, total mileage 20 miles.

Municipal district will supply large Adams Maintainer, tenderer to supply tractor, fuel and labor.

A retainer of $50.00 will be held from the cheque as a guarantee of completion of work.

Lowest or any tender not necessarily accepted.

J. O. A. LETOURNEAU,
Secretary-Treasurer.
Box No. 128, Tofield, Alta.

SUGGESTED NEW BANK BUILDING FOR TOFIELD

Information is to hand that the Bank of Montreal are considering placing a new bank building in Tofield. While at time of writing nothing definite has been decided upon, it is understood that the bank contemplates moving the building they have at Chipman to Tofield. This is a two story building of frame construction. Under present building regulations aimed at fire prevention this building would have to be tiled or bricked similar to the one immediately north of the hotel. The bank, we understand, do not wish to do this. This is where the matter now stands. There has been some talk that if the bank could not place a frame building in a suitable location they would close the existing branch here, but actually no definite decision has been arrived at.

ENGLISH WOMEN SENTENCED TO DEATH; OLD BAILEY MOVED BY HER TRAGIC STORY

LONDON, March 25.—Court officials and attendants in grim Old Bailey, accustomed to many sad stories of crime and wrong-doing, heard Tuesday the climax of what they said was one of the most bitter tragedies ever revealed in that police court.

It came when Carmen Swan, 38-year-old widow of a bank clerk pleaded guilty to the murder of her eight-year-old daughter. She was sentenced to death.

"I must accept the plea. I do not see any alternative," said Mr. Justice Hawke.

Counsel for the prisoner admitted to the court that Mrs. Swan was perfectly sane. But he offered a distressing recital of her troubled life.

Her husband was 11 years her senior. When she was about to become a mother, counsel proceeded, Mrs. Swan heard that her mother-in-law was in a lunatic asylum. The health of her husband broke down and while he was in the hospital he found the body of a patient who had hanged himself. This brought on another severe illness. He twice tried to kill his wife and finally hanged himself on his child's birthday. Mrs. Swan herself had to cut down the body of her husband.

Then she learned that she was in an advanced stage of tuberculosis. She wondered whether the child, Valerie, would develop insanity on her father's side or tuberculosis on her side. She gave the child a sleeping draught and turned on the gas. It failed. She tried again and succeeded. The mother took what she mistakenly thought was poison.

"All the people who have to judge me," said Mrs. Swan in a cultured voice, "have not been through what I have been through."

ASK FOR MINIMUM PRICE FOR NON POOL MEMBERS

Now that the Dominion Government has decided to apply the principle of a minimum price to a portion of the wheat crop 1930-31 the principle should be extended to all farmers who sold wheat during that year according to a statement made by Mr. R. S. Law, President of United Grain Growers Limited last week. Mr. Law's statement was as follows:

"According to announcement which has been made at Ottawa, the Dominion Government has decided to apply the principle of a minimum price to a portion of the wheat crop of 1930-31 and give to a portion of the farmers who sold wheat that year the benefit of a minimum price of 60c a bushel. United Grain Growers has decided to call to the attention of the Government the desirability of extending equal treatment to all western farmers and of applying the minimum price principle to all the wheat crop of that year. That would mean giving to those farmers who sold their wheat on the open market these months when the price ranged between 30 and 60c a bushel the minimum price of 60c. Customers of this Company who are in that position look to us to make representation on their behalf to the Government and a number of them have already called on us to do so. Undoubtedly the feeling will be very strong that there should be no discrimination and that the equality of treatment should be provided."

FOR SALE—Seed Wheat. Certificate 75-39492. Reward grade No. 1. 96 per cent Germination. Grown on breaking. No Glume-rot. Per bus. 80c W. F. H. Swinton, Box 39, Tofield.

LOCAL AND PERSONAL

Mr. and Mrs. Roher and son Bryce of Edmonton visited the Thompson home on Sunday.

Mr. Ray Coutts motored to the Peace River country this week.

Miss Selma and Mr. Toby Homeland and Julius Lorbekmo visited the city last week.

Eric and Dennis Edwards spent a few days visiting in Edmonton this week.

The Misses Beryl Edwards and Florence Kendall motored to the city on Tuesday.

Mr. R. Whyte of Wetaskiwin spent the week end in Tofield.

Miss Muriel Malcolm spent the week end in the city.

On Thursday evening last, the boarders at the hotel gathered together to bid Mr. Burroughs farewell. Bridge was played throughout the evening and at midnight a lovely lunch was served. Mr. McIlperran said a few words, saying that they all hated to see Mr. Burroughs go, and presented him with a small token of friendship from his fellow boarders. Mr. Burroughs left on Friday morning for Consort, where he will take charge of the Lumber Company there.

Mr. and Mrs. Burk arrived here last week from Windburn. Mr. Burk will take over the managership of the Crown Lumber Co.

Mr. Courtright spent the week end in Edmonton.

Mr. Graham Allan, who visited friends in Edmonton and Westlock last week returned home on Sunday.

Mr. and Mrs. Wm. Lee of Edmonton visited their daughter Viola here last week.

Major Walter Hale, District Superintendent of Postal Service paid an official visit to the local Post Office on Wednesday, March 25.

Mesdames Wallis, Borden and Robinson attended the 22nd Annual Meeting of the Womens' Auxiliary to the Missionary Society of the Church of England in Canada, which was held in Edmonton from March 17th to March 20th. The sessions were very interesting and educational. Mrs. J. W. Robinson was again nominated and returned to office as Thankoffering Sec-Treasurer for the Diocese of Edmonton and is now entering her fourth year in this capacity. Rev. Wallis also attended the various Sessions.

The Jolly Twelve Bridge Club met at the home of Mrs. Coutts on Thursday evening. Honors at bridge were won by Winnie Worton and Maudie Rodig. On behalf of the club Winnie Worton presented Thelma Jobb, bride of next month, a lovely bridge lamp. The same evening we also had a birthday guest and on behalf of the club Mrs. Thomas presented Mrs. Wallis with a bit of "spring". Much fun was had when the hostess read to her guests her literary efforts.

The C.W.L. wishes to thank all those who helped to make their oyster supper such a success.

HE WENT TO WAR DURING DREAMS; IS IN HOSPITAL

Ki Jensen, Edmonton resident, went to war early Thursday.

Uncertain whether he was on the enemy forces, the defensive or offensive "Private" Jensen landed in an Edmonton hospital with his right leg fractured.

The injured combatant was found by R. Green, taxi driver, who was startled to see the man trying to struggle to his feet at Jasper ave. and 99 st., clad only in his underwear. Green and Harvey Heileson took him to the hospital.

Jensen, a Dane, told his rescuers it all happened during a nightmare. He was in his 99 st. rooming house residence; he dreamed there was a war. He was in the thick of it. In his excitement over the battle he leaped from bed and out through the window. It was a 15-foot drop.

Search of the victim's room by Constable J. McMurray revealed Jensen to be a real fan of war and detective literature. Many such volumes were found.

FOR SALE—Chevrolet Coach, 1928 model. Ford De Luxe Sedan, 1930 model. International light delivery ½ ton truck, 1930 model. These are in good shape and will sell at a bargain. M. C. Hammond, Tofield, Alta.

KETCHAMOOT

The regular monthly meeting of the Ladies' Aid will be held on Wednesday April 1st, at the home of Mrs Ralph Davison. A cordial invitation is extended to all.

Mr. and Mrs. Wm Lee came down from Edmonton last week and will remain at their home until after their sale on Wednesday of this week.

Miss Dolly George of Ministik was a guest of Mrs. L. Carlisle on Thursday and Friday of last week

Miss Margaret Lindsay was guest of the Sears family Sunday evening.

Mr. Howard Lee has finished his winter schedule of hockey playing and returned home one day last week.

Misses Marie and Evelyn Lawson spent Friday night at the home of their grandparents.

Messrs Jim Ratigan and Bill Buckshot returned from the lumber camp near Edson.

The Lewis Carlisle family entertained a large crowd of friends and neighbors at their home to a dance and bridge Friday night of last week. All ages were present from Mr. Hull to Baby Sutton. Mr. and Mrs. Ernie Brick furnished the music on an organ and violin. Mr. Ed Ratigan added to the pleasure of the evening by singing several solos. Lunch was served at midnight and all enjoyed themselves very much.

Mr. and Mrs. Oscar Barnes entertained a large crowd of friends to a dance and bridge at their home Wednesday night of last week, in honor of Mrs. Barne's father, Mr. Frank Hull on his 83rd birthday anniversary. Mr. Hull is enjoying life and is hale and hearty and danced one square dance. Mr. and Mrs. Brick furnished the music and Mr. Ed. Ratigan sang several tenor solos. Lunch was served at midnight, after which dancing was resumed for a few more hours. After wishing Mr. Hull many more birthdays and thanking Mr. and Mrs. Barnes for their hospitality, they all wended their way home.

The hockey boys team are giving a dance at the Davison home this Friday night, March 27. An invitation is extended to all.

Mr. and Mrs. Whillans were guests of Mr. and Mrs. Monkedahl of Bardo Saturday evening of last week.

Remember next Sunday March 29. Premier Aberhart has proclaimed "Go to Church Sunday." Services will be held at the school house at 2:30 p.m. Rev. Allan, minister so follow your premier's request and we will be glad of your presence at the services.

Mrs. L. Carlisle daughter Belva and son Donald and Miss Dolly Stanley visited Mr. and Mrs. Schultz at their home Thursday evening.

LINDBROOK

Well, the winter seems still determined to hang on as long as possible, but cheer up it can't be for much longer and "if winter comes, spring is sure to follow" etc. and all the rest of the usual bunk.

The sympathy of the district is extended to Mr. Frank Kortzman of this district and his brothers, August, Oscar and Charlie, all well known here on the death of their sister Agnes, Mrs. Wallace Page, who lately passed away at her home in Minnesota, U.S.A.

Mr. J. Bailey is very ill with pneumonia, we hope soon to report him O.K. again.

Our former pneumonia patients, Messrs. Gonoski and R. Smith are back in the harness again.

Say, there ought to be a "pneumonitites" club here, composed of those who have been through it, still if not enough they could take in the "flucites etc."

Mr. W. Glenn is still confined to his home after his accident but is coming along O.K.; getting rested up for the spring rush eh?

Mr. and Mrs. Walter Kortzman visited Mr. and Mrs. F. Kortzman and family over the week end. They came from Torlea, Alta.

The dance given by Messrs. C. Lindgren and R. Kortzman went very well as far as fun and a good time went, but owing to the weather the attendance was not as great as usual.

Successful Sports Night Held at Local Ice Palace

On Thursday night last the annual sports night at the Tofield Skating rink was held The event took pretty much the form of other years hockey games, broomball, races etc

Bardo and Ketchamoot Simon pure amateurs in the field of sport and rivals in the hockey firmament played first, Bardo taking the honors A combination of these two teams then played the Tofield team Tofield winning by a fair margin

The girls then staged a broomball encounter which was followed by a men's broomball game [illegible] were mostly pickup teams, the fun being more important than the score

A novelty, a bicycle race, the contestants to wear skates, was won by Bill McCauley.

The girls skating race was won by Eunice Wiltsen and the boys skating race was won by Arnold Swift.

Following the sports a moccasin dance was held, the Tofield Rangers furnishing the music.

FULL HOUSE SEES G.M. FREE PICTURE SHOW

The free moving picture entertainment given by General Motors in conjunction with Coutts Bros., their local agents, held at the curling rink on Friday last was well attended The crowd was large enough to make two showings, one in the afternoon and the other in the evening.

A short travelogue "Do You Know?" was one of the leading features, and along with pictures of the testing of a heavy duty truck on famous "Pikes Peak" made an interesting reel.

The reel showing the Toronto Maple Leafs and Montreal Maroons in action held the interest of both audiences.

The features showing detailed factory production, assembling, testing and delivery of cars was equally interesting.

The entire program was well balanced and included comedy features as well as scenes showing the system employed in connection with the popular General Motors Saturday night National Hockey League broadcasts

STUDY CLUB MEET

Study clubs on every imaginable subject are now the vogue, and on Friday night last, at the Co-op store a number of people met to study the book "Social Planning for Canada," written and compiled by seven trained observers of present day economics

O. P. Thomas gave a resume of the first chapter, the contents of which were later freely discussed

It is proposed to study the chapters one by one at subsequent meetings. All interested are invited to attend

E. W. ROGERS

The Sap is in the Maple Trees

The sap is running in more than [illegible] maple trees in Eastern Canada and approximately 50,000 [illegible] an area extending from Western Ontario down to the Atlantic [illegible] Nova Scotia are engaged [illegible] the sweet and succulent [illegible]. When the sap in the maple [illegible] error no [illegible] may say. Though there are over 70,000,000 [illegible] trees in Eastern Canadian [illegible] about 24,000,000 will be tapped [illegible] will return to the [illegible]. The revenue from the sale of maple sugar and maple syrup for 1935 was $3,522,[illegible] an increase of $481,820 over [illegible].

[illegible] sound rea[illegible] than one-third of [illegible] Canada should not be [illegible]. Officials of [illegible] Branch of the Dominion [illegible] of Agriculture say this [illegible] charged of the public [illegible] syrup and [illegible] merely seasonal [illegible] good all the year round [illegible] by time in any [illegible] properly sealed or covered [illegible].

[illegible] of practical ag[illegible] Canada associated with [illegible] 1605 de Monts and [illegible] did some planting [illegible] Royal and in 1617 Louis Hebert [illegible] the first farm at [illegible] the French were the first [illegible] lations of the maple [illegible] in the Dominion. It [illegible] Indians from before the [illegible] of history knew of the [illegible] products of the maple tree [illegible] early as 1673 the French priests [illegible] advantage [illegible] the maple tree for [illegible] ingly to [illegible] France. But there [illegible] commercial production [illegible] years [illegible] the first consignment of [illegible] syrup and maple sugar was [illegible] market. This went from [illegible] Montreal ten [illegible]. There has been a veri[illegible] of sap drawn from the [illegible] that epochal event 230 years ago and the business has grown [illegible] developed until it is now a sub[illegible] and guarded by a [illegible] and Regulations to insure [illegible] the syrup and sugar [illegible] sale. As a matter of [illegible] of adulterated maple [illegible] sold is practically [illegible] are the officials [illegible] of Agriculture. Of [illegible] by Fruit Branch [illegible] there and every[illegible] of the Act [illegible] were [illegible]. In addition 23 store[illegible] four restaurant keepers [illegible] for failure to mark [illegible] products.

[illegible] Province of Quebec [illegible] 73.5 per cent [illegible] production [illegible] comes from there. [illegible] in the counties of [illegible] south of the St. Lawrence River along the north shore between [illegible] and Quebec City. Ontario [illegible] for 21.3 per cent. The [illegible] part of the Ontario supply [illegible] of Lanark [illegible]. The Provinces of New Brunswick and Nova Scotia [illegible] the remainder.

[illegible] a few years ago the methods [illegible] of preparing the syrup [illegible] were very primitive and [illegible] a more or less fine degree [illegible] cleanliness. The bark of the [illegible] cut with an axe, the spiles [illegible] were of wood and the [illegible] done in open iron kettles [illegible]. The resulting products [illegible] dark in colour with a decided [illegible] smoke, with usually a fair [illegible] of impurities that came [illegible] of bark, moss or [illegible] wind whisked into the [illegible] the open kettle. [illegible] was popularly believed that [illegible] maple syrup should be dark [illegible] and strong in flavour while [illegible] matter of fact the best and purest [illegible] amber in colour and free from any caramel or smoky flavour.

In those pioneer days maple sugar and syrup was made primarily for family use to augment a somewhat limited menu. In other words family necessity was the principal factor behind the industry. Cane sugar was a rare delicacy to the farmer living some distance from cities and towns, moreover it was too expensive. About 1850 the commercial possibilities of maple syrup began to be appreciated. In 1851 the total production was about 13,500,000 pounds. Forty years later it had jumped to 22,500,000 pounds. Lest anyone should think that racketeering is a modern practice, it is interesting to know that it was fairly well developed more than 40 years ago in connection with the maple syrup and maple sugar industry for the market became glutted with adulterated products and it appears little was done about it. In 1915 it was decided that it was [illegible] to [illegible] and protect the pure [illegible] that these essential Canadian products should be [illegible] unadulterated so legislation [illegible] to curb the racketeering was [illegible]. To some extent this was [illegible] but time disclosed that more effective measures were required and in 1930 the Maple Sugar Industry Act was passed and this put the crimp in the racketeer. The industry is now well established and [illegible] on a basis of integrity.

The restrictive measures of the Act prohibit adulteration of maple products, forbid the use of the word maple or any derivative of the word in the description of a syrup or sugar which is not a pure maple [illegible], require the [illegible] of syrups or sugars resembling pure maple products and the indication on menus or bills of fare in public eating houses, restaurants and hotels that where such is the case artificial maple flavour is used in [illegible] foods.

The constructive features of the Act include the establishment of standards for maple products which are described as products prepared directly or indirectly from the sap of the maple, the establishment of sanitary conditions under which maple products may be prepared, provision for the registration and [illegible] of sugar bushes and manufacturing plants and the provision of sanitary grades for maple syrup and sugar. Maple syrup must weigh not less than 13 pounds two ounces per gallon and contain not more than 35 per cent water. Maple sugar must contain not more than 10 per cent water; maple butter, maple cream and maple wax not more than 15 per cent water.

This legislation is intended to be beneficial to the industry by creating in the minds of the consuming public that pure maple products are assured to them.

While modern improvements have come with the commercializing of the industry such as the substituting of metal spiles and pails with covered tops, with scientific evaporators replacing the open iron kettles, the romantic association when the sap is running continues. It is then that the impish young demi-god Cupid is [illegible] for a busy time, for then with the vernal sap beginning to rejuvenate plant life a young man's fancy and a young maiden's too lightly turn to thoughts of what is not merely mundane. Young people who live in towns and villages within easy distance of a sugar bush get a thrill at a sugaring off party. There is the walk or drive to the woods on a sunny day in March, the sampling of hot syrup and tasting of "wax" that has been allowed to harden on the clean snow and then the trip home perhaps in the moonlight. What better setting could Cupid have for his work.

Sap gathering time comes at a period of the year—about the middle of March—when there is little other activity on the farm and the harvest provides the farmer with money to buy seeds and other necessities for his busy season just ahead.

There is a ready market for whatever amount of either syrup or sugar is produced. If the majority of people living in the urban centres of Canada really knew of the excellent food value of maple syrup and maple sugar, a food which in addition to being notably delectable also has [illegible] valuable medicinal qualities, the demand would increase as it should. The average annual per capita production of maple products as expressed in pounds of sugar is 2.2 lbs. and the average per capita export is 0.7 lbs. which represents an average yearly consumption of only 1.5 lbs. of sugar per person in Canada, a rather discouraging figure.

In recent years there has been an increased demand for maple products for flavouring by the confectionery industries but the biggest increase has come from tobacco manufacturers who use maple sugar to sweeten the weed in preference to molasses. One large cigarette making firm in the United States is a heavy buyer of Canadian maple sugar.

Not more than 35 per cent of the stand of maple trees in Eastern Canada is exploited. Therefore the possibility of development of this industry is plainly evident. With 80 per cent exploitation, as is the case in the United States, the Canadian crop would exceed [illegible] lb. in average year. A quickened demand would naturally stimulate the production.

The sap is running in the trees now and the resulting syrup and sugar will be on the market in a short time. It will be good then and equally as good at any time throughout the year and what has been said of strawberries is just as true of Canadian maple products, that doubtless God could have made better products than maple syrup and maple sugar, but doubtless he never did.

CACKLEHOOT

A man was travelling along the road one winter night when he noticed lights in some chicken houses. On making inquiries he was told that the lights were to give the chickens an extra meal and more exercise on the long winter nights.

Being of an inquisitive nature he was never so satisfied as when he was carrying on some experimental work, he set to work to create a breed of poultry that would not require lights at nights, thereby saving all the work and worry of attending them.

He caught an owl and bred it to a pullet, [illegible] producing a bird that was half chicken and half owl. The rooster [illegible] kept awake in the [illegible] while the owl part kept it awake at night.

It used to go around the barnyard calling "Cacklehoot Cacklehoot."

You all know how an owl will twist its head around to see if something is coming behind. Well, this proved the undoing of this new breed of chicken. One day they were in the barnyard when they saw a large hawk circling overhead and they watched it so long that they twisted their heads off and so another worthy experiment ended in failure.—Contributed

WITHHOLDS PRAYER FOR U.K. CABINET

LIVERPOOL, March 23.—Branding certain clauses of the Locarno treaty proposals "monstrous and unjustifiable" Canon T. A. E. Davey of Liverpool cathedral made a point Sunday night of not asking the congregation of 2000 to offer the customary prayer for His Majesty the King and his ministers.

"It is [illegible] with our customary manner to commend proposals of our ministers of state unto the blessing of Almighty God" he said. "To [illegible] the enforcement of a spirit of [illegible] upon Germany is a proposal unworthy of our creed and our [illegible].

"To [illegible] the occupation of their [illegible] by foreign soldiers is a proposal monstrous and unjustifiable and an unnecessary degradation of the soul of a great people.

CO-OPERATIVE BODY NAMED FOR ALBERTA

RED DEER, March 23.—Provisional organization of a new Alberta co-operative body was completed here Saturday when representatives of co-operative bodies all over Alberta met for the second and closing day of their conference, elected a provisional board of directors and drafted a [illegible] set of bylaws and constitution.

Name selected for the new body is Alberta Co-operative Council and [illegible] provisional board of directors [illegible] Saturday evening at Calgary consists of Norman F. Priestly, Calgary, representing the purchasing [illegible] and distribution of supplies; George Church, Calgary for the dairy industry; L. Hutchinson, Duhamel, Wheat pool; L. J. McKenzie, Lethbridge, [illegible]; J. H. Rhodes, Brant, poultry, and C. Jenson, Magrath for wool growers.

Inauguration of the Alberta Co-operative council marks the forging of the last link in the western section of an organization which the promoters hope to build into a Canadian chamber of agriculture, a body representative of every phase of agriculture on its economic side and performing the same kind of service for the farmer that the Canadian chamber of commerce, Montreal, now [illegible] for the merchant and manufacturer.

Similar bodies already exist in B.C. and the other prairie provinces. Quebec and some of the Maritimes have not yet seen their way clear [illegible] in the movement, definitely so western Canada is the pioneer in co-operation as in many other fields, [illegible] stated. The conference [illegible] was called by the directorate of the Alberta wheat pool, in response to [illegible] general request that they take the lead. It opened on Friday with about 30 delegates present and they organized with C. Jenson as chairman and R. H. German as secretary.

Better Avoid Disillusionment

"I want to see your beauty editor" said the caller at the sanctum of a [illegible] magazine.

"Are you following her advice?"

"[illegible]"

"[illegible] confidence in it?"

"[illegible]"

MANNING SEES END OUTSIDE BORROWING

CALGARY, March 23. —Time would come when the Alberta government would not have to go outside the province to borrow money, Hon. E. C. Manning, provincial secretary said Sunday in an address at the Prophetic Bible Institute.

Replying to a letter writer who had asked why the Social Credit government had to go to financiers for money, Mr. Manning stated there must be a transitional period before the government could discard the present economic system.

When the transition had been accomplished, he added, it would be unnecessary to go outside the province for money.

Turning to the government's codes, Mr. Manning, who is minister of trade and industry, said no merchant was under any obligation to join any existing organization. He wished to clear up any misunderstanding regarding retail and wholesale codes.

All merchants in the province have been invited to go to Edmonton to discuss the codes, Mr. Manning advised and all would automatically be members of a new provincial organization.

The present codes committee is only temporary he stated. There will be no price-fixing regulations except that a minimum price will be set up only when a merchant attempts to sell an article for less than he paid for it and a maximum price would be set when a merchant was making too much profit. Thus both producer and consumer would be protected.

Mr. Manning defended the government's recall legislation, attacked by some as difficult to put in operation, stating it was essential to have recall sufficiently difficult so it would prevent the danger of the legislation destroying the stability of the government.

At the same time, he added, it was possible to recall any member who was betraying his trust.

GILLESPIE SILENT ON SALT SCHEMES

Mum for the present over plans of the Alberta Salt company in which he is largely interested, John Gillespie, head of the grain company of that name, returned to the city Monday.

For the past two and a half months Mr. Gillespie has been visiting Pacific coast cities, including a stay in California. Mrs. Gillespie preceded her husbands return by some two weeks.

"I have nothing to say about the salt company," Mr. Gillespie remarked when queried as to whether the firm's plant at Fort McMurray would be reopened this year.

OFFICIAL IS SILENT ON ROAD DAMAGE

Homer P. Keith, deputy minister of public works, was silent Monday when questioned regarding a report that an estimated damage of $50,000 has been done by [illegible] hauling heavy timber on the Jasper highway prior to the issuing of a truck-travel ban on Saturday.

"I haven't anything to say," Mr. Keith told the Journal. "We are watching the road all the time and doing the best we can."

J. A. McNeil, secretary-manager, Alberta Motor association, stated that numerous roads in the province are in bad shape at present due to the first thaw of spring, but explained that no estimate of damage has reached his office.

Reports of motorists who visit the offices of the A.M.A. are often conflicting. One day a motorist will state that he found the going over a certain road difficult and the next day another will report that he got through with comparitive ease over the same route, Mr. McNeil said.

In some places, however, it is reported that complete re-surfacing will be necessary in order to place these sections in proper condition again. Damage amounting to thousands of dollars annually has been done to Alberta highways because the provincial government has not issued a ban on the use of these highways when the first thaw arrived the same report indicated.

INDUSTRIAL LOANS MOOTED IN ALBERTA

Interest-free loans for industries seeking financial help for beneficial expansion or to meet temporary financial stress were reported Monday to be a possibility for Alberta as the result of projected legislation which might be introduced during the next week.

Premier Aberhart had no comment to make on the report, but in authoritative quarters it was stated that the government has been considering prospects of bringing in legislation to that end.

It is believed that such loans might be granted by the government itself or by banks under provincial guarantees and with government payment of interest.

During the legislature debate on the Social Credit Measures bill last week, Liberal George H. Van Allen, K.C. asked the government to include in the "investigation" provisions some plan for inquiry into interest-free loans.

The motion was turned down by the house after Premier Aberhart had said that such provision was unnecessary because increased purchasing power would preclude requirement of such loans and because they were being provided for "by other means."

Just in Time

"Ye-es," hesitated the bridegroom, "these cakes are pretty good, but don't you think there ought to be just a little more—"

"Your mother made them." interrupted the bride quickly.

"—of them?" ended he.

SANITY IS RETURNING—

The wheat exporting countries of the world—Canada, Argentina and Australia—argue as follows: "The European wheat importing countries have permitted their minds to be obsessed with the thought that they could become self-sufficing. An acute nationalistic spirit developed with them and they set out to grow their own wheat and other foodstuffs." "Naturally", say the wheat exporting countries, "because the Europeans decreased their purchases of our wheat and other products, we, therefore, are unable to purchase as much of their manufactured goods as we used to do, and so we must try to manufacture our own."

This sounds very convincing until one hears the argument set out by the European importing countries, which in turn goes as follows: "The wheat exporting countries of the world, not content with selling us their wheat and other products, deluded themselves with thinking that they could become wealthier if they would manufacture at home all the goods which we used to send them as payment for their wheat, and so they developed a spirit of 'self-sufficiency' or 'nationalism', which prompted them to try to manufacture, in their own countries, behind high tariff walls, with the aid of depreciated currencies and other restrictions to trade, their own manufactured goods. Naturally, as they decreased their purchases from us of the manufactured goods we used to supply, we, of course, had no longer the same the same means of payment for their wheat, so, willy nilly, whether we liked it or not, we had no option but to try to grow our own wheat and other foodstuffs for the reason that the wheat exporting countries had deprived us of the means of paying them for their products".

Who is to blame? Here we have two arguments, on the surface equally plausible.

The truth is, that it does not matter in the slightest degree actually who is to blame, or who is deluded, or who first developed economic insanity. The important thing is, that the situation which is so harmful to all, and particularly to Western Canadian farmers, should be rectified as quickly as possible. Super-tariffs should be reduced, harmful restrictions should be curtailed, and goods permitted to flow more freely between nations. It does not matter how or by which nations this begins, for once started, imports will soon automatically increase exports, and exports will soon automatically increase imports.

Happily, it seems a beginning has been made, and so apparently economic sanity is returning to the world, just as it did after the Napoleonic Wars, when a similar condition prevailed in that depression (which was even greater than the present one) and when the people of all nations in Europe responded to the ideas of international freedom of trade as set out by Bright and Cobden.

It would seem safe to predict that the historian of the future will mark Canada as having been the first country after the depression to start on the road to economic sanity by attempting to decrease tariffs, to remove other hindrances to the flow of foreign goods coming into Canada, and by these means promoting the export of wheat from Canada to other nations.—(Searle Grain Co. Ltd.)

LOGIC VS. EXPEDIENCY—

ON FRIDAY last, a few individuals representing the Tofield Town Council and the Tofield and District Board of Trade formed part of a delegation that interviewed Hon. Mr. Fallow, Minister of Public Works at Edmonton. The real purpose of the delegation was to urge the Minister to build a highway from Edmonton to Cold Lake, a project that has already been half promised. The delegation was composed of different factions, some of whom wanted the road to follow one course, and others who wanted the road to follow another course. The Tofield delegation took no sides as to the route of the proposed road, but took advantage of the opportunity to press the claim of having the road which runs from Tofield 14 miles north, gravelled and made into a secondary highway. The Minister was quite courteous and while carefully avoiding any promises to the different factions, was quite definite in expressing himself as to certain phases of provincial road construction. He said in effect that he was not interested in building main highways running east and west for automobiles to race over at high rates of speed, but rather was disposed to build market roads running north and south. Political expediency has always tended to be spectacular, cold logic being almost an unknown quantity. It was then, gratifying to hear a government minister say that he preferred the logical building up of a province with a NETWORK of roads to spectacular highways reaching from boundary to boundary.

Of course, the fact that this statement of policy happens to fit into Tofield's scheme of things like a hand into a glove is a fortunate coincidence, but our ready endorsation of such a road building policy does not rest entirely upon the fact that it suits our purpose. A road system to be really effective should be a network, which as far as possible can be used both as highways and market roads. This is the logical method.

The Minister is a busy man as regards delegations, there is always somebody wanting something. Another delegation a day or so later from the Camrose district requested a secondary highway running north from Drumheller to Camrose. This road when constructed, if continued up from Camrose through Kingman to Tofield and then up to Ross Creek would be a connecting link between four main highways and if continued north from Chipman and joined to the suggested road from Edmonton to Cold Lake, it would link no less than five.

STATUS OF REWARD WHEAT

(Experimental Farms Note)

Since the naming of Reward wheat some fourteen years ago, its originators have made extensive studies of hundreds of selections with the hope of finding one which would produce more satisfactory yields than the original variety. A few Dominion Experimental Farms and private growers [illegible] have [illegible] carrying on a certain amount of selection work with the same objective.

During the past four years the best eight of these selections have been subjected to comprehensive tests at the Central Experimental Farm, Ottawa, the University of Alberta [illegible] the Dominion Experimental Stations at Swift Current, Scott, Lacombe and Beaverlodge. Extensive quality tests have also been made of the flour from each strain. As a result of these studies it has been found that while all eight strains are somewhat superior in yielding ability and equal in quality to the original more or less composite variety yet there is no real difference between the strains themselves. Since, however, one of these strains, designated Reward 22-42, has been grown fairly widely in recent years and since it has proven to be as good as any it has been decided to accept this strain as the basis for future registered seed stocks for the variety.

A special block of this strain at the Dominion Experimental Station at Lacombe, Alberta, and another at the Central Experimental Farm, Ottawa, passed field inspection for registration as Elite Stock Seed during the past summer while samples from each block sown in the so-called "verification tests" also proved to be up to the required standard. The Canadian Seed Growers' Association therefore has decided to accept these stocks as Elite Stock Seed on the condition that the resulting crops in 1936 meet established requirements.

As a variety Reward has proven fairly satisfactory in many sections throughout the Prairie Provinces although disappointing in others. Its quality is universally accepted but its return in bushels per acre have not always been what one would like.

The behaviour of this variety throughout the area seriously affected by rust in 1935 has won for it many friends as it gave a crop in many areas where neither Marquis nor Ceres was worth cutting.

The Elite Stock Seed of Reward 22-42 will be increased as rapidly as possible chiefly by members of the Canadian Seed Growers' Association.

100 YEARS OLD BANK BILLS TELL INTERESTING STORY

Early Currency Comes to Light in U.S.

Presented at

THE ROYAL BANK

Echoes of Canada's early days when a dollar was a "piastre" and pieces of eight" were practical units of currency reached Montreal to-day via the international banking route.

From a bank in the United States, The Royal Bank of Canada received for redemption a bundle of old bills issued by the Union Bank, Montreal, Lower Canada and dated 1838. Thin, some of them slightly dog-eared, the printing faded, they must have lain in some bottom drawer or old chest for nearly 100 years. There were 53 individual bills in the bundle in denominations of $1, $2, $3, $5 and $10. Their total value was apparently $140.80

The bills themselves tell a romantic story of Canadian pioneer business and finance. Engraved on the face of the "$10" is a representation of a railroad train, presumably the first railway in Canada, which began operations between Laprairie and St. Johns, Que. in 1836, two years before the bills were issued. By a coincidence, The Royal Bank of Canada this year has issued a calendar depicting the opening of this same railroad.

It is interesting to note, too, that the bills are printed in a polyglot of English, French and Spanish. The one dollar bill is engraved in French, English and a combination of French and Spanish, for the word "dollar" is translated on the opposite side into "une piastre." The use of the word "piastre" and its existence in financial parlance 100 years ago arose from the active trade which had grown up between Canada and the Caribbean.

Halifax and other Maritime merchants of 1838 were already familiar with this term through their dealings with many Spanish business men trading in the Maritime ports. Spanish currency was then common in Canada, particularly in the East and "piastres" were generally accepted as the equivalent of dollars. It is from this same term that our common expressions "two bits" and "four bits" originated; for the "piastre" was divided into eight equal parts, the "pieces of eight" of pirate fiction, each piece being a "bit"; thus "two bits" became a quarter or 25c, four bits, 50c and so on.

Other details of the old bills bring to light other unusual facts concerning the trading and financial practices of the early days. At that time there was no legal currency in Canada. Groups of men organized themselves from time to time into local banks and issued bills to facilitate business dealings. Frequently the bills were issued payable to some stated individual, or "bearer." Thus one of the $5 bills of the 1838 issue reads: "Union Bank pay on demand $5 to R. Harvey or bearer." Mr. Harvey's name being written in by the bank.

This story, unfortunately has a sad ending, at least for the people who have presented these old bills for redemption. Little is known to-day of the Union Bank of Montreal. "The Union Bank of Lower Canada" however did exist and later became the Union Bank of Canada, which was absorbed by the Royal Bank of Canada and it is perhaps because of this circumstance and the confusion between the names of the two banks that these old bills have found their way to the Royal Bank in Montreal.

Saddest of all, the "Counterfeit Detector" used by bankers as a book of reference, states in cold, unsentimental language: "Union Bank of Montreal: bank unknown and notes worthless."

But in this the "Counterfeiter Detector" is wrong. The bills are not worthless. People interested in old coins and bills value them at 10c each. Thus, by the passage of time, $140.80 becomes a mere $5.30

FREED MEISNER RESTARTS ON $10

LONDON, March 23.—With a $10 bill in his pocket, all the money he has in the world, David Meisner bought a one-way ticket to Windsor late Sunday and took leave of London scene of his court defeat as kidnapper of John Labatt, London brewer and later, of his vindication. The money was given him by Howard R. Cluff one of his counsel.

Before leaving Meisner called at the county jail to say goodbye to Michael McCardell, self-confessed kidnapper of Labatt, who gave evidence at Meisner's second trial which resulted in acquittal of the slim bookmaker from Covington, Ky. Meisner spent more than a year in [illegible]tiary after being convicted at his first trial. He will receive no reparation.

The two chatted for about 15 minutes then Meisner picked up his personal belongings which had been at the jail, shook hands with the jail guards and departed. He also spoke to Russell Knowles, convicted kidnapper, but did not ask to see John Basil Bannon.

McCardell, Knowles and Bannon will be taken to penitentiary within a few days, McCardell to serve a 12-year sentence and Bannon and Knowles 15 years each. The fourth member of the kidnapping gang according to McCardell is Albert Pegram who has not been captured.

Ontario born, Meisner, 56 said he will be content to remain in this country should he be barred by immigration authorities from returning to the United States.

One thing he is certain of, however, he is not going back to Covington where for years he operated a racing book. It was there he was arrested for the kidnapping of Labatt.

Convinced the publicity his case has received will handicap him in efforts to get work, Meisner said he doubted if he could get a job at Detroit. He was once a business office manager there and was a paymaster for a Detroit company before he took to following horse races.

For the present he will stay with his sister Mrs. Eva Lantis a widow at Windsor.

CANADIAN MAPLE TREES TO ENGLAND

A novel permanent reminder of Lord Baden-Powell's visit to Canada last summer is a group of young maple trees planted in Gilwell Park, England's famous permanent training camp in Essex. The trees were sent over late last summer.

A BIT OF CANADA IN NEW ZEALAND

An effort to grow Canadian maple trees from seeds is being made in the Antipodes. The seeds were sent out by the Boy Scouts Association for planting in an "International Circle" at New Zealand's training camp for Scout leaders. The New Zealanders hope ultimately to have trees from every part of the Empire and from all other Scouting countries of the world.

SCOUTS COLLECT 119 TRUCKS OF RELIEF CLOTHING

Although handicapped by cold and stormy weather 119 truck-loads of used clothing, shoes, bedding and furniture were collected in the third annual city-wide campaign of Toronto Boy Scouts on behalf of the Neighborhood Workers' Association.

SUGGESTED VARIETIES OF WHEAT TO SEED

Marquis wheat is 26 years old and has been the predominant variety in Western Canada for well over 20 yrs and is still the best wheat grown in the world to-day in spite of diligent efforts on the part of cerealists to supplant it with something better.

Writing in the University of Alberta Press Bulletin Dr. A. G. McCalla discusses the compartive qualities of Marquis, Reward, Red Bobs and Garnet wheat and hands the palm to Marquis of which he says: "Marquis may be considered as the standard of quality not only for Canadian but for world wheat. More and more we are coming to realize that this variety has some quality characteristics which few if any of the newer varieties possess. For this reason it is important that new varieties be equal to Marquis in general quality or our reputation will be injured.

Mr. McCalla however, points out that Marquis is unsatisfactory for the more northern areas due to its late maturing tendency to produce starchy kernels and tendency to produce a low protein, poor quality product there. So that Marquis should be restricted to the plains regions where it reaches the peak of its development.

Marquis was the result of a cross made by Dr. C. E. Saunders, Dominion Cerealist, in the early years of the century between Red fife and Hard Red Calcutta wheats. It was grown from the spring of 1904 in a relatively pure state for the first time in an isolated garden in Ottawa.

Next to Marquis Mr. McCalla recommends Red Bobs 222, but this wheat is also unsuitable for the central northern areas and the grey [illegible] as the kernels usually are piebald.

Garnet wheat is the earliest of the lot being at least six days earlier than Marquis. It gives good yields and gives kernels of good texture and [illegible] under adverse conditions [illegible] outstandingly free from a tendency to produce piebald kernels. For these reasons it has gained in popularity until it is the dominant wheat in northern regions. It quality however is not nearly the equal of Marquis and in northern districts the protein content is low. Garnet is now being graded separately and will consequently have to stand on its own feet insofar as prices are concerned.

Reward wheat is as early as Garnet in maturing but does not yield so profusely. However, the grain is of a very high quality—much superior to Garnet—and Reward will not injure our reputation for high quality wheat but if grown in the poor districts will definitely raise the general quality. It is recommended for the northerly areas.

So the choice rests between Marquis and Red Bobs for the higher protein areas of the south and Reward and Garnet for the northerly areas.

EPIC RESCUE OF STRAY DOG MAKES HEROES OF TWO COPS

A little brown pooch, short-haired, of no particular pedigree, whose plight brought him precariously close to death, now wags his tail in gratitude to friends who brought him aid and to two blue-coated officers of the city police who responded and rescued him from icy waters of the North Saskatchewan river.

The pooch, name unknown, had broken through the ice just above the Dawson bridge about 8 a.m. Tuesday. He battled the current which sought to pull him beneath the ice but his efforts to regain a foothold on the edge of the hole were fruitless, the crumbling sugary ice giving way beneath his forepaws each time he tried to climb out of the hole.

He was sighted by members of the family of C. G. MacDougall, 9913 87 street, who saw the small dog's game struggles from their river bank home. Mrs. MacDougall phoned the police and Constable Ernie Foster and Sam Kennedy quickly responded.

The MacDougal's flat-bottomed boat was pushed out over the ice and Ernie Foster climbed aboard with 13-year-old Gordon MacDougal. Veteran Constable Sam Kennedy pushed the boat further until the ice gave way beneath it and then Foster worked closer to the dog with a long pike pole.

Seeing rescue approaching the dog tired, was just keeping himself afloat by paddling with his feet, his chin resting on the edge of the ice. Foster heaved him aboard and Gordon held him until they were able to pull the boat back to firm ice.

Warm blankets and a hot stove awaited the chilled pup in the MacDougal home and he was put shivering, to bed.

For Sale: Regal field inspected smooth Awned Barley. A product of the University of Saskatchewan. Recommended by this institution as a high yielder. Government germination test machine run sample 98 per cent in ten days. Also a quantity of second generation Trebi Barley. Germination test 90 per cent in ten days. Cleaned ready for the drill. C. J. Kanal, Phone 918

FOR SALE—O. A. C., 21, Malting Barley. Machine run. Government Test 74. Apply A. J. Williams, Tofield, Alberta.

FOR SALE —Victory Seed Oats. Germination test 92 per cent. Free from wild oats. Phone R410 —A F Schultz, Tofield 4t

Same strain as that taking first prize at Toronto exhibition. Government growing period of this wheat practically the same number of days as garnet. One dollar per bushel up to 160 bushels, over that 90c per bushel. Apply to R. C. Phillips, Tofield. Phone 806

FOR SALE —GRAIN CLEANER Combination Mill, will separate wild and tame oats from wheat or barley, also wild from tame oats to your entire satisfaction. Bring in some grain and we will show you. M. C. Hammond, Tofield.

ESSAY WINNERS IN GRAIN FORUM TO BE BROADCAST

Winners of the Grain Forum Radio Speech Competition will be announced Tuesday March 31st during the Grain Forum Broadcast, according to an announcement made by L. W. Brockington, K.C., special counsel for the Northwest Grain Dealers' Association. The broadcast will take place over the following stations: CKY and CJRC, Winnipeg, CJGX Yorkton, CJRM Moose Jaw Regina, CKCK Regina, CFQC, Saskatoon, CJCA Edmonton, CFAC and CFCN Calgary, and CJOC Lethbridge at 8.30 p.m. Central Standard Time, and 7.30 p.m. Mountain Standard Time.

Professor A. Savage dean of the Department of Agriculture University of Manitoba, will deliver the adjudication. Winners of the three special prizes of $50.00 coupled with trips to Winnipeg as guests of the North-West Grain Dealers' Association and the Winnipeg Grain Exchange and winners of other prizes will be broadcast. Some hundreds of entries from all parts of Western Canada were received.

Judges of the competition in addition to Dean Savage are L. T. Chapman, editor "Nor'West Farmer" and P. M. Abel associate editor "Country Guide".

During the broadcast there will be special musical numbers and several short addresses.

TEMPERATURE DIPS TO 3 BELOW ZERO

With the weatherman practicing up to send March out like a lion the temperature reached a new low for the month of three degrees below zero early Thursday, the first sub-zero reading since the bitter cold spell ended Feb. 29th last.

The temperature climbed 11 degrees in two hours to reach eight above at 9:00 a.m. The high reading Wednesday was 22 above. Continued moderately cold weather, probable light snow was forecast. At 2:00 p.m. the reading reached 20 above. Snow flurries occurred during the morning.

ARTIFICIAL BROODING OF CHICKS

(Experimental Farms Note)

In the artificial brooding of chicks, there are a number of systems in successful use, such as the hot water pipe system, the force draft hot air system, the battery system and the colony house plan. Of these, under general Canadian conditions for the comparatively small grower, the latter system has proven most satisfactory. For a source of heat, the coal burning brooder stove is by long odds the most popular although for brooding in the late spring and summer, oil or electricity has many advantages.

The brooder stove is best used in a portable colony house which may be moved from time to time throughout the season to assure the chicks having fresh, uncontaminated ground over which to range. Don't overcrowd. A 10 x 12 house will accommodate 200 to 300 chicks nicely at the start. Be sure to supply sufficient heat at all times to ensure the comfort of the chicks. They should be kept as cool as may be for comfort but should always have a source of heat where they may go to rest in a temperature of about 100 degrees.

No thermometer is as good an indicator as the chicks themselves. Their actions will tell at once whether they are comfortable or not. When the chicks rest contentedly in a circle just outside the canopy of the stove you may know that the temperature is right. If they are not warm enough they will quickly tell you by their discontented chirping and their crowding to the source of heat. If too hot they will get as far from the stove as possible or go around with their beaks open panting for breath.

It is better to err on the side of too much heat rather than to little particularly in the early season.

When the chicks are first put in the brooder use a fine mesh guard to circle the cover a couple of feet from the edge. When they become used to the source of heat, the circle is enlarged and finally removed giving them the run of the entire house. Ventilate freely but avoid draughts. For further information write to the Department of Agriculture or to your nearest Experimental Farm for Circular No. 76 "The Brooding and Rearing of Chicks."

CITY TO START ON $1,000,000 POWER PROJECT

Program of power plant improvement, eventually to cost a million dollars or more, will be started almost immediately it was revealed by Commissioner Gibb Thursday after Alex Ritchie acting power plant superintendent, started for St. Paul to buy a $30,000 railway derrick.

The city faces the necessity in the near future of purchasing a 15,000 or 20,000 k.w.h. unit and while to various power plants.

So far, the commissioners have not discovered any way of financing power plant improvements at "reasonable rates" of interest.

M. Ritchie will examine railway derricks manufactured by different eastern concerns and will recommend the purchase of his choice when he returns to Edmonton. The derrick is required as a result of the increased coal consumption due to all-steam operation of the power plant.

ALTA GOVERNMENT BREAKS WITH ADVISER, MAJ DOUGLAS

Premier Aberhart and his Alberta government Tuesday smashed all relations with Major C. H. Douglas, world Social Credit leader and, for the past year "principle reconstruction adviser" to the province.

A spokesman for the government remarked bitterly and significantly that "it would seem that Major Douglas has forsaken the ship in the face of the coming storm. "With this view Premier Aberhart gave silent assent.

The decision was reached by a Social Credit party caucus which sat from 8:00 p.m. Monday to 1:00 a.m. Tuesday at the legislative buildings. Premier Aberhart announced the verdict in these words:

"The government will be reluctantly forced to cable Major Douglas, expressing to him that the ultimatum in his cable has precluded the possibility of further negotiations."

A high authority declared that the attitude of the caucus and of the premier could be summed up as this:

"Major Douglas has lost the confidence of the people who may henceforth hear his theories propounded either in the Old country or in other lands and will be forced to the opinion that Major Douglas is more of a theorist than a practical idealist."

Cryptic remark that Major Douglas' offer to come to Alberta "free" was "free except for a little matter of $100 a day" and indication that none of the three Albertans whom Major Douglas suggested as advisors to the government would be acceptable, were contained in a statement issued by Premier Aberhart Tuesday afternoon as he considered the government's position after breaking off all relations with the world Social Credit leader.

Major Douglas had suggested as possible Social Credit advisers to the government "if you do not want to go outside the province," H. E. Spencer former U.F.A. member of parliament for Battle River, Herbert Boyd of Edgerton, and Larkham Collins of Calgary.

It was recalled that at the time Major Douglas testified before the agricultural committee of the Alberta legislature in 1934 Mr. Collins declared that establishment of Social Credit within the province would be impossible and that in any case payment of basic dividends would require heavy increases in income tax.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else.

Uncalled For

Mother was always very particular in regard to the matter of saying grace before meals, and she made no difference when she took her small son for the first time to a restaurant to have tea.

After the waitress had served tea, she said to him "Now say grace, please, darling."

"But mummie" he said in surprised tones, "we're paying for this aren't we?"

BEAVER LAKE M.D. MINUTES

The Statutory Meeting of the M. D. of Beaver Lake No. 486 was held at Ryley, Friday March 13, 1936.

Councillors Chetney, Moen, and Kubin took oath of office to serve as councillors for Divisions 1, 3, and 5.

E. A. Moen was elected as Reeve. Wm. Logan was elected as Deputy Reeve.

The Municipal mill rate was struck at 6 mills.

The following mill rates were struck for schools: Amisk Creek 10; Anderson 12; Bathgate 7; Beaver Lake 5; Grand Forks 10; Holmdene 10; Ingram 8; Kolomea 15; Marconi 10; Shaw 8; Solberg 7; Tabbot 7; Thule 9; Ukrainia 11; Ustia 10; Vermillion Valley 10.

The Reeve and Secretary were empowered to ask for credits with the Royal Bank, Holden for Municipal and School purposes.

About 250 applications were approved for seed grain.

The council agreed to pay gopher and crow bounties the same as in 1935. ½c per tail and ½c per crow egg or pair of feet.

The council could not see fit to appropriate any great amount for Road Work, but alloted sufficient for road maintainance.

Recommendations were made to reduce M.A. of Mrs. Logan and Mrs. Sadnyk to $15.00 per month.

Several applications for relief were rejected.

The meeting adjourned at 10:30 p.m.

Transport Ways Of The Past

By W. G. Hardy, M.A., Ph.D. in the Canadian National Magazine

We live in a mechanized world. Our concrete highways rolling with automobiles and trucks, our airplanes, the carrier-pigeons of commerce, and, above all, the iron horse with its attendant brood of freight and passenger cars; these are western civilization's answer to the demand for safe and speedy movements of goods and peoples. How, one may well ask, did humanity manage before this trinity of transportation came into being? How were goods moved and people transferred from place to place?

A brief glance at commerce and transportation in the ancient Mediterranean world may give us a glimpse of the answer to these questions. In the earliest days rivers were the chief arteries of commerce. One does not need to instance the Nile, that long serpent which then as now coiled through the green strip of Egypt. Nor does one need to turn to the Euphrates and see the traffic of the Babylonians floatng down its chocolate-colored flood. The Italian Tiber presents us with a nearer example. Up its yellow stream, long before Rome was even a name, primitive traders made their way, carrying salt from the marshes at the mouth of the Tiber to the inland tribes.

The tiber, then, is one striking illustration of the importance of river highways in ancient commerce. Another example, still nearer home, is the famous route which developed at least as early as the fifth century before Christ from the Greek city of Massilia—modern Marseilles—up the river Rhone, down the Seine and so across to the Isle of Wight. Down this river highway came the tin and pearls of the savage Britons; up it travelled the manufactured articles of Greece, chiefly bronze work and pottery. For example, when, fairly recently, excavations were being made for an extension to the Bank of England a fifty century Greek vase was discovered. One wonders, looking at its graceful lines, what early British barbarian owned it and whether he bought it from merchants for some unknown but lovely British Helen.

By this time, of course, sea roads and caravan highways had been developed and had introduced trade between nations. As early as 2800 B.C. the Egyptians had sent a trading fleet to Tyre and Sidon of the Phoenicians. Some thirteen hundred years later Egypts great queen, Hatshepsut, dispatched a fleet through the canal connecting the Nile with the Red Sea and around to the land of Punt, which is now British Somaliland. This expedition, as is learned from the record which was inscribed on the queen's temple at Dehr-el-Bahri, brought back myrr-trees, electrum, panthers, cattle,, dwarves, ebony, ivory and gold dust. Similarly, a thousand years and more before Pericles and the sea-empire of Athens and at least a half a millenium before the Phoenicians found their way to Britain, there was a great naval empire centering in the island of Crete, with trading-posts from Spain to Asia Minor. In the graves of this people, the Minoans, are found amber from the Baltic, and white jade, said to be from China. We must, then, give up the notion that the nations of antiquity, who were really far younger people than we, were circumscribed in knowledge or in communications. Long before Greece and Rome and the beginnings of modern civilization, the seaways had tapped not only the river-routes but the great caravan highways as well.

The Roman Empire, however, saw ancient trade reach its zenith. Under the Caesars, particularly in the first two hundred years of the Christian era, Rome was the centre of the Mediterranean world. From her Forum stretched out the strands of an intricate banking and credit system so that towns in Romanized Britain and municipalities in Egypt were often in debt to Roman bankers. Along her sea-ways and her great roads came the commerce of the world, wheat from Africa, gems and elephants from India, furs and amber from the Baltic, purple dye from Phoenicia, even silk from far-off China. "All roads lead to Rome" was the saying—and this saying was literally true, since the distances of the Empire were computed in Roman miles from the golden mile stone which stood in the Roman Forum.

The Roman roads, indeed were one of the marvels of the ancient world. There were in all some 47,000 miles of main highways in the Roman Empire; and in building them the Romans built for all time. As a rule their roads ran in a straight line over hills, through tunnels, across viaducts. When a road was begun the engineers first dug two parallel trenches from ten to fifteen feet apart and then excavatd the road-bed between them. On a layer of broken stones was super-imposed a stratum of smaller stones mixed with mortar. Next came a bed of cement in which were fixed massive blocks of stone; while drainage was secured by rounding the surface of the road and putting runnels at the side. Small wonder then that in places the Roman roads are still in use and the bridges which the Romans built have defied the test of centuries. When there was a flood a few years ago in the southern part of France all the modern bridges were swept away. But the old Roman bridge at Nimes stood the shock.

CONTINUED ON BACK PAGE

LOCAL AND PERSONAL

Mrs. Chevreaux and daughter Peggy Lou of Killam is visiting her parents, Mr. and Mrs. Furman for a couple of weeks.

Miss L. Ross visited friends in Edmonton for a week.

Miss Ruth Paul returned to her home in Edmonton after visiting Lois Thompson for a short time.

Mr. and Mrs. George Coutts spent the week-end in the city.

The Jolly Twelve Bridge Club met at the home of Mrs. Innes on Wednesday evening this week. Honors for the evening were won by Thelma Jobb and Mrs. Thomas.

Mr. A. Sinclair is away on his holidays for a few weeks.

The sympathy of the district is extended to Mr. W. O. Glover on the death of his brother Mr. Alfred C. Glover, who died in the University hospital on March 28th, following an operation. He leaves to mourn his loss his wife and six sons, four brothers and four sisters.

LAKESHORE

Mrs. L. H. Graham spent the week end in Edmonton.

Mrs. John Wood was victim of the prevailing epidemic of flu last week.

Mrs. Bethel also is on the sick list. Not a very cheerful budget of news this week but seems to be the best Lake Shore can do. Here's hoping next week's will be happier with all the sick ones much improved.

It is with sorrow that we have to report the passing of Mr. T. E. Seale, which occurred early Thursday morning. Mr. Seale was taken ill a week or ten days ago, a cold later developing into pneumonia. The strain upon him caused by the pneumonia effected his heart, death being caused by a combination of pneumonia and heart trouble. Our sincere sympathy, with that of the community, goes out to the bereaved ones. A more complete report will appear next week.

'FULL OF WEALTH, DYING OF INANITION,' LABOR CHIEF ROGERS QUOTES CARLYLE

OTTAWA, March 31.—The world had passed through serious depressions in years gone by, Hon. Norman Rogers, minister of labor, told the house of commons Monday, discussing the employment commission bill. In former crises, as in the present, no easy solution had been found.

"Sometimes for moral discipline and mental exercise I turn to the pages of Carlyle," the minister said. He referred to the opening chapter of "Past and Present" by that author which was published in 1843 during a period of acute distress, not only in Great Britain but in other parts of the world.

"England," Thomas Carlyle wrote on that occasion, "is full of wealth, of multifarious produce supply for human want in every kind; yet England is dying of inanition. With unabated bounty the land of England blooms and grows; waving with yellow harvests; thick-studded with workshops, industrial implements, with 15,000,000 workers, understood to be the strongest, the cunningest and the willingest our earth ever had; these men are here.

"The work they have done, the fruit they have realized is here, abundance, exuberance on every hand of us; and behold some baleful fiat, as of enchantment, has gone forth saying "Touch it not ye workers, ye master workers, ye master idlers; none of you can touch it, no man of you shall be better for it; this is enchanted fruit."

Explaining that England of that time had possibly not more than one-half its present population, the minister continued to quote that some 2,000,000 "it is now counted, sit in workhouses, poor-law prisons; or have "out-door relief" flung over the wall to them—the workhouse bastille being filled to bursting and the strong poor-law broken asunder by a stronger. They sit there, these many months now, their hope of deliverance as yet small .... They sit there, pent up as in a kind of [illegible] enchantment; glad to be imprisoned and enchanted that they may not perish starved."

There was a vast difference, the minister said, in the attitude of Carlyle and that of some modern reformers towards the solution of economic and social problems. Some of the modern reformers had suggested one simple way out of the difficulty. The minister was convinced the entire teachings of history were against any such view.

He quoted Carlyle on that phase: "It seems to be taken for granted by these interrogative philosophers that there is some "thing" or handful of things which could be done, some act of parliament, 'remedial measure' or the like which could be passed whereby the social malady were fairly fronted, conquered, put an end to; so that, with your remedial measure in your pocket, you could then go on triumphant and be troubled no further. 'You could tell us the evil' cry such persons as if justly aroused, 'and do not tell us how it is to be cured.'"

"How is it to be cured?" Carlyle asked. "Brothers, I am sorry I have got no Morrison's bill for curing the maladies of society. It were infinitely handier if we had a Morrison's bill, act of parliament or remedial measure which men could swallow one good time and then go on in their old courses cleared from all miseries and mischiefs. Unluckily we have none such, unluckily the heavens themselves in their rich pharmacopoeia contain none such."

The minister declared it was only by slow careful methods the situation could be met.

MR. AND MRS. H. HICKS AND FAMILY LEAVE FOR EDMONTON

After spending a good number of years as residents in Tofield, Mr. and Mrs. H. Hicks and family left for Edmonton on Thursday of this week. Mr. Hicks has been with the Northwestern Utilities staff in Tofield for many years and is now with the same company in Edmonton. Friends in Tofield will greatly miss Mr. and Mrs. Hicks in the social life of the town, but all wish them much happiness in their new home.

On Monday evening last in the Curling rink waiting room, a number of Henry Hick's friends held a farewell party for him. Games were played during the evening and at lunch time Charlie Worton presented Henry with a small token of friendship from his friends. Henry responded very suitably saying that he would miss all his Tofield friends very much and thanked them all for their kindness in giving this party in his honor.

On Saturday evening a few friends gathered at the Firth home to bid Henry Hicks good bye. A good time was had and a lovely lunch was served by the hostess.

The Anglican W. A. will hold an Easter tea and sale of home cooking at the Curling rink on Saturday April 11. There will also be a sale of daffodils, Easter lilies and aprons. Leave your orders for flowers with Mrs. Clutterham, phone 100.

FAIL IN EFFORTS TO UNSEAT MAYOR

VEGREVILLE, March 31.—Charges against Mayor J. B. Holden and Councillor Neil Primrose of making false statements on their candidate's acceptance papers in the recent municipal election were dismissed by Magistrate Gore Hickman in Vegreville police court Monday. Councillor A. W. Shaw, charged with the same offence will appear in police court at a later date, his case having been adjourned due to absence of his counsel.

Allegations that the property for which Mr. Primrose is assessed does not properly belong to him were made by the crown which produced abstracts from the land titles office relative to the property. The dating of the information on the abstract early in 1930 made it possible that the situation there outlined had changed, pointed out the magistrate in dismissing the case, and he advanced an observation the crown should have proved that certain encumbrances which then existed were still a charge on the land.

The contention of the prosecutors that the onus of proof had shifted to the defendant was disallowed. In the case of Mayor Holden the bench held that Mr. Holden had signed his papers in the belief that he was entitled to hold the office of mayor and since no intent was shown he had little to do but to dismiss that charge.

On the stand on his own behalf, Mr. Holden outlined his long years of public service in the town and his long residence therein. He said he felt he had more than sufficient equity in the property registered in the land titles office in his wife's name to entitle him to hold office.

It was intimated at the close of the case that an appeal would be made to a higher court.

Mother and Daughter Banquet Greatly Enjoyed

On Friday evening March 27, in the basement of the United Church, the Tofield C.G.I.T. groups held a very successful Mother and Daughter banquet. The room was very prettily decorated in blue and white, the C.G.I.T. colors, and the tables looked very attractive when the Mothers and daughters sat down. A short sing song very quickly put everyone at their ease and was greatly enjoyed. Minnie McAllister acted as Mistress of Ceremonies and called upon Mrs. Allan to give a short talk on "Treasures Mothers receive from girls." Pat Firth responded to this by telling the group of the "Treasures that the girls receive from their Mothers." Mrs. Firth greatly interested the audience with her topic "Treasures that girls and Mothers may enjoy together." Rev. Allan then spoke on "Pearl of Greatest Price," which was both interesting and helpful. Joyce Innes read a "Parable of a Mother" and Louise Stevenson have a reading entitled "Mothers". A candle lighting ceremony was then held which was very beautiful and effective. The evening closed with the girls singing "Taps"

ROGERS SCORES WAGE CHEATERS

OTTAWA, March 31.—Employers who pay low wages in order to throw a part of the burden of maintaining their employees on relief agencies were charged with "treason against the state" in a time of national emergency by Hon. Norman Rogers, minister of labor, as he moved second reading of his bill to establish a national employment commission in the house of commons Monday.

The government, he declared, would use to the full the weapon of publicity against employers of that type. The minister mentioned no names but indicated information had come to him that some employers were guilty of the practice he condemned.

Since 1930 the dominion has spent $200,000,000 on relief, Mr. Rogers said. This total did not include public works costs or loans to provinces

UNITED CHURCH NEWS

Arrangements are being made to hold Easter Services in the United Church.

There will be special Easter music along with the beautiful Easter hymns.

At the close of the evening service on April 12th, Communion will be held in the United Church.

FOOD POISONING

Food has played an important role in history. A lack of food has been a factor in revolutions; the cry of the hungry masses for bread was heard in both Rome and Paris and has been re-echoed in most cities. A deficiency in the quality of food caused scurvy which decimated armies and navies. Tainted foods have caused many an epidemic of national significance.

"Food poisoning" is a term which should be restricted to the ingestion of such poisons as arsenic in food. "Food infection", or intoxication is a better term to express the condition which results from the use of foods contaminated with certain bacteria and their products.

The usual history is that from two to six hours after eating occasionally delayed for as long as twenty-four hours, there is abdominal pain, vomiting, chilliness, prostration, diarrhoea and fever. These symptoms recurring among a majority of people who have partaken of the same food, the symptoms described are attributed to the food.

Spoiled meat, or ptomaine the toxic product of decomposition, used to be blamed. We now recognise that true ptomaine poisoning rarely if ever, occurs because no one would eat meat so rotten as to contain ptomaines.

The cause lies in the food eaten but it is really the bacteria present in the food which do the harm, for, when taken into the body they are capable of producing disease. If the animal from which the food was derived was diseased, the food may be contaminated with bacteria. Generally however the food is contaminated during its preparation, or while it is standing around before being used.

Different groups of bacteria may be responsible for an outbreak of food infection. Measures of protection should include having all food prepared by healthy people who are cleanly in their habits; food utensils should be scrupulously clean; prepared foods, such as salads should be kept covered and on ice until used.

Botulism is a food toxaemia; it differs from the food infections in that the symptoms are caused by the action of the toxin or poison produced by the bacillus botulinus. This toxin, one of the most powerful known, gives rise to marked and alarming nervous manifestations; disturbance of vision; inability to speak; muscular weakness; there is no fever.

Usual sources of botulism are pork, sausage and, in this country, home-canned vegetables. Unfortunately food so contaminated may be normal in appearance, taste and smell. Fortunately, however the toxin is destroyed by heat so that protection can be assured by the simple process of boiling all canned foods particularly the home-prepared variety, immediately before use. It need hardly be added that bulged cans should be discarded, as should canned food that shows gas formation or evidence of spoiling.

Questions concerning health addressed to the Canadian Medical Association, 184 College St. Toronto, will be answered personally by letter.

BRITISH GOVERNMENT

We have preserved so far the right and freedom of our men and women and the existence of our Parliament during a time when in every other country such things have been trampled down by tyranny and dictatorships. We have preserved the decencies and the tolerances, the stability and the dignity of our island life whilst almost everywhere beyond our shores there is a very different scene. Under her ancient Monarchy and Parliament Britain has so far proved herself able to come through the fiercest storms of war and peace that have ever beaten upon mankind.—Mr. Winston Churchill

IMPROVED WHEAT TRADE PROSPECTS

There are indications that the European demand for Manitoban and Australian wheats is likely to improve in the near future. Supplies of home-grown wheat in Italy are becoming scarce and between now and harvest Italy may have to import wheat. Although "sanctions" would prevent their buying Australian and Canadian wheats it would mean purchases of wheat elsewhere, which otherwise would have been shipped to the markets of the United Kingdom. It seems reasonably sure that between now and the next harvest British millers will have to depend largely on Canada for their supplies of wheat. Belgium is also likely to become a buyer of Manitoban and Australian wheats, as the supplies usually drawn from Russia and Argentina have come to an end.—The Northwestern Miller.

"FISHERMAN'S HEAVEN" IN CANADIAN ROCKIES

Rex Beach describes new fishing grounds at Amethyst Lake in Jasper National Park

"There must be millions of trout in Amethyst Lake (in Jasper National Park in the Canadian Rockies) for whatever part of the lake we explored produced an ample number. We released many more than we kept and the only problem we had was to induce the bigger fish to strike." Thus Rex Beach, noted fisherman-author sums up his fishing experiences at Amethyst Lake during last season—the opening season for fishing in these hitherto barren waters. The story of his trip is told by Beach in the April issue of Cosmopolitan magazine.

Following the successful "planting" of Maligne Lake with speckled trout rainbow trout were introduced into Amethyst and other lakes in the Tonquin Valley area of Jasper National Park. These lakes were opened for sport fishing in 1935 and Rex Beach was one of the first anglers to try conclusions with the sporty game fish. In his article he recounts that wet flies failed to raise the trout so he had recourse to smaller patterns of dry flies. Then the action commenced and he and E. G. Poole, Tourist Representative of the Canadian National Railways secured splendid catches at all parts of Amethyst Lake.

"Canada is doing a fine work in stocking these high barren lakes of hers" states the noted author-fisherman. "The first experiment was made at Maligne Lake where Pennsylvania brook trout were introduced. They grew to prodigious size and raised big families. Fishermen hurried up there. Trails were improved, a chalet was built and Maligne Lake became world-famous for the splendor both of its fish and its scenic setting. Now trails and a lodge are now projected for Amethyst Lake.

"This section of the Rockies is already a fisherman's heaven and the quality of the sport is steadily improving."

Lest his experience of "dry flies only" should discourage less experienced fishermen, Beach states: "No doubt a beginner would have fully as much fun as we had and perhaps catch more fish, for those trout will gobble worms or liver or strike greedily at a trailing bait; but once a person acquaints himself with the technique of fly-fishing he can never again enjoy the cruder forms of angling."

Continuing westward from Jasper National Park to the Pacific Coast, Beach states: "From Jasper Park west on the Canadian National are countless lakes and streams that squirm with fish waiting to give a few fast rounds with all comers. Of course one doesn't have to go that far to get good fishing; it is to be had almost anywhere if one takes the pains to look for it. Nevertheless these Canadians are farsighted. They have pursued a much sounder conservation policy than we have and they are building wisely for the generations of fishermen (and women).

THOUSANDS GET B.C. LOG JOBS IN TRADE BOOM

VICTORIA, March 28.— Greater activity in the standing timber market and in logging and milling operations than at any time in the history of Vancouver island was revealed in a survey made public Saturday.

Within the past few weeks several billions of feet of standing timber mostly Douglas fir, have been acquired by operating companies in a series of deals running into millions of dollars. New operations are being opened on both the east and west coasts of the island.

About 1,500 men are being added to the staffs of logging and milling companies in the area between Victoria and the Nanaimo-Alberni line.

Above the Nanaimo-Alberni line the big camps in the Campbell river area will be re-opening on full production within the next few weeks, taking on more than 2,000 men.

"Paper clothing is coming soon," says Robert Edmond Jones. It may seem strange for a while, dropping into a book-binder's for a press.—Milwaukee Journal.

Girls in New York are having their sweetheart's portraits painted on their fingernails. Later, of course, they will be under their thumbs.—Regina Leader-Post

MILLION BEES NOW ON WAY TO EDMONTON

Two bees or not two bees. The much-maligned quotation that runs something like that has been changed to "one million bees, please."

Edmonton's population will be increased during the next two weeks by 1,000,000 bees—arriving in 100 packages direct from their native clover patches in California, according to H. W. Love, prominent apiarist supply dealer to restock the Edmonton apiaries in preparation for another summer of honey production, he announced Saturday.

Strangely enough, those 1,000,000 buzzers will not stay here long. All will be dead in approximately three weeks. In the meantime, however, they will have produced eggs that will later mean more bees to work here all summer.

Mr. Love has transferred his business premises to 9539 106 ave.

RIMBEY HORSEMAN IS PLANNING ROUND-UP OF OUTLAW BAND

RIMBEY, March 28.— Francis Marshall, one of Rimbey's out-standing horsemen and "broncho busters" is seriously considering making a trip out west, beyond the Saskatchewan and north of the Brazeau river, to catch up with a band of wild horses that is said to be roaming the wild land in that district.

For years, trappers, Indians and travelers have come back to Rimbey telling tales of the roving band of outlaws whose numbers have been increasing since 1906 when the first bunch of about 50 head were driven out west of the Medicine Valley to escape a death sentence handed down by the government whose representative, a Mr. Sweetapple, was ordered to shoot a great many horses in the district on account of an epidemic of glanders.

Escaped Execution

These abandoned horses had been the property of Shelby Reed who, when he attempted later to round them up found that they had drifted more than 100 miles from home and into a locality which made re-claiming difficult if not impossible.

Estimating that the cost of recapture, with the necessity of providing pack trains, building corrals, etc., would be in the neighborhood of $1000 Mr. Reed abandoned the idea for the time being. In 1906, before he had had opportunity to proceed further with the matter he fell ill and died.

Since that date, a second lot of horses, owned by a Mr. Tipping of Buck Lake is supposed to have joined the band and the herd now numbers more than a hundred.

If all the fantastic tales that drift back here are true the story of the magnificent pacing stallion which heads the band of wild horses would equal any of Ernest Thompson Seton's best.

Many attempts have been made by horsemen to capture these animals but guarded and led by the stallion leader whose cunning and acumen is beyond understanding the horses either avoid the traps or outwit their pursuers.

Mr. Marshall believes that right now is the logical time to attempt the capture when the past severe winter has lowered the stamina of the beasts.

PREMIER RENEWS PLEAS FOR CHURCH

CALGARY, March 30.— "You can't expect to get prosperity if you don't go to church" Premier Aberhart told followers at his Prophetic Bible institute. Sunday was "go to church Sunday"—the day he had invited people of Alberta to attend church.

"I hope you haven't forgotten to do what I asked you to do" the premier said. "How many were at church this morning? Let's count them. About 12% out of an audience of 1,000 have been to church. Well that's not so good is it.

"You can't expect to get prosperity if we don't go to church. Won't you go to church once this Sunday at least? Get in some church, go to the nearest church, go to your own church. I want you all to acknowledge the Lord. It isn't much to ask and anyway it is your duty, so that next Sunday you will be able to say 'yes, I went to church.'

"This would give me greater inspiration than anything that you can do so please go to church.

"There seems to be no room in our hearts now except for business and work. I want to break that horrible bondage. You will never get anywhere unless you recognize God. Will you do it or will you say 'no.' If you say 'no' then all right, remember what you are saying. There will be no hope for you."

ENGLISH WEEKLIES PICK ON ABERHART

LONDON, March 28.— "Douglasism," or Social Credit, could be tried only by a sovereign state powerful enough to subject its bankers to its will, says the New Statesman and Nation, left-wing intellectual weekly commenting on the parting of Major C. H. Douglas and Premier Aberhart of Alberta.

"There was never a real prospect of Alberta Social Credit-ers being able to carry out the policy of Douglasism," the Journal continues. "It is beyond the reach of a provincial legislature, subordinate in most matters to dominion authority.

"These hard facts would remain even if Aberhart were not at bottom rather an evangelist than social reformer."

For more interest attaches, the Review said, to what is happening in New Zealand, where the Labor government "with no Douglasite pretensions," is trying to nationalize the central bank and establish public control over the credit supply.

As for the citizens of Alberta, the New Statesman and Nation comments, "they still are waiting for the promised social dividend and seem likely to wait. Aberhart is busy borrowing money from the dominion to tide him over his financial difficulties and while Alberta remains in pawn to its bondholders he will hardly be free to experiment in unorthodox finance."

The Spectator another weekly, declared Premier Aberhart "has quarrelled with the federal government because he demands its assistance in refunding debts while refusing the guarantees which the government properly demands.

"He has quarreled with the bondholders because they do not see the value of voluntary conversion without an increase in security, and finally has broken with Major Douglas himself. It is no rash prophecy his next quarrel will be with his own supporters. It is difficult to see what he can offer them when he has neither Major Douglas nor federal credit behind him."

The situation may still become an imperial problem. The Spectator adds owing to the determined opposition of Alberta, along with "the other impoverished provinces" to the amendments desired by the federal government to the British North America act.

"A man should always learn his station in life," said the pompous gentleman in the smoking room.

"So he should," agreed his fellow passenger. "There's nothing so annoying as being carried on to the next one and having to take the train back."

ABERHART GIVEN FULL SUPPORT BY S.C. CAUCUS

Application of Social Credit principles in this province has been expedited rather than given a set-back by the government's break with Major C. H. Douglas, principle reconstruction advisor, in the opinion of a special committee of the Social Credit party studying the whole situation.

With the responsibility for action now placed definitely upon the government's shoulders, the Douglas termination of contract frees the government from further delay on that score, it is claimed by a spokesman for the committee.

"Freed from the vague and ineffective advice, the government is prepared to accept its responsibility. It is eager to take definite action forward to implement its mandate," said the spokesman Friday night.

Caucus of Social Credit-ers was solidly behind Premier Aberhart in his stand during the negotiations with Major Douglas, it was announced by the committee.

The message given the premier by the caucus follows: "You were elected by the people to give Alberta practical Social Credit. We were elected to give you the power to do this. With or without Douglas you are our leader to this end and have our united and unqualified support in this matter."

In addition the caucus pointed out that the advice asked from Major Douglas generally came too late for action to be taken. Owing to the great distance immediate advice of a complicated nature could not be obtained in time. When any advice was not clear from four to six weeks would be involved in clarifying the matter. Thus refusal of Major Douglas to come to Alberta had provided a solution for these difficulties, S.C. claimed.

AIRMAN TO BRING $81,000 FUR LOAD

Largest aerial shipment of fur this winter will be made next week when a Canadian Airways aeroplane will leave McMurray on a 2,740-mile flight into the Arctic to bring out an $81,000 cargo of Arctic white fox.

For three days blizzards sweeping north have held Pilot Matt Berry, veteran airman of the far north grounded and Saturday he was standing by" waiting to leave for Coppermine on the Arctic coast where he will make a base camp for his difficult flight.

From Coppermine the aviator will take off on a 210-mile flight across Coronation gulf to lonely Read island. Returning to the base he will unload and leave on a 560-mile flight northeast to Cambridge Bay on the south shore of Victoria island.

IMPROVEMENT IN ENGLAND VISITOR SAYS

In the city of London, England, we do not know what depression means any more, stated A. L. Rawlinson, general passenger agent, Canadian Pacific Steamships, London, England, in an interview to the Bulletin Monday. Mr. Rawlinson came to Montreal on a business trip but his trip in Western Canada is a holiday tour to renew old acquaintances.

"During the last two or three years and particularly in the last eighteen months there has been a wonderful change in conditions in England. London hasn't a depression any more. Everyone is busy and the people are happy. Other parts of England are recovering from the depression though at a more gradual rate," Mr. Rawlinson said.

"What about war?" the visiting official was asked.

"I left England on March 6 and at that time the people refused to get excited about a war scare. There isn't any war atmosphere in England. The people are optomistic and consider war a remote possibility."

"We have heard considerable about the building trade in England and schemes for housing. Would you care to say a few words about it," the reporter ventured.

"Yes. The British housing schemes are the most ideal arrangement I can think of. If you want to build a home you go to a building society, submit the plan of the house you want and pay a deposit of 10 per cent of the total cost. The society builds your home and charges you rent, which is about the same as ordinary rent (sometimes less) for 12, 16 or 20 years depending on your ability to pay. At the end of that time you own your own home. In the meantime you have security of tenure and pay the taxes annually. Nearly everyone in the middle class in England is building and paying for homes on this basis. It assures you of a home without burdening you too much, and it stimulates the building trade thus creating employment."

"How is the tourist trade from North America to Europe?" asked the reporter.

"It is good. Every year for the last three years it has been steadily improving. People are beginning to travel again which is a good sign," Mr. Rawlinson stated.

There is further proof that the depression is about over: Business men are going to Washington to shake their fists instead of their knees.—New Yorker.

Some 30 bales of the valuable furs, collected from the Canalaskan trading posts will be flown out to McMurray and shipped south by rail to the fur market.

TAKE ADVANTAGE OF THIS BARGAIN OFFER AND BANK THE DIFFERENCE

Here is a real offer that will save you money . . . Give yourself and your family lasting enjoyment and entertainment the whole year through . . . This is all you have to do.

Select any 3 of these famous Magazines

MOB PSYCHOLOGY—

NOT SO very long ago an Edmonton broker was asked why stocks fluctuated as much as they do. His reply was simple and direct "mob psychology," and of course, this answer would meet with the approval of most trained observers of the stock market.

However, the stock market is not the only place where "mob psychology" appears; in varying degrees it appears in every walk of life, economic, political and religious. Psychology may be generally described as "the science of mind." However, a more definite description would be that used by M'Dougal, namely "that psychology is the positive science of the behavior of living things." But no matter how psychology is described, any person who is intelligently observant, can see its effect day by day.

While not exactly opposed to, or the opposite of psychology, reason and logic are at least entirely different, so much different in fact, that when mob psychology is working among any large number of people, reason and logic generally is lying dormant. In times when mob psychology is aroused by any particular thing, men and women in group formation condone things and do things that in more normal times they would consider themselves incapable of.

A week or so ago the writer viewed the picture "A Tale of Two Cities." As all who have read this Dicken's masterpiece knows, "A Tale of Two Cities" deals at considerable length with incidents connected with the French revolution, 1789 to 1799. The moving picture version of this great story graphically portrayed the deadly work of the guillotine, those people believed to be unfriendly to the Commune being ruthlessly beheaded one by one, to the applauding shouts of the populace. While of course the movie camera can portray the most distressing things without the accompanying suffering, real tragedy lies in the fact that as regards these scenes portraying the French revolution, hundreds of executions did take place, a fair trial and calm justice being practically non-existent. The plaintive remark of the little seamstress, who was being executed for no other reason than that she once worked for one of the hated Lourgeoisie,, "I cannot undertsand it," is full of meaning; as also is the reply of Sidney Carton, "It is not understanding we need now, my dear, but courage."

The tempestuous evidence of mob psychology is generally most in evidence following a period of economic distress. The French people who were down trodden and half starved under the monarchy of the day, lost all sense of restraint and in building a new social order, which was a good thing, used methods both cruel and senseless, which was a bad thing. Many times since the French revolution have the fortitude of different peoples been tried, and while perhaps the misery and poverty among present day peoples is not as great as that experienced by the French in 1789, yet it is bad enough to cause widespread dissatisfaction, and unless in some measure relieved may even cause revolt.

In times of economic prosperity, people in general are satisfied with the government, at least, concerned with their own affairs, they are indifferent. But the very things people do while the prosperity wave is upon them, sensible and right as they appear at the time, almost invariably bring about a depression period. Agricultural and business expansions, borrowings, purchasing on time, all pile up and like a large wave rolling in from the sea, finally breaks, carrying with it in its backwash much financial wreckage.

When business is booming mob psychology is expressed in a jubilant tone, but when the inevitable reaction sets in the same "instrument" emits an ominous rumble.

Mob psychology is more akin to passion than reason and logic and this fact should not be lost sight of. In times of high prosperity or deep distress, not passion but reason is required. There are few who do not remember the real estate booms with frenzied activity and inflated values, this was mob psychology in its most jubilant form, but again the scene changes to the Regina riot and we have the same thing but in a tragic setting.

One thing is fairly certain that mob psychology in its most virulent form is of short duration. The higher the pitch, the shorter the note. Movements that rise with the speed of a prairie fire almost invariably die as quickly, those things that last are engendered by calm reflection, reason, logic and above all a sense of tolerance and fair play. The citizens of Alberta have, for too long a period, allowed mob psychology to govern their actions. In fact one might say that they have done so in one key or another since the province was formed. What is needed now, what has always been needed, is not a replica of that boyhood game of "follow your leader," but an intelligent and reasonable consolidation of individual gains. The population of this province is composed of so many thousand thinking units, and the future of this province depends upon just how these units will function. If they choose to follow the hue and cry of popular clamor they will be caught in the backwash of trouble. If they choose to carry on in a calm, reasonable, practical and intelligent manner, the seasons as they unfold themselves will bring a measure of prosperity and the contentment it creates.

A PROBLEM IN COWS

It is 50 years in Montana since a problem in cows appeared that kept many a prominent cowman of the territory awake o' nights. Originating in Connecticut January 14, 1886, the problem came to Montana late in April of that year. It was a simple question.

"A man has a cow, which has her first calf at the age of three, and one each year until she was 21. Her offspring are all heifers, and equally as productive. How many head of cattle will the man have at the end of 21 years?"

The problem did not look like a monstrosity at first. It appeared as harmless and peaceful as a new-born babe. In fact, it seemed so easy to one cowman that he would not pass it on to his neighbors, but would sit down quietly and produce the answer without any difficulty. This cowman, who was also the publisher and editor of a newspaper in Miles City, sat down one afternoon early and continued until about sundown in answering what he considered an easy problem. The result failed to materialize under the use of much ink. The more he worked at it the madder he got. At last he gave it up in despair. Somebody simply had to work the problem. The editor offered it to the public.

Answers began to come in the next day. At first it was pure fun reading them. Then it got monotonous. The pigeon holes began to fill. The cow began to get dreary. The editor read letters about that cow all day, and dreamed of her at night. Life began a symphony of mathematical cows—or rather, a dirge of algebraical calves.

The differences in the results convinced the editor that none of the answers was correct. It was submitted to other editors. One of the elite of the printer's ink "who slingeth and archeth" gave one glance at the problem and gently murmured:

"I don't half-er head for mathematics."

The conundrum editor was staggered. He did not dare approach another man in his office. Taking the problem home he put the members of his family to work on it. Tears and reproaches were his reward the next night. Every scrap of notepaper in the house had been used. Columns of figures covered the walls, in his imagination. Waxing fierce, the editor once more attacked the problem. His first impulse was to declare that no cow ever lived for a period of two decades. There was no hope for a solution in that contention. He then argued that no such cow ever lived. By a priori reasoning the editor succeeded in convincing himself that no sane farmer would allow such a disgraceful prolific cow to live.

But still that "suppose" stared him in the face. Then he manfully set all quibbles aside and began to wrestle. He wrestled as did Jacob with the angel—all night. Victory was his reward, and he triumphantly declared that at the end of 21 years that farmer should have 1,873 head [illegible].

The deluge of answers sent in varied. Figures ranged all the way from 64 to 11,886. The writer who sent in the 64 answer later forwarded a post card stating he had forgotten the old cow. The answers indicated the intense interest which the problem a[illegible].

Far from relieving the quandary the question persisted: "Was the editor's answer correct?"

GIRL GOES CLEOPATRA AND CHORINE ONE BETTER: TAKES HER BATH IN MAPLE SYRUP

PETERBOROUGH, Ont., March 30.—Cleopatra took baths in milk and a broadway chorus girl once took a bath in champagne, all of which is as nothing, residents here say, to what one Peterborough girl took a bath in.

In a hurry to get that Saturday night rite attended to, with insufficient water in the automatic heater, she hastened downstairs and discovered two large kettles steaming merrily on the kitchen stove.

She took them upstairs, poured them into the water already in the tub, sprinkled on some bath salts and then got in.

The mixture felt strangely sticky. It would.

Downstairs her father was yelling that someone had lifted his two kettles of maple syrup.

New Champion

A stranger was dining in Aberdeen. When the meal was over he handed the waiter a penny tip.

The waiter looked at the coin in his hand. "Do ye ken, mister," he said, "that the champion miser in Aberdeen gies me tuppence?"

The stranger held out his hand smilingly. "Here," he said, "shake hands with the new champion."—Answers.

OTTAWA FACTS ARE YET VALID

OTTAWA, March 30.— The Canadian government in negotiating the Reciprocity Treaty with the United States did not interfere with the margins of preference laid down in the Ottawa agreements it was stated today by Sir Francis Floud, high commissioner for the United Kingdom.

Sir Francis had no comment to make on the report that the British government would ask for further tariff reductions because of the reduced duties granted by Canada on American goods.

It is understood however, that the next Dunning budget will voluntarily increase the margin of British preference by reducing still further the present preferential duties on British imports, preparatory to a general revision of the preference situation at the Imperial conference of 1937.

HITLER WINS BY 97.73 PER CENT

BERLIN, March 30. Germany expressed in votes yesterday its overwhelming approval of Reichsfuehrer Hitler's policies, including his remilitarization of the Rhineland and denunciation of the Locarno treaty.

Under the pressure of the Nazi propaganda machine, Der Fuehrer won the greatest majority the head of any state ever received, in the election of candidates for the Reichstag.

The final official recapitulation of returns showed that 97.73 per cent of those who voted marked "X" in the sole circle on the ballots.

Of the 45,428,641 qualified voters 44,952,476 voted and 44,400,522—or 97.73 per cent showed their approval of the Reichsfuehrer's policies. There were 542,954 invalid ballots, and 476,165 persons qualified to vote did not exercise the franchise.

If a voter left his ballot blank or treated it in any manner other than placing an "X" in the circle, it was counted invalid. This group, therefore, included those who wished to express disapproval of the Reichsfuehrer's policies.

The final figures, corrected once by an official announcement were still subject to possible slight alterations.

The early ballot counting showed Hitler having as much as 99.1 per cent approval but more invalid votes showed up later.

The greatest majority Hitler had had in previous plebiscites was in Dec. 1933 when 95.1 per cent of the voters approved Germany's quitting the League of Nations and the disarmament conference.

From the list of 1035 candidates Der Fuehrer will select the Reichstag members who will probably number about 700 depending on the total number of ballots cast.

Exhortations had been dinned into the ears of the German people since March 7 to vote for Hitler and Nazi trumpets and squawking horns called them to the polls.

A fine spring day favored Der Fuehrer's efforts to rally the people behind his foreign policy in an election with only one vote possible—that of approval.

J. S. WOODSWORTH WOULD CONSCRIPT WEALTH NOT YOUTH IN EVENT OF WAR

MONTREAL, March 30.— Should Canada become involved in war, there should be conscription of wealth rather than youth, J. S. Woodsworth leader of the Co-operative Commonwealth Federation, said here Sunday. Mr. Woodsworth was a speaker at a symposium on the possible occurrences of the next decade.

The C.C.F. he said, was opposed to Canadian participation in any war, but there would be no progress as long as Canadians bowed and scraped to wealth.

The parliamentary institutions of today did not resemble real democracy, Mr. Woodsworth said. There was an element of unreality in the house at Ottawa and it was out of line with the real needs of the people. There was too much individualism rampant in the land, he said. The greatest citizen was not the man able to grab the most, but the one who could give the greatest service to his country.

YOUTH JUST COULDN'T STAND BEING FUGITIVE

WINDSOR, March 30.— Freedom weighed heavily on the brow of John Bernat, 20 years old.

Arrested Saturday night on a warrant charging a break-in at Kingsville, near here, he was lodged in Walkerville police station. After a few hours in there he picked the lock and disappeared.

While most of the city police force was out hunting him, he turned up late Sunday at Windsor headquarters, surrendered, said he couldn't stand the suspense of being a fugitive.

"Every actor has a well-nourished ego."—John Mason Brown.

S. C.'s WANT RIGHT TO ISSUE CURRENCY

CALGARY, March 30. — Social Credit-ers believe the sovereign right of monetization of Alberta's credit should be in the hands of the province and that means the right to issue currency, apart from coin, according to three members of the provincial legislature interviewed here during the week-end.

The three members—H. E. Wight, Lethbridge; Rev. Peter Dawson, Little Bow; and James Hartley, Macleod, believed the right could be obtained to issue paper from a provincial bank or state credit house. This would give to the people they said all the advantages now enjoyed by the banks, including the right to loan credit.

PICKWICK COACH TRAVELS AGAIN

LONDON, March 30.—Celebrating the 100th anniversary of the publication of "The Pickwick Papers" by Charles Dickens, the famous Commodore coach—the actual coach which bore the Pickwickians to Rochester 100 years ago—set forth again Monday from the Golden Cross with its quintet of illustrious passengers. Departure of the coach was part of the elaborate ceremonies arranged by the Dickens Fellowship and other devotees to celebrate the centenary of that immortal work.

The Dickens Fellowship is holding its 40th convention here simultaneously with the celebrateion. A total of 40 branches are represented, including Toronto, Edmonton, Victoria, Vancouver, Philadelphia, Copenhagen and Brisbane.

NO ALBERTA RELIEF GIVEN TRANSIENTS

Transients coming to Alberta from other provinces will not be granted provincial relief and such men must return to their own provinces if they need assistance because of unemployment. It was made known Saturday by A. A. Mackenzie, chairman of the Alberta relief commission.

His warning came in a formal statement in which he noted that "there are a considerable number of men drifting to this province from other parts of Canada where they have been receiving relief, anticipating that immediate care will be given them in Alberta."

Due to the fact that the federal department of national defence will no longer accept this class of men in the dominion's relief camps, the provincial commissioner said: "It should be definitely known that the province has made no provision for them, as it does not consider it its responsibility to care for single unemployed men from other provinces and no provision will be made.

"Single men who enter this province will do so knowing that their applications for relief will not be accepted."

At the same time, Mr. Mackenzie reaffirmed that "it is the desire of the government that all deserving cases which are provincial responsibilities be provided with the necessities of life when employment is not available and their condition is no fault of their own."

PROPOSE CHANGE IN RADIO CONTROL

OTTAWA, March 28.—When the commons radio commission opens its investigation into broadcasting supervision in Canada it will have available a draft bill on which it may form a basis for its inquiry.

The draft was given Friday to members of the sub-committee which is preparing the agenda by Hon. C. D. Howe, minister of marine and railways, but the minister made it clear it had not been passed upon by the government.

Under the draft the Canadian radio commission would be abolished. Part of the control now exercised by that body would revert to the minister of marine and part to a broadcasting corporation with a board of seven directors named by the government and a general manager.

The popularity of mystery stories isn't surprising. It's the only kind of thing you can read with the radio going.—Detroit Free Press

WIT AND WISDOM

Agreed

Landlady—"I'll give you just three days in which to pay your board."

Brakeman—"All right. I'll pick the Fourth of July, Christmas and Easter."

****

Just $5 Where

A pretty, young nurse was selling poppies when a potential buyer, a young man, told her that he would give her a $5 bill for a poppy, provided she would promise to nurse him if at any time he went to her hospital. She agreed.

"By the way," the young man asked, "where is your hospital?"

"I am at the maternity hospital," meekly replied the pretty nurse, putting the note into the box.

****

That Settles That

"I don't suppose you don't know of nobody who don't want to hire nobody to do nothing, don't you?"

"Yes, I don't."

****

Too Soon to Say

Officer—"You've been doing sixty miles an hour. Don't you care anything about the law?"

Lady—"Why, officer, how can I tell? I've only just met you."

****

His Own Boss

Arthur—"So your new job makes you independent?"

Albert—"Absolutely. I get here any time I want before eight, and leave just when I please after five."

****

Naturally!

Discontented wife—"Several of the men whom I refused when I married you are richer than you are now."

Husband—"That's why."

****

The Difference Age Makes

Young men talk of what they are going to do; old men talk of what they have done, lazy men talk of what they would like to do.

****

Well Stated

"Do you believe in clubs for women?" asked the reporter of a local newspaper, interviewing the visiting celebrity.

"Yes," he replied judiciously, "if kindness fails."

WON'T APE COAST SILVER CAMPAIGN

Plan of the Vancouver chamber of mines to aid Canadian silver mines by means of a campaign to encourage circulation of silver dollars will not likely be adopted by the chamber of mines in this city, it was revealed by an official of the Edmonton organization Friday.

Despite a report from the coast city to the effect that a branch of the Central Bank of Canada wired to Ottawa for an additional supply of the new Canadian silver dollars due to the increased demand caused by the campaign, such a "flood" of silver dollars would be impractical here, an official believed.

He expressed the opinion that people in this part of the country "are not accustomed to going about with the added weight of silver dollars in their pockets."

City bank officials reported that few of these original silver dollars known as the King George V. issue, are in circulation at present as souvenir hunters and collectors are going in for hoarding them in a big way. An order for 600 new Canadian silver dollars placed at Ottawa by one city branch some time ago remains unfilled it was stated.

TRANSPORT WAYS OF THE PAST

(Continued from front page)

[illegible] these roads went the traffic [illegible] the Empire, goods in transport, [illegible] carrying letters, legions on march and even travellers being [illegible] the state transportation [illegible]. It seems almost incredible [illegible] that there were first and sec[illegible] coaches and tickets, that [illegible] were sleeping coaches called [illegible] and stop over tickets. In [illegible] there were passen[illegible] five years or [illegible] for the life of the reigning [illegible]. A regularly-organized freight [illegible] service also existed as [illegible] a developed postal system [illegible] the time of Cicero the great Ro[illegible] for instance, we learn [illegible] from three to five days [illegible] letter from Rome to Pom[illegible] of 150 miles.

[illegible] all this there were sta[illegible] "mutationes" for the [illegible] horses ridden by the cour[illegible] "mansiones" for the carry[illegible] money and goods and [illegible] freight service [illegible] were supplied [illegible] and carriages and their [illegible] well as with doctors and [illegible] and in a good day's journey [illegible] would pass some six [illegible] these post stations. In [illegible] of the famous "Roman [illegible] was quite usual for people [illegible] means to take the "grand [illegible] Italy to Greece and [illegible] the Aegean islands and [illegible] way of Syria and Pales[illegible] Egypt, there to wonder at the [illegible] by which the modern world [illegible] amazed. And one must re[illegible] here that the Roman bankers [illegible] the equivalent of our letters [illegible] credit and that guides and tourist agencies are no new invention.

We have touched very briefly on transportation of goods and passengers in the Roman Empire. But [illegible] of the Roman roads would [illegible] complete without referring to [illegible] military purpose. The Romans [illegible] their great system of roads during their conquest of Italy in order to facilitate their holding of the [illegible] territory. The famous Appian Way, for instance, was built in 312 B.C. so that Roman legionaries could be marched swiftly and directly [illegible] the heart of Campania. Later when the Romans subdued central Italy they extended this road straight through the Apennine mountains to [illegible] at Brundisium, the modern [illegible] which is still the port of [illegible] for Greece and the Near [illegible] their provinces were [illegible] their great roads, the "railroads" of the empire, [illegible] Britain to Mesopotamia and [illegible] forests of Germany to the [illegible] Africa stretched the bands [illegible] along them, in case of [illegible] the hobnailed boots of [illegible] moving swiftly to re[illegible] or to crush revolts.

[illegible] the roads went the [illegible] Rome followed. Then, as [illegible] followed the flag. As [illegible] B.C. when Mithridates [illegible] Great attacked the small Roman [illegible] we hear that 80,000 [illegible] were massacred [illegible] and, incidentally [illegible] when the news [illegible] reached Rome "credit [illegible] the Roman bankers [illegible] investments in the East [illegible] however to dis[illegible] of the Roman [illegible] system strikingly [illegible] this art[illegible] visualize the Ro[illegible] stretching out to all parts [illegible] like giant tentacles [illegible] soldiers and mer[illegible] and vehicles [illegible] and passengers we [illegible] remember the invisible but [illegible] strands of credit which [illegible] just as effectively [illegible] her legions did.

[illegible] then in ancient [illegible] taken care of in a very ef[illegible] even if it was less speedy [illegible] the mechanized present.

In fact the more one studies the var[illegible] features of life in ancient times [illegible] realizes that there are [illegible] few things under the sun [illegible] new. Roman civilization [illegible] modern life as effect[illegible] her roads once scored the [illegible] world.

[illegible] the Romans built well is [illegible] the fact that traces of their [illegible] still exist. They had not [illegible] machinery which modern builders [illegible] in their work, but they did have [illegible] manpower with which to [illegible] their building. The modern [illegible] builds on a different basis, since changes are more frequent and what [illegible] it today is sometimes torn up tomorrow to make way for improvement.

But in the past as in the present, transport is the first step toward progress in building up a country or an Empire and nowhere has that lesson been brought home more clearly to a people than it has to those who dwell on the North American continent.

GAS PUZZLE FACES NORTH FLYING MEN

While British Columbia solons probe the oil and gas set-up on the coast and Edmontonians kick at the high price of motor fuel, the northland aerial transportation companies are coping with a gasoline price spreads of their own.

The flight of Canadian Airways Pilot Mat Berry to Cambridge Bay disclosed that after gasoline leaves Edmonton for down river points it gets dearer and dearer approaching Fort Norman and then gets cheaper and cheaper along the Arctic coast.

Thursday Berry was hung up at Coppermine waiting for the Arctic weather to clear for his hop to Cambridge Bay. Hudson's Bay boats working out of Kittigaziut just east of the Mackenzie delta caches Canadian Airways gas at Reid Island and Cambridge Bay. It costs $1 35 a gallon at Fort Norman and Great Bear and after freighting through the delta around the coast and through Amundson Bay, Coronation Gulf and Dease Strait, the price is 35 cents cheaper.

It's just one of those things that only the oil companies can explain.

WENSTOB WINS

Eddie Wenstob, the Viking Alberta light heavyweight flash last night in Edmonton out-pointed and out-fought Jimmy White of St. Paul, Min. and was awarded the fight on a technical knockout in the ninth round. As a result of his win Wenstob is in line for a try at the Canadian light heavyweight championship now held by Charlie Belanger. They will meet in a title bout next month. Wenstob's fight with White was scheduled for 10 rounds.

OBITUARY

Mr. Ben Lasher an old timer of this district died at his home near Dodds on Monday following a paralytic stroke on Thursday March 26th.

SALES TAX MAY 1st

New provincial retail sales tax of two per cent is to come into effect on May 1 according to terms of a bill to impose taxes on the ultimate purchaser of certain commodities which has been introduced in the legislature and given first reading.

Under this tax $2,000,000 will be taken from the pockets of Alberta citizens in the next fiscal year, this being the amount of estimated revenue.

The purchaser must pay the tax at the time of purchase and the vendor must turn the amount collected over to the provincial treasurer.

The articles exempt from this tax are listed as follows: "bread, milk, coal, gas; water; newspapers; farm machinery and repairs thereto, binder twine; electricity; agricultural products produced within the province when sold by the producer; fuel oil within the meaning of the Fuel Oil Tax act; liquor within the meaning of the Liquor Control act; money or things in action or the evidences thereof and any other commodities which may be declared by the lieutenant-governor-in-council to be commodities to which the act does not apply."

Where several commodities are purchased on the same occasion and as part of the same transaction by the same purchaser the tax shall be payable on the aggregate price of the commodities so purchased.

When the price amounts to or includes a fraction of a dollar, any fraction of a dollar which does not exceed 50 cents shall be treated and computed as 50 cents and every fraction that exceeds 50 cents and does not exceed $1 shall be treated and computed as $1 according to the act.

A refund may be given by the minister when it is shown to him that the commodity was purchased for purposes of resale and not for use of the purchaser.

While it is the intention to bring the sales tax into operation May 1 there is an alternative bill to provide for a two per cent retail sales tax. This bill also has been given first reading in the house but is dependent upon necessary authority being provided through an amendment to the British North America act. Operation may be effected through proclamation.

It appears that the government intends to bring into operation first the act to impose taxes on the ultimate purchasers of certain commodities as there is no question of its powers to impose that tax. Possibly the act would be kept in operation for a year to take advantage of the experience gained, even if federal authority is given to bring the other act into operation.

As the session of the house is about ended steps will be taken immediately by the provincial treasurer's department to organize the machinery to handle the administration of the sales tax.

MOUNTIE 'ORIGINAL,' COL. J. WALKER DIES

CALGARY March 31 —Pioneer of pioneers who had known western Canada from its Indian days when he led the first detachment of the North West Mounted Police—now the Royal Canadian Mounted Police—to the prairies Col. James Walker, 90 died suddenly in hospital here early Tuesday.

Soldier, policeman, rancher and [illegible] Col. J. Walker was the last surviving officer of the N.W.M.P. established in 1874 also rode into Winnipeg more than half a century ago. He was the longest service militia officer in the dominion, enlisting in 1861 at Carluke Ont. where he was born. At the age of 68 he served in the great war being stationed in England and Scotland as a forestry expert.

Col. Walker first came to Calgary in 1880 and a year later took up homestead land in what is now East Calgary and later when the city was incorporated he was prominently identified with business and community enterprises.

To the Indians of the west he was "a friend" and to them he was known as "the eagle that protects," a title bestowed upon him when he was made an honary chief of the Cree tribe.

WOULD STOP FIRMS AIDING PARTY FUNDS

OTTAWA March 31 —Contribution by corporations to election funds should be barred by law. Hon. H. H. Stevens, Reconstruction party leader and member for East Kootenay, asserted before the commons committee on elections Tuesday.

One dollar per bushel up to 100 bushels, over that 90c per bushel. Apply to R. C. Phillips, Tofield. Phone 804.

NEW CALENDAR MAY BE LAUNCHED IN 1939; IS A SIMPLIFIED FORM

A good deal of space is being devoted in newspapers and periodicals to the revisions proposed for our calendar with a view to simplifying it. The Vegreville Observer comments on an article appearing in The Financial Times intimating that the practical common-sense which seems to actuate those wishing to make the calendar more uniform has not won the day for it appears that people just naturally resist changes and the more logical the change the stronger the resistance.

It is pointed out that our present calendar goes back 2,000 years to the day of Julius Caesar. With certain adjustments made in 1582, it became known as the Gregorian calendar. This was adopted by the British Empire in 1752 and is now in general use throughout the entire world.

The present movement for calendar reform retains the 12 months under their present names. The new World calendar would have 364 days. The 365th day would be a holiday following the last day of December. Leap Year day would come every 4th year likely at the end of June. The year would be divisible into equal halves of 182 days each and four equal quarters of 91 days each. Easter would be fixed on April 8th and all other religious holidays would be fixed by it. January, April and October would have 31 days each and all the rest would have 30 days. All the 31-day months will begin on Sunday. February, May, August and November would start on Wednesday and all the others on Friday.

It is proposed to start the new calendar on January 1st 1939. It is hoped to educate public opinion to this change in time for measures to be taken about it. It could not be done in 1933 when the most recent attempt to introduce the new calendar was made.

CORRESPONDENCE REQUEST PASSED

Declaring that although the government had nothing to hide, there were some things which it was not in the public interest to make known, Premier Aberhart Monday again parried an opposition request in the legislature for tabling of the complete correspondence between the Social Credit administration and Major C. H. Douglas, chief reconstruction advisor, who has terminated his contract with the province.

D. M. Duggan, Conservative leader, who brought the subject up, said that he had no desire to embarrass the government by asking continually the correspondence be tabled. It was difficult for members of the assembly, however, to get a proper and true perspective by reading portions of the correspondence in the press. He felt that if the government could give an assurance that the complete correspondence would be brought down at this session, it would not be bothered again on that score.

HON. W. N. CHANT DID NOT GET DOG TAX BILL UPHELD IN LEGISLATURE

Newspapers gave bold headlines last week to the terms of The Dog Tax and Sheep Protection Act introduced by Hon. W. N. Chant, minister for Camrose. It was sweeping in its terms and proposed a new tax of $1.00 on all dogs in Alberta. The revenue was to be used for compensation for sheep destroyed by "killer" dogs. It was estimated that 3,200 dogs would be taxable in Edmonton. Calgary would have been taxed on about 3,000 dogs under the new act. The taxing was to have been made a duty of the councils in urban centres of the municipal offices for the district. However, Mr. Chant failed to interest the legislature in the act this year.

It is reported that the bill brought a storm of criticism from all sections of the House. A motion to give second reading to the bill was defeated on Friday last, just before the House turned down an amendment to give the bill a six months' hoist. Hon. Mr. Chant stated that the dog bill had been proposed by the Sheep Breeders' Association. Mr. Chant said: "I realize that the members of the House are more dog-minded than sheep-minded."

It is thought the dog bill may not appear again this session but the non-support of his colleagues does not for a moment mean that the minister of agriculture is without support for his proposed measure outside of the House, and a survey would probably show that many, other than sheep-breeders, consider that a provincial dog tax is one that might well be imposed. If as stated in one article there are more than 6000 dogs in the cities of Calgary and Edmonton alone, with a comparitive number in the smaller urban centres to say nothing of the rural areas, it is no wonder the minister saw a way to raise a tidy sum to take care of the sheepmen's losses caused through the depredations of marauding dogs.

Prepare For Spring

As The Season Approaches to Discard Drab Winter Garments for Crisp, Colorful summer Wear Our Store is Showing a Complete Stock of the Season's Latest Offerings. Here are the Latest Arrivals.

Thomas E. Seale Well Known Resident Passes Away

The death occurred on Thursday morning last of Thomas Elgin Seale, well known and highly respected resident of the Lake Shore district, at the age of 44 years. The late Mr. Seale has resided at Tofield since 1919 and since that time made an ever widening circle of friends. Well educated he farmed according to advanced methods and took great interest in the junior grain and live stock clubs, rendering invaluable aid to them. In the realm of sport he was quite active, playing baseball for the Tofield team for several years, later sponsoring sporting activities among the juniors of his own district. Mr. Seale was first taken ill with a bad cold which later developed into pneumonia, later still heart trouble developed which caused death.

Thomas Elgin Seale was the son of the late Robt. D. Seale of Tofield. He was born in Grandby, Que. July 26th, 1892. He attended Grandby High school and later Trinity College, Toronto University. He was among the first to answer the call for volunteers in 1914 going overseas in September of that year. He embarked for France in February 1915 and in April of the same year was wounded and invalided to England. In September 1915 he was made Lieutenant in Royal Field Artillery and in September 1916 was awarded the Military Cross. In June 1917 he was gassed in action and returned to England never being physically able to return to the front. He came to the Tofield district in 1919 and started farming north of town in which district he has since resided. On July 15, 1924 he was united in marriage to Miss Bertha Neale. He leaves to mourn his loss a loving wife and one daughter, Miriam; two brothers, W. R. Seale and Marven Seale and a step-mother Mrs. R. D. Seale all of Tofield. Uncle and aunts include Mr. and Mrs. R. T. Seale, Granby, Que.; Dr. John Seale, Salem, Mass; Mr. E. N. Seale, Spokane, Wash.; and Mrs. W. W. Fallows, Vancouver.

The funeral was held on Saturday, a large number attending to pay their last respects to a highly regarded citizen. Service was held at Holy Trinity Anglican Church, Rev. A. Wallis officiating. The floral tributes were very numerous and beautiful. Interment took place in the Tofield cemetery.

The pallbearers were: A. N. Booth, J. Secord, J. B. Warner, T. R. Murray, C. Kenway and J. Ferguson.

Floral Tributes

Bertha and Miriam; Mildred and Willie; Myrtle and Marven; Nettie and Stan; Dorothy and Bert; Oma, Clarence and son; Mr. and Mrs. J. Appleby and family; T. W. Ferguson and family; Mr. and Mrs. Johnston Ferguson; Bert, Lillian, Mildred and Annie; Mr. and Mrs. Joe Murray; Mr. and Mrs. C. W. Piper; Bill Lumsden; Janet, George and Ray; Stanley Scott; Anita and Cyril Kenway; Rev. and Mrs. Wallis; Mrs. Bethel and family; Mr. and Mrs. J. Secord and Jim; Gene and Fred Rodgevill; Returned Comrades, Tofield district; The Vestry and W.A., Holy Trinity Church Tofield; Junior Grain Clubs; U.F.A. and U.F.W.A. Tofield; Lakeshore Ladies' Aid; Lakeshore School District; The Trent family; Grace MacKinnon; (Mr. and Mrs. T. R. Murray and Mr. and Mrs. W. H. Anderson;) The Children of Lakeshore School; Mr. and Mrs. Lester Nelsed and family; (Mr. and Mrs. Jim Francis and Mr. and Mrs. Geo. Francis;) Mr. and Mrs. J. B. Warned; Mr. and Mrs. J. O. A. Letourneau and Darcy; Mr. and Mrs. M. C. Hammond; Mr. and Mrs. Guy Walker; R. C. Phillips and family; Lovat Ross; Mr. and Mrs. Ed. Kallal; Mr. and Mrs. Geo. Bruce; Mr. and Mrs. F. Googlein and family; Mr. and Mrs. Chas. Kallal and family; (Mrs. Moss and Mattie; Ollie and Verlyn;) Mr. and Mrs. L. H. Graham and family; Mr. and Mrs. T. A. Jones and family; (Mr. and Mrs. John Wood; Maggie, Lloyd and Mel Wood; Minnie McConnell;) (Mrs. Glen Bailey; Mrs. M. Englesham; Mrs. J. A. Jacobson; Mrs. E. J. Anderson; Mrs. Ollie Moss; Katy Desjarlais;) Mr. and Mrs. T. D. Ferguson; Mr. and Mrs. Jim Ingram; Mr. and Mrs. Chas. Ingram; Mr. and Mrs. A. F. Schultz; Mr. and Mrs. Earl Carlisle; Mr. and Mrs. G. W. Sears; Mr. and Mrs. John McGinitie;) (Mr. and Mrs. Stanley Brown; Mr. and Mrs. W. A. Mitchell; Jason and Mrs. Henderson; Mrs. E. McMullen; Mrs. Annie Lee.)

LOCAL AND PERSONAL

Mrs. Haines of Cardston visited her sister Mrs. Thomas over the week end.

Mrs. McKeown of Calgary was in town on Saturday to attend the funeral of the late Mr. Seale. Mrs. McKeown is a sister to Mrs. Appleby.

Mrs. Bud Hannan and family visited Camrose for the week end.

Mrs. E. Weatherick and small daughter visited in St. Paul last week.

Miss Ella Taylor, Graham Allan and Lee Burnett motored to Vermilion on Wednesday. They will return on Thursday bringing Aileen Allan home who has been attending the Vermilion College.

Mr. and Mrs. H. Green visited Edmonton on Saturday.

Mr. Simmons is the relieving agent at the station while Mr. Sinclair is spending his holidays at the Coast.

Harry Bowick had a rather painful accident last week when a piece of emery flew into his eye. He was taken to Edmonton where he received medical attention.

Miss M. Redig spent the week end at Edmonton.

Mrs. F. Hill is visiting Anne Swift for a short time.

MOTHICIDE SPECIAL—2 for $1.00.—Mrs. J. W. Robinson, Tofield.

Mrs. McCullie of Neilburg, Sask. is visiting at the Jobb home over the Easter holidays.

On Sunday afternoon a lovely tea was held at the hotel in honor of Miss Thelma Jobb, bride of this week. Miss Helen McCauley and Miss Muriel Malcolm were the hostesses. The room was beautifully decorated with daffodils. A delicious lunch was served by the hostesses, Mrs. Hammond pouring the tea. On behalf of those present Muriel presented Thelma with two lovely pictures for which Thelma thanked her friends for their kindness to her.

KETCHAMOOT

We wish to extend our sincere sympathy to Mrs. Elgen Seale and daughter in the loss of their husband and father. Mr. Seale had many friends in our district who were deeply grieved to hear of his death.

Mr. A. F. Schultz sold a team of horses last week for three hundred dollars to Mr. Smith a horse buyer.

A large crowd attended the Wm. Lee sale on Wednesday of last week and everything sold satisfactorily. Mr. Jim Hannan was the auctioneer and Boyd Stauffer the clerk.

The dance put on by the hockey boys at the Davison home on Friday night was well attended and all enjoyed the evening very much. All expenses were met and a small sum left over. Mr. and Mrs. [illegible], Miss Edna Nomeland and Julius Lorbekmo furnished the music. Mr. Jack Fair was floor manager. Lunch was served at midnight. The boys wish to thank the Davison family for their kind hospitality and all others who helped to make it a success.

The Sears family entertained a few friends at their home Tuesday evening in honor of Mrs. Sears' er-born birthday. Those present were Mr. and Mrs. Wm. Lee, Mr. and Mrs. C. A. Ingram, Mr. and Mrs. Whillans, Mr. and Mrs. Nomeland, Mr. and Mrs. J. H. Ingram, Mr. and Mrs. Schultz, Mrs. Davison Mrs. Coombes and Messrs. Thompson, W. A. Mitchell and Bill Stairs.

Mr. Sammie Mitchell returned home one day last week after an absence of several months.

Mr. Arnold Steen of Bardo visited several days last week at the home of Mr. and Mrs. Nomeland.

Mr. and Mrs. Wm. Lee returned to their home in Edmonton on Wednesday.

A pleasant afternoon was spent on Wednesday, April 1st, when Mrs. Davison entertained the Ladies' Aid at her home. Eight members and eleven visitors were present. After the devotional and business session, a delicious luncheon was served by the hostess. The next meeting will be held on April 29th, at the home of Mrs. Chas. Whillans.

Mr. and Mrs. Kenwood and Mrs. De Silva of Edmonton attended Mr. Seale's funeral on Saturday.

On Tuesday evening at the home of Mrs. Scott a cup and saucer shower was held for Thelma Jobb. Thelma received many lovely cups and saucers from her many friends. A lovely lunch was served by the hostess.

The Jolly Twelve Bridge club met at the home of Mrs. E. Rogers on Wednesday evening. Honors in cards were won by Hilda Nomeland and Mrs. Chapman.

Mr. M. B. Stutzman, Mr. and Mrs. Joe Brenneman, Mr. Jacob Brenneman and Boyd Stauffer will spend the Easter holidays at High River, where there will be special church service held.

Mr. and Mrs. Gordon Jobb of [illegible] are spending the Easter week end at the Jobb home here.

Mrs. H. Martin of Chip Lake is visiting friends and relatives in Tofield.

Doctor B. W. Richardson will not visit Tofield on April 16th and 23rd, but will be back as usual on April 30th.

UNITED CHURCH NEWS

The United Church Young People's debating team, Miss Fay Wilson and Mr. B. Clutterham went to Viking on Friday April 3rd and debated with the team from Viking on the following resolution: "Resolved that the right to bequeath or inherit be limited to a reasonable provision for dependents."

The young people went very thoroughly into this subject and both teams had given the subject carefu consideration and preparation. Viking won the debate by the close margin of three points.

These debates have been held during the winter months under the auspices of the Presbytery of Wainwright—Viking, Wainwright and Tofield Y.P. taking part.

The president, Mr. Wm. McIntyre was notified that Tofield is declared champions for the Presbytery on a point average. It now enters the Provincial contest with other Presbytery Young People's Unions.

EASTER SUNDAY

Services will be held at Ketchamoot on Sunday 12th at 2:30 p.m. and in Tofield at 7:30 p.m.

At the Easter service in Tofield Mrs. L. Smith and Mr. A. Cowell will be the soloists.

The happy stirring Easter hymns will be sung.

Easter Communion will follow the service.

On Sunday, April 19th the choir will render the Cantata "The Conquering King." This is a musical treat and brings also a stirring message.

There are solos quartettes and choruses all helping in a worshipful and enjoyable service.

Popular Young Couple Wed

An Easter wedding of unusual local interest took place at the home of Mr. and Mrs. Gordon Jobb on Thursday afternoon, April 9th, at 3:00 p.m. when their youngest daughter Thelma, was united in marriage to Mr. Robert Whyte of Wetaskiwin, son of Mr. and Mrs. J. Whyte of Tofield. The ceremony was performed by Rev. D. K. Allan in the presence of immediate relatives and friends. To the strains of "The Wedding March" played by Mr. W. McCauley, the bride entered the drawing room on the arm of her father who gave her away. She made a charming picture in her travelling dress of grey crepe with grey accessories and wearing a corsage of sweetheart roses. During the signing of the register Mr. Blake Clutterham sang "At Dawning." After the ceremony a delightful buffet luncheon was served from the dining-table which was centred by a three tiered wedding cake. The rooms were tastefully decorated with yellow daffodils. The happy couple left by car for a short honeymoon in the south and will later take up residence in Wetaskiwin. Among the out-of-town guests at the wedding were Mr. and Mrs. Gordon Jobb of Daysland; Mr. and Mrs. McCullie of Neilburg; Mr. and Mrs. James Allan and Miss Helen and Mr. Bill Allan of Edmonton.

Aha!

"They call them permanent wave machines but really," confides Alice, "they ought to call them short-wave sets."

SCHOOLS CLOSE FOR EASTER

The Tofield public and high schools closed on Thursday afternoon for the Easter vacation. They will remain closed for ten days, re-opening on Monday, April 20th.

The teachers and out of town pupils have taken the opportunity to spend a few days at their homes.

Mrs. J. W. Robinson left on Tuesday for Vermilion where she will attend the graduation exercises of the School of Agriculture.

We regret to report that Mrs. Calvert is ill with influenza and wish her a speedy recovery.

TRUCK FARMER: "Ah, Sally, my dear, that homemilk does taste good! Hot work, you know. This truck farming . . . ."

FARMER'S WIFE: "Don't call it truck farming, Sam! Call it fine-fresh-vegetable farming. That's what it really is, and you're helping to keep healthy a lot of families, including your own."

FARMER: "You always do see the ideal side of this tough job. You're right, too. We are in a useful and worth-while business. Perhaps that is why the Bank of Montreal is always willing to co-operate with me."

WIFE: "That reminds me, Sam! Your note at the Bank will soon be due."

FARMER: "Don't worry about that, Sally. You know we have enough in our joint account to pay off that loan and leave a nice balance. How are the savings accounts coming along for the children?"

WIFE: "Just as fast as the children are growing. I never forget to make the regular weekly deposit we agreed to, and every now and then I deposit a little extra—from the butter and eggs. We'll be able to educate the babies. Run along now, Sam, and finish that patch before dinner."

PYORRHOEA

The movies have given a great impetus to the desire for sound clean teeth. We find it difficult to associate pyorrhoea with the smiling movie-star. In the ancient writings is found mention of bleeding gums and loose teeth, although the term "pyorrhoea" did not come into use until 1877 at a meeting in Chicago.

Pyorrhoea means a flow of pus. It is an infection of the gums and the disease which is responsible for the loss of as many teeth as comes through dental decay. Teeth come loose as the gums separate from the roots of the teeth, due to infection. Once separated, they seldom become attached again.

The presence of pus in one part of the body generally means trouble in other parts. The blood picks up the bacteria causing the infection around the teeth and as these bacteria are carried by the blood to other parts, new infections may result.

Pus means foulness, and the mouth of the victim of pyorrhoea is foul; the breath then will likely to be offensive. The gums are apt to be sore. Food is not chewed properly and it is mixed with pus; the digestion is thereby upset and, all told, in severe cases the general condition is miserable.

The time to prevent pyorrhoea is early in its course. The first evidence of the condition may be in childhood. Redness and swelling of the gums and slight looseness of one or more teeth are early signs. Regular dental examination which includes inspection of the gums as well as the teeth allow for the early detection of such conditions. It is at this stage that proper treatment will accomplish what it may not be possible to do later on.

It should not be forgotten that the health of one part of the body is related to the general health of the whole body. Among the causes of pyorrhoea may be listed the irritation from a crown or filling which presses down on the gum tissue. Accumulations of tartar will do the same by pressing down and cutting into the gums.

When teeth are out of alignment, the dental machine is out of gear. Broken teeth, missing teeth, irregular teeth, all throw the teeth out of proper alignment, cause abnormal pressures, damage the tissues and so favour infection. Lack of cleanliness [illegible] irritation from the [illegible] food particles.

Sound teeth come with a proper diet, regular cleaning and periodic dental examination. Healthy gums come with a proper diet, good alignment of teeth, regular cleaning and periodic examinations. It is presumed that when the examination reveals the need for treatment it will be secured and that cleaning will be done properly with a tooth-brush and dental floss, not with tooth-picks or knife.

Give prompt heed to bleeding gums. Early care hastens cure.

Questions concerning health addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

ANCIENT FRIEZE SHOWS MILKING

Among the many interesting relics [illegible] have been unearthed during the excavations of Ur of the Chaldees, birthplace of Abraham, is a mosaic frieze showing a procession of cows [illegible] of a reed-built byre from the door of which two calves are seen [illegible] men seated on low stools are milking cows. The men sit under the cow's tail milking the animal from behind. The calves duly muzzled are [illegible] to the cow's headstall [illegible] to encourage her to give milk. On the [illegible] of the byre two men clean shaven and wearing fleece petticoats, the official dress of priests, are pouring milk into a vessel set on the ground, while two others are collecting the strained liquid into great stone jars. This frieze is said by experts to represent a scene at a farm attached to a temple, a farm dating about 3100 B.C., employing dairy methods which might have been employed with profit in the intervening centuries.

Another find of interest to students of agriculture was a small statue representing the Goddess Bau seated on a throne supported by geese. Bau was the patroness of the poultry farm, and her figure, square and thick-set, in a flounced and pleated dress reaching to the ankles has an appropriately domestic look.

MORE BOYS GIVEN BETTER CHANCE

The membership of the Boy Scout organization in Canada has increased more than 4000 in a year. That means 4000 more boys have a better chance of growing up into the best type of citizenship.—Peterboro Examiner.

A "DOGGONE" GOOD TURN

A Scout good turn to a dog involving quick action and some courage was that of Scout Joyce of Hunstanton, England, on Guy Fawkes day last. On his rounds as an errand boy, Joyce came upon a dog with lighted firecrackers tied to his tail. He called the dog and cut and threw the firecrackers just before they exploded.

CANADIAN TURKEY HARD TO BEAT

In the British Fish Trades Gazette published in London, England one of the leading publications dealing with the produce trade there has appeared recently several complimentary articles on Canadian agricultural products principally with reference to Canadian poultry. In its issue of 7th of March 1936 one of its writers states:

"The class of turkeys which are arriving from abroad—that is the fresh killed varieties—are very good.

"Apart from these we shall no doubt have some Canadian birds on show, and as you know a good Canadian turkey wants a lot of beating if it is the right quality and pack.

"To sum up the turkey trade I consider that the most reliable pack to which to look forward during the next few months will be the Canadians if they can be shipped at a reasonable price. Present quotations are rather beyond the reach of the trade, but holders on the other side may think differently in a few weeks' time."

WINTER ON THE FARM

(Contributed)

The march of the seasons brings winter again;
Jack Frost binds the streamlets of mountains and glen;
A powder of white over forest and fen
Pronounces a truce in the tillage of men.

The garden is lifted, potatoes are stored;
The settler has garnered his vegetables hoard
The threshing is done, for which Heaven be thanked;
The stables are mudded, the buildings are banked

A long winter rest is the city man's [illegible]
Of farmer friends living on honey and cream
Reality's diff'rent, there's wood to be got
And hay to be hauled to the fat cattle lot

There's a spring to be opened or water to pump;
Brief daylight keeps choremen quite well on the jump
The cows must be milked and the hogs must be fed,
The chickens be tended, the horses bed,

There's grain to be shipped, and seed to be cleaned
And posts to be sharpened, and poles to be teamed
And snowbanks to shovel and coal to be bought
And logs gotten out on the new building spot

And repairs to be done and old harness to mend
A gran'ry to roof and events to attend
Before we are ready the winter slips by,
And spring once again bids us cropping to try

SHERWIN WILLIAMS APPOINT NEW SALES MANAGER

Montreal, March 30. The appointment of Charles W. Baker, well known Montreal sales executive as General Sales Manager of the Sherwin Williams Company of Canada Limited was announced today by D. A. Whittaker, Vice-president and Managing Director of the company.

Mr. Baker's promotion has been rapid. He entered the company in 1917 as a junior in the Sales Department advancing through various positions to the post of chief clerk. In 1920 he was appointed Advertising Manager and in 1931 he was again promoted to Trade Sales Manager for the eastern Division. Mr. Baker became assistant to the Vice-President and Managing Director in 1932.

Mr. Baker will have charge of all sales activities and development plans. He is president of the Advertising Club of Montreal.

INNER MONGOLIA SCENE OF DESOLATION, 80 PER CENT OF CATTLE AND SHEEP LOST

KALGAN, Chahar Province, Inner Mongolia, April 6.—With stacks of frozen cattle and sheep dotting its plains Inner Mongolia which might become a focal point of world attention if the Soviet-Japanese border clashes extend to the south, presented a scene of desolation Monday after the hardest winter within memory.

Even now when spring usually softens the Gobi desert's year-round hardiness, freezing temperatures are prevailing.

Thousands of Mongols, perpetually poverty-stricken, are in particularly desperate straits as the flocks of livestock which ordinarily supply their livelihood have been reduced almost to nothing. Eighty per cent of the cattle and sheep in this vicinity have been frozen or starved to death as deep snows without precedent have blanketed the Gobi.

Although many Mongols have already died under winter's attack, additional large numbers seem destined to starve to death in the spring time as summer comes late to the Gobi and the people have nothing to support them until warm weather renders the sparse crops gatherable.

MUST TRY PAY S.C. DIVIDEND, SAYS CREDIT-ER

LETHBRIDGE, April 6.— James Hansen, Social Credit M.L.A. for Taber speaking Saturday at a Social Credit Convention in Taber, told a crowded convention hall: "It is not enough for me if the present government just gives Alberta good honest government. They must tackle Social Credit; that is what you voted for and it is up to this government to make an honest effort to pay dividends. I am making you no promises but if it can't be done I want to know it."

He also declared: "I firmly believe the U. F. A. administration was an honest one—at least we have discovered nothing to make us think otherwise."

On default he said: "We have refused to pay—the default would have had to come sooner or later." His remark was applauded.

A vote of confidence was passed in the Aberhart government.

Astonished

A little fellow was on a visit to his uncle and grandfather.

"Uncle" he said, after his grandfather had left the room, how old is grandpa?"

"I couldn't tell you" answered his uncle, "without looking it up in the family Bible."

"My word!" gasped the child, "is he old enough to be mentioned in the Bible?"—Tit-Bits.

LAST BRUNO WORDS CLAIMED INNOCENCE

TRENTON, April 6.—Here are Bruno Richard Hauptmann's last words as reported by his spiritual advisers Rev. D. G. Werner and Rev. John Matthiesen:

"I am glad my life in a world which has not understood me has ended. Soon I will be at home with my Lord. And as I love my Lord so I am dying an innocent man.

"Should however my death serve for the purpose of abolishing capital punishment—such a punishment being arrived at only by circumstantial evidence—I feel my death has not been in vain.

"I am at peace with God. I repeat that I protest my innocence of the crime for which I am convicted.

"However I die with no malice or hatred in my heart. The love of Christ has filled my soul and I am happy in God."

BEDRIDDEN PATIENT TESTIFIES AT HOME

Mr. Justice Ford, barristers and court attendants held an informal supreme court hearing in the home of a bedridden woman witness on 107 st. Monday during the hearing of the action of James S. Dargavel, Luella B. Dargavel and William S. Cole against John Frederick Hoffman seeking $1321 in settlement of an estate.

LACOMBE RESIDENT TO GET OLD DIARY

LACOMBE, April 6. — Robert Hainsworth of Lacombe is to receive a diary which he kept during the Great War.

While on duty during the Saar plebiscite Private H. Lace, an English soldier, was handed the diary by a German ex-soldier who said that during the Great War a British soldier, who thought he was dying had asked it to be sent to his parents. Private Lace forwarded the diary to England and at Doncaster it was shown to a solicitor, M. Hainsworth who recognized the writing as that of his brother, now in Lacombe.

Needn't Worry

The manager of a cinema was interviewing an applicant for the position of attendant. After asking the man several questions as to his suitability for the job he finally demanded: "What would you do in case of fire?"

"Oh" said the man, "don't worry about me. I'd soon get out."—Tit-Bits.

EXPLORING FIELDS FOR S.C. MANNING

CALGARY, April 6.—Experts already are exploring various fields toward application of Social Credit theories in Alberta, Hon. E. C. Manning provincial secretary said here Sunday in an address at the Prophetic Bible institute.

The brief announcement was made by Mr. Manning while he outlined work done last week by the Social Credit government.

Attitude of the government in regard to the provincial debt situation was reiterated by the provincial secretary. It contained four points he said:

1. The government is against repudiation.

2. Borrowing of money by Alberta must cease.

3. The people cannot continue paying the present interest rates.

4. The province will not sacrifice its right and cannot "give away" its autonomy.

"I guess there is some truth in that" Mr. Manning remarked after reading a letter which charged the opposition in the Alberta legislature was "negligible" but its members did a great deal of talking and newspapers gave them too much space.

DECLARES DEFAULT CAUSES UNEASINESS

Alberta's default on the $3,200,000 April 1 maturity has caused concern in eastern financial circles because of fear that other provinces may attempt to follow suit, says John MacCormac, resident Ottawa correspondent for the New York Times who has arrived to observe the Alberta situation.

Mr. MacCormac said both Ontario and British Columbia, with maturities ahead are acting in a manner regarded in some quarters as disturbing.

Mr. MacCormac said the Townsend movement in the United States is losing ground, a split having occurred between the leader and his right-hand man, Clemens.

For some 10 years Mr. MacCormac represented the Times in London, England while he also was correspondent for that paper at Vienna and Washington. He went to Ottawa two years ago.

He plans to spend a week here observing the operations of the Social Credit government.

URGES B.C. ADOPT ALBERTA'S SCHEME

VICTORIA, April 7.—For the first time Premier Aberhart's plan of compulsory reduction of interest rates on government bonds, was advocated in the British Columbia legislature recently.

"The provincial government" said George M. Murray, Liberal of Lillooet, "should follow the Alberta premier's fine example and get behind him and negotiate with the bondholders."

Premier Aberhart, he said, was compelling a reduction in the present huge interest burden, and "this government should do likewise."

"I feel," he said "no moral obligation for debt created in an atmosphere of dishonesty and often of fraud."

Most of the provincial and municipal debt he said, was the result of wild speculation and crooked promotion of such improvements as streets and railways particularly the P.G.E.

"We need a Country party!" he cried. "This province has too long been dominated by brokers and financiers and the great cities."

THE SESSION ENDS...

ON TUESDAY of this week the first session of the only Social Credit government in the world came to an end. Since February some sixty-odd men and women have been meeting almost daily to verbally thresh out the problems confronting the province. A large number of measures have been passed, some radical in their nature, such as the retail codes legislation, others radical enough in one sense but extremely conservative in another, such as the bond refunding measure. It was not to be expected that the main purpose for which the government was elected would be brought about immediately. Such a mammoth task of abolishing poverty in the the midst of plenty could hardly be expected to be done over-night, and even though the first steps of the government seem to point in the very opposite direction to that indicated in pre-election promises, there is a certain amount of truth in the old adage, "the longest way round is the shortest way home." We feel that the government is entitled to the full eighteen months asked for and perhaps six months thrown in for good measure to bring about the economic reforms promised. It is, of course, possible that the government may reach a deadlock due to other causes, but this is merely conjecture and at best "crossing your bridges before you come to them."

We often think that far too much stress is placed upon the government, that it is considered the end itself rather than the means to an end, the end being a happy, contented and reasonably prosperous population.

The exultant cry of victory when any party is returned to power should be tempered by the knowledge that the world is one large market place in which economic welfare is being shuffled around according to peoples whims, fancies and decisions. Governments do from time to time stimulate or stifle trade and commerce, but generally speaking trade and commerce is stronger than governments. People live by production, trade and commerce, not by the power they invest in their elected representatives. A government could be termed the control lever of a machine, very important, but certainly not the machine itself. As with the control lever on any machine, it should neither be too large or too small to exercise efficient control. Too large a control means waste of power needed to operate it, and too small means inefficient control. Time passes and the development of commercial life, which is really the life machine itself, demands a more efficient control lever.

The Alberta government consists of sixty-three members which while suitable for the prairie trail era of this province is both too cumbersome and expensive for present day needs. Modern transportation and communication have shortened distances, and half that number would be ample. Cost of government, while not the major item in provincial taxation (the major items of taxation spring from those things the people demand) nevertheless is quite an item and cut in half would, when spread out into relief allowances, help quite a number of people in distress. However, the money saving is perhaps not as important as having a smooth working, efficient, not too large body of legislators. Too many tend to create confusion.

With only the first session of a new parliamentary body just concluded, there is no hope of a reduced number at present. No individual member is going to vote himself out of a good position, and moreover there is no way of saying with justice who should drop out and who should remain. But this idea of a numerically reduced legislature is worthy of consideration and is likely to loom up larger in the future.

It has been a momentous session what with the increased taxation (which was inevitable regardless of who was in power), the codes, the break with Douglas and the default on the loans. All these things are of great importance and no doubt the effect of them will carry a long way into the future. Of lesser importance was the vote on a state lottery. This was defeated hands down. In principle we are against gambling and rarely patronize sweepstakes of any kind. Even so, one has to recognize that large sums of money, money that the province can ill afford to lose, goes out of the province to Irish, Eastern Canadian and Australian sweepstakes and lotteries. Four government sweepstakes a year, with restrictions as to the number of tickets a person could buy would have the effect of keeping a large portion of this money at home and a portion of it could be used for some worthy object. We see no particular danger or harm in a state lottery. To us it is putting something that already exists and is lacking control into channels where proper control is possible.

I like the story of what the thrifty man expected for his money. With his two boys he entered a fashionable restaurant and ordered a bottle of lemonade and three glasses. They were served and father and sons sat around. The waiters were interested. Presently their chief walked that way.

"Are you the manager?" inquired the father.

"Yes, sir. I am."

"Then," demanded the man, "why is it that the orchestra is not playing?"—Methodist Times and Leader.

ALBERTA GETS $2,000,000 ROAD PROGRAM

Almost $2,000,000 will be available in Alberta for road and highway construction this year as the result of a dominion plan for allocation to such work of part of the federal $[illegible] relief fund it was announced Monday by Premier Aberhart and Hon. W. A. Fallow provincial minister of public works.

Beside direct relief contributions of $140000 a month to Alberta the dominion is planning to give Alberta about $750000 during the year for road construction, Mr. Fallow was told over the week-end in a message from Hon. C. C. Ross provincial minister of lands and mines who is now in Ottawa.

In addition the dominion will allow the province grants for main highway construction on a basis of dollar-for-dollar with provincial expenditures.

The province already has provided a $532000 allocation for main highway work and this now will be doubled by the dominion's contribution.

Arrangements for this are not complete Mr. Fallow said and it is possible that he may be going to Ottawa within the next two weeks to confer with the dominion cabinet on the projects.

Allocation of these sums to provincial road work it is expected will speed completion of the Jasper highway and possibly improve it; will allow new work on other main highways including the Edmonton-Calgary route; and might even allow some hard-surfacing work as a government enterprise instead of through private enterprise as previously considered.

But the chief aim and the chief result, officials noted, would be provision of employment the consequent lessening of the cost of direct relief and improvement of the general morale of men now unemployed.

SESSION OVER: 102 NEW LAWS ADDED TO LISTS

First session of the world's first Social Credit government came to a close at 11:15 a.m. Tuesday when the Alberta house was prorogued by Hon. W. L. Walsh, lieutenant-governor.

In session since Feb. 6, a period of practically nine weeks, the members of the eighth legislature added 102 new statutes to the provincial list at this first session.

Meeting at 10:00 a.m., with galleries sparsely filled in deep contrast with every other day since the session opened, the members settled at once into a quick business stride. Resolutions on the order paper were disposed of in jig time, few members designing to prolong debate, with the result that in an hour the house was ready to summon His Honor to prorogue the assembly.

In his Windsor uniform, His Honor proceeded to the throne. He was accompanied by Premier Aberhart and Attorney General Hugill and Capt. C. V. Pacre, secretary to lieutenant-governor. As His Honor took his seat on the throne, the cabinet ministers returned to their seats.

A list of 24 bills which had been passed by the house then was read by Robert Andison, clerk of the legislative assembly. On two previous occasions, 45 and 33 had received royal assent.

Upon reading of the third batch being completed, His Honor signified royal assent.

LITTLE EFFECT FELT CATTLE TARIFF CUT

Benefit of the cut in duty this year of one cent per pound on cattle exported to United States has not been noticed as much as was anticipated because the American cattle market is three cents per pound less than a year ago said John Burns, general manager of Burns, Ltd. packers, who paid a visit to the Edmonton plant Monday.

While these lower prices were disastrous to American finishers of beef cattle who in some cases paid four cents for Alberta feeders last fall, they have resulted in the re-opening of the British market to Alberta cattle, after almost a year's absence. As a result cattle boats had again to be secured and readied for the handling of shipments, he said.

It is estimated that there are 40 per cent more cattle on feed in United States than a year ago.

Instead of a surplus of 70,000 fed cattle in Canada as last year, there is more likely to be 170,000 head for the feeding season, December to July.

Like the American cattle finishers, the Alberta cattle feeders were not making any money. While it was anticipated that the market for finished cattle may improve in May and June most feeders have been sending their stock to market when ready and are meeting the problem by taking an average price through the season said the Calgary packer.

Cattle losses have been worse than usual because of the long winter and the shortage of feed in some districts.

While there was nothing serious to anticipate there would be further losses should setbacks in weather occur after cattle go on the grass in weakened condition said Mr. Burns.

KILLED BY TRAIN, BODY RECOVERED

Bruce, April 7.—Body of a man apparently fatally injured when he fell or jumped from a train, was found beside the railway tracks near here Monday. He was identified as a man known only as "Walter" and who was seen to board an east-bound freight train last Friday.

It was apparent that the man had walked around shortly after the injury and then had collapsed in a ditch where he died. He was Polish and about 30 years old. He had told acquaintances that he planned to go to Ontario.

A BOYS' BACK-TO-THE-LAND MOVEMENT?

Is there a boys' back-to-the-land movement developing in Canada? Well over 600 Proficiency badges in subjects associated with farming were [illegible] year by Boy [illegible] in Ontario: They included: Bee Keeper, 42; Dairyman, 60; Farmer, 64; Forester, 44; Gardener, 126; Poultryman, 63; Stockman, 27. Covering additional knowledge also useful on the farm were: Blacksmith, 5; Engineer (mechanical) 130; Electrician, 162; Carpenter, 274; Mason, 18.

PAY OUT SAVINGS FOR NEEDY CASES

CALGARY, April 6.—Alberta government will redeem provincial savings certificates in needy cases "if they are not too high," Hon. E. C. Manning, provincial secretary and minister of trade and industry, announced in an interview here Sunday night. Payment on certificates was suspended last August just before the Social Credit government took control.

Mr. Manning said he did not wish to divulge further particulars. However, he added the government will make every effort to redeem all certificates as quickly as possible.

RUBELLA CASES SOAR PAST 1000 MARK IN EDMONTON

Showing little sign of abatement, rubella or German measles cases soared past the 1000 mark Monday. City health authorities were unable to predict when the current epidemic would abate.

Dr. R. B. Jenkins, city medical health officer, expressed the opinion that influenza which caused 11 deaths in March, had declined greatly.

WILL OF KIPLING PROVIDES SUM FOR B.C. SCHOOL

LONDON, April 7.—Part of the late Rudyard Kipling's fortune will eventually find its way to "Our Lady of the Snows." The empire poet, his will probated Monday showed, made provision for the Canadian branch of Fairbridge Farm schools for poor children located on Vancouver island.

He left a gross estate of 155,000 pounds ($775,000). His widow receives his house and land at Burwash with the contents.

WIT And WISDOM

Too Busy

Policeman (to motorist): "Take it easy: didn't you see that notice—'Slow Down Here'?"

Motorist: "Yes, officer, but I thought it was describing your village."

Unnecessary

Mother: "Junior come in and take your bath before you go over to the Browns' to supper."

Junior: "But mother, they said it was going to be informal."

Before Her Time

The home was one of many noted because Washington had stayed there.

Visitor: "Which room did Washington stay in?"

Maid: "Washington?"

Visitor: "You know Washington—he stayed here."

Maid: "Oh, Mr. Washington must have stopped here before I was hired."

Generous

The young bride was extolling the virtues of her husband to a friend.

"George is just the most generous man in the world," she declared. "He gives me everything credit can buy."—Pearson's.

Courage

Even when the fighting was hottest, the colonel of an Irish regiment noticed that one of the privates was follwing him everywhere, with apparently much devotion. At length he called the man to him and said: "You've stuck to me well this day Private Rooney!"

"Yis sor!" replied Rooney, saluting smartly. "Me ould mother she sez to me, sez she: 'Patrick me bhoy, stick to the colonel and ye'll be all right; them colonels niver get hurt!'"—Tit-Bits

Genius

"Mary, why didn't you wash that window?" demanded the lady of the house.

Mary: "Sure, and I did wash it on the inside, ma'am, so we could look out but I though I wouldn't wash the outside so those curious people next door couldn't look in."—Cash Year.

The Cause

Mother: "Why are you making faces at the bulldog?"

Small Child (wailing) "He started it."—Toronto Globe.

A Tryout

She: "If there's anything you can do that I can't do quite as well I'd like to have you name it."

He: "Well I'd like to see you hang all your clothes on one small nail in the closet."

Time Enough!

Celebrating their sixtieth wedding anniversary in Cleveland, William W. Britton 79, told guests how he courted his wife Sarah, before they were married. Being a railroader, Britton was too busy to call on Sarah very often during their courtship days. She lived beside the railroad track and that helped him out. He always waved to her as his train went by. His special joy as the member of a freight crew was to get on the front end of the train, which in those days did not travel very fast, jump off at Sarah's door, giving him time for just a few words and a kiss before he had to swing onto the caboose as it came along.—Wall Street Journal.

Here and There

Barnwell, Alta., sets this year's record for the first official report on work on the land, according to a message received March 19 by the Agricultural Department of the Canadian Pacific Railway at Winnipeg. The earliest last year was from Taber, Alta., which has held the record for five years, on March 21.

Alfred S. McKay, recently elected president of the Southern Alberta Pioneers' and Old-Timers' Association, is one of the two surviving members of the survey party which charted the route of the Canadian Pacific Railway across prairies and mountains in 1880-1885.

Interviewed at Victoria recently, W. M. Neal, vice-president of western lines, Canadian Pacific Railway, stated that he anticipated one of the biggest travel years in recent Canadian history. There had been, he said, a substantial improvement in passenger travel business last year which is expected to continue this year.

Changes in hotel management in western Canada are announced by H. F. Mathews, general manager Canadian Pacific Hotel system as follows:—T. F. Chesler, manager Hotel Vancouver, appointed assistant general manager of the company's hotels in western Canada, succeeding A. E. Robertson resigned. Colin F. Pratt manager Palliser Hotel Calgary, becomes manager Hotel Vancouver with W. J. Mylett, succeeding Mr. Pratt as manager of the Palliser.

Vancouver Island, known as the historical cradle of the Pacific Northwest, is to be featured this summer by a special cruise of the Princess Norah, of the Canadian Pacific B.C. service, which will make a complete circuit of the Island leaving Vancouver at 2 p.m. July 13, for a seven day trip in the paths of the early explorers.

During the winter season just closed there was witnessed the greatest step forward in ski-ing travel ever recorded. Over 31,000 more than a fifth greater than last year, made journeys over the week-end from Montreal to ski territory in the Laurentians, the mountain paradise to the north of Montreal thoroughly covered by Canadian Pacific Railway. Many came from cities in the Eastern United States to enjoy the sport.

Nine weeks have been named and arranged for Vancouver's Golden Jubilee celebrations proper this summer but the festivities will cover the whole season and are expected to attract visitors from all over the world. One of the high lights will be the re-enacting of the arrival of the first Canadian Pacific train half a century ago.

Thirteen short European cruises from British ports will be made between May and October by the Canadian Pacific liners Montclare and Montcalm this year. The Baltic and the Mediterranean will be covered extensively in these voyages.

Dr. A. H. Compton, physics research expert, recently returned from a trip to Honolulu on S. S. Aorangi, after studying activeness of the cosmic ray in the southern hemisphere. A specially constructed house on the liner's after bridge contained the delicate apparatus for the purpose of securing more data on the little-known but ever present ray during the ship's Antipodean trip.

The Punster Is In Again

"It must be rather difficult to eat soup with a moustache," suggested the young lady who was seated near a bearded gentleman at the banquet.

"Yes" he agreed. "I find it quite a strain."

BARDO

Messrs. L. G. Foshaug and M. B. Ness left last Thursday for a visit to the coast.

Mr. O. Johansen left for New Westminster, B. C. on Monday morning.

Sunday evening a farewell party was held for Mr. and Mrs. Roy Roth. They are soon leaving our district and we all wish them good luck at their new home. A very pleasant evening was held.

Dinner guests at the Mikal Erickson home on Sunday were the C. M. Finseth, C. J. Rude and A. Kindley families.

Mr. and Mrs. Geo. Hendrickson left for a short visit in Camrose on Saturday. Mrs. Hendrickson also attending the Womens' Missionary Federation meetings in Wetaskiwin.

Miss Ethel Chetney has returned to her home near Holden.

Miss Dorothy Helmer of Kingman is assisting Mrs. B. M. Anderson with her housework.

Mr. John Ness returned home from Jasper on Sunday evening.

Last Monday Mr. and Mrs. M. Bender moved to their farm in this district. Mr. and Mrs. I. B. Moen and family moved to Mrs. H. Haugen's farm on Monday.

A charivari was held for Mr. and Mrs. John Westby last Wednesday evening. A very enjoyable evening was held. Mr. and Mrs. Westby were recently married and the whole community joins in wishing them a long and happy married life.

Mr. Inge Johansen who has spent several months in the Peace River Country returned home last Wednesday.

Mrs. C. M. Rude entertained the L.D.R. at her home last Thursday. After an interesting meeting the hostess served a delicious lunch.

Prayer meeting was held at the C. M. Rude home Friday evening.

Mr. and Mrs. Albert Sutton had a party at their home on Friday evening for the Bardo young folks. They all report a very pleasant time.

THANKOFFERING MEETING

The Easter Thank offering meeting of the Woman's Missionary Society will be held in the United Church, Wednesday afternoon April 15th.

Miss Houston of The Women's Missionary School Home in Edmonton will speak on home missions. The Mission Band and C G I T girls will take part in the program.

Social half hour and lunch in the basement of the church after the meeting.

Cordial invitation is extended to all who are interested.

AMISK CREEK

Our deepest sympathy is extended to Mrs. Seale and family in their recent sad bereavement.

The Amisk Creek Ladies' Aid held their monthly meeting at the home of Mrs. J. Annebo on March 17. There were many members and visitors present. Mrs. R. O. Berg gave an interesting talk on white and black lies. The next meeting will be held at Mrs. J. Berild's home.

A Mr. and Mrs. gathering was held at the home of Mr. and Mrs. I. C. Olson on Thursday evening, April 2. Eleven couples and a few others were present. A very enjoyable evening was spent, the guests having much fun with the guessing contests. At midnight a delicious lunch was served for the usual sum of twenty-five cents, the proceeds going to the U.F.W.A. Hostesses for the evening were Mrs. I. C. Olson; Mrs. E. A. Moen; Mrs. P. O. Moline and Mrs. C. Erickson.

Some of the young people here are busy practising a play "You Would'nt Fool Me" which they intend to present in the near future. They are also trying to practice for an Easter program but the cold and stormy weather makes it difficult for all to meet for practices.

Mrs. Ferguson (nee Emma Bruha) and her little daughter is visiting with her mother Mrs. K. Bruha for some time.

Mr. A. Erickson visited in the city and while there took in the "Old Timers."

Lillian Patterson, Alice Berg and Raymond Patterson spent the week-end in the city. Alice Berg visited her sisters Lily and Ruby and her aunt and uncle Mr. and Mrs. N. Sand. Lillian Patterson had some dental work done. They returned Monay evening.

The flu is still visiting our district. Mrs. E. A. Moen, Marvin and Edna having another slight attack.

Mr. and Mrs. J. Jacobson and daughter Mavis, Mr. E. Wasgord, Lloyd Berg and Gordon Sand were supper guests at the C. Ericksen home last Sunday.

Mr. and Mrs. C. Erickson visited with Mr. and Mrs. J. Heltie of Lake Demay a short time ago. Carl Erickson went to Camrose to visit with John Heltie who was in the hospital suffering with rheumatic fever.

MRS. L. S. WINQUIST DIES AT EDMONTON

Mrs. L. S. Winquist of the Woodlawn district died in an Edmonton hospital on Saturday of last week, aged 39. She was taken to an Edmonton hospital on Thursday and despite all efforts passed away on Saturday being a victim of pneumonia. She leaves a husband and seven children. The funeral was held at Kingman on Thursday.

LINDBROOK

The weather still continues to disgust and annoy us all but we guess its the same all over and we've just got to take it as it comes; one thing we aren't worried with floods, tornados and earthquakes and it cannot last much longer.

A new club for the ladies has been formed in this district, to be known as the "Lindbrook Community Club" the L.C.C. (not the London County Council). The first meeting was called at the home of Mrs. Ted Genohl and was a very jolly sociable afternoon and enjoyed by all present; so much so in fact, that at the next meeting last Wednesday April 1, at Mrs. F. Kortzman's a lot more ladies were present. We believe bridge was the order that afternoon, Mrs. Smith winning first prize; altho' just what way other meetings will be spent seems to be undecided as all ladies are not bridge players. The president of the L.C.C. is Mrs. Paul McMullen; the secretary, Mrs. L. Gill and the news reporter Mrs. E. W. Hooper. The next meeting is on Wednesday, April 29th at 2:00 p.m. at the home of Mrs. W. Glenn. All ladies are invited to come and see what's what and if they feel like it to join the club.

Mr. J. Bailey had a close call with pneumonia, but is on the road to recovery now, we are glad to sal altho we hear now that his son Leslie is sick, we hope not seriously and that he will soon be O.K. again. Meanwhile Mr. Earl Brown is looking after the chores there.

Mr. F. Kortzman has been around sawing wood with his outfit lately.

Divine Services will be held at the School here next Sunday, Easter Sunday at 2:30 p.m. All are welcome.

Congratulations to Mr. and Mrs. Roy Osborne on the birth of a son a little while back, we've just heard of it, so excuse delay.

Mr. Jas. Bracegirdle left Tuesday, April 7th on a trip to the coast.

Mr. and Mrs. Fontaine left here this week to reside in or near the city.

COWMEN PICK C. GALLINGER

Claude Gallinger was re-elected president of the Northern Alberta Shorthorn association at their annual banquet and election of officers held at the Royal George hotel Wednesday evening.

Other officers installed to office were: Lyle Robinson, who was elected vice-president, and Miss E. L. Holmes who was elected secretary.

Dean Howes as the guest speaker of the evening congratulated the club on the progress it has shown in the last few years, and gave a resume of his various dealing with cattle.

Others who gave short addresses were: Professor G. E. Day of Guelph Ont. secretary of the Canadian Shorthorn association; J. W. Durno and Percy Abbott.

FOR SALE: Seed grain Oats and barley. Victor oats, government germination 96 per cent, clean of wild oats 40 cents per bushel. Barley germination 97 per cent; 40c per bushel. Apply to C. W. Piper.

WAKE UP YOUR LIVER BILE—
And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name. Stubbornly refuse anything else. 25c.

Lakeshore

Mrs. John Wood spent two or three days with Mrs. Seale the first part of the week.

Mr. L. H. Graham and Mr. R. C. Phillips are attending the Spring show in Edmonton this week.

Miss Grace MacKinnon left for her home at Mannville on Thursday to spend the Easter holidays.

"Tssarrsssnngsssss" in a soprano duet echoed thru the pleasant hills and valleys of Lake Shore on Wednesday eve. This announced to the natives that Mrs. Johnston and Mrs. Wood (Ike Tarzan) made their kill. In other words licked the tar out of Mrs. Graham and Mrs. Phillips at bridge. Meantime the latter named ladies were busy taking a "squint into the crystal bowl" to see how the cards were going to run next time.

An enjoyable dance was held at the Community Hall on Wednesday evening.

Billy McMullen, young son of Mr. and Mrs. Jesse McMullen passed away at an Edmonton hospital on Wednesday morning. Billy had been taken to the hospital for abdominal trouble and was thought to be progressing when a relapse occurred and the little fellow passed away. The sympathy of the community goes out to Mr. and Mrs. McMullen in their sad loss.

APPROPRIATION FOR RELIEF WORKS [illegible]

Ottawa April 7.—The relief appropriation bill this year may reach $75,000,000 Premier King advised the house of commons Monday when he revised his estimate of $50,000000 made a few days ago. It will not be presented until after the house returns from the Easter recess, April 20.

Included in the appropriation—its size is still indefinite—will be money for public works, reforestration highways and direct relief grants to the provinces. Size of the vote may be judged from the fact the whole revenue of the Dominion did not exceed $75,000000 for any year between 1867 and 1905.

For almost two hours the house had a round-table discussion on economics, finance and unemployment relief when the government bill to establish an employment commission was in committee.

Hon. H. H. Stevens, the only Reconstructionist in the house started it all when he stressed the need of definite policies on reforestration and housing with national leader-ship from Ottawa. Canada was away behind on housing to say nothing of slum clearance scheme and hundreds of millions of dollars could be put to work.

The Reconstructionist struck political fire when he gave his opinion the government was being led into a blind alley by its policy of improving internal conditions by fostering export trade. In his judgement, it couldn't be done.

Treating Seed

The conditions of rust and frost that prevailed over large areas of the West have brought about a difficult problem for treating seed against foot rot disease and smut. Certain treatments are better than others. Searle Agents have been supplied with the latest information as to the best treatments for certain qualities of seed. They will cheerfully supply this information free to any farmer. See the nearest Searle Agent.

Local Girls Gassed In Car

A near tragedy occurred on Wednesday morning when two local girls were badly gassed while enroute home from Edmonton by auto.

The two girls, Miss Lois Thompson and Miss Edith Burden were travelling in the Thompson car driven by Mr. Thompson who was accompanied by Mr. W. Sears. The girls were in the rear seat and when the car was well on the road towards Lindbrook the men noticed the girls were in distress. A rapid run to Lindbrook was made where they were taken into the home of Mr. and Mrs. Bracegirdle and a call made for Dr. Law at Tofield. The girls were in a very serious condition but very fortunately were taken out of the car in the nick of time. They were put to bed, resting throughout the day, being brought home in the evening. They will be confined to bed for several days as a result of their experience.

It is believed carbon monoxide gas from the exhaust got into the rear of the car affecting the girls so quickly they were unable to give the alarm.

PARTY WON'T LET WOODSWORTH QUIT

TORONTO, April 11.—Hint of a desire to withdraw from the national leadership of the Co-Operative Commonwealth Federation was given by J. S. Woodsworth, National chairman Friday night. Speaking before the provincial convention he reminded it he had been in office since the movement first was organized and said "it would be a very good thing to have a change in this office every few years as in the British Labor Party." The delegates immediately thundered No. No!

Establishment of Labor colleges C.C.F. daily newspapers and of Christian fellowship within the ranks of the C.C.F. were advocated by Mr. Woodsworth at the convention.

REJECTED OFFER $20,000,000 FALLOW CLAIMS

VERMILION April 11.—Dr. R. C. Wallace and Hon. W. N. Chant and Hon. W. A. Fallow were guests of the Vermilion board of trade at their luncheon last week.

Mr. Fallow declared while the government was being offered millions of dollars for investment in this province [illegible] conditions of the offer were such that the government did not feel like accepting them because their acceptance would mean placing the province more than ever in the grip of "the big financial interests" and they did not propose that this be done.

(Mr. Fallow declared in Edmonton Satuday that at Vermilion he had been referring to oil companies which had offered to hard surface roads in return for certain concessions. The concessions including gasoline taxes and other matters were considered too drastic by the government which would not consent to them.)

Only recently he said, the government was offered $20,000,000 by an English syndicate [illegible] the terms were not acceptable and the money had to be declined. He was positive the course taken by the government with respect to the recent financial negotiations would be justified before very long.

"We do not propose that this province shall be subjugated to the big money powers and we are showing the why out for the other provinces," he said. He forecast the biggest development in oil, gas and tar products in 1936 that has ever taken place in the history of the province.

He also said that this year would see the beginning of a [illegible]-year road program which would hard-surface the 1,000 miles of graveled highways in the povince. He expected $3,000,000 would be spent in 1936 alone. He announced the policy of the government in particular to be the development of market roads so that the farmer would be able to reach his trading centre at any season of the year.

[illegible] roads [illegible] been sacrificed in the past and he considered that the wrong policy. The view the government was taking was there should be a more equitable distribution of the moneys raised by the different sections decided among themselves as to what road construction they wanted the government will be there to assist them.

Dr. Wallace spoke briefly of the wonderful potentialities of the great north country.

President Robinson presided at the luncheon.

Tofield Students do Well at Vermilion

The closing exercises of the Vermilion school of Agriculture were held on Wednesday, April 11th. A good number of Tofield young people attended and all did very well indeed. Diplomas were awarded to Isabel Robinson, Charles Kallal, Joseph Kallal, Harold Schultz.

Special prizes were awarded to: best exhibit of sewing, Isabel Robinson; general improvement sewing, Aileen Allan; general proficiency, Joseph Kallal; Blacksmith, Joseph Kallal.

Other Tofield students were also in attendance including Ross Craig; Melvin Walker and John doore. There may be others from the district of which we have no knowledge.

In addition to the two year course there is a "two years in one course" Isabel Robinson taking this one.

GOODS TO $100 TO BE EXEMPT FOR TOURISTS

OTTAWA April 15.—Two measures of outstanding interest will be taken before the House of Commons by Revenue Minister Ilsley when parliament reassembles after the Easter recess.

In addition to the Customs Act amendments carrying out undertakings contained in the Canada-United States trade agreement already given first reading Mr. Ilsley will bring down a special bill respecting the privilege to be given Canadian tourists returning from the United States allowing customs exemption up to $100 on taxable goods.

Conditions under which the $100 exemption on goods brought from the United States by Canadian visitors to that country have been a matter of much consideration by customs officials. The effort will be made to make this exemption available for bona fide tourists but at the same time to avoid exploitation of the privilege, especially by those living in border communities.

The Jolly Twelve Bridge club met at the home of Hilda Nomeland on Thursday evening. Honors were won by Mrs. Yakabuski and Winnie Werton.

On Wednesday evening Miss Betty McCarthy entertained a few friends at her [illegible] in [illegible] of Miss Eva Burrows. Dancing was the order of the evening and at midnight a delicious lunch was served to the guests. Everyone reports a good time.

Mr. Thomas spent Tuesday in Edmonton.

Mr. and Mrs. Frank Dunn spent the holiday week-end visiting friends in the city.

Born: To Mr. and Mrs. Jim Yakabuski on Monday, April 13, a daughter. Congratulations.

Born: To Mr. and Mrs. Ross Bell on Tuesday April 14th, a son. Congratulations.

UNITED CHURCH NEWS

The Cantata "The Conquering King" will be rendered by the choir in the United Church on Sunday, 19th of April at 7:30 p.m.

The cantata lends itself to fine expression in solos, quartettes and choruses. Under Mr. Broughton the choir leader, the choir has done well in mastering this beautiful service of song.

On Sunday, 26th of April, the Oddfellows and Rebekahs members of the I.O.O.F. will worship in the United Church.

Miss Houston of the United Church Home in Edmonton was the speaker at the Easter meeting of the W.M.S. on Wednesday afternoon.

CALL FOR TENDERS

Sealed tenders are invited by the Board of Directors of the Beaver Lake Mutual Telephone Co., for the moving of their telephone line running due north of the Town of Tofield for a distance of 12 miles. Line to be moved and reset approximately six feet west of present location. Tenders are to be in the hands of the undersigned not later than 12 oclock noon, April 30th, 1936. Any information desired may be had by calling the President, Mr. J. B. Warner or A. C. Dodds. The lowest or any tender not necessarily accepted.

A. C. Dodds, Tofield, Secretary-Treasurer.

KETCHAMOOT

The many friends of Mr. and Mrs. Jesse McMullen were very sorry to hear of the death of their little son, Billie, and extend to them our sincere sympathy.

Born: To Mr. and Mrs. Henry McGinitie, a son on April 11th.

Born: To Mr. and Mrs. Lionel Ferguson a son on April 12th.

Mrs. McGinitie and Mrs. Ferguson are sisters, congratulations to both.

Miss Mabel Lowson is home for her Easter holiday from her school duties at Camrose.

Miss Margaret Lindsay is spending her Easter holiday at the home of her parents at Innisfree.

Mrs. John Lee entertained the Social Hour club at her home on Thursday afternoon of last week. A pleasant afternoon was repoted by all.

Mr. Ralph Williams who is working near Barrhead spent a few days at the parental home.

Leonid son of Mr. and Mrs. Andrew Ovaldson was taken to an Edmonton hospital one day last week, but owing to a cold has not had his operation yet.

Mr. and Mrs. C. A. Ingram, Mr. and Mrs. G. W. Sears were Sunday dinner guests of Mr. and Mrs. Schultz.

Mrs. G. R. Owen returned home last Sunday after a three weeks stay at the home of her daughter in Edmonton.

When sawing wood at the Floyd home Bill Buckshot cut his hand on the buzz saw, necessitating several stitches taken by Dr. Law.

Harold Ovaldson met with a painful accident one day last week, cutting his foot with an axe. Ten stitches were taken.

Mr. Jim Ratigan left on Saturday for Pritty Buttes, a small town near Lethbridge to do plastering work.

Mr. and Mrs. Herman Lawson and family, Mr. and Mrs. Roy Lee and daughter Doreen spent Easter Sunday visiting at the Geo. Lawson home.

Mrs. Earnie Brick and brother Jim Ratigan motored to the city Saturday of last week.

Miss Margaret Mitchell spent the week end at the home of her grandmother, Mrs. Henderson.

Miss Ethel Brown underwent an operation for appendicitis at an Edmonton hospital on Monday of last week. Her many friends wish for her a speedy recovery.

Mrs. L. Carlisle Mrs. Earl Carlisle and children were guests of the Sears family Tuesday afternoon.

Mr. Harold Schultz returned home Saturday after finishing his course at the Agricultural College at Vermilion.

LINDBROOK

The people of this district extend their deep sympathy to Mr. and Mrs. Jesse McMullen on the loss of their little boy who passed away recently from peritonitis.

Sympathy is also extended to Mr. Windquist and family in the loss recently of their beloved wife and mother.

Easter Service was held at the school on Sunday afternoon last. The Rev. A. Wallis of Tofield conducted the service and quite a large congregation were present, who all enjoyed the Easter service. The School was decorated with flowers lent for the occasion by Mrs. Jas Bracegirdle.

We've given up reporting who has the flu now, it seems all have had or are having it; the thing to do now is to find those who haven't had the "pleasure" yet of being initiated into its mysteries.

Miss Irene Linsiemeer of Wainwright is visiting her relatives the Bracegirdle family here.

CARD OF THANKS

Mrs. T. E. Seale and Miriam wish to thank their many friends for the kindness and sympathy shown them in their recent bereavement.

CARD OF THANKS

Mr. and Mrs. J. W. McMullen extend thanks to the many friends for their help and expressions of sympathy during their recent sad bereavement.

Oil In The Front Garden

OKLAHOMA CITY, Okla., April 11.—The march of the derricks of a gigantic oil field into the heart of residential Oklahoma City has left some homeowners happy and prosperous and others irked and discouraged.

For months a battle was waged between property owners over whether spouting wells of black gold should be punched farther into the best residential areas. Little by little zones have been extended and citizens have leased.

A survey of "one block leases" showed today no fortune is being made by the man with an oil well in his back yard forced to split royalty income with others in the block.

Some homeowners have paid off mortgages, halted foreclosures and had small royalty checks to help support families. For others, noise and dirt outweighed the monetary gain.

A visit to a southeastern district where wells have been producing on community leases for months, brought varied reactions.

"We have made plenty to pay for our little home" said Mrs. R. A. Jones. Pumps chugged at her back fence. "From our lease and royalty we received about $5000 before we sold our mineral rights. The money came when we needed it."

She voted for the oil extensions "because I wanted others to benefit as we have benefited."

"Look" demanded a resident two blocks south. "These spots all over my house are oil spots blown from a near-by well. I'm calling now to get someone to clean them off.

"Of course we got enough out of the well to pay for our home. But taxes went up. My shrubbery was taken out and while I get a royalty check—$18 last month—I'd rather be where it is quiet. I doubt if I would lease again, if I had it to do over."

Opinions also varied just north of the Capitol where dozens of new wells are rising among new brick homes.

"I'm terribly discouraged," shouted a housewife in the doorway of a new $6000 home as steam hissed from a drilling well near by. "Most in the neighborhood aren't very pleased but the others leased and we had to."

Oil companies bought some homes in the district outright, paying almost double their normal value.

One woman in the new field, an oil well near her window, pronounced it "a Christmas tree" declaring her home would have been foreclosed had she not received the lease money.

Win Judging Competition

At the recent Edmonton Spring Livestock Show, Paul Kallal, son of Mr. and Mrs. Chas. Kallal won signal honor in the livestock judging contest. In this event some forty boys and girls from fifteen to twenty years old competed, Paul Kallal coming first with the highest average score. Congratulations

HEALTH by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

GUARANTEES

Some patients are obviously disappointed when their doctor refuses to guarantee a cure from the treatment which he has prescribed. In his refusal, the doctor is being honest with his patient, and while he would be glad to give such assurance, he cannot do so because no treatment promises a sure cure in all cases.

For a limited number of diseases, medical science offers what are known as specific remedies. The term "specific" implies that the remedy effects the cure of a certain disease, but even specific remedies do not give hundred per cent results.

It is practically true that, treated on the first day of the disease with adequate amounts of antitoxin, no patient should die from diptheria. Nevertheless, we know that a very occasional death may occur. This does not imply that diptheria antitoxin is not a specific for diptheria. It does mean that in very exceptional cases, for some unknown reason, the antitoxin is not effective.

Immunity or resistance to disease is a relative form. We know that recent successful vaccination confers an immunity against smallpox. Some lose this immunity more quickly than do others. There is no way of telling who will be immune after a few years except through repeating the vaccination at which time those who are immune give an "immune reaction" and those who have lost their immunity have another "take" somewhat modified.

The dosage of drugs varies within a wide range because individuals differ considerably one from another, in their response to drugs. The doctor observes the response of his patient to treatment and increases or decreases the dose until he gets from the drug the desired effect that will benefit the patient most.

These may not be good examples of why doctors cannot give definite promises as to the results of treatment, but they may suffice. You select your doctor because you have confidence in him. He cannot give you guarantees, but he can and will bring to you all that medical science can offer in the treatment of your condition. It is to be expected that you will benefit by his treatment, and, in all likelihood you will, but that is all your doctor can promise you.

The medical quack promises mostly anything and everything to sell his wares. Knowing how much individuals differ, any "sure cure" is obviously a fake. Suggestion is a valuable part of treatment. The confidence you have in your doctor surrounds his treatments with a feeling on your part that they will be of value—suggestion again. But suggestion will not cure an acute appendix, neither will a twist of the foot restore a failing heart, nor can an electric current banish disease from the body.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

PLANTING ROSES

(Experimental Farms Note)

The successful establishment of a rose plant in a new position depends to a large extent on the observance of a few important details of planting. Most rose catalogues carry instructions for the guidance of customers, but this advice is not generally available to those who purchase their plants from the department stores of our larger cities. Observation of some of these plants badly set has prompted this article.

Plants from the above source, or those obtained from a distant nursery are immensely benefited by being immersed in deep water as soon as received. From 12 to 24 hours is enough. If the ground is then unfit for planting they should be placed in shallow trenches and completely covered with damp soil, making it firm about the roots and comparitively loose over the branches.

Early planting is desirable and important but should not be attempted until the ground is frost-free to a considerable depth and has lost its stickiness.

During planting and at all times the roots must be protected from prolonged periods of exposure to sun and air. At the Morden Experimental Station a large tub of water placed in a central position takes care of the bulk and a pail is used to carry a few at a time to where they are needed.

The hole for the reception of the roots should be wide enough to allow them to be spread to their greatest extent, and a little deeper than seems necessary. This extra depth enables the planter to place the plant in its proper position by shaking it during the process of filling in the hole allowing the soil to flow beneath and among the roots until the plant rest at the required level. When the filling in is completed and trodden firmly, the crown or the point of the plant from which the branches radiate, should be two inches below the surface. The roses are then pruned by removing all weak growth and cutting back the stronger branches to within six inches of the ground. The cut being made one-half inch above a bud pointing outwards or away from the plant centre.

POSTMASTERS AND PATRONAGE

A recent bill introduced by O. L. Boulanger, Liberal Member for Bellechasse, Que., for the purpose of removing the outside Civil Service, including most Dominion employees outside of Ottawa from the jurisdiction of the Civil Service Commission, was viewed with dismay by all Civil Servants but particularly by the country village and small-town Postmasters. Under previous Governments this class of employee suffered severely, particularly in Quebec and the Maritime Provinces and even to a certain extent in the other Provinces also. Mr. Veniot, Postmaster General in the previous King Government set a very bad example and was followed by Mr. Sauve, Postmaster General in the Bennett Government who although he promised to abolish the spoils or patronage system, found the pressure from those who wanted jobs too great for him and during his term of office he equalled if not exceeded, the previous record set by Mr. Veniot.

Under these circumstances it was only natural that a change in Government again caused much perturbation amongst the Post Offices in Eastern Canada particularly and the Dominion Secretary of the Canadian Postmasters' Association, Mr. Charles D. Griffith, accompanied by Col. E. J. White Postmaster of Bathurst N. B., interviewed the Hon. J. C. Elliot very shortly after his appointment to the Cabinet. They were pleasantly surprised to find a new type of man holding the office of Postmaster General who had already refused to dismiss small country Postmasters wholesale without any charges being laid against them or without the accused being given an opportunity of defending themselves against any political charges which might have been made by those desirous of obtaining their positions.

Since that time Mr. Elliott has gallantly carried on his fight with the result that very few Postmasters have resigned or been dismissed and there is a greater sense of security in the Postal Service today than has ever been known before.

If the Hon. Mr. Elliott can stick with his guns and withstand the pressure there is no doubt that he will have done a great act and his name will ever be remembered in the Postal Service as the man who killed patronage. The Postal Service is, without doubt, the greatest business in Canada entering intimately into the lives of every citizen and the disrupting effect on this great business machine can readily be understood when over eight hundred Postmasters lost their positions after each change of Government and were replaced by inexperienced men.

MARKET POULTRY WITHOUT SPURS

Of recent years a more determined effort than ever before has been made by Canadian marketing agencies to supply quality poultry to the British market. As success or failure in this market depends, to a very large extent upon the quality sent over it is in the best interests of Canadian shippers that due regard should be paid to the preferences which exist in the minds of the purchasers of poultry in England.

Of these preferences, one which is of some importance, as indicated by criticisms of Canadian poultry parks, is the presence of spurs, particularly in Leghorns. The spur development which often is taken as a matter of course in Canadian markets is a source of dissatisfaction to the overseas buyer. Since this drawback is one which is very easily corrected, there is no reason why spurred poultry should be shipped.

The following procedure will prevent spur development. At any time during the period from six to ten weeks of age, when the spur is just developing, the chickens should be treated. A small slice is taken off the top of the spur with a sharp knife and a stick of caustic potash rubbed lightly over the cut surface. It is necessary to touch only the cut surface since the caustic will burn wherever it touches causing discomfort without in any way improving the killing of the spur. Apparently no pain is caused by the operation and the chicken pays no attention to the treated area when released. The attendant must be particularly careful that the stick of caustic is wrapped and does not come in contact with the hands or clothes. This treatment is effective in killing spur growth, and the birds when mature will show only the slightest knob where the spur would ordinarily develop.

WHY I CLING TO LIFE

The following is a copy of a letter sent by a subscriber to a well known hospital in answer to their appeal for funds:—

"For the following reasons I am unable to send you a larger cheque. I have been held up, held down, sandbagged, walked upon, sat upon, flattened out and squeezed by the income tax, the super tax, the tobacco tax, the beer tax, the spirits and the motor tax, and by every society, organization and club that the inventive mind of man can think of to extract what I may or may not have in my possession—for the Red Cross, the Black Cross, the Ivory Cross and the Double Cross and for every hospital in town and country.

"The government has governed my business till I don't know who runs it. I am inspected, suspected, examined and re-examined, informed, required and commanded so that I don't know who I am where I am, or why I am here at all.

"All that I know is that I'm supposed to be an inexhaustable supply of money for every need, desire or hope of the human race, and because I will not go out and beg, borrow or steal money to give away, I am cussed, boycotted, talked to, talked about, lied to, lied about, held up, hung up, rung up, robbed and damn near ruined.

"The only reason why I am clinging to life at all is to see what the —— is going to happen next."

SWINE PASTURE IS REAL GREEN GOLD

Swine fed an ideal ration, such as in Denmark, may have no need for pasture; but under Western Canadian conditions, usually far from ideal, the use of good pasture will return substantial dividends.

Experiments conducted at the Dominion Experimental Station, Lacombe comparing the growth of pigs fed a straight grain ration in dry lot with that of pigs on pasture receiving the same grain mixture have shown remarkable results. The pigs on pasture made about thirty per cent quicker gains and twenty per cent cheaper gains than those in dry lot, thereby proving conclusively the great value of pasture for hog production under Alberta conditions.

Expensive grass and legume mixtures need not be used; in fact, the most satisfactory hog pasture ever grown at the Lacombe Station is a combination of fall rye, oats and rape. Two bushels of oats and one of fall rye per acre are mixed and seeded early in the spring. The rape is seeded separately, preferably in rows thirty inches apart at the rate of four to five pounds per acre.

This combination affords a constant succession of fresh pasture crops. The oats made a quick growth and provide early pasture. Since hogs prefer oats to rye they will not touch the latter until the oats are fairly well eaten down, then the rye provides late summer and early fall pasture. As rape is still less palatable than rye, the hogs do not touch it until most of the other growth is gone, and it will carry the pigs until freeze-up. One acre of this combination pasture will easily carry twenty growing pigs.

Because the pasture lot must be ploughed and freshly seeded each spring this treatment assists materially in controlling parasites, and in maintaining the pigs in a generally thrifty condition.

HUGE AAA CASH DISTRIBUTION

The payments to United States' farmers under the Agricultural Administration Act, from its inception until it was declared ultra vires by the Supreme Court, totalled $1,100,322,870 32. This does not include $286,000,000 recently appropriated by Congress to fulfill contracts previously entered into.

This gigantic sum of [illegible] was distributed to 3,000,000 [illegible] and 5,000,000 farms received [illegible] payments.

The distribution, by commodities was as follows:

Cotton	$3[illegible],516,020 01
Wheat	255,624,660 37
Tobacco	53,254,637 39
Corn-hogs	337,026,641 34
Sugar	57,068,394 20
Rye	9,383,015 82
Peanuts	2,129,349 03
Total	$1,100,322,870 30

The City Boy

Johnnie was visiting his uncle's farm. Among the animals was a young colt. The boy gazed at him long and earnestly.

"What do you think of him?" the uncle inquired.

"Why—he's all right, I guess," answered Johnnie, "but where's his rockers?"

ABERHART SEES 'JOBS FOR ALL' IN TWO MONTHS

CALGARY, April 13.—"I hope in two months more we will have all our unemployed at work for wages," Premier Aberhart declared here Sunday when he addressed the congregation at his Prophetic Bible Institute. The premier did not qualify the statement or say how he expected to put the unemployed to work.

"I must not promise to much," he added. "I am going to the lower altitude at the coast to give my heart a rest. When I come back there will be some action."

Outlining the attitude of his Social Credit government in regard to the intended refunding of Alberta's debt and adoption of Social Credit principles in the province, Mr. Aberhart said he thought all legislation essential, keeping in mind the capacity of the public to assimilate the change, had been passed.

The premier said the government might have done more and "if I had allowed my emotional propensity to direct my actions, I might have gone too fast."

Fall Session Possible

Another session of the legislature might be necessary in the late fall, Mr. Aberhart stated. But, he added, he was proceeding cautiously and not allowing his enthusiasm to run away with his better judgment.

Establishment of a provincial bank was not necessary until a year from now, the premier continued. All Social Credit-ers should be satisfied with results obtained by the last session. Everything possible was done to put the business of the province on a satisfactory basis.

The government's financial department was working overtime on refunding, Premier Aberhart said. He cautioned bondholders and investors that they must not let newspapers or magazines discourage them.

He promised bondholders the Alberta government would pay the face value of its obligations "dollar for dollar."

"If we cannot pay the high rate of interest, we will pay the principal 100 per cent," the premier stated.

"You have received five and six per cent for the past six years during the depression," Mr. Aberhart continued. "We cannot pay more than three per cent. After settling up with past interest to date, we will ask you to be satisfied with three per cent—one per cent more than the banks give you." He added no "fuss" was made when the banks reduced their interest rate to two per cent."

Predicts Bond at Premium

Mr. Aberhart warned if the government had allowed the present financial "set-up" to continue another five years, bondholders probably would have lost both principal and interest and predicted the government's three per cent bonds soon would be selling at a premium.

Efforts of certain interests to "confuse and excite" the people bordered on treason and was an attempt to interfere with good and sane government, he charged.

"It just makes the job that much harder," the premier said. However, cheerio. We asked for 18 months to do it. We have been hindered in every way.

Premier Aberhart asserted his Social Credit government had "difficulty" with Major C. H. Douglas, originator of Social Credit theories, and the dominion government.

Retail merchants were told to get ready for business. "Many people need clothes and they are going to get them," he declared.

The government intended to set up a permanent advisory committee of experienced merchants representative of the retail trade, he stated after remarking he was sorry confusion had arisen among retail merchants. Merchants will be asked to recommend appointment of directors at various points to the permanent advisory committee.

All matters will be in the hands of the merchants themselves, and the department of trade and industry merely will enforce their recommendations he continued.

The government would not enforce compulsory membership in any retail association but there is no reason why merchants cannot agree to any regimentation in their ranks that they would like, the premier stated. They will act, not the government.

Leap Year

Gertrude (doubtfully): "Is this the office of J. Horace Billings, the architect?"

Clerk: "Yes, ma'am."

Gertrude. "Well I understand he is opening sealed proposals today and I want to get one of them."

SOYBEAN IMPORTANT CEREAL CROP

To many people, the soybean has an oriental flavor; they know it as the basic ingredient in some of the most famous meat sauces and have heard that it is an important Manchurian export.

Again this background it is something of a surprise to learn from the Wall Street Journal of February 17, 1936, that in the previous year from the viewpoint of cash return to the farmers it had become the fourth most important crop in the United States.

The rapid spread of soybean acreage is due to its rather obvious advantages to the farmer rather than to organized propaganda at the part of those industries making use of soybean products.

The soybean brings a return to the farmer roughly equivalent in value per acre to that which is obtained from wheat. It may be grown on any land that is normally considered good for corn, and the nodules in the root of the bean enrich the nitrogen content of the soil in much the same manner as does alfalfa.

With its high protein content, about three times that of wheat, it constitutes an important food ration for livestock.

It is an excellent milk producer, but it must not constitute too large a proportion of the hog ration since it tends to produce "soft bacon".

Finally the soybean cake, which is the residue when the oil has been extracted from the bean is one of the most satisfactory types of fertilizer. With the rapid expansion of its use in industry the price of the bean has remained at satisfactory levels for the farmer even during the depression.—The Royal Bank of Canada's April Letter.

Wife (looking over travel folders): "Why not take an ocean cruise this summer, dear?"

Husband: "Hm-m, beggars can't be cruisers."

THE TRAVEL URGE—

QUITE FREQUENTLY some of the most interesting things happen unobtrusively and go unrecorded. Things of this nature are just as likely to happen in a small town as in a large city, and when they do happen in a small town they assume an interest greater than the teeming city is willing to bestow upon them.

On Thursday afternoon we watched the departure from the Tofield district for greener, if not newer, pastures of Mr. and Mrs. R. Zook and family. They were commencing the first stage of a long journey, which when completed will land them at Hutchinson, Kansas. To see the car drive off it seemed much the same as any other car starting up the highway on a relatively short journey, but actually it was history, in a small way, in the making. Mr. and Mrs. Zook came to Canada from the United States about twenty years ago and have therefore spent what might with some [illegible] called the most productive years of their lives here. On Thursday, accompanied by seven of their nine children, they commenced the long journey to Kansas, the site of their former home. To the children it will be an epochal journey. From Thursday onwards their lives will run in different channels. New school, new teachers, even, in a way, new teaching. As we watched the family get into the car, one little fellow scuttling in as if afraid of being left behind, and seeing them packed in about as snugly as it is possible to pack a family into a car, the unexpressed wish was made that good fortune might accompany them during the journey and stay with them upon arrival. Mr. Zook, when he has reached his destination will farm, growing not wheat, but mostly corn, and we hope that the lines of the familiar hymn:

> I've reached the land of corn and wine
> And sweet communion's freely mine

will literally be true. That is, the corn part, we do not imagine the Zook's would be interested in wine. Anyway Kansas is a dry state.

Just exactly what creates the travel urge in people it is hard to say. While Mr. and Mrs. Zook were, after a lapse of twenty years, returning to the land from which they had come, many similar departures happen from numerous points daily. Departures that take people out into the unknown, sometimes lost to their relatives and former friends for ever, sometimes to return with tales scarcely believeable. Readers will recall that, a few years ago, Professor Rowan of Alberta University was busy in this district netting crows with the object in view of studying migration causes. What his final findings were we do not know, much of his study being of too deep a nature for the layman to follow. But we do suspect that as bird migration on a north and south swing is a basic law of nature, so is the urge of some individuals, particularly young people, to leave surroundings that are familiar and dear to them and travel afar off seeking a livelihood in new lands and fresh pastures. Whether this is so or not, there is always something enticeingly interesting in watching the departure of a family who are leaving a district in which the scenes of their boyhood and girlhood days will become to them but a memory.

FACE THE SUN

Don't hunt for trouble,
But look for success
You'll find what you look for,
Don't look for distress.
If you see but your shadow
Remember, I pray,
That the sun is still shining,
But you're in the way.

Don't grumble, don't bluster,
Don't dream and don't shirk;
Don't think of your worries
But think of your work,
The worries will vanish,
The work will be done;
No one sees his shadow,
Who faces the sun.

—Fleetwood

SCENT ROMANCE?

He was finding it hard to propose, and Maggie, his fiancee, was too reticent to help him along.

"Maggie, I have been calling on ye for three years [illegible]."

"Aye, Jock," she answered.

"I have taken ye oot every Sunday, Maggie."

"Aye Jock."

"I have taken ye to the pictures every Saturday, Maggie."

"Aye, Jock."

"And I have sat wi' ye every Thursday nicht."

"Aye Jock."

"And I'm here the noo."

"Aye, Jock."

Then in desperation: "Maggie, d'ye no' smell a rat?"—Unidentified Clipping.

PATIENT 'DIES' GETS NEW LIFE BY ADRENALIN

LONDON, April 13.—Another case of a patient who "died" on the operating table, only to be brought back to life again by heart massage and injections of adrenalin, is described in the current issue of the British Medical Journal.

The patient, Ernest Hinsley about 40, of Waterloo, Asthon, is now normal again but has no memory of having been to the operating theatre.

His heart said Dr. J. V. Fiddian, stopped without warning and Hinsley ceased to breathe. Dr. Fiddian injected intracardiac adrenalin into the ventricle and the effect "was immediate and almost magical."

EXPERT ROBBERS MAKE HAUL AT EDMONTON

Escaping with close to $5,000 scooped from the safe of the Army and Navy departmental store, 10125 101 st., thieves who forced entry into the premises early Sunday brought police investigating what is said to be one of the largest single robberies to have been perpetrated in Edmonton.

With expert cunning, the cracksmen left a meagre trail following their rifling of the store's strong box. Forcing entry through a trap door on the roof, they dropped several feet to the second floor, stealthily crept to the basement by matchlight, smashing open the safe.

S. D. Lashgold, general manager of the store, would not state the amount of cash stolen when seen Monday. Police reports, however, indicated that investigations revealed the theft would "reach approximately $5,000." A small quantity of jewelry also was stolen, with little value attached to it.

"Nothing else in the store was disturbed," said Mr. Lashgold. "Papers were scattered around in the office as they were pulled from the safe. The men apparently knew where they were going when they entered the store."

Apparently experts at the job, the intruders smashed the safe dial from its moorings, and by inserting a sharp instrument in the opening caused the tumblers to drop out of place. Little difficulty was then experienced in opening the inner doors.

The receipts from Saturday's business were in the safe and "it was a big day's takings" was the report. Similar method of operation was used by the thieves as those which resulted in theft of more than $400 from the Crescent Furniture store several months ago.

After dropping through the roof door, the thieves—believed by the police to be two—walked to the basement, holding matches for light. They worked on the safe itself under the same conditions. Early Monday Detectives H. Allen, F. Kingsett and C. Shaw were investigating searching the premises for finger-prints.

Humorless Punch

The issue of Punch coming from the presses immediately after the passing of King George V had all humor deleted from its pages.

SPOTS ON SUN RULE WEATHER SAYS SAVANT

VICTORIA, B.C. April 11.—Possibility of forecasting climate from the action of "sun-spots" was considered by Dr. W. E. Harper, acting director of the Dominion Astrophysical observatory here, in an address before the Victoria centre of the Royal Astronomical Society of Canada.

Dr. Harper said the apparent effect of the sunspots, or vortexes, was to change the amount of heat emitted by the sun, with a resulting change in the heat reaching the earth.

The net result on the earth, he added was to vary the amount of rainfall, which in turn varied the nature and quantity of vegetation. Dr. Harper added it was claimed by Prof. De Lury of Toronto, that sunspots have a relationship to drought areas, growth of grain and grasshopper plagues.

Dr. Harper claimed a study of the solar phenomena might enable weathermen to estimate weather conditions over wide areas for the succeeding year. His lecture was illustrated with special slides and photographs.

MAN'S BRAIN BEST CLAIMS PROFESSOR

LONDON—The dinosaur, gigantic, fantastic monster, wandering the earth when the earth was young. The ordinary man, average height, a busy bee in the hive that is our world.

Put them — as Professor W. Watts put them in his presidential address to the British association in Norwich recently — on the scales of science. Weigh them. What do you find?

Listen men!

"Of all the wonders of the universe of which we have present knowledge from the electron to the atom, from the virus and bacillus to the oak and the elephants, from the tiniest meteor to the most magnificent nebula, surely there is nothing to surpass the brain of man."

Brain, Not Brawn

You thought that dinosaur a big fellow, rather frightening, worse than a real King Kong?

Pshaw!

It's brain, not brawn that counts. Hear Professor Watts dispel the mists of fear.

"The brain of those grotesque reptiles the dinosaurs was relatively tiny.

"In the diplodocus, 80 feet long, weighing 20 tons, the brain was about the size of a large hen's egg.

"Of true brain there was not more than a quarter of an ounce to control each ton of body and limb. We begin to understand why they lost the lordship of creation.

But—

"A 12-stone man of the present day has about three and a half pounds of brain—an amount not far short of half a hundredweight per ton."

And consider the blade of grass. Humble it seems. Yet all fades into insignificance beside it, even man.

Victorious Grass

"It is not too much to say that the magnificent outburst of energy put out by the earth in the erection of the Alps, Andes and Himalayas was trivial in its influence for man's advent and his occupation of the earth in comparison with the gentle but insidious growth of more unconquerable grass."

Tread lightly on your lawn. For—

"How much meat and drink and life of mankind is bound up with the grasses [illegible] wheat, maize, millet, other grains and bamboo?"

BIG NEW PACKING PLANT AT EDMONTON WILL BE OPERATING IN THE FALL

Operations at its $1,000,000 packing plant now under construction in North Edmonton will commence early in September, J. S. McLean of Toronto, president of Canada Packers, Ltd., announced Monday after making an inspection of the property and building progress.

A staff of approximately 200 will be employed at the plant when it opens. With the exception of key men the staff will be engaged here.

Manager of the plant will be W. B. Tranter who is being transferred from the Winnipeg branch. He is expected to arrive around Aug. 15 to take over his new duties.

On Monday Mr. McLean, accompanied by J. Harris of Winnipeg, western manager, made an inspection of the work conferred with officials of the Bird Construction company who have the contract in hand.

"I am very pleased indeed with the progress. Work has gone ahead well, considering weather conditions," said Mr. McLean.

Rush Construction

During the coming season the work would be rushed with the probability that a peak of 300 men would be employed on construction. The structure will be four storeys in height besides the basement.

Mr. McLean said it was the intention to carry on a large export trade from the Edmonton plant particularly butcher bacon for the English market.

"The quality of northern Alberta bacon is good but not as good as it could be. It would be more profitable to the farmers themselves to raise still higher quality products" said the packers' chief.

"The plant is being established in Edmonton because this is the centre of one of the chief livestock producing districts in Canada," said the president.

With the plant here in operation, the company would be selling meats in every important town and village from the Atlantic to the Pacific.

The Edmonton plant would serve the Alberta field while also covering British Columbia and part of Saskatchewan. Areas outside Edmonton would be covered by car routes or branches said Mr. McLean.

Commenting upon the trade agreement between Canada and the United States, Mr. McLean said so far any advantages had not affected trade as U.S. prices for cattle had not been as high as anticipated. Nevertheless the U.S. offered a natural market surplus Canadian cattle he said.

Queen Mary's Clocks

The Queen Mary will have 500 clocks on board, the largest marine clock installation in history.

CANADA'S FARM POPULATION

Of the 10,362,833 people who form the population of Canada exclusive of Yukon and North West Territories, 3,289,507 or 31.7 per cent live on farms. The rural population of Canada at the last census numbered 4,792,135 of which 3,289,507 or 67.2 per cent live on farms and were presumably engaged in farming. The remainder 1,502,628 represented the rural population which did not live on farms—usually in small hamlets or other unincorporated villages.

The English Lesson

"I 'eat' seven eggs this morning."

"Of course you mean 'ate'."

"Well, maybe it was eight."

****

Sold!

A well-known man of wealth is notorious for his ancient, green-hued overcoat. The other day his daughter got him to promise that he would at least look at some new overcoats she had had sent to the house.

Knowing her father's thriftiness, she arranged with the tailor's salesman to tell him that one of the 10-guinea coats was an odd size and old stock, and that he could have it for two guineas; she would then send her cheque for the balance.

The ruse worked; but on the first visit to his fellow-directors in the new coat the man was met with bantering comments, one remarking that it must have cost him a good bit.

"What's your guess? What's it worth?" the wealthy man countered.

When the guess was 10 guineas he said quickly, "What'll you give me for it?"

"Five!"

"Right!" and he sold it on the spot.—Tit Bits

SHIPLOAD OF POWER . . . (left) An Imperial Oil tankship in the Welland Canal. This is one of a fleet of ten lake vessels and fifteen ocean-going tankers that help in the big work of providing an unfailing supply of Imperial gasolines and oils for the Canadian market.

A VENETIAN EFFECT . . . (below) Warm weather followed heavy snow and then this happened to an Imperial Oil dealer up near Slave Lake. Where motor cars used to stop, motor boats became the customers—but what matter? Imperial Oil products are favorites both on land and water.

CAREFUL, CAREFUL! . . . (above) Quality is the result of infinite care. Here an Imperial Oil scientist is checking a sample of Marvelube to be sure it measures up to the specifications that make it the ideal lubricant for your car. Wherever you go in Canada you'll see the Imperial Oil oval sign. Day and night thousands of Imperial workers are employed making and distributing high quality products. Most motorists buy at the Imperial Oil sign so that they will be sure of good service, high quality and fair value.

SOME OF THE DISADVANTAGES OF THE NEW CALENDAR

By George McCready Price in The Canadian Watchman.

(Contributed)

First we should review briefly just what the new calendar involves. Its friends want a year which can be divided into an exact number of weeks, so that these even weeks will fit neatly into the months and quarters. In other words they want a year of 364 days instead of the present year of 365 days. But astronomy shows us that the solar year is a trifle over 365 days in length; so it is out of the question to ignore this troublesome extra day entirely. The calendar reformers know these scientific facts perfectly; so they do not propose to drop out this day entirely, as far as the year is concerned. They want to retain this day in the new style of year, so as to keep from getting the year completely out of harmony with those celestial regulators of time, the sun and the moon. But so far as the weeks and the months are concerned, they propose to drop out this 365th day. They would have every year under the new scheme invariably begin on Sunday. But when we follow a year beginning on Sunday through to its end, we find that the 364th day would be the end of the week or the seventh day (commonly called Saturday). Thus the 365th day would correspond to what we now call Sunday, the first day of a new week. But the reformers say No; this would spoil the whole scheme. Let us just drop out this day entirely—call it a "blank day" or a "year day" or anything at all so as not to let it come into the weeks or the months of the New Style. On this basis the first day of the next year (really a Monday under the present arrangement) would start again with Sunday and again follow along as stated above always ending on a "blank day" and the new year always beginning on a Sunday, so-called.

Sabbath and Sunday

Many people cannot at first see any harm in all this. They look only at the supposed advantages of having a neater looking calendar, with every year beginning and ending like all the rest, with the three-month periods or quarters all exactly alike. And certain men of "big business" assure them that the new calendar will be ever so much more convenient for gathering and comparing statistics than the months and years of the present calendar.

But they fail to consider what will happen to the Sabbath and the Sunday under the new scheme. The blank day at then end of each year must inevitably result in throwing the week, as God ordained it, completely out of order. The liberal-minded evolutionist who has no interest in trying to keep the Sabbath as a memorial of creation, smiles indulgently at what he terms the unreasonable scruples of the Sabbathkeeper, who contends that God ordained the week for man to keep all down to the close of time. Even the conscientious observer of Sunday as the memorial of Christ's resurrection would under the new calendar lose all connection with the actual day on which the resurrection took place and would soon find that the original first day of the week would actually fall on Monday, or Wednesday or Friday of the new-style week. And how can he claim any religious sanction for the new Sunday, which has thus become a purely artificial and man-made day with no possible religious backing at all?

Biblical Opposition

It thus becomes clear why believers in the Bible must stand out in solid opposition to the new calendar scheme. They believe that the Creator has commanded His people to remember the Sabbath day to keep it holy; though to do thus remember the Sabbath they may find themselves obliged to keep holy what the new calendar may call Wednesday, or Monday or Friday as the case may be. And this inconvenience of observing a day called a working day or an ordinary week day by all the world will have to be endured under the new calendar by those who observe first day just the same as by the Jews and others who observe the seventh day.

But it will result in much more than inconvenience. How will mechanics or tradesmen manage if the genuine Christian Sunday happens to fall on what the new calendar calls Wednesday? In states where compulsory school attendance is required what will happen if conscientious Sunday keepers feel obliged to keep their children out of school every Thursday (let us say) or every Monday? Jews and seventh-day Christians have long been accustomed to something like this situation; yet the problem of school attendance has seldom been involved except in some European countries where a six-day attendance is required. But the observance of the last day of the week could never give rise to so many troublesome problems as would the attempt to observe as a Sabbath a day right in the middle of the world's new-calendar week.

I cannot understand how any thoughtful observer of Sunday as the Sabbath of the New Testament can view with equanimity the prospect of being obliged in a few years to choose between observing the resurrection day on what the new calendar may call Monday or Thursday or following the careless multitude in observing the new Sunday on a rotating program which will make it fall on a different day of God's real week every succeeding year.

Modernism and Fundamentalism

As is usual in most important problems the real issues involved in this one do not appear clearly on the surface. But we all know that the controversy between evolution and creation as told in the Bible has already split Christendom into two rival camps. Now the larger camp or the evolutionists seem bent on bringing in an entirely new calendar which will bring out into objectionable prominence all those who are conscientiously determined to be loyal to their belief in a genuine creation. The new calendar will bring out this diametric contrast in a way that nothing else could do. Would it not seem almost like the last insult to Jehovah for Christendom not only to deny the reality of his creation as they have been doing but to so plan its business as deliberately to obliterate that divine memorial of creation which He has given as a blessing for all mankind?

The reader may depend upon it that all believers in the Bible and in a genuine creation are not going to follow this last-day multitude to do evil. Obviously the end of the ages is upon us; "the coming of the Lord draweth nigh" James 5:8. And in the final showdown when men by their deluded cleverness have arranged to flaunt their rebellion in the very face of the Creator we may depend upon the Christian to declare that he must obey God rather than men.

In that day where will you stand? And what do you plan to do about this matter in the meantime while this hard alternative is visibly creeping upon the world with steady glacial progress?

It seems to me that every loyal Christian should throw all of his influence into enlightening those around him regarding these impending calendar changes and the extreme danger which they offer to religious liberty and freedom of conscience.

MUTE 16 YEARS, MAN GAINS SPEECH

QUEBEC, April 15.—Lucien Dynes former from Ancienne Lorette, told today how his hired man had partially regained his speech after being mute 16 years.

Dynes said his helper Raymond McDonald, 21, had been unable to utter a word since stricken with illness when five years of age. Then after being frightened into unconsciousness he was able to speak. Dynes said the youth, hesitant in using his new power, first spoke incoherently but was gradually improving in phrasing and pronunciation.

The funeral of Billy, the little son of Mr. and Mrs. Jesse McMullen was held at Tofield on Friday last, service being held at the United Church, Rev. D. K. Allan officiating. Interment took place at the Tofield cemetery.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

One dollar per bushel up to 100 bushels, over that 90c per bushel. Apply to R. C. Phillips, Tofield Phone 806.

RUSSIA'S AMBITIOUS FARMING PLANS

The Union of Socialist Soviet Republics, formerly known as Russia, having been fortunate in obtaining an excellent wheat crop in 1935, well over a billion bushels, has plans prepared for a record-breaking seeding campaign this year.

The returning power of the sun's rays is now rolling up the snows of the southern area of the great Russian wheat belt and as fast as fields dry out workers are busily engaged in seeding operations. Farming is fully socialized in the USSR now and the central power has prepared elaborate plans to seed 340,000,000 acres. An idea of the size of this huge acreage can be gained by the knowledge that the number of acres of improved farm land in the Dominion of Canada totals approximately 85,000,000 acres and annually some 56,000,000 acres are seeded to field crops.

The Soviet is planning for a spring wheat acreage of 80,000,000 and a total grain acreage of 158,000,000 compared with 155,000,000 last year. It is hoped to produce 3,744,000,000 bushels of all kinds of small grains this year, an increase of half a billion over last year.

Of course the weather cannot be planned, and the vast area of Russia presents a variety of soil and weather, just as does Canada or any other large country. Drouth, rust, frost and hail happen in Russia to spoil the farmer's plans just as they do in Canada.

It is noticeable that among the things forbidden by the Russian government is seeding by means of airplanes. This was tried out in Russia a year or so ago, with a great deal of publicity, but the results of course were a failure.

Given favorable weather Russia may produce an enormous crop of wheat and other small grains this year. The rapidly increasing population requires vast quantities of grain. It is reported that the USSR has now close to 170,000,000 people. The government is now inclined to treat treatment of the population in the way of providing more food. But the possibilities for a considerable export surplus are present.

WOMEN FIGHT OVER BARGAIN PAIR OF SHOES

OTTAWA, April 15.—A pair of shoes and a bargain Tuesday caused two women to fight a waiting battle that lasted two hours and four minutes in an downtown department store, each woman held one shoe.

The trouble started when a $1 shoe sale opened. Two women dived for a pair of shoes. Each seized one shoe and refused to surrender it. Alice Nadeau, salesgirl said: "Flip a coin." The women said "no."

Secretary Treasurer H. G. Munro of the store was called. He declined to intervene. The women sat down and waited grimly till the two-hour mark was passed. One showed signs of nervousness and then surrendered.

The victor took the shoes.

Munro appeared unimpressed. Women were sometimes like that, he said.

NATURAL GAS AS SUBSTITUTE FOR AUTO FUEL

MINNEAPOLIS, April 11.—A successful demonstration of natural gas as a substitute automobile fuel was reported Friday by the Minneapolis Gas and Light Company. The company announced an automobile had been propelled over short distances at an average of half a cent a mile by natural gas.

John Swanson, vice-president of the company, has been directing tests of gas for automobile use for several months. He said the principal problem was compressing the gas to a pressure greater than the 125 pounds used.

WOMAN DENIED HOPE REPRIEVE

LONDON, April 14.—The home secretary today refused clemency to Mrs. Dorothy Waddingham 34 nurse and mother of five children who is under sentence to be hanged Thursday.

Mrs. Waddington was convicted February 27th of killing a patient at her nursing home in January. The criminal court dismissed her appeal last month.

Small Fire Friday Night

Many residents were awakened by the shrieking of the fire alarm siren between midnight and one o'clock of Friday night.

The alarm had been sent in by Mr. Wentworth who lives in the Myers house along with another tenant Mr. and Mrs. Carter. It appears that Mr. and Mrs. Carter first discovered the fire and while the other tenant ran and turned in the alarm, Mr. Carter ran for water and was successful in putting the fire out.

The Carter's first intimation of trouble was a slight explosion which dislodged some of the surface of the wall above the cook stove. Later it is reported, a rag which had been saturated with gasoline was found pushed into a hole in the outside wall. The owner of the house, Mrs. Myers, lives in Edmonton.

The fire brigade responded promptly but had little work to do upon arrival.

GRADS WIN SERIES

After being defeated by the American championship Tulsa team on Saturday last, the Grads came back on Monday to win the fourth game of the series, thus successfully defending the Underwood trophy and earning the right to be classed North American basketball champions. The game Monday was strenuously played and there was not much to choose between the two teams. Accurate shooting contributed toward the Grads victory, especially on free throws.

THRESHING GETS UNDER WAY

Following another light snow storm on Monday last, threshing finally got underway Thursday of this week. The quality of the grain threshed varies, some not being too bad, other fields being affected by weathering. The mice have done considerable damage.

WANTED— A girl to work on farm. Able to milk and do light chores. Salary $10 per month. Apply W. Morden. Phone 2303.

ANY POTATOES?

Any subscriber who wishes to renew or any new subscriber to the Mercury can make payment with potatoes. We are not in the potato business but can use a few bags at this time.

LAKESHORE

Mrs. Jas Gray of [illegible] arrived a few days ago for a visit with relatives and friends here.

Miss Ethel Graham returned to her normal duties in Edmonton on Saturday.

The Sherlock family had as their guest for several days this week Mr. Wilmer Gold of Vancouver Island. Old timers will remember that Mr. Gold lived in Tofield with his parents more than twenty-five years ago when as schoolmates he and Frank Sherlock formed a friendship which absence (except for brief visits now and then) and years has strengthened rather than diminished.

We are sorry to report that Marvin Beale is confined to his room with heart trouble. While the condition is not considered serious if rest and proper treatment is taken, the active young lad finds his enforced rest very irksome and we hope he will soon be able to be about again.

Mr. and Mrs. T. A. Jones attended the Old Timers get-to-gether in Edmonton last week.

Mr. and Mrs. Abernethy, Fern Walker, George Abernethy and Oscar Ackley were visitors at the Walker home on Monday evening.

Lost, strayed or stolen, one rabbit's foot. Any information leading to its recovery will be gratefully received by Mrs. Graham and Mrs. Phillips.

Mr. and Mrs. Art Redway left on Monday for Saskatchewan.

Mrs. T. D. Ferguson spent a day or two in Edmonton last week.

ODDFELLOWS AND REBEKAHS ATTEND UNITED CHURCH

On Sunday last the Tofield and Ryley members of the Independent Order of Oddfellows along with Tofield and Ryley members of the Rebekah order assembled at the Town hall and paraded to the United Church for divine service.

Rev. D. K. Allen occupied the pulpit and preached an inspiring sermon. In addition to the regular hymns the choir rendered an anthem and Mr. Broughton sang a solo.

There is no Oddfellow or Rebekah lodge at Tofield at the present time, the Tofield lodge becoming affiliated with the Ryley lodge a number of years ago.

ALBERTA WHEAT POOL
CALGARY

LOCAL AND PERSONAL

T. E. Tanner of the Calgary Power Co. was in town on Wednesday.

Mrs. W. Hay of Edmonton is taking care of her mother, Mrs. H. Kendall while she is ill.

Mrs. Albert Kendall of Edmonton visited the Kendall home here on Friday.

Mr. Marion Thompson who has been attending the University of Alberta returned home last week.

Miss L. Ross spent the week end at her home in St. Albert.

Among those who saw the Grad basket ball game in Edmonton on Monday evening were Mr. and Mrs. Clutterham, Mr. and Mrs. Cowell, Mr. and Mrs. W. E. Beale, Art Francis, Hilda Nesseland, Mrs. Calvert and Lovett Ross.

Mrs. Wilmore of Edson is visiting at the Kendall home here.

We are glad to report that Lois Thompson and Edythe Borden are up and around again after their narrow escape.

Miss Jessie Colpitts returned to Vegreville this week.

Mr. B. Blair of Edmonton is working at the Tofield Creamery.

Mr. Ed Hill spent the week end in Tofield.

Mrs. Freeman Hill and Anne Swift spent the week end in Edmonton.

Mr. and Mrs. N. Paulo and son, and Mr. and Mrs. Howard and son were Sunday visitors at the Borden home.

Florence Kendall left for Edmonton where she will be a member of the telephone staff.

The regular meeting of the Anglican W. A. will be held at the home of Mrs. J. W. Robinson on Thursday, May 7th.

Miss Edith Davison spent the week end in Edmonton.

Mr. and Mrs. Ed. Hicks, Mrs. Barnett and Mary spent Wednesday in the city. Mrs. Hicks is staying at the Harold Hicks home.

The Jolly Twelve Bridge club met at the McCauley home on Wednesday evening, Marjory Stuart being the hostess. Honors were won by Mrs. Chapman and Anne Swift.

Mr. Beirnes, Arthur and Donald visited the city on Thursday.

Jack Beirnes left a short time ago for Calgary where he is taking a course in aviation.

Mr. B. Baker of Edmonton spent Thursday visiting at the Warton home.

We understand that Mrs. Jobb is receiving treatments in an Edmonton hospital.

Mrs. Russell Ferguson and infant daughter returned home after visiting some time with Mrs. Ferguson's parents Mr. and Mrs. Wm. Thomson.

GRAND CANYON FORMED WHEN METEOR FELL

FLAGSTAFF, Ariz. April 29.—A theory that the Grand Canyon of Arizona was formed when a giant meteor struck the earth was advanced here Tuesday before the southwest section of the association for the advancement of science.

Disagreeing with the commonly accepted theory that the gorge was the result of erosion, Capt. J. Turley, Albuquerque, N.M. civil engineer, contended the canyon was created when a meteor struck the earth with great force 40 miles west of here about 600 years ago.

SEEDING IN FULL SWING WITHIN WEEK

WINNIPEG, April 28.—Seeding of wheat across western Canada's prairie farm belt will be in full swing within a week under the most favorable conditions in years, according to information from provincial departments of agriculture.

Moisture conditions range from "abundant" in Alberta to "very fair" in Saskatchewan. A slight reduction in acreage sown was a possibility in Manitoba where farmers are not as well stocked with horses as in others.

The season is late in some districts and advanced in others when compared with last year. There is little apprehension, however that the delay might result in loss of crop. Fair weather forecast is expected to hurry on the sowing and bring work on the land up to schedule.

KETCHAMOOT

We extend to the Foshaug family our sincere sympathy in the death of their husband and father, Mr. Lars Foshaug. Several from our district attended the funeral at Bardo Sunday.

Mr. and Mrs. Scholtz, Mr. and Mrs. J. H. Ingram, Messrs W. A. Mitchell, Tom Sutton, Roy Williams Ivan Mitchell and Charley Sears were passengers to Edmonton Friday. A few returned the same day, the rest staying until the first of the week.

Mr. and Mrs. Peters and family have moved to the former Hugh Mitchell farm. Mr. and Mrs. Hubert who formerly lived there have moved to the Woodlawn district.

Mr. John McGinitie received a wire Sunday evening stating his mother had passed away at her home in Frisco, California on her 84th birthday. It will be remembered she visited at the McGinitie home last summer. We extend our sympathy to the McGinitie families. She was also Mrs. Maurice McGinitie's and Mrs. John Brown's grandmother.

Mr. and Mrs. Wm. Ingram visited at the Wiley home Sunday near town. Mrs. Wiley entered a hospital in Edmonton Tuesday where she will undergo an operation. We wish for her a speedy recovery.

Mrs. T. D. Ferguson of Lakeshore returned home Tuesday after a few days visit at the home of her parents Mr. and Mrs. J. H. Ingram.

Mrs. John McGinitie entered an Edmonton hospital Saturday suffering with complications from the flu. We hope she will soon be able to return home.

Miss Irene Couture of Edmonton is assisting Mrs. Geo. Lawson with her spring work. Jack Fair is also helping Martin.

Mr. Robert Cameron of near St. Paul arrived on Tuesday and will work for the [illegible] family for the spring work.

ROYAL RECOGNITION

Mr. W. C. Pollard, Town Clerk of Uxbridge, Ontario, Canada, author of "Pioneering in the Prairie West" which we reviewed in our columns September, has received the following letter, dated February 17, from Buckingham Palace:

W. C. Pollard, Esq.,
Uxbridge, Ontario.

Dear Sir,—The copy of your book "Pioneering in the Prairie West" forwarded by the Governor General, has been laid before the King, an expression of whose thanks I am commanded to convey to you.—Yours very truly,
(Signed) A. LASCELLES.

Mr. W. C. Pollard is Mrs. Baptist's brother.

WHISTLING SWANS IMPRESSIVE SIGHT

ERSKINE, April 29.—During the stormy weather recently 500 whistling swans collected on Erskine lake, one mile south of town. It was one of the rare sights of wild life and Erskine bird lovers regret that the sight could not have been preserved by moving pictures for all bird lovers to see. The snowy creatures, all white except their black bills and legs measured over eight feet from wing tip to wing tip. To see them come zooming down the sky, talking and whistling as they came, long necks stretched out and light gracefully on the blue waters or riding the white-capped waves was a thrilling experience.

Their "talk" is more of a "chatter" than a whistle. Each year this lake is a "resting rendezvous" for the migratory birds, for they go far south to winter and each spring return to the Arctic circle to brood. Once they had become almost an extinct bird family, but under protection have increased and are one of our most beautiful species, being much larger than Canada geese or even the great blue eagles.

MISPLACED on a bus-wagon on Tuesday, April 28th, at the tying shed, a straw trunk filled with men's clothing. Please leave at Geo. B. Bruce's store.

TO RENT—Rooms suitable for housekeeping. Unfurnished. Apply to James Campbell, Tofield.

Some hitch-hikers now refuse to ride with a man who has no radio in the car.—Los Angeles Times.

BARDO

OBITUARY

Lars Gerhard Foshaug, was born in Bardo, Norway October 1, 1879. In 1901 he came to this country where he took a homestead in the Bardo district. In 1906 he was united in marriage to Alma Fiaseth. To this union was born nine children, two of which are dead. He had been ill for some time but on Sunday April 19th, he became seriously ill and passed away at his home on Friday, April 24th. He is survived by his wife, five sons, Ivan, Leif, Merlin George and Tolbert; two daughters, Mrs. Clarence Rude and Mrs. Arnold Johnson; one granddaughter, two sisters, Mrs. M. B. Ness all of this district and Mrs. C. J. Jernberg of Manitoba, and two brothers Olaf and John of Norway.

Funeral services took place at the Bardo Lutheran Church on Sunday, April 26th, Rev. Solheim of Camrose officiating. The pall-bearers were Messrs Ben Anderson, Bennie Fiaseth, C. M. Fiaseth, I. B. Moen Albin Anderson of Kingman and Andrew Fiaseth of Ryley.

The deepest sympathy of the community is extended to the bereaved family.

Miss Hannah Jensen of Edmonton spent the week end at her home here.

Rev. Solheim of Camrose spent the week end at the M. B. Ness home.

Mrs. Harold Ronning, Misses Alice, Gladys, and Muriel of Camrose and Betsy and Esther Ness of Edmonton were week end guests at their home here.

Miss Martha Roth was practice teacher at the Standard school last week. She spent the week-end at her home here.

Miss Gladys Ness was practice teacher at the Grand Forks School.

Mr. O. Johanson returned from the coast last Thursday.

CARD OF THANKS

Mrs. L. G. Foshaug and family thank their many friends for the kindness and sympathy shown them during their recent bereavement and also for the beautiful floral tributes

New Post Office Started

The foundation for Tofield's new post office is now being laid and construction work will be pushed as quickly as possible. The building will be of brick and tile construction and will be located immediately south of the Bank of Montreal. It will be conveniently planned both as regards the public and post office staff, Postmaster Clutterham says Geo. B. Bruce is having the building erected and G. McSporran is the contractor. Occupation is expected about the last week in May

FOR SALE— Hardy perennials from selected seeds. Sweet Williams, Iceland Poppies; Scarlet Lychnis; Lily Bulbs. 10 cents each. Apply evenings J. W. Robinson.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

YOUR RESPONSIBILITY

The departments of public health [illegible] are doing a great deal with the money [illegible] place at their disposal [illegible] you against disease and [illegible] information concerning [illegible] practices which are the [illegible] personal health.

What [illegible] with the information you receive [illegible] your personal responsibility. There is no particular merit in the possession of a vast store of health [illegible]. The only value of [illegible] from its use [illegible] way in which results [illegible].

[illegible] under regular medical [illegible] live a practically [illegible] if he will adhere to his [illegible] (as indicated in his case) [illegible] the manner prescribed [illegible] responsibility, no one else [illegible].

[illegible] heart provided it is [illegible] more than it [illegible] may function adequately [illegible]. To live a [illegible] life to step being [illegible] to conserve [illegible] are the sole responsibility of the individual whose [illegible] damaged.

[illegible] generous in some [illegible]. We can get along, for example, [illegible] with one kidney or one [illegible] possible to collapse one [illegible] and place it at complete [illegible] as to have a better [illegible]. It depends upon the [illegible] following the advice of his [illegible] by such a situation [illegible] his health.

[illegible] elimination is simply a [illegible] whereas constipation is [illegible]. It is the responsibility of [illegible] to secure regular elimination [illegible] through a regular toilet [illegible] the use of a diet which promotes [illegible] and reasonable body [illegible] into play the [illegible] of the body including [illegible] from the abdominal [illegible].

[illegible] the [illegible] of the law you [illegible] drugs and attempt to treat yourself which incidentally is something [illegible] does not try to do for [illegible]. On the other hand, you can [illegible] secure the advice of a qualified person who prescribes treatment [illegible] only after an examination which reveals the cause and nature of [illegible] for which treatment is required.

[illegible] costs nothing. It is a [illegible] of each one to secure [illegible] sending part of the day [illegible] and by sleeping in a [illegible] the window opened sufficiently [illegible] keep the room cool and [illegible] fresh and in gentle motion.

[illegible] health is largely a personal [illegible]. It comes through [illegible] attention to the [illegible] adjusting the habits [illegible] condition of the body. [illegible] concerning health addressed [illegible] Canadian Medical Association, 184 College St., Toronto, [illegible] answered personally by letter.

FASTER CONTINENTAL TRAINS

WINNIPEG, Man., April 27.—One [illegible] was clipped from [illegible] time of the "Continental [illegible]" the Pacific Coast [illegible] Canada, effective with [illegible] change of time on April [illegible] an announcement [illegible] Robert Creelman, passenger [illegible] for the Canadian National [illegible] at Winnipeg. This [illegible] a saving of four [illegible] with the schedule [illegible]. The "Continental Limited" [illegible] Vancouver an hour [illegible] than previously and [illegible] Winnipeg at 6.00 p.m. instead. [illegible] Departure time from [illegible] Eastern cities has been [illegible] p.m. instead of 6.00 p.m. [illegible] the eastern cities have been carefully planned. They [illegible] Toronto and 8.30 a.m. in Montreal, making connection at this point with the boat special [illegible] Quebec and the fast train for [illegible] Provinces.

[illegible] the summer season to meet the demands of the tourist business [illegible] sleeping car service will be [illegible] in both directions, between St. Paul, Winnipeg, Jasper and Vancouver, connecting at St. Paul with trains to and from Chicago. This service will become effective from St. Paul June 27, Winnipeg June 28 and eastbound from Vancouver on June [illegible].

A fast boat train will be operated twice a week in both directions, during the season, between Jasper and Prince Rupert, connecting with the Canadian National steamers to and from Vancouver. This new service will permit of a daylight run through the spectacular Skeena Valley and a stop at the Indian village of Kitwanga. The service becomes effective June 15.

TREATING SEED AGAINST SMUT

When it is considered that smutty wheat penalizes the grower from $75 to $90 a car the advantage of treating seed against smut is obvious.

Scientific tests have proven the organic mercury dusts treatments to be the best to use in treating seed grain for smut.

New improved Ceresan and Leytosan P are two of this type of fungicide which have much to be said in their favor, particularly in a season such as this when undoubtedly much frosted grain of low viability will be sown. Neither of these will harm the treated seed at all while the same cannot be said of liquid fungicides.

The University of Alberta has made extensive tests with treatments against smut and found New Improved Ceresan and Leytosan P to give best results. It is pointed out by Professor A. W. Henry and J. D. Shaptason, who conducted the tests, that these preventatives should not be used if the seed grain is damp and should be applied just before seeding. Injury may occur if grain is stored for a week or longer.

Growers desirous of obtaining these fungicides if not available locally should apply to any government branch.

HAS DENMARK THE ANSWER?

Denmark leads the world in co-operatives. True the English co-operative movement is richer and has more members but England cannot touch Denmark yet as a co-operative state. Most of the needs of the Danish people are met through some form of co-operative organization. The Danish Co-operative Wholesale Society has 1,800 affiliates with 340,000 members. Danish cities make loans to co-operative housing societies up to 80 per cent of the dwellings value. Danish farmers have shown the farmers of the world a way out of their difficulties. They have organized producing and consuming societies, and co-operatives in milk testing, cattle breeding, and everything farmers do and need. The Danish Co-operative Bank lends only to co-operative societies and includes co-operative saving banks, credit unions and individuals. It has a staff of nearly 300 people. The state owns a number of the key industries and enjoys a handsome revenue from them.

CHAINED BY NECK TO STEERING WHEEL, LEFT FOR 4 HOURS, IS TEACHER'S STORY

ISLINGTON, Ont., April 27.—Police Monday pressed inquiry into the reported attack on Reginal Parker, 32-year-old school teacher, who informed authorities he had been chained by the neck to the steering wheel of his car by an unknown man, his imprisonment in the machine lasting four hours.

Police declared themselves mystified by the attack on the teacher who summoned help from passing motorists by pressing his cheek to the horn on the steering wheel. His neck was bruised and swollen from the chain and his face cut from pressing on the horn.

According to Parker's story the stranger, well dressed, informed him he wished help in releasing his car from the ditch. Parker said he drove stranger where the ditched car was supposed to be.

"There is no car," Parker quoted the man as saying. "You just keep on driving."

The school teacher said he was forced to drive to Islington in suburban Toronto. At the end of the 70-mile ride the car was stopped in a field and he was chained to the wheel.

Able to return to his classes, Monday, Parker said he knew of no one with a grudge against him.

ITALY CLOSES GRAIN EXCHANGE

Private trading in wheat stocks has been prohibited in Italy and surplus wheat is stored in warehouses from which supplies can be obtained only on the authority of the government. The price of bread flour has remained unchanged. The price of wheat for bread purposes [illegible] around $1.70 a bushel and slightly higher for Durum wheat.

COLLECTIVE FARMING IN THE U.S.S.R.

It now seems evident that farming in Russia is almost completely a government function. Out of the total sown wheat acreage in that country in 1936 40,500,000 acres only 1,250,000 acres are listed to be sown by individual peasants and 53,000,000 acres in collective farms and the balance in state farms.

WOOL FROM ROCK AND FURNACE SLAG

MONTREAL, Que., April 27.—To most people wool is usually associated with sheep. It may come as a surprise however to learn that wool is also "spun" from rock and blast furnace slag, from asbestos and also glass! These wools are used for insulating purposes in gas and electric ranges and for pipes. They are also used for sound absorption. One would scarcely conceive of rock and slag being associated with radio broadcasting but these play a not inconsiderable part in the production of programmes that emanate from the studios of the British Broadcasting Corporation. The rock and slag, however, is in the shape of wool and is used for deadening of sounds in the studios, the walls being covered with the wool which is held in place by wire netting and covered by some loosely woven fabric. The floors are also treated with slag or rock wool, the wool being laid in the gaps left between the slats. Considerable quantities of rock wool are manufactured in the United States and it is imported into Great Britain in fairly large amounts. Some manufacturers in Great Britain are interested in sources of supply for rock wool in Canada, samples of which were displayed in the recent Building Trades Exhibition and British Industries Fair held in Birmingham. Two leading firms use about 80 tons per annum, according to the Industrial Department of the Canadian National Railways.

FARMERS TO SAVE AGRICULTURE

A practical school in co-operative management for directors, managers and employees has just been successfully completed by Dean Christensen of Wisconsin University College of Agriculture.

The Dean is on the right track. It takes a lot of courage and optimism, especially when Congress is in session to hold on to the conviction that agriculture is going to be saved by farmers themselves and not by politicians.

Co-operative marketing succeeds or fails just so far as farmers think through their problems and decide that the only enduring help is self-help. Their organizations succeed or fail depending upon the understanding which the members have of the problem. The business organization which is set up to carry out the marketing of their commodities must be administered along sound business lines and here is where forward-looking Dean Christensen has wisely offered a training school for those who run these co-operative businesses.

More of our agriculture colleges should get down to brass tacks with their farmers and help them to understand their problem and then furnish the type of concrete assistance for them in their marketing business. —National Live Stock Producer.

A TRUE MEASURE OF PROSPERITY

What we are concerned with and what the farmers' organizations are concerned with is not the abstract term "prosperous agriculture." We are concerned with the farmer and his family in his home. Prosperity is measured for us by the standard of living which exists in the farm homes and in the lives of those who now inhabit them on these prairies and who have given the best of their lives to the cultivation of prairie soil. Whatever else exists—cities, factories, railroads—is at best ancillary to farming and at worst a predatory parasite upon it. The farmers of Western Canada and their organizations hold firmly to this view and will fight all comers in the determination to maintain and enhance the comfort and well-being of those people now here and will continue to hold fast to the view that the prosperity of agriculture [illegible] and will not be measured by wealth of cities or corporations [illegible] by the health, happiness, security [illegible] comfort which prevail in the farm homes of the prairies.—The Western Producer.

MARK DIVIDED TWO 62 YEARS; DEATH TAKES ONE

HOPSNELL, N.Y., April 27.—Death has separated permanently two brothers, whose hermit-like existence in the hills near here had been divided by a chalkline for 62 years.

George Washington Coleman, 79, said he would "carry on" in the little cabin at Baker Gulch where James Philatus Coleman, 81, died Saturday of pneumonia.

For more than half a century the two brothers had lived in the little cabin as veritable strangers, a chalkline through the centre of their one room home marking the boundary of their individual domains. Neither ever disclosed the reason for the strange relationship. On each side of the room was a bunk where each slept and each did his own cooking and had his own set of dishes.

HUNGERFORD CHAIRMAN OF NEW C.N.R. BOARD

OTTAWA, April 27.—S. J. Hungerford, president of the Canadian National railways, will be chairman of the new board of directors for the government rail system, it was indicated in the commons Monday by Railways Minister Howe.

Railways minister moved second reading of the government bill to re-establish a board of directors for the C.N.R.

He claimed the present board of trustees had failed in co-operative methods and the outlook for the future was not bright. There was unrest among C.N.R. employes who regard the trustees with suspicion because operating men were under the control of three laymen who knew nothing of practical railway problems, he said.

The board of trustees, Mr. Howe said, was responsible to no one. It seemed to have no policy and as far as public relations were concerned, no voice. There was disagreement among them with the chairman having an over-riding vote.

GAINER'S HAY PILE IS HIT BY FIRE

Attracting excited spectators from all parts of the city, hurtling flames destroyed a hay shed on the property of Gainers Ltd., packing plant, Sunday shortly after 9.00 p.m. Cause of the spectacular blaze is unknown.

Property loss, covered by insurance is estimated at $2,500 mostly in approximately 400 tons of baled hay which went up in smoke.

Whipped by a northeast wind, flames leaped high in the air before the blaze was noticed and the flame and smoke-painted sky attracted cars and pedestrians to the scene. The destroyed building was located at the extreme south of the Gainer property and it is believed that if the wind had been in the other direction all the buildings might have been endangered.

Fire-fighters from halls 2 and 6 responded to the first alarm and the second alarm brought equipment from hall 1. The blaze was under control shortly after firemen arrived on the scene.

The teacher had forbidden the children to eat candy or chew gum during school time. One day she became suspicious of a lump in Jimmie's cheek.

"Jimmie," she said reprovingly, "are you eating candy or chewing gum?"

"Neither one," replied Jimmie. "I'm soaking a prune to eat a recess."—American Boy.

FRENZIED GROOM BITES OFF DOG'S TAIL IN PARADE

BELGRADE, April 27.—The man who bit the dog is no longer a legend, says the Yugo-slavian Herald.

While a wedding procession was marching through the streets of Beshenovo, Yugoslavia, the bridegroom—who was the mayor of the township, Dusko Chiritch—in a frenzy of happiness seized a barking dog which was accompanying the party and bit off its tail.

The dog's howls were drowned by the music of the wedding band, but the mayor's act did not go unnoticed by his critics on the local council.

The latter declare that local opinion is so shocked over what is considered the undignified act of the mayor, that it is likely he may be deposed.

The mayor himself pleads high spirits at the prospect of his marriage, and the number of toasts his friends made him drink, were responsible for his biting the dog.

MAN IS STRIPPED AS PANTS CATCH ON DRIVE SHAFT

DIDSBURY, Alta., April 27.—Henry Banks, who works for John Mansen west of here, caught a ride to town on Harvey Burgess' truck, which consisted of cab and chassis. While riding behind the cab his pant leg caught in the drive shaft. He was thrown to the ground and all his clothing torn from him except his socks and boots. He is in Didsbury hospital with several broken ribs and internal injuries.

Ramsey Parsons, who lives southwest of here, fell from the scaffold of a well-drilling outfit Saturday afternoon. His father, Lake Parsons, tried to catch him and broke his left arm. The boy is in Calgary General hospital suffering internal injuries.

McMURRAY RESIDENTS FORCED TO FLEE FOR LIVES IN FLOOD NORTHERN TRAVELERS REVEAL

Vivid account of terror-stricken women and children fleeing for their lives in the dark to the hills above McMurray as swirling flood waters of the Athabaska river shoved huge ice cakes against their homes was related here Saturday by residents from the flooded area who arrived in Edmonton on the weekly N.A.R. train.

Hundreds of dollars damage was done to property but no lives were lost by the worst flood in that area in 60 years which partly submerged McMurray and Waterways.

John McDonald, retired Hudson's Bay company employe, recalled a similar flood struck the trading post in 1876, according to F. W. Lundy, Canadian Airways agent at McMurray, who was among the northern passengers arriving here.

Another big flood occurred in 1918 but the water did not reach as high as the present flood, he said. With little warning the water commenced rising Tuesday last at 7:00 p.m.

The ice jammed at the junction of the Clearwater and Athabaska rivers and in three hours a dozen residences on the Athabasca river flats at McMurray were submerged.

Carrying their clothes and only their most treasured possessions, the families ran for their lives. Since then they have been living in tents on the high land and each day as the waters gradually recede from the homes the families commence the task of repairing the damage and moving back again.

The ice jam is still holding firm, however, and if the Clearwater river ice breaks up and floods come pouring down from its upper reaches the water will rise again, Mr. Lundy said.

The river rose some 40 feet above the ice level at McMurray. During the excitement several families in both McMurray and Waterways, whose homes were on higher ground, joined the refugees from the flats seeking safety in the hills.

They spent a sleepless night Tuesday in tents hastily pitched on the damp ground. Except for the dozen homes, little further damage was done at McMurray.

Waterways, end of steel on the bank of the Clearwater river, three miles to the south, bore the brunt of the flood damage.

The Hudson's Bay company warehouse was submerged and goods stored within damaged as employes had no time to empty the building. Another warehouse was shifted bodily down the river while two 12,000 gallon steel gasoline and fuel oil storage tanks of Imperial Oil Limited were nosed from their concrete foundations by the force of the ice and floated down stream. They were recovered later and anchored.

The oil company lost a number of steel drums and their premises suffered other damage but no estimate has been made of the monetary loss.

TRADING OF COLONIES 'OUT,' SAYS BALDWIN

LONDON, April 27.—Premier Baldwin Monday assured the commons "in the most categorical terms" Britain "has not considered and is not considering the transfer of any mandated territory to any other power." Uneasiness had been manifested recently in parliament the government might be ready to talk colonial trades with Reichsfuehrer Hitler of Germany.

NAME ....

STREET OR R.F.D. ....

TOWN AND PROVINCE ....

THE PRESS—

IT IS NOT particularly surprising that in days of economic stress combined with political turbulence that the press should have aimed at it a certain amount of criticism. Undoubtedly there are times when criticism of the press is warranted but it is equally true to say there are plenty of times it is not.

Readers of newspapers should as far as they are capable weigh newspaper articles with, if only a little, understanding of the newspaper as a unit in our daily lives. Almost all newspapers perform a dual purpose, namely (a) to present the happenings of the day, which also includes opinions expressed by individuals and groups as well as things done by and happenings to individuals and groups. (b) to present the newspaper's own opinion with necessary comment as regards the happenings of the day. The latter of course is almost invariably contained in its editorial columns and the former in its news columns. Newspapers, particularly daily newspapers are keen rivals, and as all newspapers try to get information to readers as quickly as possible, this being considered a degree of excellence, it is necessary for readers to analyze some of the writings they read. For instance a government or company might be seriously considering a certain move. The newspaper learns of it and publishes it. Then the government or company changes its plans and often feels hurt because the original intention was made public, knowing that many unobserving readers mistake consideration for decision. But it should be remembered that newspapers want news while it is hot and if they always waited until everything was cut and dried, much news would be uninteresting. In reading editiorials readers should bear in mind the class of paper they are reading. Newspapers are roughly divided into two classes, political and independent. There are very few questions that effect the political life of the country, that have not two sides. Therefore readers when reading a paper supporting the principles of any one party, should not expect the editorials to be over generous to the opposing party. This does not mean that newspapers deliberately mislead readers, but it does mean that, in support of the political belief a newspaper is allied to, editorially it boosts the ideals of that party and says little about the ideals of any other, this being left to some opposing newspaper with equal powers of expression.

Some people believe that advertisers control newspapers. Perhaps in very rare instances this is so, but generally speaking advertisers of any importance and newspaper men of experience, understand the situation well enough to know that in the long run it is mutually suicidal for advertisers to dictate to newspapers. A newspaper to be of any real use to an advertiser must be free to pursue its own course, otherwise it soon loses prestige and ceases to be of much value as an advertising medium.

Generally speaking newspapers are not unfriendly to anything they believe to be in the best interests of the country. This is easily [illegible] when it is realized the best interests of the country concern newspapers as it does other folk. Naturally newspaper judgement does not necessarily bear the seal of infallibility, but it should be remembered that good newspaper men, through years of training, acquire a broad knowledge of men and affairs that is often denied to those following more secluded occupations.

OLD FRIENDS RETURN—

IN THE EVENING of the only really warm day we have experienced this season, an old friend, or perhaps it is better to say, old friends, joined in what can truthfully be called a welcome chorus. One did not need to go beyond the confines of town to hear the frogs, brought into activity by the temperature; their song, peculiar to themselves, could be heard well into the early hours of morning. It is quite a few years since such a hearty volume was heard in this district. To a lesser degree this song was heard in the spring of 1935, but in the years immediately preceding that the cr-e-e-k, cr-e-e-k cr-e-e-k of the slough dwellers was heard only now and then. Strangely enough, it seemed as if their sudden coming to life heralded a new era for this district and quite possibly for Alberta. Those people who have lived in this province for the past twenty-five years or more, can remember what a chorus the frogs gave on a warm spring night in past years. People coming into the province in the spring of the year to settle, were literally welcomed into the country by the evening chorus of the frog family. As the years passed and dry seasons occurred the spring song of the amphibians considerably decreased, and as far as town residents were concerned, practically ceased. Residents of Alberta of earlier, and it could be said happier days, will perhaps associate the reappearance of the frog family with the relatively care free and [illegible] days of the past. As the robin is considered the harbinger of spring, so might papa frog be considered the harbinger of less economically strenuous, more prosperous, years to come in the immediate future. Anyway the not unwelcome song of the frog is not without hope in this respect.

GRAIN FORUM PRIZE ESSAY DEALS WITH WHEAT PROBLEMS

Wheat marketing problems were dealt with in the prize winning essay submitted to the Grain Forum Radio Speech Competition conducted recently by the North-West Grain Dealers' Association and the Winnipeg Grain Exchange.

C. E. Sargent of Eyre, Saskatchewan, was winner of the grand prize carrying with it a trip to Winnipeg and $50.00 cash. Judges in the competition were: Prof. A. Savage, Dean of the Department of Agriculture of the University of Manitoba, L. T. Chapman, editor of the "Nor'West Farmer" and F. M. Abel, associate editor of the "Country Guide."

Following is the essay submitted by Mr. Sargent:

(By C. E. Sargent, Eyre, Sask.)

As a Western wheat grower, and formerly in the milling industry in England, I am strongly convinced that one of the major problems in grain marketing is the lack of a proper appreciation, by the growers, of the fact that our most important market, England, is, and [illegible] for such abnormal [illegible] as were presented by the Great War, probably always will be a "Buyers' Market."

The English miller has all the exporting countries of the world to choose from, and he is a past master in the art of blending wheats. Whenever he finds wheat suitable for his purpose held at a higher figure than those of other countries, he will purchase if necessary, two or three different wheats at a suitable price, by blending which he can replace that which he considers too high in price for his purpose. Sentiment does not enter into the matter; he is a firm believer in the adage, "Well bought is half sold." If he finds it advisable to do this for any length of time, it may [illegible] alterations in his [illegible] which are expensive, and to win [illegible] the market once lost it will be necessary to offer price inducements over the produce of other countries that will admit of the necessary plant alterations to again adapt the mill to the use of the wheat that had then been displaced. It is therefore a chief essential in dealing in such a market that it be held at all costs.

It is only fair to point out here that, if our wheat is unable to compete with that of other countries owing to Government subsidy by means of a fixed price or by depreciation of currency, the only way of meeting that competition is by similar Government intervention and not by scrapping our marketing machinery. To sell successfully in that kind of a market, it is important to understand the customer's way of doing business and to adapt ourselves to it, otherwise the business will go to the exporters who are willing to do just that, and to sell to the customer when he wants to buy.

For some hundreds of years the practice of the English miller has been to sell flour on contract to the purchaser, delivery to be taken as required over a period of three months, or possibly six months. Even if delivery orders are not received within the specified time, a contract is rarely cancelled by the miller. Every week the millers' travellers call upon their customers, pressing for delivery of contracts formerly made and writing up new ones whenever they find the customer willing to buy. These travellers know well that if they miss a sale, some other miller will book it, and it may, and very likely will happen that it may be six months or a year before they have a chance to even quote a price when making their weekly calls. Every morning the total contracts booked the previous day are noted by the head of the milling concern, and from the offerings of the grain merchants, of whom some or other call daily and submit samples, is purchased enough wheat for future delivery to cover the sales made the day before. These sales are wired to the offices of the grain merchants and a process of covering sales by future contracts gradually works back to the various grain exchanges in the wheat exporting countries. It therefore simmers down to the fact that if in the Fall, when the farmer is harvesting his wheat there is to be a daily opportunity for him to obtain cash for it at some figure or other, it must have been contracted for in the shape of flour purchased from an English miller about the time, or possibly even before the time, when the grain, which is to be marketed by the Canadian wheat grower as it leaves the combine, was actually seeded.

Now, if the wheat grower were asked, before he seeded his crop, to contract the sale of a thousand, two thousand or ten thousand bushels of wheat for delivery in October, he would be unable to do so, as he has no certainty of how much his farm is going to produce, or, of late years in some districts, whether it is going to produce anything at all, nor of the date when he will be able to put on the market. Individually, very few farmers have any reliable information on world supplies, probable production and demand, that would guide them as to the probable value of a normal crop. Some one therefore, must be found, willing and able to carry the risk of the changes in world conditions which may affect the value of this crop between the time it is seeded and is being sold by the miller in the importing country for future delivery, and the time when the farmer is able to deliver the harvested grain. Failing some organization which will perform this function, the producer must be willing to operate under the conditions which obtained at the close of the war, and on taking his grain to the elevator, to run the risk of being informed that it can be taken in and stored for him, but that the elevator company is not buying at the present time, nor do they know as to when they will again commence to buy. To perform that service which will ensure a daily cash market, the various grain exchanges were organized and exist, and whatever their faults and failings may have been, the result of their functioning has been to ensure that any day in the year that the farmer wants to turn his wheat into cash, he has the opportunity to do so at some figure satisfactory to him or otherwise.

The other alternatives to ensure a daily cash market are:—

1. To unite and form a co-operative grain marketing concern, paying an initial payment and the balance when the wheat is sold. This means that the individual must trust the business judgment of someone else to do his marketing for him, and may find himself liable to refund an over-payment instead of receiving an anticipated balance, on the strength of which he has already made expenditures which cannot be recovered or cancelled. In practice, that method has meant that instead of the individual producer using the marketing machinery of the Exchange, it was used by the co-operative body, and the individuals composing it gained or suffered according to the success or otherwise of the co-operative body in using the facilities of the Grain Exchange. Until the result of the year's operations was known, the individual was completely in the dark as to whether he had money coming, had broken even or had gone in the hole, on the sale of his wheat, and could govern his other financing accordingly.

2. The other alternative is Government monopoly of the grain trade, which, no sooner is it obtained than the first person to decry it and to claim it is nothing but a political football, is the farmer. I have yet to meet the farmer who did not claim that during the War, when wheat was thus marketed, the only effect of that method of marketing was to prevent the farmer from obtaining the prices that he would have realised on the open market, had it been allowed to remain in operation.

The natural tendency of either of the last two alternatives, under normal conditions, is a holding policy, with consequent loss of the export market and also with the result of depressing prices when the producer is less able to stand a low return than in the year of abundance, owing to the surplus carryover preventing the rise in price that subsequent short crops should have brought about. Under the open market system maintained by the Exchange, the producer is always dependent upon his own judgment and reaps the reward of good business acumen in the disposal of his crop, provided that he is operating his farm with such reasonable amount of capital as will enable him to sell when the market appears favourable and hold when it is not. The fact that a lot of people have been farming without any capital at all, and therefore been obliged to dispose of the crop at the time of threshing, whatever the price, is no fair reason for criticism of the marketing machinery of the Grain Exchange, but rather of the homesteading policy which encouraged men to attempt to farm without any capital at all. The open market provided by the Grain Exchange has the advantage of fitting in with the way our best customers have chosen as their method of doing business for generations. Undoubtedly it has been abused; there seem to be very few farmers who have experienced the other forms of establishing a daily cash market who do not claim that they too have been abused. Those for instance who delivered flax co-operatively in 1930, and those who relied on the Government Wheat Board paying over some Eight million odd for the 1930 wheat taken over by it and made expenditures on the strength of pre-election broadcasts. It would therefore appear to be our wisest course to concentrate on improving the open market, removing abuses from it, and above all, adapting ourselves to the uses and opportunities provided by it, rather than attempting to destroy it, until we have proved that we have something better to take its place.

Unfortunately, comparatively few farmers study very much the various methods of marketing their wheat available to them under this system. One of the big abuses is the fact that farmers themselves very largely only make use of the Grain Exchange to gamble for a rise in price and thus afford an easy prey to the large scale operator.

May I close with the suggestion that the Grain Exchange might do a great deal to overcome this major problem in grain marketing by bringing out a booklet, written in the interests of the producers, on "How to use the facilities of the Grain Exchange to SELL your wheat to the best advantage."

Good Evening.

(Signed) C. Evans Sargent

P.S. The writer has seen contracts in the milling concern for which he travelled, and also in possession of customers on whom he called which were dated in the reign of Queen Elizabeth.

PAGE DECLINES LIBERAL NOMINATION

Announcement that he would not accept nomination in the forthcoming byelection for an Edmonton legislature seat was made Saturday by J. Percy Page, principal of McDougal commercial school and mentor of the famous "Grads" basketball team. Mr. Page had been suggested as a possible Liberal nominee and had been approached by a number of citizens who sought to persuade him to accept nomination.

In making known his decision, Mr. Page stated his belief that an election campaign or legislature duties might interfere with his teaching activities.

HIM GOES TO JAIL FOR THEFT MAN WHO BIT HAND THAT FED

RED DEER, Alta., April 27.—Robert Kirk, 19 of Hamiota, Manitoba, who "bit the hand that fed him" started for Prince Albert penitentiary Saturday to serve a three years' sentence for theft of $94.

Three weeks ago Kirk arrived in Red Deer hungry and jobless. George Thompson, local implement dealer, gave him work and a home. The money was stolen from Thompson's shop.

Magistrate E. C. Jones in sentencing Kirk condemned his "despicable act in biting the hand that fed him."

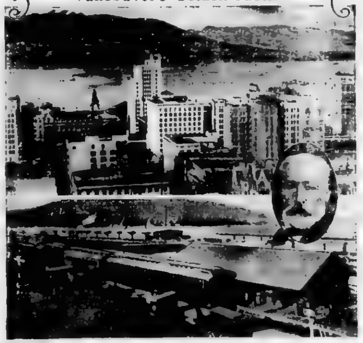
REDS DON'T WANT 'SUPERMAN'

MOSCOW, April 27.—Communist party put its foot down hard Saturday on the theory a superman can be created through the application of a substance reported designed to regenerate human mental processes.

The party protest included a demand the laboratory of the scientist, S. Kisilitzin, in Moscow State university be closed.

The party organ, Pravda, described Kisilitzin's theory as application of a "special substance" called "geniol" which would be applied to human beings in order to spur their mental processes, endow them with power to foretell would events and finally bring in creation a "more perfect man."

Vancouver's Golden Jubilee



Fifty years ago the first trans-continental Canadian Pacific Railway train from Montreal reached the Pacific Coast. This summer Vancouver, now the Gateway to the Orient and port for ships of the entire world, will celebrate the Golden Jubilee of its founding as the western terminal of the Canadian Pacific Railway. Commencing July 1 with Dominion and International Good Will Week, the programme concludes with the Canada Pacific Exhibition on September 7, and includes land and water sports, several weeks of grand pageantry, musical attractions, visit of American warships, a two-day air show with a solo flight across Canada planned as the highlight, floral decorations, visit of 15,000 Kalsers in mid-July, traditional pageantry of an Aldershot tattoo, frontier week, street dancing and costume balls, and historical exhibits arranged to illustrate Vancouver's steady progress during the first half century of its existence.

Even before the beginning of the celebration proper, many colorful events will be given recognition, including Empire Day and horticulture show in May; Pioneers' festival on June 13-14; schools' programme in June; Eucharistic Congress, which will attract thousands June 11 to 14; golf tournament, King's birthday, and religious dedicatory services.

One of the highlights of Vancouver's celebration will be the re-enacting of the arrival of the first Canadian Pacific train almost half a century ago. The venerable old engine, first to the coast, will be run again with its original pilot, W. H. Evans, at the throttle. Some of the old-timers who saw the first train arrive will also be present for the ceremony. The Canadian Pacific Railway will run tours at low cost from Eastern Canada to the Pacific Coast for the event, with stop-over privileges at Banff Springs Hotel, Chateau Lake Louise, and other famous Rocky Mountain resorts.

Pictures show the old and the new Vancouver and Sir William Van Horne, second president of the Canadian Pacific Railway, who chose the name of Vancouver in 1881 for the western terminal of the first trans-continental railway line.

NEW SALES TAX STAFF BEING FORMED

Appointment of E. M. Gunderson, superintendent of income tax, as acting superintendent of the provincial sales tax branch, was announced Tuesday by Hon. Charles Cockroft, provincial treasurer.

A. Mara, former credit manager for Edmonton wholesale firms and subsequently in the insurance business, has been appointed chief inspector under the Sales Tax act.

Organization plans provide for an inspection staff at the start of two inspectors in this city, two in Calgary, and one for Medicine Hat and Lethbridge.

Transfer of Hugh Baker, former secretary of the tax inquiry board, to the sales tax staff is to take effect, it was learned. Before returning to the province some years ago, he was secretary to the Alberta agent general in London.

Some members of the debt adjustment staff are being transferred to build up the sales tax staff which also will be augmented when necessary by surplus employes in any of the other provincial departments.

The headquarters for the sales tax staff will be in the Qu'Appelle building on 100 st. where the income tax staff has been located for several years. Preliminary preparations for the sales tax administration operations which take effect May 1, now are under way, staffs being busily engaged.

Some 15,000 application forms for all firms selling commodities within the province are being sent out by the sales branch. The applications for registration for which there is no fee, have to be made up May 5.

First returns on the sales tax will be due in the period between June 1 and 15, which still gives the department some time to complete organization. The act provides that the vendors, all of whom are entitled to retain five per cent for commission on collecting the two per cent tax on retail sales, shall make returns to the sales branch by the fifteenth of the month on the preceding month's sales. As the act takes effect May 1, the returns are expected to start to come in on June 1 while all covering May sales are to be in by June 15.

RABBIT DISEASE HITS OYEN AREA

OYEN, April 28.—Suffering from tularemia, a disease which may be communicated to humans, a large number of dead rabbits have been found around sloughs in this district. Authorities are urging residents to burn all the dead rabbits they find.

It is believed that cattle and horses drinking from the sloughs and children swimming in them may be affected.

As many as 40 dead rabbits have been found around a single slough.

OFFICER SAVES WOMAN CAUGHT IN QUICKSANDS

LONDON, April 28.—Police Constable George Galloway of Liverpool, saved a 70-yer-old woman from a slow death by suffocation.

Mary Brasendale was buried to her armpits Sunday, in quicksand beside the sea at Liverpool.

The constable ran a quarter-mile along a docksill (a ledge blow a dock under water except at low tide) towards the place where Miss Brasendale was trapped.

Then he threw himself on his face and rolled over the most treacherous section of quicksand to relatively firmer footing. From there he succeeded in pulling the woman out of the sand. He rolled her to safety in the same manner as he had reached the spot himself.

WOMEN BRAVER THAN MEN AS DENTIST DRILLS

BOSTON, April 29.—Women may shriek and faint at the sight of a mouse but when it comes to sitting in the dentist's chair and standing pain without a whimper they put the stronger sex to shame.

Dr. Walter Emerson Briggs, instructor in dentistry at Tufts College, told members of the Massachusetts Dental Society here:

"Men as a rule are very unreasonable patients. The language they use is not exactly polite. Women can take any kind of pain without a whimper."

MILLIONS OF GEESE IN WINNIPEG AREA

WINNIPEG, April 29.—Geese by the million visited Winnipeg Tuesday. Countless numbers of the beautiful birds "sat down" on the adjacent prairies, apparently awaiting warmer weather before returning their northward flight.

HOUSE MEMBERS AID FORMATION NEW S. C. BODY

Approved by a caucus of Social Credit members a scheme designed to give this province a sweeping Social Credit organization now is in process of formation.

Social Credit members in each constituency are the official organizers operating under the new constitution of the organization known as the Alberta Social Credit league.

The far-reaching plan of organization includes formation of S.C. groups, zoning of ridings, constituency associations, divisional conferences and a provincial convention which would be attended by one accredited delegate from each of the 63 ridings.

Provision is made for the provincial convention electing the league's central executive.

Ten of the accredited delegates would be named to act with the provincial board of management for the league.

Provision is made for holding of zone assemblies open to all active members of registered groups within the zone and all registered associate members. These assemblies are to meet at least once every three months.

A zone council also would be elected, headed by a president who is to be the zone organizer.

Provision is made in the constitution for a "women's division" and a "youth division" which would be organized later.

All members are to pay an annual subscription fee of 25 cents to the central office of the organization.

FOR SALE: A quantity of Banner seed Oats. Government germination test 96 in six days, price 35c per bushel, cleaned. Also young purebred Hereford bulls for sale; ages 13 and 14 months; sired by Tofield Domino 2nd. —Apply to Earl Moore. Phone 1810 Tofield.

6 MONTHS' PLANNING, FEW SECONDS' WORK; SEVERING BIGGEST DIAMOND TRICKY TASK

NEW YORK, April 29.—Eyes of Lazare Kaplan, diamond-cutter shone with happy tears today as he told how he performed the biggest job of his career—the first cleaving of the Jonker diamond.

The 726-carat gem which was the world's largest and finest uncut diamond is now in three pieces. Later these will be split into 12 which the owner hopes to see sold in a $2,000,000 necklace.

It was Kaplan's task to tap the uncut jewel with a brass hammer and sever it for the first time—an operation so delicate that even the owner Harry Winston wouldn't look on.

The diamond fell apart perfectly.

The actual cleaving took but a few seconds; but Kaplan had been studying the diamond'h groove and planning the cleft for six months.

Winston said the cleaving was uninsured although the uncut gem was insured for $1,000,000. He said his insurance brokers were told by Lloyd's of London "the risk is too great."

SPRING, LOVE COMES TO UTE INDIAN DOMAIN

BYTON, Utah. April 29.—Spring—and young love— came Tuesday to the Ute Indian reservation to the accompaniment of a thundering tomtom.

Old White Eagle, garbed in a bear skin let it be known that the bears have ended their long sleep and that spring officially is at hand. Then the Indian maidens chose their husbands at the traditional mating dance. The fete closed with a banquet of barbecued meat and cornbread.

10,000,000 CHINESE FACING STARVATION

CHUNGKING, Szechwan Province, China, April 29.—Terrible famine sweeping Szechwan and North Honan provinces assumed the proportions of a national disaster Tuesday with estimates of the number of natives dead or facing death ranging from 10,000 to 30,000,000.

Chinese vernacular newspapers reported some hunger-maddened victims were resorting to cannibalism and that other starving parents were selling their children to gain money for food.

While millions of Chinese are facing certain death from starvation, other millions are suffering "deficiency" disease which missionary doctors say must lead inevitably to their deaths.

The famine in Szechwan province is the first to ever visit this former land of plenty.

Three large government banks in Szechwan have raised a loan of about $100,000,000 to be used for purchase of seed for rice crops, but informed sources said this was only "a drop in the bucket." Missionary doctors say that millions more would be required to cope with the situation.

SALES TAX TO BE OPERATIVE NEXT FRIDAY

Plans are well advanced for institution of the sales tax operation on May 1, Hon. Charles Cockroft, provincial treasurer stated on Wednesday. As he announced during the session, the tax will be administered by the income tax branch, of which E. M. Gunderson is head. Through this tax, it is expected that $2000000 additional revenue will be raised.

The list of exemptions and regulations under the tax have been published.

Hugh Baker the former attache at the Alberta office in London and latterly secretary of the Tax Inquiry Board has been transferred to the sales tax division. A. Mara former manager of the credit branches of Edmonton wholesale houses has been named chief inspector of the branch.

The sales tax will be quartered in the Qu'Appelle building where the income tax branch is housed.

There will be about 15000 application forms for firms selling commodities in the province sent out by the branch.

Applications for registration have to be made within five days of the Act coming into force.

Hon. Mr. Cockroft expects that first returns from the sales tax which is levied on all individual purchases in excess of 15 cents—except to which exemption has been given—will come in between June 1 and June 15.

The Act has been proclaimed to come into effect on May 1 and returns covering May sales are expected to be completed by June.

MOCKED BARTER STORE LOOMS

LETHBRIDGE, April 29.—Mrs. Mildred Erickson of Lethbridge "a staunch supporter of William Aberhart," today awaited a reply from Alberta's premier to her letter asking his support for her proposed "Social Credit Trading Company."

"Not one five-cent piece will change hands," Mrs. Erickson said in the business she hopes to establish where farmers will trade their farm produce for groceries and city residents will barter trade goods, services, clothing or whatever they have for eggs; onions; potatoes and cabbages.

Mrs. Erickson expects to be assisted by her father Nick Fania, who farms 80 acres close to Lethbridge.

MUNICIPALITY TO PAY RELIEF IN SILVER COIN

MATSQUI, B.C. April 29.—Matsqui municipality will pay relief allowances, current operating expenses and all other expenditures with new Canadian silver dollars, Reeve G. A. Cruikshank announced Tuesday.

"We are going to lead the way to recovery" Reeve Cruikshank said, "by calling into circulation all the silver we can muster."

About $10,000 will be paid out monthly in silver dollars by the municipality.

THE PRESS GOES ROUND AND ROUND

It is not only the music that goes round and round, here in the country print shop the old press makes its revolutions too. It rumbles and perhaps grumbles, but under the power from the old 1912? Studebaker engine, it is kept on the move. We don't press a valve but press keys and we don't play music, but life's little comedies and dramas. Weddings and funerals, births and deaths, comings and goings of folk who live around us. The political, municipal, fraternal and sporting activities are in our repertoire too, and glory be, the very best applause we can get is a renewal subscription or a new subscriber. The applause is never deafening, but thank goodness there is never absolute silence.

Fatal Auto Accident Saturday

Word was received on Thursday morning that M. McPherson, former elevator agent at Phillips, had died in the Viking hospital early Thursday.

On Saturday night last, while travelling east from Edmonton and about two miles east of Tofield, a coupe driven by Mr. M. McPherson collided with a truck travelling west driven by C. Bendikson of Ryley.

The light coupe was hurled into the ditch in a badly wrecked condition the driver being badly injured and A. Armstrong, provincial government employee who was travelling with McPherson, injured also. C. Bendikson the truck driver, attempted to bring the injured men into Tofield, but the truck had been damaged in the collision and stopped on the way in to Tofield. Mr Bendikson then walked in and notified the police and doctor. They immediately left to attend to the injured men and transferred them to the Viking hospital. Mr. Armstrong is making fair recovery and as stated above, the driver of the coupe succumbed Thursday morning.

The driver of the truck received a shaking up but was not seriously injured.

Many Tofielders viewed the damaged car on Sunday, it later being brought into town the early part of the week. It was badly wrecked.

HIGH SCHOOL STUDENT'S UNION HOLDS DANCE

On Friday evening last the Tofield High School Student's Union held their annual invitation dance in the Curling rink. The rink was very attractively decorated in the school colors, purple and gold. Miss Annie Swift, president of the Union and other memvers of the executive met the guests at the door and presented them with flowers and their programs. The Tofield Rangers supplied the music.

SCHOOL FAIR MEETING TO BE HELD

A School Fair meeting will be held on Tuesday, May 12th at 8 p.m. in the Town Hall. The Tofield School Fair was the second largest last year out of 18 schools. Let us try and make it better this year. We need your co-operation.

UNITED CHURCH NEWS

Remember Sunday 10th of May is Mother's Day.

The S.S. at 11:00 a.m. is having a special program.

Be sure and hear the scholars on the virtues of Mothers.

Mr. Broughton will sing. Everyone is invited.

At 7:30 p.m. "Mother" will be the theme. Mr. Cowell will sing. You are cordially invited.

Remote Cousin

At the wedding anniversary of a Scottish magnate one of the guests noticed a somewhat lonely looking and rather shabbily attired man in a corner walked over and sat beside him.

"I was introduced to you but I did not catch your name" he said.

"My name" replied the other "is Blan."

"Oh! then you are a relative of our host?"

"Yes" rejoined the poor relation. "I'm a cousin $300000 removed."—Tit-Bits.

LOCAL AND PERSONAL

Mrs. Edwards and Beryl spent Friday in Edmonton.

Miss V. Moore visited the city on Friday.

Jean and Diana Davis spent the week end visiting friends in Edmonton.

Mr. and Mrs. S. Johnson are back in Tofield after spending the winter at Grande Prairie.

Mr. Hutchinson spent the week end visiting his home at Strome.

Mr. and Mrs. Hammond, Muriel Malcolm and Wesley Taylor motored to Forestburg on Sunday.

Charlie Edwards spent the week end visiting in Viking.

Helen McCauley spent the week end at her home here.

Miss M. Stuart spent the week end at her home in Edmonton.

Mrs. Ellis, Miss Cherry and Joan Ellis of Edmonton visited Mrs. Malcolm on Sunday.

Miss M. Neath of Edmonton is visiting Mrs. Contin.

Sid Worton of Wainwright spent Sunday at his home here.

Frank Wood of Owls Eye is visiting with Mr. and Mrs. B. Hannon.

Mr. Stinson, Blake Clutterham and Dr. Law spent the week end at Banff.

An entertainment will be held in the United Church Saturday, May 16, at 8 p.m. under the auspices of the ladies' aid.

Cafeteria lunch served after the entertainment.

BARDO

Mr. Joe Eide, who has spent the winter near Edson trapping, returned home on Saturday.

Mr. Reuben Eide returned from a trip to the coast on Saturday.

Edmonton visitors last week were; Mrs. Foshaug and Messrs Ivan Foshaug; M. B. Noss and O. Johanson.

Sponsored by the Bardo Baseball Club the Bardo School gave a concert on Friday evening. The program consisted of the Musical Festival numbers. Lunch was also served.

Mrs. Robert Borreclough entertained the Ladies' Aid on Thursday. She served a delicious lunch after the meeting.

Young People's Meeting on Sunday evening was quite well attended.

Dinner guests at the C. M. Rude home on Sunday were Mrs. Alma Foshaug and family and Mr. and Mrs. A. Johnson. They all spent the afternoon with Mr. and Mrs. R. Borreclough.

Mr. Charles Allenby from Ontario is visiting at the Johanson home.

Mr. and Mrs. A. Hauksdahl and family were in New Norway on Sunday.

Mr. and Mrs. Thor Horte and Ronald of Kingman; Mr. and Mrs. S. M. Johnson of Tofield, Mr. and Mrs. John Noss and Mr. and Mrs. John Westby were Sunday visitors at the I. B. Moen home.

Mr. Talbert Foshaug found a white mouse one day last week.

Mrs. C. M. Rude and daughter, Mrs. Gertude Haugen and Mrs. Barbara Finseth spent Monday at the Foshaug home.

Sunday visitors at the Nels Falkeid home were Miss Juliet Jevning; Messrs Milton Jevning; Joe Eide; Arden Nash and Buddy Steen.

Threshing and spring work is quite general now.

Mrs. M. B. Noss was in Camrose on Saturday.

Presto Fertilizer

For House Plants and Gardens. Enrich the soil so that it will produce more fragrant and larger blooms and a greater yield of vegetables.

Central Co-op Store

AMISK CREEK

Our deepest sympathy is extended to Mrs. Foshaug and family in their recent sad bereavement in the death of husband and father.

Some of the farmers are now busy threshing so that they can start seeding.

Mrs. K. Bruha received word that her father was very ill and left for Nebraska, U.S.A. about a week ago.

The Young People of this community presented the play "You Wouldn't Fool Me" a week ago. A good crowd was present to see it and the players all did very well. Much credit and thanks are due to Miss H. Hillerud who directed the play. Those taking part were: Hazel and Merle Hillerud, Lillian and Pearl Patterson, Nora and Erling Sand, Hilmar Moen, Lloyd and Arnold Berg and C. Berild.

Lilly Berg who has been attending University in Edmonton this term returned home last week.

Mrs. Sam Olson was visiting her niece who lives in Saskatoon last week.

Mr. and Mrs. C. Erickson, Olive Haugen and Nora Sand motored to De May last Sunday to visit with Mr. and Mrs. J. Holtie.

Many from here attended the funeral of the late Mr. Foshaug in Bardo.

The Young People presented their play at the Solberg school last Saturday evening. The players and several others were invited to the Hillerud home for lunch afterwards.

Mrs. P. O. Flesten spent the week end visiting friends and relatives around Viking, returning Monday evening.

Miss Ruby Berg of Edmonton spent the week end at her parental home here.

Olive Haugen is assisting Mrs. C. Erickson with her work during the busy season.

The Ladies' Aid met at the home of Mrs. C. Erickson on Tuesday.

ALBERTA CITIZENS TO PAY 10 PER CENT SALES LEVIES

From both federal and provincial trenches, Alberta taxpayers were bombarded Friday last.

Increased federal sales tax will take at least $125,000 additional out of central and northern Alberta, it was estimated with something over $250,000 for the whole province.

The federal budget increases the dominion sales tax from six to eight per cent. Taking into account the two per cent provincial tax which took effect Friday Alberta consumers now are to pay 10 per cent or four cents on the dollar over the old burden.

Business firms will be hit by the increased corporation tax.

Higher liquor prices are possible through the federal sales tax having been increased by two per cent. Government officials were not prepared to make any definite statement however until having studied the tax details.

The budget announcement which places the maximum automobile excise tax at $250 will not be felt by car purchasers except on the high-powered high-priced machines. Average excise tax on "smaller types" of cars ranges between $40 and $50 it was revealed.

A department store said the increased sales tax necessarily will add to the cost of goods to the consumer who in the end must pay even if the tax is paid in the first instance by the manufacturer. It is simply passed on to the ultimate purchaser.

MR. A. P. MOAN AND MRS. SPANGLER WIN CONGOLEUM RUGS

The Congoleum people each year have a guessing contest in each town, the winner being presented with a new Congoleum rug. Tofield and district residents had two chances, one at the Crown Lumber Co. and one at Geo. B. Brace's. The rug at the Crown Lumber Company was won by Mr. A. P. Moan while at Geo. B. Brace's, there was a tie between Mrs. Wentworth and Mrs. Spangler. A second choice of a number between these two ladies resulted in Mrs. Spangler winning the rug.

FOR SALE: One Horse. Apply to C. Jackson, RR1 Tofield, Alta.

Mrs. Wiley Passes Away

The district was shocked to hear that on Saturday night, Mrs. Wiley had passed away in an Edmonton hospital. Taken ill earlier in the week she was taken to Edmonton presumably for an operation.

Prior to living immediately west of town the family lived a good number of years in the Ketchamoot district.

She leaves to mourn her loss Mr. C. H. Wiley husband one son Wendell at home and one daughter Mrs. W. Ingram of Ketchamoot; two sisters Mrs. J. T. Galloway of Calgary and Mrs. James A. Mitchell of Pakan Alberta, two brothers H. E. Diamond of Pincher Creek and L. Diamond of Fort Saskatchewan, also her mother, Mrs. E. Diamond of Grandin, Alberta. Mrs. Wiley was 44 years of age at the time of her death.

The funeral was held on Thursday service being conducted in the United church, Rev. D. K. Allen officiating. Interment was made in Tofield cemetery.

The pallbearers were Wm. Sears, Chas. Ingram; F. Nickerson; W. Staire; W. Mitchell; C. Coombes.

Truth

He that hath truth on his side is a fool as well as a coward if he is afraid to own it because of other men's opinions. —Daniel Defoe

COMING

Mr. Wm. Lowden
Stylist and special representative of
TIP TOP TAILORS LIMITED
will be here Monday, May 11

On the above date, men will have an opportunity of inspecting an outstanding collection of British woolens for the new season. The Tip Top representative will also interpret London and New York's latest style trends for men and women.

Unrestricted choice of these superior fabrics, hand-cutting and tailoring to your individual measure, emphasize Tip Top Tailors' "more for your money" policy.

● Feel free to consult with the Tip Top representative.

MYSORE SCOUT LAWS DISREGARD CASTE

That the brotherhood code of the Boy Scouts of India is an active agency in breaking down caste lines is indicated in the phrasing of the 4th Scout Law for the Scouts of Mysore: "A Scout is a friend to all and a brother to every other Scout, no matter to what social class, caste, race or religion the other belongs "

THEY STILL STOP RUNAWAY HORSES

Gallantry awards for stopping runaway horses still are occasionally made to cool-headed and quick acting Boy Scouts At Cheddington, Buckinghamshire, when a baker's horse frightened by a sanding machine ran madly down High Road, Scout A Wesley 13 ran out and stopped him while grown men hung back; and a Certificate of Gallantry was awarded

HEN IS SUCCESS AS SPARE MAMA TO FOUR KITTENS

PENNSBURG, Pa May 4.—Bantam hen on the farm of Charles Y Fronheiser wasn't much of a success as a hatcher of eggs, he said, but she's doing all right at mothering four kittens

Fronheiser's curiosity was aroused he related when he observed the unusually restless hen sitting on her nest steadily, displaying great interest in what he thought was the business of hatching a nest of eggs Fronheiser said he found four little kittens beneath the hen's wing as he lifted it

The kittens only leave for lunch, Fronheiser said and the mother cat doesn't seem to mind

GARBO, NOW JUST A WANDERER IS BACK IN NEW YORK; ILL, FRIGHTENED, NERVOUS

NEW YORK, May4 —Greta Garbo who bade adieu to America a year ago with "I tank I go home now" came back Sunday and said "I have no home. I'm just a wanderer."

The wanderer frightened nervous and wan-looking paced the deck of the liner Gripsholm in from Sweden and lifted blue eyes from viewing the upper bay

'Not a gypsy you know just sort of a wanderer " The voice was crisp low and thoroughly Americanized

"I did not enjoy my year in Sweden How can you enjoy yourself when you have been sick?"

This time the Garbo who has traveled as Jane Smith; Greta Berger; [illegible] Berger; Joan Emerson and Greta Gustafsson was plain Mary H[illegible] without escort or maid.

"I was sick I have been " Her face was rather pale without lipstick rouge or powder

Only streaks of mascara creased the [illegible] of her eyes "It was nothing well, like grippe "

ITALY CONQUERS ETHIOPIA—CAPITAL OF COUNTY IN SHAMBLES

ADDIS ABABA, May 4 —Fire pillaging murder and anarchy raged in [illegible] Addis Ababa Sunday

The lofty capital from which Emperor Haile Selassie and his family fled early Saturday was a ghastly wreck

In the centre of town, streets were strewn with corpses Eight bodies were counted on one of them and the estimated casualties were unestimable

Twenty-one foreigners had been killed by rioting Ethiopians, nearly all of them Armenian or Greek merchants who attempted to defend their shops against looters.

Among the fatalities was that of Mrs N A Stadin, wife of an American missionary doctor She was killed at dawn when a bullet pierced the corrugated roof of the Seventh Day Adventist mission where she was hiding

A great portion of the population was pillaging, firing and even burning, determined to raze the capital before arrival of the Italian forces. Government buildings and some foreign mission and legation quarters were attacked

A definite reaction set in, however to the wild orgy of Saturday as regular "Shiftas" (warriors) strove to defend their misgotten gains against the true warriors

The looters also heard that retaliation could be anticipated for their acts when new law and order (presumably to be set up by the Italian high command) was established

Monday the rioters were retiring and only warriors from the Galla tribes remained about the capital to oppose the Facists when they enter the city Small groups of about 20 warriors each entered the town, armed only with spears. Some women dressed as men brandished sabres

The government "gold house" where treasury funds were held, was the scene of a desperate fight as a mob stormed the posts defended by machine guns Swarming over the corpses of their comrades some of whose hands were chopped off in the fighting the rioters finally succeeded in capturing the gold stores

The Ethiopian Red Cross headquarters was destroyed

The head of the British Red Cross unit, Dr. Melley was wounded seriously receiving a bullet wound in the lungs Sunday while dragging in wounded from the streets He was given a blood transfusion and was expected to survive

Natives attacked Dr T A Lambie of Toronto, field director of the Ethiopian mission service at the mission headquarters but the staff beat off the assailants, killing one and wounding one The rioters made off with four mules.

The Turkish legation also was an object of attach the natives finally fleeing and leaving 12 dead.

Italian troops were reported camped on the Akaki plain, 10 miles from Addis Ababa with white flags of surrender flying from all posts along their route (Akaki is the site of the Addis Ababa aerodrome and the Ethiopian government wireless station town was becoming quiet and the streets deserted For the first time since the pillaging broke out droves of "parya dogs" ventured forth to tear at the mutilated bodies of men and beasts

In the past 36 hours, it was estimated more than 500,000 bullets had been fired from native rifles

All women and children in the United States legation were removed Sunday night to the British legation with the exception of Mrs Engert who remained with the entire male staff.

One hundred foreign residents of the capital once prosperous, watched from the various legations as their properties were ruined by flames, mounting to the sky

Some foreign residents expressed regret that the Italian army had not entered the capital 3 hours ago to prevent the native violence

Foreign correspondents who had barricaded themselves in their own compound near the government wireless station were forced to abandon it under fire shortly before dawn. (Presumably they went to the legations where thousands of foreigners are quartered).

During the night the correspondents were constantly subjected to attacks of shiftas—or wild bandits.

The entire retail centre of the city was demolished The post office, Tobacco Regie (National Tobacco building—a large structure) Triumphal Arches and the customs house were but smouldering remains. Munitions stores exploded.

At dawn the British legation reported it sighted dust on a distant hilltop which might be the advance guard of the Italian army.

Rains however might delay the occupation of the capital.

Foreigners were picked up by legation lorries under cover of darkness in the early hours of the morning and carried to comparitive safety.

Most legations are well fortified The British legation is guarded by a company of Sikhs.

Several Europeans isolated in the streets when the trouble broke out Saturday had narrow escapes They were rescued by repeated dashes by British subjects from the legation and were brought to safety in cars and lorries

Thrilling tales were told by refugees many of whom lost their houses and shops through pillage and fire

When the emperor left for Djibouti he ordered the imperial palace to be thrown open to the people and that they be allowed to help themselves Streams of men and women and children were seen running from all directions to the palace They returned laden with clothing beds carpets and furniture

The ammunition dump also was thrown open Thousands of men carried off cases full of amunition which was tried out Shots fired into the air made it sound as if a terrific battle were in progress

When townspeople realized the emperor and his ministers had gone they began looting shops Laughing men and women were seen wearing top hats and European clothing over their ordinary clothes

Later when much liquor was consumed fierce wrangling over the loot started. Swords were drawn and shots fired.

The store of Mohammed Ali was defended by an Indian staff supported by the British consul Hope Gill It was besieged by an infuriated mob The staff was rescued by a party from the British legation after putting up a stubborn defence.

Most British subjects had taken refuge in the British legation where a well organized camp was set up in the legation park.

Official quarters said after a day of indecision the emperor who was strongly pressed by the empress decided at midnight Friday that the only course left open to him was to leave the country.

YOUTHFUL CITY GROUP REFUSES TO BEAR ARMS

While statesmen appear helpless to rivet the lid on War's coffin as Mussolini Hitler and the Japanese militarists, threaten to send Peace scuttling out of Europe and Asia one section of Edmonton's youth—the senior class of the Avonmore United Church Sunday School—this week end passed a resolution of refusal to take up arms except in the name of an international world court

Putting itself on the record as "utterly opposed to war as a means of settling international disputes" the class advances two reasons for the pacificist stand the slaughter of women and children and war as a valueless carnage contrary to the principle of Jesus

The resolution reads: "Whereas Mr. Baldwin the Prime Minister of England has said in connection with war, 'The only defence is offence which means that you have to kill women and children more quickly than the enemy if you want to save yourselves' and whereas we believe that war as a method of settling international disputes is not only valueless but contrary to the principles of Jesus, therefore be it resolved that we all members of the Senior Class of the Avonmore United Church Sunday School, Edmonton are utterly opposed to war as a means of settling international disputes and we believe that all such disputes that might otherwise lead to war should be settled by an international world court whose decisions shall become binding; and we refuse to take part in any war except on behalf of such a world court for the purpose of the upholding of its decisions in the event of their violation."

HOPES LOWER COST OF ALBERTA GOODS

Sale of Alberta-made goods at prices lower than imported goods can be sold in the province was laid down as government policy Tuesday by Premier Aberhart as a part of his plan to develop and expand industry within Alberta

Announcement of this policy was an amplification of his earlier announcement of a plan to encourage entry of new manufacturing companies here, to process the province's own raw materials and also to provide electric power at cost.

"We are going to encourage people to buy Alberta-made goods" the premier said. "And to do so these goods must be sold at prices lower than those of similar imported goods."

And his proposed path to this goal the premier indicated definitely, will lie along the way of issues of certificates bearing tax stamps—the certificate plan which the Journal revealed last week has been under the consideration of the government

"We are just now working out a plan by which this (manufacture of goods at less than imported cost) can be done without sacrificing the producer or retailer," the premier said "We must follow somewhat the plan used by Japan in aiding her industries the difference being that Japan applies it to the export trade; that is Social Credit upside down Alberta will apply it to her own internal trade "

Meantime the certificates plan was reported to have progressed to some extent since the premier's return to his office Monday.

Under the terms of this plan, as it was presented to the Social Credit caucus it is stated, new industries might be given loans or guarantees as provided by existing legislation with cash as needed within the province being supplied in the form of certificates while "bank money" needed to buy equipment outside the province would be provided out of the provincial treasury

Each new manufacturing field starting in a small way would be given a government license necessary to operate in the province and it would be assured that through restriction of these licenses competition firms would be kept out

Then the new firm would start manufacture of its products using all the Alberta raw materials possible and all-Alberta labor. It would sell its goods to the wholesaler at cost prices. The wholesaler would distribute the goods to retailers again at cost price. The retailer would sell the goods to consumers still at cost price. Thus the consumer would buy these Alberta-produced goods at the cost of manufacture but certificates would be acceptable in each process. And at the end of the chain of handling, the government would pay each dealer—manufacturer, wholesaler and retailer—a "fair commission" on the turnover

These government commissions would be paid supposedly in new and unstamped certificates with the proviso that the certificates would be exchanged for "bank money" upon demand particularly for the purpose of sending funds outside the province in payment for supplies

Fact that consumers would receive Alberta-manufactured goods at cost would supposedly create a market for those goods even though the actual cost of manufacture in this province might be larger at first than in the great eastern factories.

But if one or two companies in each line of trade were given exclusive rights by license to manufacture within the province it is claimed those companies would soon be able to manufacture on scales as large and as cheap as those in the present eastern plants

Thus would the province overcome in promoting its own industries the impossibility of setting up a provincial tariff barrier the plan states.

SEA DELIVERS FISH INTO LAP OF FISHERMAN

BOSTON, April 29—The sea delivered a foot long herring right into the lap of a seaman, members of the crew of the Boston fishing schooner Mary E. O'Hara reported Tuesday.

The delivery, they said was made Monday night about 50 miles east of Boston as the vessel headed for port with its load. A comber broke over the bow and washed a herring into the forecastle depositing the fish in a crew member's lap.

STRAW IS UNSUITED TO PAPER NEEDS

Presence of undesirable mineral elements in straw have thwarted efforts of science to use it in papermaking and although the handicap may be overcome shortly by scientists vastness of Canada's wood pulp reserve will prevent widespread use of straw for paper-making.

So said Dr. Harold Hibbert of McGill university head of the scientific movement to find new industrial uses for Canadian farm products in an interview with the Journal over the week-end He is visiting in the city while en route to Vancouver where he will receive an honary degree at convention services at the University of British Columbia on May 7.

Tall white-haired and scholarly in apearance the scientist was born and educated in England, received practical training in the United States and brought the fruit of his experience and training to McGill where he is professor of industrialand cellulose chemistry for the pulp and paper research branch of McGill.

The science of which he is an authority is called "chemurgy" and is a coalation of chemical and agricultural sciences Dr Hibbert proudly points to a meeting of United States "chemurgists" now in session under the auspices of Henry Ford. "Chemurgy" completes the powerful triumvirate of industry agriculture and science which is seeking new wealth for man

"Our greatest feat to date has been throwing of important new light on composition of plants. We are continually searching for new by-products from farm produce and when we find one our discovery is of mutual benefit to farmer and manufacturer" Dr. Hibbert explained.

Highly impressed with University of Alberta chemistry-training facilities, the eastern professor declared that U. of A. chemistry graduates are at a premium for research purposes in eastern Canada. He lauded work of Dr. J. W. Shipley head of the U. of A. chemistry department.

IMMEDIATE WAR POSSIBLE

PORTLAND May 4.—The Oregonian quoted Dr. Alfred Salter London as saying Saturday the British parliament believes a war "that means the end of our civilization" will break out within a few weeks unless the powers work out plans to satisfy the economic wants of Italy Germany and Japan.

The interviewer said Dr. Salter commented "We think war is imminent and only by a stroke of good luck can it be postponed a few months. And remember war cannot be localized today

"If two of the great powers go to war for any reason every other power would be drawn into it in a few weeks. And America could not stay out."

"There won't be a single capital left standing in Europe when the next conflict closes."

Dr. Salter is chairman of the medical committee of the House of Commons. He spoke Sunday at a peace meeting at Reed College.

He was quoted as saying England would not aid an aggressor nation.

No Competition

Husband: "I understand your women's club has dissolved."

Wife: "It seems that we made a mistake. The majority voted to have the five oldest women constitute the board."

MEASLES MAKE INROADS ON "OUR GANG" FILM TROUPE

DETROIT May 4 —Measles invaded "Our Gang" child motion picture troupe making a personal appearance at a theatre here and three members were in quarantine today

"Spanky" McFarland seven-year-old "leading man" has the disease and Arla Hood four and William "Buckwheat" Thomas Jr. four were quarrantined for lack of immunity.

The remainder of the caste including the dog Pete will continue their performance.

THE SALES TAX—

THE REACTION of the general public to the new Alberta Sales Tax is varied. Some people appear to be incensed, others mildly antagonistic towards it, but the greater number seem to accept it as something in the nature of a joke on themselves. For no matter what political beliefs they hold or how they voted at the last provincial election, there was a lingering and oftimes wistful hope that the government would find some way of giving THEM something which would help solve THEIR financial difficulties. To find on May 1st in the year following, that they were being called on to give THE GOVERNMENT something to help solve ITS financial difficulties, seemed to appeal to the sense of humor with which all, more or less, are gifted. Anyway, it was with a certain amount of joking that many people paid their tax on Friday and Saturday last. Just what will happen when the tax becomes less of a novelty and more of a burden, it is difficult to say. It will depend on general economic conditions, if the going still remains tough, there will be quite a wail, but if nature is kind this year and the markets encouraging, it is quite likely the people will continue to pay the tax and in time come to accept it as the usual thing.

The new tax cannot help but increase the cost of living for Alberta families, but even so the extra burden is not a crushing one. Most groceries are exempt, and while in some cases the tax on clothing will add to the worries of parents responsible for the clothing of large families, generally speaking people will "get by" in much about the same way they have before. Whether a sales tax in a prairie province is a wise measure or not is another question. Undoubtedly money has to be collected and the sales tax is bound to result in the collecting of no small amount. Those sponsoring the Act in answer to critics, point to Montreal and say, THEY are doing it, which of course is quite true. However we must remember that often there is in any of the prairie provinces a strong economic undertow toward the large metropolitan centres. It could very easily be "good business" for Montreal to institute a sales tax, because very few Montreal purchasers ever think of buying outside of Montreal. The city itself probably represents to the Montreal buyer the cheapest and most varied market available. The rural prairie dwellers are in a different position. From near and far they are persistently invited to send away their money and receive goods in return. There is danger that a sales tax in a prairie province will make these invitations a little more attractive. We sincerely hope not, but the danger is there.

RESPONSIBILITY PERSONIFIED—

THERE ARE few issues of any daily newspaper which do not contain one or more news items pertaining to motor vehicle accidents. This week, within a mile of this town, a car colliding with a truck resulted in the serious injury of one man, injury of another and the shaking up of a third. Inasmuch as man is imperfect, machinery not infalible and highways not without blemish, a certain number of accidents are bound to occur. Authorities realize this but they also realize that there are now TOO MANY accidents—that the motorists as a body have it within their power to reduce the number of highway mix-ups if they so desire. Legislative, municipal, police bodies, newspapers—all at some time or other have raised their voices in support of fewer accidents and less highway risks.

Some time during 1935 a very pungent and rather lengthy article was published in the United States, vividly depicting the gruesome details of many smash-ups. Its purpose was not to offend good taste or shock the finer sensibilities, but rather to bring home to the reading public, particularly the motoring reading public, the need for more responsibility, better judgement and greater care behind the steering wheels of North America. Automobiles have become so much a part of modern life that many people fail to fully realize the speed and power embodied in them, with the result that very often driving creates little more concentrated effort than walking. As the automobile developed from the "tin can" variety with its comparitive slow speed to the present marvel of engineering ingenuity of great speed possibilities, "speed," excessive speed generally being meant, has been blamed for the large number of road accidents. As the usual rate of travel rose from 15—25—35—45 miles per hour many claimed accidents would increase—and they did. But the number of cars on the highways increased also and the percentage of accidents perhaps is not a great deal more. Speed is not altogether to blame, in fact under some sets of conditions, speed, even excessive speed, is the safety factor. What is evidently to blame is that so many people are driving that are not fully competent to operate cars under all conditions. If it were possible to make expert drivers of all people who are now driving the percentage of accidents would immediately decrease. It is really an individual problem. Each new automobile owner should "sit at the feet" of men who have been driving thousands of miles for many years, and learn all they can about how to handle a car in unusual as well as usual circumstances. When a person is at the wheel of a high powered car he or she has accepted not only the responsibility of his or her own safety but the safety of any other motorist that may be met along the road.

FARM REBATE ON FUEL OIL TO CONTINUE

Regulations issued on Monday under provisions of the Fuel Oil Tax Act which was proclaimed effective as from May 1 provide that the rebate on gasoline used for agricultural purposes will continue in effect as heretofore.

The provision is that "an agriculturists may purchase from a dealer in fuel oil not more or less than 45 gallons at one time at the net tax of one cent per gallon being the tax of seven cents per gallon as provided under the Fuel Oil Tax Act 1936 less rebate of six cents per gallon on fuel oil to be used exclusively in farm machinery and engines for agricultural purposes on the farm."

The improvement in the present method of rebating is that the rebate will be given at the time of purchase whereas formerly the farmer had to wait several months before receiving his rebate.

It is provided that coupons can be issued to agriculturists of such denomination as may be requisite and convenient for obtaining fuel oil on payment of the net tax of one cent for the above purpose.

Persons desiring to obtain fuel oil for agricultural purposes only must file an application with the minister for authority to purchase at the net tax of one cent a gallon at the time of purchase.

No dealer shall sell any fuel oil at the net tax of one cent to be used for agricultural purposes unless the purchaser presents the prescribed coupon at the time of such purchase.

The regulations which are being widely distributed will be on view at service stations garages and other points.

NEW OIL FILTER

A new type oil filter that removes sludge dirt and other foreign matter from the oil; makes oil last longer and at the same time cleans the oil itself so that its natural color is restored is the latest development of engineers of the AC Spark Plug division of General Motors. The new device is designed for use on buses trucks and tractors while development of a nearly similar device for automobiles is practically completed. The filtering element used in the new oil filter is composed of ignesite a porous rocky substance which both filters and clarifies the oil. This is a ceramic development which makes possible a uniformly porous filter element an achievement that has been sought by scientists for years. According to H. G. Kamrath research engineer who has been working on its development for several years the new oil filter will prolong the engine by keeping the oil clean and will eliminate sludge in the engine thus removing the major cause of clogged oil pump screens and oil lines. Kamrath declared that the development of the new oil filter would prove an especially important factor in combatting the dust menace to automobiles in sections where dust storms occur and where the most thorough protection of the engine's lubricating system is essential.

C.N.R. OFFICIAL APPOINTED TO B.C UNIVERSITY

Vancouver B.C. May 5.—An important addition to the staff of the University of British Columbia Vancouver was approved a few days ago at a meeting of the Board of Governors in the appointment of Robert England western manager of the departments of colonization and agriculture Canadian National Railways Winnipeg to the position of Director of University Extension and Associate Professor of Economics.

In an interview Dr. Klinck president of the University of B.C. stated that Mr England's major task will be organizing co-ordinating and directing university extension work throughout the province. He will also be associate professor of economics a branch of education in which he is well trained. University extension work in British Columbia has grown to large proportions and throughout the past years over 30000 people in Vancouver and vicinity alone have advanced themselves through this medium. The work during the past years has been carried along with no endowments and few grants but with a grant from the Carnegie Foundation $30000 has been set aside for University work alone which will considerably widen the scope of this important department of education Much of this work has extended throughout the province and now it will be possible to enlarge on it. Adult education is an important feature of the department and is now being organized nationally as a result of conferences held in Toronto and Montreal during the last two years. During the past year some of the best lecturers have toured the province and over 500 meetings held and this year during the latter part of May and during June a tour will be made through northern British Columbia The University of British Columbia is now preparing to administer the finest service in this respect.

Robert England is widely known throughout Canada the United States and Europe having written two books entitled "The Central European Immigrant in Canada" and "The Colonization of Western Canada" the latter quite recently. He has written numerous articles which have been reproduced in well known quarterlies and educational media on this continent Many of these articles were delivered by Mr. England personally before large groups of interested listeners on both sides of the line

PARIS SEES WAR'S END DEFINITELY

PARIS May 4.—French official circles saw the definite ending of the war in Emperor Haile Selassie's flight. They regarded his abandonment of the capital as a blow to the League of Nations' efforts to maintain collective security and as adding new difficulties to the tense international situation.

Time

Time is what we want most, but alas! we use worst —Penn.

POLICE CROONER MAKES A HIT

..JACKSON, Mich.—"Police headquarters" said Capt. Henry Stevens when he answered the phone. "Police headquarters. What can I do for you?"

"I think your amateur program is swell but I think you should have a little more variety" came from the other end of the wire

"I don't get you," said the captain. "We're not having amateur programs "

"I just heard one over your radio" said the strange voice. "I enjoyed it much more than the police calls "

Captain Stevens looked toward the radio room, when out walked Officer Hutchinson with a very red face. "Gosh Captain! Some one left the radio on and I've been in there singing to myself. What'll I do?"

"Nothing," said the captain, "'cept you might learn another tune Your listeners would like a little variety."

HAILE TAKES RICHES WITH HIM IN EXILE

DJIBOUTI, French Somaliland, May 5 —Emperor Haile Selassie went into exile laden with rich treasures

When the Ethiopian monarch sailed aboard a British cruiser yesterday for Palestine his possessions included the Imperial family jewels and many cases of gold bullion gold coins and silver Maria Theresa thalers

Even six automobiles were listed among the Imperial belongings

The Emperor was reported to have stopped at Diredawa while coming here by railway from Addis Ababa over the week-end and to have removed all cash from the treasury and customs house there.

WANT McFARLAND HEAD FUSION PARTY

John I. McFarland of Calgary former head of the Canadian wheat board probably will be invited to head a new non-partisan party in this province, it was reported in Edmonton on Tuesday.

Whether Mr. McFarland would consent to entering the political field is not known, but it is felt here that a strong pressure will be brought to bear upon him.

The suggestion follows the appeal made by D. M. Duggan, M.L.A. Tory leader speaking at a Conservative Banquet in Edmonton Monday night, in which he urged all citizens to join in a new movement that would discard party lines and function in the best iterests of the province as a whole.

Interest in the Tory leader's appeal carrying with it his offer to resign as a party leader himself was noted in political circles in Edmonton as preliminary discussions got under way.

Mr. McFarland, it is pointed out in some quarters in Edmonton is a noted grain authority and well understands the agricultural problems of this province It is believed by friends in Edmonton that if he can be induced to take the leadership of a party combined of producers business interests and others in this province many will rally to his banners

WIT And WISDOM

Disappointing

Sandy was engaged to a girl who a few days before her graduation succumbed to the appeals of her friends and had her hair bobbed. They congratulated her on her improved appearance and it was therefore without any misgivings that she showed herself to her sweetheart However Sandy viewed her with gravity.

"It's hard on me lassie" he said, "verra hard! After I've bought ye a packet o' hairpins for a graduation gift "

Cautious

Barber (to new assistant): "This man wants a shave."

Assistant: "Let me practice on him "

Barber: "Well, all right; but be careful and don't cut yourself."

Sound Reasoning

The problem of creating a sound-effect to simulate water being poured into a glass from a pitcher caused a major disturbance during a broadcast rehearsal a few days ago The production men and the entire crew of sound-effecters tried a variety of ways trickles of sand, swishes of sand, drops of sand—all in vain

In the midst of the technical despair a page boy suggested "Why not pour water into a glass from a pitcher?"

They did —N.B.C News Service.

Aha!

"What is your age?" asked the magistrate

"Twenty-one years and some months" replied the woman witness.

"Just how many months? You know you are on your oath?"

"A hundred and twenty."—El Paso World News

PYGMY FEEDS GIANT . . . It's part of Imperial Oil's job to fuel mighty liners calling at Canadian ports. Here is one of the smaller Imperial Oil tankers on the job transferring its precious load of liquid power

SHE'LL BE COMIN' THRU THE MOUNTAIN . . . It takes more than a mountain to stop a Canadian railroad train. Sometimes it goes around or up—sometimes it goes right through. Good lubricants are needed to keep those wheels humming—Imperial lubricants.

FLOATING SERVICE STATION (left) A familiar sight in Vancouver's world famous harbour is this marine supply depot which makes Imperial Oil products conveniently available to power boats, large and small. You'll see it if you are one of the fortunate thousands who will visit Vancouver this year to help celebrate the Fiftieth Anniversary of B.C.'s metropolis.

"YES SIR, I'LL DO THE WHOLE JOB" . . . it's the smiling chap in the Imperial uniform speaking. He's talking about that Spring change-over job every motorist has to have done sometime, somewhere. New, clean, summer oil and grease for old, thin, dirty, winter stuff. Have you had YOUR car put in tune with Spring, yet? Your nearest Imperial Oil Station or dealer will give you quick service, finest products.

Precaution

A woman asked the bank clerk for a new check book. "I lost the one you gave me yesterday" she said. "It doesn't matter though, I took care to sign all the checks as soon as I got it—so naturally it won't be of any use to anybody else."

Geography Note

"Willie, is the earth round?"

"Yes—to keep some slicker from getting a corner on it."

E. E. ROGERS

THE PRESS GOES ROUND AND ROUND

It is not only the music that goes round and round, here in the country print shop the old press makes its revolutions too. It rumbles and perhaps grumbles, but under the power from the old 1912? Studebaker engine, it is kept on the move. We don't press a valve but press keys and we don't play music, but life's little comedies and dramas. Weddings and funerals, births and deaths, comings and goings of folk who live around us. The political, municipal, fraternal and sporting activities are in our repertoire too, and glory be, the very best applause we can get is a renewal subscription or a new subscriber. The applause is never deafening, but thank goodness there is never absolute silence.

CANADIANS AND THEIR INDUSTRIES—AND THEIR BANK
· LIVE STOCK RAISING ·

JOHN SR.: "Well, son, I'm glad you are doing so well with the outfit. You are going through my old experiences of hard but satisfying work. We are happy now to rest."

JOHN JR.: "You deserve to rest after all your years of hard work and I realize I owe all this opportunity to you and mother. I have often heard you say how successful she was with the poultry and dairying end of the business."

JOHN SR.: "Thank you, son, but we don't deserve *all* the credit. In 1900 when we had only a homestead and preemption, with shack and barn, and had to haul water five miles and drive 20 miles to market, the Bank of Montreal made me the seasonal loans I needed to carry on. In five years we had clear title to the 320 acres and three years later owned 640, with good buildings and equipment. The bank kept on lending for harvesting and feeding, because I carried out my contracts and kept my credit good. You remember, son, we sold out in 1919 for—cash, and were able to retire. You were lucky to rent the old place, for it's a good one."

JOHN JR.: "I *am* lucky, father, and I am trying to live up to your reputation."

Business Change

A. E. Calvert who has been in business here as a barber for quite a few years sold his business this week to Mr. Adam Hummel of Castor. Mr. Hummel has already taken over the barber shop in the Stauffer building. Bert is well and popularly known, having taken considerable interest in baseball, curling and other sport. It will be remembered he was unfortunate in having his building and home destroyed by fire last Autumn, at that time operating a pool room and bowling alley with his barber business. At present he is uncertain where he will locate.

Mr. Stevenson, son of Mr. and Mrs. Fred Stevenson of Tofield visited at his parents home for a few days last week. Mr. Stevenson is in the butcher business in the Peace River country.

Buys New Grader

Last week there was unloaded at Tofield for delivery to the Cornhill Municipality an Adams Elevating grader. This machine, one of the most up-to-date road graders obtainable weighs some thirteen tons and works differently to any grader seen in these parts before. Of huge construction, it is drawn by a 60 h.p. caterpillar tractor, while on the grader itself there is a 36 h.p. engine to operate the elevator.

The earth is apparently cut by a large metal concave disc and thrown onto a moving rubber belt and deposited anywhere, within the range of the machine, the operator desires. Experts are now busy putting the finishing touches on to the machine prior to operation. There are only a few of these machines in the province but where they have been working it is claimed excellent road work has been done. It is planned to put it into operation soon and no doubt many will be interested to see this titan in action.

NEW POST OFFICE RAPIDLY BEING COMPLETED

The brick and tile work on the new post office is now completed and carpenters are busy putting on the roof. It is expected it will be ready for occupancy by May 24th. When completed we will describe it more fully.

THANKS!

Having sold my barber and hair dressing business to Mr. Adam Hummel of Castor, I take this opportunity of expressing thanks for the support accorded me during the years I have been in business at Tofield. I would also bespeak for my successor the same generous patronage accorded to me.

A. E. CALVERT.

CONTRIBUTES TO NAVY LEAGUE

Rev. Fred Cooke, field representative of the Navy League of Canada made his annual visit to Tofield last week. Citizens of Tofield contributed thirteen dollars to this cause. The Navy League of Canada was organized to assist widows and orphans of men of the merchant marine, to maintain sailors' homes and to train boys and young men in the ways of the sea.

LINDBROOK

Ladies and Gentlemen! We bring to you now a brief resume of the month's? news of the Lindbrook district. Sorry, but everything seems to be coming all at once even the ?weather.

The sympathy of the district is extended to the Wiley family in their sad loss.

Congratulations to Mr. and Mrs. J. H. Brown on the birth of a son recently.

The monthly session of the L.C.C. was held at the home of Mrs. W. Glenn and from all accounts was a very enjoyable affair. The next "spasm" will be at the home of Miss Lily Morden, the date doubtless being known to all the members.

Miss Gertrude Sullivan of Edmonton spent Arbor Day with her father Mr. Steve Sullivan of this district.

The school children of the district cleaned up their school grounds on Arbor Day and then proceeded down to the farm of Mr. A. Jensen and spent the rest of the day in games etc. along the creek bank, also enjoying a wiener roast.

Mr. Jas. Bracegirdle returned home after a brief holiday in Vancouver. He reports it not so hot, very wet and lots of unemployment and hard times so perhaps we are not so badly off as we think.

The wet weather is hindering spring work in every way here and little is sown.

Divine Service was held at the school here on Mother's Day Sunday May 10th by the Rev. A. Wallis of Tofield. Despite the inclement weather and beastly roads the service was well attended and enjoyed by all. Thanks are due to the choir of Holy Trinity Church, Tofield for coming out and giving their services to help make the service more enjoyable by their singing.

Mr. and Mrs. A. Scott visited their friends Mr. and Mrs. Gillis of Ardrossan last week.

SASKATCHEWAN LEGISLATURE APPROVES IMMIGRATION

The following resolution was passed in the Saskatchewan Legislature on February 27th.

"That this Assembly is of the opinion that the time has now come when the Canadian Government should get in touch with His Majesty's Government of Great Britain with a view to putting forward a scheme for the voluntary redistribution of the white peoples of the Empire and thereby creating a stimulation of shipping and trade under the flag."

The Resolution was passed by 42 to 5—the total number of members in the Legislative Assembly being 55. One Minister was amongst the eight absent. The other eight Ministers, including the Premier voted in favour of the Resolution.

Too Obvious

A blushing young woman handed the telegraph operator a telegram to be sent which contained only the single word "Yes." Desiring to be of real help to patrons of his company the operator said: "You know you can send nine more words for the same price."

"I know I can" replied the customer, "but don't you think it would look like I am too anxious if I said it 10 times?"—Pathfinder

FOR SALE—Early Ohio potatoes. 25 cents per bushel. Apply A. F. Schultz, Tofield. Phone 410.

LOCAL AND PERSONAL

Born: To Mr. and Mrs. John Wood, on May 11th a son.

Mr. and Mrs. Jack Cookson of Edmonton visited at the Cookson home one day last week.

Miss Muriel Malcolm spent the week end visiting friends in Edmonton.

Mr. Matchmee, Art Beirnes and W. Worton motored to Vegreville on Sunday.

Miss Aileen Allan, who has been spending some time in Edmonton spent Sunday at her home here.

Mr. and Mrs. McDougal of Unity, visited at the Malcolm home on Friday.

Mr. W. J. Duckfield was a visitor in Tofield on Thursday, stopping in on the way to Edmonton.

Mrs. Simmons visited at Edgerton for a few days this week.

Mr. and Mrs. A. E. Calvert, Bud Hennan, Mr. Hummel and Miss L. Ross visited the city one day last week.

Mr. Hummel of Castor is a new resident in Tofield, taking over the barber shop formerly owned by Bert Calvert.

Miss M. Redig spend Sunday visiting in the city.

The Jolly Twelve Bridge Club met at the home of Mrs. Thomas. Honors were won by Mrs. Rogers and Anne Swift.

An entertainment will be held in the United Church Saturday May 16th at 8 p.m. under the auspices of the Ladies' Aid. Adults 25 cents; children 15 cents. Cafeteria lunch served in the basement following the entertainment.

The Regular monthly meeting of the Womens' Missionary Society of the United Church will be held at the home of Mrs. Firth on Thursday, May 21st at 3 p.m. Visitors welcome.

The Ionic Order of the Eastern Star, Tofield Lodge, will hold a public bridge drive at the Masonic Hall on Monday, May 18th at 8:30 p.m. Admission 25c, including lunch. Everybody welcome.

B.L. Council Meet

The regular Monthly Meeting of the M.D. Beaver Lake No. 486 was held at Ryley Saturday May 9th, 1936 at 8:30 p.m. All councillors were present and the minutes of the previous meeting were read and adopted.

The councillors agreed to take an inventory of all machinery in each division and place same in hands of secretary. A application for the purchase of the old machinery and parts was rejected.

Lots 15 and 17 Block 12, Poe was sold to W. Larson of Poe.

Lots 8 and 9 block 1, Poe was leased to W. Thomson of Poe with provision that the first have the appointment of Postmaster at that point.

The council agreed to appoint one weed inspector in each division to work when called.

A. W. Tymchuk was appointed as weed inspector D. 5 on the N E 25-51-16-4.

The secretary was instructed to order 50 culverts from the N. W. Utilities at $4.00 apiece for to be used as culverts.

The next meeting will be held at Ryley on June 13, 1936.

The usual bills were passed for payment.

Mr. Lucas moved the adjournment at 2:08 a.m. Sunday.

OBITUARY
MRS. JAMES ACKLEY

Mrs. James Ackley died on Friday May 8th in a hospital at the age of 33 years and six months. Funeral service was held on Saturday May 9th. She leaves to mourn her loss her husband and three children all of Tofield; her mother of Nelson B.C.; two sisters, one at Golden, B.C. and one at Nelson; two brothers, Tom of Tofield; and one in the Vermilion district.

Mrs. Ackley was born in Ontario and raised in Alberta.

NEED FOR FACT-FINDING COMMISSION

Extracts from statement of James R. Murray, Chairman of Canadian Wheat Board, in the course of which he suggested the appointment of a royal commission to investigate the wheat situation:

"Until recent years our surplus wheat was absorbed into world trade and no one knew, except in the most general way just how or where it went. The little consideration we gave to this question ten years ago is not sufficient now.

World trade which averaged 721,000,000 bushels for the ten years 1920 to 1929 was large enough to absorb the surplus from average crops in exporting countries.

This situation no longer exists and if wheat is to retain the position it has occupied in the production of our national wealth, we must wake up to the importance of the problem. I might interject and say that from 1926 to 1930 inclusive the value of wheat exported was 32 per cent of the total Canadian exports. From 1931 to 1935 inclusive it was 25 per cent; that is wheat and flour.

World trade in wheat last year, including 56 million bushels imported by the United States, was only 520 million bushels. This year including perhaps 50 million bushels which may be imported by the United States, it will probably not be more than 520 million bushels. Excluding the United States this means an average for the two years of less than 500 million bushels of wheat taken by importing countries

We cannot count on the United States continuing as an importer and they may in a few months again become exporters. Europe may not be as successful as in recent years in growing large crops, but no sensible person would advocate in dealing with this problem that our main dependence should be on Providence continuing to help us through crop failures in other countries

Our problem for the future then is briefly: normal crops on present acreage in exporting countries will give 640 to 740 million bushels exportable surplus. The available market may only be 500 to 550 million bushels.

How can Canada continue to grow crops of 375 to 425 million bushels and fit into this picture again piling up unwieldy and burdensome surpluses?

Can we as a nation, tackle this problem intelligently? If we continue as we have for the past few years we will not do so

Let us examine another and little considered angle of our problem. The idea is prevalent in Canada that Britain is and must continue to be the greatest market for our wheat. This is true in so far as any one country is concerned, but the British wheat and flour imports for the past ten years averaged approximately 225 million bushels per annum. If we get 50 per cent of this market it only takes 112 million bushels of our surplus each year

If we are to sell an average of 250 to 275 million bushels each year (this being the exportable surplus we would have from average crops on present acreage) the balance above what we may export to Britain, amounting to 140 to 165 million bushels, must go to Europe, the Orient and the United States. The United States is more likely to be one of our competitors in exporting wheat. From 1925-26 to 1929-30 our wheat exports to Europe averaged 165 million bushels yearly. For the five years 1930-31 to 1934-35 103 million bushels yearly and in the year 1934-35 they dropped to 58½ million bushels

Our problem for years to come is to find the best method of placing our wheat surplus on foreign markets and I believe we need a Commission of outstanding men to examine it in all its aspects at home and abroad.

The reduction of our present burdensome surplus will not solve our wheat problem. Our problem is not one for western farmers alone. It is a challenge to bankers, railwaymen, manufacturers, wholesalers and every interest in Canada whose prosperity depends largely on our marketing the exportable surplus available from crops of about 400 million bushels of wheat.

We need a new starting point and a policy behind which we can forget our differences and make a united effort to develop and retain the markets for our present normal production of wheat.

We need to examine past policies for what we can learn from them so we can discard the bad and keep what is good

We need an independent report on the statistics of our exports in order to sweep away the fog and confusion surrounding them.

We need an independent body to visit the buyers of wheat in importing countries and to come back and tell us what these buyers think of our product and our policies.

We need to find out if we have lost a share of markets that we might have had and if so why, and how we may regain them.

We need an authoritative answer that cannot be disputed to these things and finally above all we need some recommendation from an impartial body as to what is the best policy for us to follow in the international marketing of our wheat

In short we need an intelligent impersonal analysis of our wheat marketing problem and we can get it only through investigation by a Commission of able men who have nothing but the national interest to serve."

Any Wanted Color

Last fall Jack Hardy bought a black cow at John Morton's sale and evidently got good value for money. This week the cow gave birth to twin heifer calves. Twin calves are not so very unusual but the unusual feature concerning this is that the first calf to arrive was black like its mother, and its twin sister was red. Generally twin calves are of the same color.

CARD OF THANKS

C. H. Wiley and family wish to express their deep appreciation of the many expressions of sympathy and kindnesses extended to them on their bereavement.

HEALTH by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

OXYGEN

The human body is built up from a very large number of individual cells. There are cells of various types which group together to form the different tissues and organs of the body.

The cells differ in certain aspects making it possible for them to perform their special functions, but at the same time they have much in common. They are all alive and active so they all require food and all manufacture waste products.

The cells are able to store a certain amount of fluid and food, but they are unable to store oxygen. The body can live for some days without food or water but can survive only a few minutes if deprived of air.

Oxygen is in continuous demand by the cells of the body to burn up the waste products of their activity. The body is never completely at rest because such vital functions as breathing, the beating of the heart and so forth are continuous, they are essential to life itself.

Increased physical activity calls for more oxygen. Lactic acid is a product of muscular activity. It is got rid of by being combined with oxygen, thus forming carbon dioxide. The carbon dioxide is carried by the blood to the lungs and is there released.

It is common knowledge that when we engage in physical activity, breathing becomes deeper and quicker. The result of this is that more air is taken into the lungs. At the same time the heart quickens its beat so that more blood circulates through the lungs and the tissues of the body. Altogether there is as a result a greater amount of oxygen carried to the tissues and the carbon dioxide is removed in proportionately greater quantities.

This may not suffice to meet the need. In such cases the product of muscular activity, lactic acid accumulates. The deep breathing which continues for some time after physical activity supplies the oxygen required to take care of the accumulated lactic acid.

This is but one example of how the body adjusts itself to meet the demands that are made upon it. We think very little about the body need for oxygen because it is so freely and readily available in the air around us. Under ordinary living and working conditions, there is never any lack of oxygen in the air which we breathe. Physical activity makes a call upon the mechanism of the body and provided that the cells are not exhausted, the body is kept in better condition by regular use of its muscles, heart lungs and other parts.

Questions concerning health addressed to the Canadian Medical Association 184 College St. Toronto will be answered personally by letter.

BROME-ALFALFA COMBINATION

The growing of perennial grasses and legumes in mixtures for hay and pasture purpose has for many years been a common practice in some of the better developed agricultural areas of the world. During recent years there has also been a tendency to adopt this procedure in the seeding of permanent hay and pasture fields in Western Canada and the results obtained have been most encouraging. At the Dominion Forage Crops Laboratory Saskatoon different grass and legume mixtures have been studied for a number of years with a view to determining the relative values of the various combinations as compared with pure cultures.

Results of these investigations have clearly demonstrated that certain combinations are more desirable than others. A mixture which has given excellent results is brome grass and alfalfa sown in the proportions of ten pounds of brome grass to four pounds of alfalfa. Yields from this mixture exceed those from all others and also from any of the grasses or alfalfa grown in pure culture. In addition there has been less tendency for the brome in this mixture to become "sod bound" as it has in adjacent plots where it is growing alone. Neither has there been any tendency for the alfalfa to be crowded out by the brome grass.

These results may be explained by the fact that competition for moisture is largely eliminated by different rooting habits. Alfalfa sends its roots deeply into the earth and draws moisture from great depths, thus leaving most of the moisture near the surface available for the more shallow rooted brome grass. The brome is also supplied with additional nitrogen because of the close contact of its roots with those of alfalfa. This fact not only helps to maintain the productivity of the brome but results in an increased protein content as well and consequently a higher feeding value. It has also been noted that the alfalfa-brome grass mixture cures more readily for hay than does alfalfa alone and that the loss of leaf during the curing process is relatively small.

PIGEON CARRIES LONGEST MESSAGE

NEW YORK, May 11.—Doughboy army carrier pigeon fanned his way up from Rockefeller Plaza Saturday with 20,000 words fastened to one leg—said by sponsors of the flight to be the longest message a bird ever bore.

The pigeon was released by Sir John Wilson president of the Royal Philatelic Society of London and carried a film strip bearing invitations to President Roosevelt, 48 governors and others to visit the international Philatelic exhibition which opened Sunday.

Use of the film which may be projected to enlarge its words increased 150 times the usual message capacity.

SAYS FARMERS' EXTRAVAGANCE THEIR DOWNFALL

OTTAWA, May 11.—Dr. A. B. Hyndman (Conservative Carleton) in the commons Monday stressed the plight of agriculture in the last few years and complained western farmers have been receiving too much from parliament.

In recent years Dr. Hyndman continued farmers of Ontario and Quebec and the Maritimes have received nothing from Ottawa "but I can take you over the budgets of the last few years and show you millions and millions of dollars handed over to the farmers of the west."

Western farmers Dr. Hyndman said "are continually coming down and asking for bonuses on wheat."

"How about eastern manufacturers," interjected a western Liberal.

"I am not saying anything about manufacturers, but farmers" replied the Carleton Conservative. He said he had sympathy with western farmers but he would "let them buckle down by themselves and suffer a bit." In his judgement most of their troubles were due to their own extravagance in past years.

NAPS UNDER WAGON CRUSHED TO DEATH

LLOYDMINISTER, May 11.—Crushed beneath a heavily-loaded hay wagon under which he had fallen asleep while his older brother was loading it six-year-old Lister Bruce McKenzie son of Mr. and Mrs. McKenzie of this district died as a result of his injuries.

The lad had crawled under the wagon while the rack was being loaded with hay. Unaware of the boy's presence his older brother drove the wagon away with the wheels passing over the boy's body.

He died in hospital 24 hours after the accident.

VAULT TO STORE VAST U. S. HOARD

FORT KNOX, Ky., May 11.—Secretly built to defy every known power of man or nature the vault where the United States government will store $9,000,000,000 in gold—more than half the nation's treasure—progressed Monday toward completion.

Two storeys of stone and steel are being reared against the hills which rim this military reservation where cavalry and artillery will guard the finished vault.

Hundreds of workers manned concrete mixers, a derrick and steel workers' tools on the mass that showed. The upper works form a square building surrounded by a balcony. At each corner was an eight-foot area heavily reinforced looking like the defences of a medieval fortress. Whether these were ornamental or part of the vault's protection could not be learned.

The subterranean or business part of the vault apparently is far larger than what can be seen.

Many workmen are engaged on the underground vault. The nature of the work has been kept secret.

It appears likely that the treasury will have an arrangement to flood the vault in time of danger similar to that employed by the Bank of France to safeguard its hoard. Ta[illegible] ditches 20 feet deep with yard-thick pipe in the bottom lead to the vault. These apparently could carry water for such a flooding.

The French however have kept the exact location of their vault a state secret. But the American vault rears up its white walls on the edge of Fort Knox for all the world to see where the gold is hidden. The fast combat cars of the First Cavalry the army's only mechanized unit the field guns and mortars whose crews practice firing every day in the year and the lines on lines of machine gunners seem to promise the gold more security than the dragons of old or the secrecy of the French.

The six billions in gold will come here in about two months from depositors in New York and Philadelphia. Already the post office is working to safeguard the shipment. It will be the greatest in American history.

Forty or 50 special armored trains will bring the gold to Kentucky. Their departures will be kept secret. Before they start every yard of track on the way will be inspected. Dangerous points will be patrolled by soldiers.

QUEEN MARY CHIEF IS GIVEN MASCOTS

SOUTHAMPTON, England, May 11.—Grey-eyed square-jawed Yorkshireman in excellent trim despite his 62 years will be Britain's public hero No. 1 if the new superliner Queen Mary takes the blue ribbon of fast ocean travel away from the French liner Normandie.

Sir Edgar Britten commodore of the Cunard-White Star line who has been at sea 44 years will be in command of the Queen Mary when she puts to sea May 27 on her maiden voyage to New York.

There will be dual control however because of the size of the ship with Capt. George Gibbons 57 and a bachelor sharing the command for the time being.

Although 63 is the normal retiring age for men of his rank, there is no indication Sir Edgar is ready to begin life ashore. He has received letters from all parts of the world congratulating him on his new appointment and dozens of mascots have been sent to him to encourage good luck on his maiden voyage on the Queen Mary.

Capt. Gibbons a typical sailor, short broad and genial has been master of the Majestic, Aquitania and Berengaria.

THORSBY WOMAN TAKES OWN LIFE

THORSBY, May 11.—While her 7 children and husband walked in a nearby field Mrs. Julius Sheetz, farm woman in the Sunnybrook district fired a .22 calibre rifle bullet into her brain killing herself according to report of Coroner Dr. Hankin who investigated. Mrs. Sheetz was found dead in her home. She was reported to have been in ill health for some time. Before taking her life she had sent all her children out of the house to a nearby field with their father.

FREEING COAL OIL FROM SALES TAX

Coal oil for illuminating purposes is to be exempt from the amended provisions of the fuel oil tax act, and probably will be sold through registered retail merchants only it was announced Wednesday by Hon. E. C. Manning, minister of trade and industry. At the same time, he emphasized that a regulation to permit this has not yet been passed.

Present regulations indicate that buyers of coal oil for lighting purposes must pay the seven-cent fuel oil tax and then apply for a rebate of six cents. The amendment as planned by Mr. Manning now will mean that no tax at all is imposed when the oil is bought from retail merchants in small quantities.

Temporary extra staff of 30 stenographers meantime is busy in the trade and industry department offices issuing coupons which farmers will use in buying fuel oil at the net tax of one cent a gallon for supplies to be used in agricultural machinery and engines.

SCADDING 'LUCKY' BUT TO LOSE TOES

HALIFAX, May 11.—Considering himself "lucky to be alive" after being entombed in Moose River gold mine for 10 days, Alfred Scadding Monday was not complaining about the news that he probably would lose all his toes.

For days after the rescue there had been fears that his feet would have to be amputated but Dr. H. MacDonald had been successful in restoring circulation to a point where that danger was passed.

But the toes turned black, and Monday there was no hope of saving them.

ITALIAN EMPIRE NAMED BY DUCE AS GUNS SALUTE

ROME, May 11.—A 101-gun salute roared in every garrison and city in Italy Sunday, booming in a new empire.

As the window-shaking salvos echoed, literally millions of Italians gathered in their public squares to continue Saturday nights' demonstration.

The Rome crowd cheered before royal quirinal palace but Emperor Victor Emanuel did not appear. Morning newspapers carried headlines in some instances eight inches tall reporting the proclamation by Mussolini Saturday night annexing Ethiopia and conferring upon the king the title of Emperor of Ethiopia.

From his Palazzo Venezia balcony standing in the lurid light of searchlights and flares Il Duce shouted:

"The Italian people have created an empire with their blood. They will fertilize it with their work and will defend it against anyone with their men!"

The decrees rushed through successive meetings of the grand Fascist council and the Italian cabinet made Marshal Pietro Badoglio viceroy of Ethiopia.

It was he who broke the back of savage Ethiopian resistance and marched down out of the mountains to occupy Addis Ababa as Emperor Haile Selassie fled into exile.

Long before the grand council gathered Saturday the square was filling with thousands who heard and saw the dictator. A few blocks away scores of police guarded the British consulate.

Before he read the brief decrees, Il Duce declared:

"Officers, non-commissioned officers privates of all armed forces of the state in Africa and Italy, Blackshirts of the revolution men, women in the Fatherland and in the world listen!

"With the decisions which in a little while you will hear and which were proclaimed by the grand council, a great event has been accomplished.

"The destiny of Ethiopia is sealed today May 9th, in the 14th year of the Fascist era.

"All knots were cut by our gleaming sword and Italian victory remains in the history of the country whole and pure as the legionnaires fallen or survivors, dreamed of it and wanted it.

"Italy finally has her empire. It is a *Fascist* empire because it bears indestructible signs of will and power and because this is the end toward which during 14 years were directed the vibrant and disciplined energies of the youthful generations of Italy.

"It is an empire of peace, because Italy wished peace for herself and for all and decides on war only when she is forced to by the imperious and incorrigible necessities of life.

"It is an empire of civilization and humanity for all population of Ethiopia.

"This is the tradition of Rome.

"Here is the law of Italians, which closes one period of our history and opens another like an immense chasm opens on all the possibilities of the future."

Then Il Duce read the decrees of the council and cabinet.

At the close of his speech the crowd called him back to the balcony for several salutes, cheering wildly.

Behind the effervescent demonstrations however, there was sober thought. "What will England and France do about it?" asked many of the demonstrators.

Unofficial news that France has made the fullest reservations to Italy's annexation of Ethiopia created an impression but well-informed circles said Italy's attitude at Geneva Monday would be a rigid one.

An empire has been created and its emperor named, they said and these are accomplished facts which admit no change. The league has no jurisdiction any longer and must keep "hands off" Fascists argued.

They assert a continuance of sanctions will not change Italy's attitude but will simply increase her irritation and postpone the time when she can resume collaboration in Europe's problems. Continuance of sanctions would be regarded by Italy as an attempt to take revenge on her because of her successes.

Dispatches from Addis Ababa said four bus lines had been installed there and that the first train with provisions was due. Italians intend to install their Littorine (gasoline motored, streamlined railroad coaches) on the Djibouti-Addis Ababa line, cutting the time of travel in half.

"No pets no children and no raids" were among the terms of an agreement a South London tenant had to sign for the lease of a flat. Before affixing his signature he admitted quite frankly that he owned a very loud pair of mauve pyjamas and that his shoes squeaked.

THE TOFIELD MERCURY
A Weekly Newspaper Published At
Tofield, Alberta
W. Worton, Publisher

TOWN GOSSIP—

Mr. Jack McCusker comes into the limelight this week as a worker par excellence. The Town of Tofield has been doing some grading, ditching and general repair work to main street and Jack, while not the Commander in Chief, deserves special mention at headquarters for his ability to hang onto walking plough handles under conditions anything but conducive to good ploughing. It was found necessary to plough a ditch through a boggy patch, just south of the shoemaker's shop. It was muddy, oozy and wet, but in went Jack with the horses and between them they got through. Wearing ordinary leather boots the ploughman was wet to the knees in no time at all and about half way through, the suction of the mire pulled one boot off. Fishing out the boot from the mud, Jack calmly poured out the water, put it on and away he went again. Hanging on like grim death to the plough handles he reached the other end and the furrow was ploughed.

An old friend is missing from the town. Inspected, noted and admired by hundreds it finally gave way under the strain and has been taken east for repairs and perhaps to adorn an elaborate city office. We refer to the railroad depot clock. This clock of Seth Thomas make, started to tick away life's seconds soon after the Tofield C.N.R. depot was built, about 1909, and with the exception of a trip east for repairs, ticked in glad days and sad days without ceasing. In the days prior to radio time signals, the railroad station clock was a piece of mechanism of importance. It was the only time piece guaranteed to be right and station agents had pride in keeping it right on the dot. The card saying "this clock is —— seconds fast or slow" was altered to allow for slight variations and it is safe to say it was the "master clock" of all time pieces of the district. We are sorry to see the old boy go east, whether to occupy a dusty corner or to hang on an office wall. In fact we would like to own it, or better still, have the town own it. There are few pieces of mechanism as interesting as a public clock that has given many years of service. It may be pure sentiment but even sentiment has its place in a mundane world. Inquiry at the station elicitates the information that after giving more than twenty-five years of faithful service, the Seth Thomas time piece failed to function properly and station clocks must be right. Consequently it was shipped east for repairs, but word came back there was no money for this work and another clock was sent in its place. The new clock is quite "snappy looking" almost jazzy in appearance when contrasted with the dignified appearance of the old one. Anyway we have the word of Mr. Sinclair that it is a good one and keeps good time. We doubt whether it will assume the importance of the old one—but this we surmise is just a form of evolution.

We almost believe a word of explanation should be given regarding the editorial with reference to the singing frogs published in this column a week or so ago. The frog chorus is not the only old time noise to smite the ears of town residents this spring. And in case residents should mistake one for the other, we hasten to inform them that some of the old time noise they hear of an evening is a town band in the making. Now, this is NOT a slam, we stand ready to give the budding musicians all the encouragement possible and strongly urge all others to do likewise. The Tofield town band in days gone by played with gusto and in spite of the wonderful development in music transmission of the past few years, if the town band possessed a fair degree of musical technique, it would still be a real attraction. Scattered here, there and everywhere, are various instruments purchased by the town in days gone by. Youthful enthusiasts are collecting these up and are toot, toot, tooting whenever a favorable opportunity presents itself. Three cheers for the town band!

We looked in upon an unusual spectacle one day this week. We watched a man carefully open up a crow and take out the gall. Unacquainted with the interiors of the crow family, we were surprised to learn that a gall was contained therein and still more surprised that anyone should consider it of sufficient importance to extract it. Upon inquiry we learned that certain healing qualities are attributed to this organ within a crow. The gall is extracted, dried and pulverized. It is then put in a bottle with whisky or other spirits and the resulting concoction is supposed to be a great aid to those who suffer fainting spells. As we watched the gall extracted from a gruesome interior in a rather prosaic manner, we felt that given the right ceremonial setting, such as in a forest at night with flames from a fire leaping upwards, and accompanied by suitable incantations, there would be sufficient power of suggestion to cure anything. Actually what we saw was of little more interest than a housewife cleaning a chicken. We also gathered the information that the gall of a crow is larger at sunrise and sunset than at mid-day, but to prove this readers will have to catch their own crow.

DEFEATED BY GAS SELASSIE DECLARES

JERUSALEM, May 11.—Emperor Haile Selassie in a statement Sunday explaining for the first time his flight from Addis Ababa said he left in order "freely to pursue our efforts to safeguard the independence of Ethiopia" the Palcor News Agency reported.

The emperor also asserted his continued presence in Ethiopia "constituted a real menace" to foreigners there.

The emperor looking ruddier than any time since he touched the shores of Palestine Friday, received newspapermen in the King David hotel. Clad in white chemma, shoes and trousers the Negus looked on with weary eyes as his press director read a statement.

The statement declared the morale of the Ethiopians was maintained until the Italians started using poison gas and "other inhuman" methods of warfare.

"Our presence in Addis Ababa or any other place in Ethiopian territory" the statement said, "constituted a real menace not only to ourselves or our population but also to the numerous foreigners in Addis Ababa which the bombing of the open town of Dessye had already proved."

PLAN PAVING HIGHWAY TO GOLDFIELDS

Allocation by the Dominion government to the province of $400,000 for highways construction in Alberta this year will mean a considerable downward revision of the program, Premier Aberhart announced following a cabinet meeting on Tuesday at which a verbal report was received from Hon. W. A. Fallow, minister of public works on his trip to Ottawa and his conference with Hon. Norman McLeod Rogers minister of labor.

It had been announced from Ottawa that the Dominion would go dollar for dollar with the province in highway construction and that $1,000,000 had been appropriated for the construction of highways into northern mining areas.

Hon. Mr. Fallow determined at the Ottawa conference that the total Dominion allowance to Alberta for this purpose was $400,000 although $843000 had been voted in Alberta estimates for new highway construction.

"When Hon. Mr. Fallow arrived at Ottawa he was informed of the decision made by the Dominion and there was really no reason for his being summoned east," said the premier.

Hon. Mr. Fallow interviewed on the subject pointed out that the $843,000 voted in the provincial estimate plus the $400000 to be granted by Ottawa would enable the government to proceed with its highway program on a curtailed basis.

Asked as to the possible disbursement of the money the minister said that it would permit expenditure of $[illegible] to complete the Jasper highway; $[illegible] to finish hard-surfacing of the Calgary-Banff highway; $75,000 to build the [illegible] stretch from Lethbridge to Picture Butte and Iron Springs and $[illegible] for reconstruction of the Edmonton-Calgary trail between Edmonton and Wetaskiwin which project was announced prior to his going to Ottawa.

Asked if the idea had now to be abandoned of building the highway from Fort McMurray to Goldfields, the Minister stated that the idea was not dropped but any help from the Dominion appeared to be fading.

EXTENSIVE SALT SUPPLY SHOWN IN NORTH TEST

Revealing an extensive body of salt sufficient to warrant creation of a plant, successful diamond drilling operations have been completed at Waterways, C. E. P. Cottee engineer of Industrial Minerals Limited stated Saturday on his return from the north.

The company has leased land from the provincial government with the intention of developing the McMurray salt beds. Extent of the salt bed exposed by the drilling and future plans for a plant were not revealed by the engineer who will wait here until P. I. Batchelor Cornwall president of the company arrives from the east.

Mr. Cottee planned to confer Monday with Hon. C. C. Ross minister of lands and mines on the progress of the preliminary work.

The engineer said the salt bed was sufficiently large to "feed" an extensive plant but was not as big as some Ontario beds.

The salt is in a solidified formation but will be mined by mixing with water and pumping up the solution. Chemicals are placed in the brine to remove impurities and the salt is evaporated in huge pans. Fine salt is made by rapid drying and coarse ground salt by slower evaporation he said.

Previously officials of the company had announced a plant would be erected this summer and production started possibly by September. Starting with 11 tons a day production may be increased to 100 tons a day with employment for 40 men it was said.

Mr. Cottee praised the drilling done by O. D. Bush Edmonton, who operated the diamond drilling equipment and was able to bring out cores of solid salt rock, a difficult feat because water poured on the drill tip usually "melts" the salt.

"He did one of the best drilling jobs on salt I have seen" Mr. Cottee remarked.

Flood conditions now removed, did not hinder the diamond drilling as the work was proceeding near the N.A.R. depot at Waterways but on slightly higher ground, he said.

Mr. Cottee arrived here on the weekly train from Waterways. He is a guest at the Macdonald. He said Mr. Batchelor is motoring west and is expected here in a week or two.

CENTURY'S SUPPLY OF GAS IN TURNER VALLEY FIELD

If a pipeline to carry natural gas were built from Calgary to Edmonton 12,311 citizens in 15 towns and villages could be added to the list of gas consumers and the supply for Edmonton could be drawn from Turner Valley instead of Viking as at present, notes the annual report of the provincial department of lands just printed.

Advantages in this plan says the report would be that the wastage in the Turner Valley field could be reduced greatly and the Viking field could be held as a reserve.

Wastage in Turner Valley is proving a problem to the department it was indicated. Figures show that in the past 10 years it has amounted to 314,050,000,000 cubic feet or 85 per cent of the total amount of gas withdrawn from the field.

The figures indicate that only 103,000,000,000 cubic feet of the gas was utilized.

If the wasted gas had all been conserved instead of being burnt after naptha had been extracted, the total withdrawals would have met the entire gas demand for Alberta for 50 years except for the fuel used in drilling operations, the departmental report says. Used in the Calgary-Lethbridge system alone, it would have lasted for 100 years.

"As things stand" the report continues "it is difficult to say how long the Calgary-Lethbridge system will be able to obtain its supply of gas from Turner Valley. A part of the field has been closed in and this action will make gas available for some time longer than would otherwise be the case."

The bachelor has one advantage. Nobody uses his money to buy him gifts he doesn't want.—St. Louis Star-Times.

SEARCH RENEWED FOR SCHOOL GIRL LOST 28 YEARS

WINNIPEG, May 11.—R.C.M.P. Saturday took up the search again for Olive Dupraw who vanished 28 years ago from a train en route from Fort William to Kenora, Ontario.

A letter from an Alberta farmer provided the new incentive. Police declined to reveal his identity but said inquiries had been resumed. The farmer said the girl was still living.

Olive Dupraw was eight years old when, accompanied by her sister Sybil she disappeared. They had been attending school at St. Pierre, Man. and were returning to their lakehead home when the train stopped at Pine, a way station.

Olive left the coach and was never seen again.

60 YEARS IN JAIL GIVEN KIDNAPPER

TACOMA, Wash., May 11.—In a prison without walls gaunt William Mahan resumed as a kidnapper Sunday the convict life he first learned as a bank robber.

He began a 60-year-term—"quite a jolt" was his word for it—after pleading guilty Saturday to the $200,000 ransom kidnapping of little George Weyerhaeuser, timber fortune heir.

The scar-faced Mahan started his term at McNeil island, regarded as "escape proof" because it is in Puget sound.

You can tell a rich man. When he says his shoes are four years old he is bragging instead of complaining.—Detroit Free Press.

QUINQUENNIAL CENSUS OF AGRICULTURE

The Census of Agriculture, which is to be taken on the first day of June is primarily for the benefit of the farming industry and if taken accurately will be of great value in the study of agricultural conditions. It is extremely important therefore, says the Dominion Bureau of Statistics that a complete and accurate record of agricultural operations be taken.

The report when published will be [illegible] information for all those interested in the problems of the farmers of the Prairie Provinces. It is of the utmost importance that the figures contributed by each farmer shall be complete and accurate so that the best possible inventory of the leading industry will be effected.

The Census of Agriculture aims at securing accurate statistics relative to farm lands; buildings, live stock; mortgaged debt etc. as at June 1; statistics for 1935 concerning crops; live stock products, farm expenses and products sold; statistics of incidental agriculture production; live stock, animal products etc. on plots less than one acre and statistics of vacant and abandoned farms.

There is an absolute guarantee that the information given will be used otherwise than in preparing the Census figures. The individual answering the questions is completely protected. All officials connected with the Census are bound by oath of secrecy and there is therefore no reason whatever why every farmer should not co-operate by supplying the Census enumerators with complete and accurate information. Thoroughly effective remedial policies can only be created when facts are made available.

A farm for Census purposes is all the land farmed by one person with or without help. It must be of one acre or more and must have produced agricultural products to the value of $50 in 1935. A man who owns a certain amount of land might rent part of it. This will be entered on the Census records as two farms, the land farmed by each man being considered as a unit. On the other hand a man renting various tracts of land from different owners will be regarded as operating one farm only the various pieces of land constituting one unit. If however the tracts are in different enumeration areas or if a manager is hired to supervise a certain portion of the land that portion will go down as a separate farm.

The farm population on June 1 will be ascertained together with the number of persons who have permanently left the farm as well as those who have come to live permanently on farms.

The information requested on the general farm schedule covers the operator population of the farm on June 1, persons employed to do the farm work in 1935, conditions of farms, the value of the farm and equipment and the amounts of mortgaged debt and farm expenses in 1935, farm facilities in 1936 forest products produced in 1935; cooperative marketing, crop acreages in 1936, acreages and production in 1935; with information relating to crop failure, live stock on June 1, animal products raised in 1935 and whether they were consumed on the farm or sold, pure bred animals on farms and the value of products sold off the farms in 1935.

CENSUS QUESTIONS

These are the questions that will be asked about each person by a Dominion Government census-taker some time during the month of June:

1. Your name and where you live.
2. Is your home owned or rented?
3. If you own your home give the value. If you rent it the rent per month.
4. How many rooms are in your home and is it an apartment, a row or terrace, a semi-detached house, a single house or a flat?
5. Your relationship to the household (whether head; wife, son, daughter; uncle; boarded etc.)
6. What is your sex?
7. Are you single, married widowed or divorced?
8. What was your age last birthday?
9. In what province of Canada or in what other country were you born?
10. If you were not born in Canada in what year did you immigrate and in what year were you naturalized? (For other than British born)
11. What is your nationality i.e. to what country do you owe allegiance?
12. What is your racial origin?
13. Are you able to speak English? French?
14. What is your mother tongue?
15. Are you able to read and write?
16. How many years have you attended school?
17. How many months at school since September 1, 1935? (For persons of school age.)
18. If employed what is your present occupation (as carpenter; farm labourer; insurance agent etc.)? If you have no gainful occupation state whether you are a student; retired homemaker etc. If unemployed state the occupation at which you were last employed. (For all persons 14 years of age and over.)
19. In what industry are you employed (as dairy farm; iron foundry; street railway; drug store; etc)? If unemployed state the industry in which last employed.
20. Are you an employer; a wage-earner; an unpaid family worker or are you working on your own account?
21. Since your occupation at the present time may not be your usual occupation you will be asked to state what is your usual occupation, industry and status therein.
22. If you are a wage-earner you will be asked if you were at work on Monday, June 1 1936. If you state "no" you will be asked whether it was because of, (a) no job; (b) lay-off; (c) strike or lock-out; (d) sickness; (e) accident; (f) holiday; (g) other reason.
23. If you were not at work on June 1, give the number of weeks since last employed.
24. If you have a job you will be asked to state whether it is full time or part time or whether it is a relief job.
25. You will also be asked the number of weeks you have worked during the last twelve months prior to June 1 1936, including holidays with pay and your total earnings during the same period.

BOY 7, FINDS STOLEN LOOT

CALGARY May 11.—Seven-year-old Melvin Giles thought he had found a pirate-chest when several pieces of jewelry rolled from behind a board as he worked to tear down an old chicken house at his home here. Police were advised and he soon learned it was loot obtained in a neighborhood robbery two years ago.

Melvin found a diamond ring and two gold watches valued at $200. The Giles family only moved into the house two days ago.

APPLE BLOSSOM FESTIVAL MAY 22—25

Dates of the Annapolis Valley Apple Blossom Festival have been advanced to May 22 to 25 inclusive due to extremely favorable weather conditions in Nova Scotia. The fine weather also assures a plentiful [illegible] of pink and white blossoms for the annual celebration in which residents of the valley, joyfully uniting to give thanks for the promise of a bountiful harvest, are joined by visitors coming from far places to view the largest single apple belt in the British Empire at its most beautiful time. The Blossom Ball at Cornwallis Inn, Kentville will be on the 22nd and the Festival Queen will be crowned on the 25th.

For more than three centuries apple trees have bloomed throughout this historic valley in the Land of Evangeline. It was natural, dignified work so the orchards spread rapidly until now it is possible to drive mile upon mile through millions of trees covered with quadrillions of blossoms in a fairyland of unsurpassed beauty.

The annual Festival is one of pageant and merrymaking. School children take a prominent place beside their elders in the parades and folk songs and folk dances of old England. Processions from towns throughout the Valley enter into competition for the crown annually awarded the Apple Blossom Queen. The coronation ceremony conducted by the Premier of the Province is a colorful one, with a chorus of one thousand voices symphony orchestra and military and civilian bands. Mounted police and regimental units create a touch of color.

Last year the queen of Nova Scotia's Apple Blossom Festival represented Canada at the Imperial Fruit Show at Cardiff, Wales. This year it is expected that an English girl representing the apple industry of Great Britain will be present for the Annapolis Valley Festival.

CROP REPORT

General—Field operations over the major part of the Dominion, except the Maritime Provinces and the Peace River country have been retarded from one to two weeks owing to the inclement weather which followed the breakup of winter. There is a good reserve of moisture in most districts and preparation of land and seeding are now under way. In the Prairie Provinces seeding is progressing favourably. While in the areas last year affected by rust and frost a substantial proportion of inferior seed is being sown the good seed bed conditions at present enhance the possibilities for normal growth. In Quebec the soil generally is in good condition, and pastures meadows and fruit trees show no sign of winterkill. In Ontario land preparation is general and seeding has commenced. Fall wheat wintered well and has since progressed in the absence of frosts or damaging winds. In the Maritime Provinces pastures and meadows including areas flooded this spring are generally in good condition. In British Columbia farming operations are fully two weeks late but the soil is in good condition and fall wheat and hay crops wintered well. Details follow:

PRAIRIE PROVINCES

Alberta—Wheat seeding is now fairly general. The seed bed is in good condition for early germination if warm weather continues. Moisture conditions are satisfactory but there is little subsoil reserve in the southeastern area. In the Peace River District operations commenced two weeks earlier than last year. Beet seeding is well advanced.

Saskatchewan: Seeding operations have commenced and are becoming general in all sections of the Province. Early moisture conditions are favourable and with the exception of a few scattered districts subsoil reserves have shown improvement. Indications are that the wheat acreage will be smaller than that of last year.

Manitoba: Wheat seeding is general in the southern and central areas and a start has been made in northern districts. The seed bed generally is in good condition with sufficient moisture for present requirements. A slightly reduced wheat acreage is expected.

WAKE UP YOUR LIVER BILE—
And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name. Stubbornly refuse anything else.

THE PRESS GOES ROUND AND ROUND

It is not only the music that goes round and round, here in the country print shop the old press makes its revolutions too. It rumbles and perhaps grumbles, but under the power from the old 1912? Studebaker engine, it is kept on the move. We don't press a valve but press keys and we don't play music, but life's little comedies and dramas. Weddings and funerals, births and deaths, comings and goings of folk who live around us. The political, municipal, fraternal and sporting activities are in our repertoire too, and glory be, the very best applause we can get is a renewal subscription or a new subscriber. The applause is never deafening, but thank goodness there is never absolute silence.

The Calverts Leave Town

On Tuesday afternoon Mr. and Mrs. Calvert left Tofield, which has been their home for quite a few years, for "parts unknown." At least at the present time they are uncertain where they will locate, preferring to look around before making a final choice.

Both Mr. and Mrs. Calvert will be missed by the sporting fraternity, they having taken an active interest and part in almost all branches of sport.

Bert started his sporting career at Tofield by playing soccer football, a game at which he had had much experience in Ireland. Football did not go over so big here and with a versatility typical with him he turned his attention to base ball and quickly developed into a good player. Of late years he has been the king-pin of the baseball club here and in this connection will be sorely missed. Curling claimed most of his attention in the winter but he had an interest in hockey also. At one time for a few games he played goal for the senior team of the early twenties. Handy at most anykind of sport he included cricket, tennis and bowling in his bag of tricks. Commencing his business career here as a pool room operator he later turned to barbering and hair dressing of which he made quite a success.

Mrs. Calvert was a tennis enthusiast in summer and a curling enthusiast in winter, but of late years both summer and winter she gave whole-hearted support to the United Church Ladies' Aid. They carry with them the best wishes of Tofielders for success wherever they happen to locate.

New Bridge Being Installed

We understand the bridge just north of town on the Tofield Creamery road is being replaced with a new structure. The road which takes a sharp curve at this point is being straightened out, which will be a great improvement and a help to travellers using the road.

PARTY FOR BERT CALVERT

A number of men got together on Friday night last at the pool room and made the event into a farewell party for Bert Calvert. Bert's good qualities were eulogized and there were many expressions of regret at his leaving town. Bert was made the recipient of a handsome hunting coat and cap.

The Tofield [illegible] gave Mrs. Calvert a lovely silver dish as a farewell gift.

FOR SALE—Pure Bred Shorthorn Muley Bull, 2 years old. Also four ewes with lambs at side.—Apply to Walter Bellamy, phone 38 Tofield.

PLENTY OF RAIN

All signs may, as it is said, fail in dry weather but they certainly have run true to form in wet weather. Anyway, we learned long ago that an east wind brings rain and sure enough for the past two weeks it certainly has.

After Saturday last, we thought surely a dry spell was due to arrive, but a strong dust laden, east wind of Monday brought the inevitable down-pour on Wednesday, further delaying the protracted threshing season.

KING APPEARS WEARING STRAW —VEST IS DOFFED

London May 19.—His Majesty the King Tuesday officially inaugurated the straw hat season appearing at the Chelsea flower show wearing one. He did not wear a vest and showed he was as worried about the heat and drouth as his subjects.

"It's hopeless for us gardeners unless we get some rain" the King said.

The King spent Sunday in the flower garden of his country home Fort Belvedere.

6 BLACK CROWS CONDEMN WHITE COUSIN, EXECUTE

VIRDEN, Man. May 19.— Six black crows held court over one white crow condemned it to die and duly carried out the death sentence near here, William Goff, farmer an eye witness told of the strange judgment Monday.

The crime for which the crow was "tried" Mr. Goff believed was its capture at Pittsburgh where it was banded and painted white. It carried a tag on its leg.

The six black crows chased the white crow forced it to the ground. For a few moments they sat around their victim cawing loudly. Then they pounced on the prisoner and pecked the white bird to death.

U. S. TO HELP CHINA STABILIZE CURRENCY BY SILVER PURCHASE

WASHINGTON May 19.— Secretary of the Treasury Morgenthau said Monday the United States government has agreed to buy large amounts of silver from China to provide dollar exchange to help China stabilize her currency.

Simultaneously in a statement the secretary again opened the door to foreign approaches on the subject of international currency stabilization. He said:

"I believe that only through full and frank exchanges of views similar to that which has just taken place between the representatives of the Chinese ministry of finance and ourselves will it be possible to improve the internal stability of national currency and with this achieve a greater international stability."

It was emphasized however that Morgenthau was not advocating an international conference at this time. Replying to a specific question he said he would prefer to confer with one nation at a time.

Morgenthau's announcement at a [illegible] conference came as representatives of the Chinese ministry of finance concluded a series of conferences begun two weeks ago to exchange views in mutual problems.

The treasury head would not say how much silver would be bought but said payment would be made at the average world price each month.

Ye Gifts Supreme

An Englishman, an Irishman and a Scotsman were having lunch together.

"By the way did either of you go to Smythe's wedding?" inquired the Englishman. "I wasn't able to but I sent him a dinner service set for 12 people."

"I wasn't there either" said the Irishman "but I sent a tea set for 24 people. Were you there, McTavish?"

"No, I couldn't get there but I sent him a pair of sugar tongs for a hundred people."

SPLENDID ENTERTAINMENT

On Saturday evening last in the United Church the Ladies' Aid presented an excellent variety program. The program was made up of sketches; duets; solos and quartets. All ages took part even two tiny tots, Joan Webb and Donald Stinson, each of whom sang a solo. The Rev. D. K. Allan acted as chairman. After the program a cafeteria lunch was served in the basement of the church.

Following play a delightful lunch was served.

36 FOOT VESSEL WEATHERS 2-DAY ATLANTIC STORM

YARMOUTH N.S. May 19.—Mrs. P. S. Benoit and her 15-year-old son Julien sailed their crippled pleasure yacht into port Monday after weathering a two-day storm that threatened to send the 36-foot Plonia to the bottom of the Bay of Fundy.

The father skipper of the ketch-rigged craft and his daughter the fourth member of the crew were seasick and tossed back and forth in beds soaked by spray.

Sailing for Nova Scotia from Boston under command of Brigadier P. S. Benoit retired the Plonia was only kept afloat by connecting a small motor to the pumps.

The storm struck late Friday shortly after the craft put out of Boston and the wind hauled around to the north and swept freezing weather over the bay. Exposure weakened Brigadier Benoit and he and his daughter Jeanne had to go below to their sodden bunks.

With water swirling about the decks and starboard main chain plate broken Julien and his mother took turns at the wheel as the little boat was tossed on the 30-foot waves that smashed down on the pleasure craft and left her deck gear twisted wreckage.

To keep the Plonia from foundering the youthful skipper ran the engine on the pumps. After the danger had passed and the vessel was headed for land the motor failed becoming clogged by salt water.

Mother and son worked together to rig a makeshift sail and brought the crippled ketch to Yarmouth where Brigadier Benoit was placed under a doctor's care. His condition is not serious. Jeanne was up and about but still a little weak.

AUSTRALIA HAS WOMAN WHO CANNOT DROWN

SYDNEY N.S.W. May 19.—A woman who cannot drown is puzzling Australian doctors.

She is Mrs. Rebecca Parker whose amazing buoyancy is believed to be due to the low specific gravity of her body.

In a demonstration at a swimming pool she reclined on the surface of the water resting on her head with arm crooked comfortably. She read a magazine and lay basking in the sunlight her head protected by an umbrella she held. She rolled over on top of the water like a cork.

In the water Mrs. Parker just cannot remain in a perpendicular position for her legs slowly float to the surface without visible movement. The most difficult thing for her to do is to walk on the floor of the baths.

Post Office to Move This Week

If present arrangements carry, the beginning of next week will see the post office installed in the new building now being finished expressly for it. Located immediately south of the bank and of brick and tile construction it will make a commodious and comfortable home for His Majesty's Mail and its custodians. The walls are plastered and the floor is of fir. Postmaster Clutterham expects to move the fixtures, to which new ones are being added, from the temporary quarters in the W.I. building over the week-end. To facilitate this work we understand permission is being obtained to close the present post office lobby at 3:00 p.m. on Saturday, May 23rd.

The Tofield post office has been located at various places during the past 23 years. In 1913 it was located in the premises now occupied by H. H. E. Rogers. J. F. Jamieson was then postmaster. It was then, if our memory serves us right taken to the building last occupied by Roger Bros on the east side of main street and which was burned down in August 1929. Long before the fire it had been moved by the Postmaster, W. Somers, to the west side of main street when he moved his drug business over. Mr. Beirnes, brother of Tofield's present druggist, succeeded W. Somers as Postmaster, he in turn being followed by A. E. Clutterham, the present holder of the office. Mr. Clutterham has been Postmaster for about ten or twelve years.

CHILD KILLED; 10000 PERSONS TERRORIZED AS STORM HITS CIRCUS TENT

WASHINGTON May 19—A storm riding the wings of a two-mile gale brought death Monday to a child and terrified 10000 persons gathered under the threshing canvas of a circus "big top."

The child was Betty Lee Roudabush 12 of Shenandoah Va. who was fatally injured when a heavy tent pole toppled as the storm struck the acres of canvas.

The child was the second of two persons killed in a series of storms which swept over the United States capitol. A bolt of lightning ripping down the trunk of a tree instantly killed William H. Green Negro as he sought shelter.

The heaviest storm broke as the afternoon performance of the circus began. Tons of water collected in the canvas of the big tent finally ripping through to cascade down on spectators. The audience scrambled down through overturned seats to mill around in the middle of the tent.

Heeding the possibility of a jungle like stampede the head elephant man herded his 42 pachyderms together and then tail-to-trunk they plodded quietly out into the storm.

SPOOK BESETS MEMBER EDMONTON POLICE FORCE

There's one member of the Edmonton police force — he asks to remain anonymous—who is now beset by a spook.... He vows to reporters that he does not believe in ghosts but asks what can be do in the face of following experience. The other day while he was sitting at the signal machine in the station a call came in from box no. 54 stationed at 100 street and Jasper avenue. Constable Ed. Macron was reporting. The constable at the signal machine finished receiving the call when a weird noise came over the wire.

Hastily he dropped the receiver then picked it up listening heard the popular jazz tune "I'm Putting All My Eggs in One Basket" coming over as though a radio had been tuned in for that station.

Reporters laughed when told about it but this morning a similar event occurred and with their own ears they heard it.

Now the constable says he could have forgotten both incidents had he not had another unusual experience shortly before noon Monday.

While sitting in the signal room a old hand tapped him on the shoulder. He turned around to see who it was. There was no one behind him. A few minutes later it happened again. He says he doesn't know what to make of it and he's getting jittery.

First Base Ball Game of Season

On Friday last the Tofield High School ball team journied to Ryley and defeated the Ryley team 27-7. This is only the beginning of the season and neither of the teams being in shape, in fact this was the first time on the diamond for both teams. Battery for Ryley was Beirnes and Pepper and for Tofield was Glover and R. McClymont. It is expected the Ryley team will visit the Tofield boys very shortly.

GARDENING IN FULL SWING NOW

Gardening both floral and vegetable is claiming the attention of many town residents these days. Many of the ladies are busy with trowel and planting bulbs, perennials, seeds etc. so that the town may have a beautiful appearance during the all too brief summer months. Gladiolas are going to be popular this year weather permitting, many ladies planting them. Mrs. W. Chapman and Mrs. Emery probably hold the record, having planted 175 of these bulbs, while others have planted from a dozen upwards.

The men folk have been busy planting vegetables the humble but very necessary potato receiving considerable attention. Other vegetables too, are being planted according to the tastes of the gardeners. Luckily, in spite of the long cold winters experienced here, through the short summer it is possible to grow an abundance of garden foodstuff.

LOCAL AND PERSONAL

● ● ● ● ● ● ● ● ● ● ●

Mr. Matchmose, Bill Worton and Lee Burnett motored to Strome on Sunday.

Mrs. A. Thompson attended the graduation exercises of the University of Alberta on Friday last. Harland Thompson was among the students that graduated this year.

Mr. and Mrs. Umphries of Unity spent the week end visiting with Mrs. Malcolm.

Mrs. Ellis, Miss Cherry and Jean and Raymond Ellis were visitors at the Malcolm home on Sunday.

Harland Thompson returned from Edmonton on Monday after spending a week there.

Mrs. Stephenson and son Howard of Edmonton spent Sunday at the Malcolm home.

Among those who visited the city on Friday were: Mrs. Ed Hicks; Pat Burnett; Annie Chopka; Mrs. Smith; Annie Swift.

Dr. and Mrs. Law and Mrs. Hammond spent one day in Edmonton last week.

Charlie Edwards spent the week end visiting in Viking.

Mr. and Mrs. J. D. Hannan from Camrose spent Sunday visiting with Mr. and Mrs. Bud Hannan.

Mr. George McLaughlin and Mr. Somers of Wetaskiwin were Tofield visitors last week.

"Bunty" Hicks is visiting at the Ed. Hicks home.

The Jolly Twelve Bridge club met at the home of Winnie Worton on Wednesday evening. Honors were won by Hilda Nomeland and Winnie Worton.

Mr. and Mrs. A. E. Calvert left on Tuesday for Edmonton.

Born: To Mr. and Mrs. C. Piper on May 18, a daughter.

Capt. Balfour, inspector of high schools paid an official visit here on Monday.

Mr. Chas. Fry was a visitor in Tofield this week.

HEALTH by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

WATER

The fear of disease which accompanies floods and similar catastrophes arises largely out of an appreciation of the danger that wells and other water supplies may have been contaminated.

One of the greatest factors in the prevention of disease has been the safeguarding of water supplies. We cannot live without water, and because of this universal daily need, a contamanated supply endangers all who use it.

A large part of the body weight is water. We all have "water on the brain" in the sense that a high percentage of the grey matter is water. Loss of body fluids is serious when it reaches ten per cent and if the loss is continued there is a point where it is fatal.

Water serves as a vehicle for foods. Just as the body itself is made up largely of water so also are the foods which we consume. Even if we do not drink any fluid with our meals we actually take in quite a quantity of water as a part of the solid foods eaten.

Internally water is essential for certain of the chemical changes which go on in the body. The body fluids are required as lubricants and the heat of the body is regulated through the evaporation of water-perspiration from the surface of the body.

Considerable quantities of water are lost regularly from the body each day. Even when there is no obvious perspiration, the skin is kept moist, and approximately one pint a day of this "insensible perspiration" is evaporated.

With every breath taken, water is lost as can be shown when we breathe on glass. Dogs and other animals which do not perspire get rid of their excessive heat by rapid breathing or panting. From the lungs are lost the volatile waste products, from the kidneys, the non-volatile in watery solution. Any excess of water in the body is eliminated by the kidneys.

The amount of water required depends upon the kind of work done and the temperature. A man doing heavy manual labour on a hot summer day needs considerable quantities of water as compared with the man who sits quietly in a cool office.

The sense of thirst is the signal provided by nature to indicate the body's need for water. Neglect in responding to this signal may blunt the sense of thirst and so limit its value. It is likely true that a majority of people would be the better for drinking more water and that is why it is suggested that a glass or two upon rising and between meals is a desirable habit to establish. The excessive use of fluids is not desirable and may be harmful.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St. Toronto will be answered personally by letter.

MUCH DISTRESS AVERTIBLE

If industries had enlarged the production of goods and lessened prices as agricultural prices went down much of the distress of the depression could have been averted. J. D. Sutherland of the Federal Bureau of Statistics told the parliamentary committee enquiring into the cost of farm implements.

Mr. Rutherford pointed out that agricultural production had been maintained in the face of a falling demand and the result was a precipitate decline in the prices of agricultural products. On the contrary many industries maintained their prices and cut production. This resulted in unemployment. Much of the distress of the depression was due to reduced operation.

In 1932 agricultural prices had declined fifty per cent from the 1926-29 level and agricultural implements in 1933 was only 15 per cent of the average production volume in the period 1926 to 1930.

A few industries Mr. Rutherford pointed out enlarged production and reduced prices with beneficial results.

The enquiry into the cost of producing agricultural implements is continuing. The government has made some slashing reductions in the tariff on imported machinery.
—Wheat Pool Bulletin.

Her Viewpoint

On his tour of an English district, an inspector of city high schools came before a class of girls. He wrote on the blackboard "LXXX." Then peering over at a good-looking girl in the first row, he said:

"Young lady, I'd like to have you tell me what that means."

"Love and kisses" the G.-L.G replied.—Washington Labor.

GIRL ENDEAVORS TO FIND OWNER OF LOST NICKEL

"Honesty is the best policy." This simple little homily has by no means lost its significance with Edmonton school children as was shown by the number of articles turned in by children at the Edmonton musical festival at Edmonton last week.

Finding a nickel on the floor an honest little miss promptly brought it to the desk of the festival officials. Told that it would be alright to keep it she demurred vigorously and named a possible owner. The "suggested" owner denied ever having a nickel but despite this the little girl was reluctant to take the money.

"Go on" urged the official "it's the price of an ice cream cone." Flushing and looking as guilty as if she had been caught stealing the young lady took the money—but still reluctantly.

YOUTH IS RECOVERING FROM EFFECTS OF 1800 SKIN-GRAFTING OPERATIONS

DAYTON, Tenn. May 15.—Nineteen-year-old Marvin Smith was recovering here Friday from what doctors hoped would be the last of 1800 skin grafting operations on his right leg.

On October 28, 1931 the youth was injured in an automobile wreck. A spinning wheel of the wrecked car rubbed the flesh from his leg to knee to ankle. Doctors estimated about 180 square inches of skin were torn off.

He spent two birthdays in hospital while Dr. A. C. Broyles grafted a total of 1,740 patches on the injured limb, using skin taken from various parts of the patient's body.

He was dismissed three months ago but while working in a potato warehouse at Carp, Tenn. a few weeks later he was bitten by a rat on the patched up leg.

Infection developed and he was forced to return to the hospital where 60 more operations were necessary to restore the member to normal again.

ANTENNA MIND CLAIMS "BIGGEST CROP" FOR WESTERN CANADA IS DUE THIS YEAR

LINDSAY, Ont. May 16.—Intimate secrets of 1936 were laid bare Friday as Lindsay's "man with the antenna mind" swept the fog from the future and confidently predicted more and bigger stomach aches, riots, earthquakes in eastern Canada and the biggest crop in history for western Canada, all before the end of the year.

He is J. Bates who explains that science has discovered in the human brain a little sack of sand and gravel which acts as an antenna and can be made to pluck "messages" out of space. Bates has trained his antenna diligently and he gets all kinds of ethereal news bulletins on the future.

The person who plays a "hunch" at the races and wins didn't have a hunch at all, claims Bates. What happened was his antenna nabbed a passing message telling him what was going to happen and he acted accordingly.

"The air's full of them" he says "and if you know how you can pick them up all the time—like I do." He wanted to demonstrate.

It's going to be a particularly bad year for stomach ailments he said. The west is going to harvest the biggest crop in its history. Hurricanes and earthquakes are going to strike eastern Canada. More? Sure.

There will be riots all over the world, terrific warfare in the east. Germany is going to fight Communism, and a world financial jam will be straightened out by London, England. He could go on and on said the man with the trained antenna, who is well-read and widely traveled.

He has been getting these "hot flashes" for years said Mr. Bates and only once did his antenna go haywire. In 1932 he got a tip on a war for March 1936.

"It was only a war scare" he apologized.

ROUNDUP LAW OF OLD WEST IS USE AGAIN

MEDFORD, Ore. May 12.—Wild West days are being re-lived here.

An outlaw band of 100 wild horses has been ordered rounded up by the Jackson County court on the complaint of 10 stockmen, acting under a state law that has not been invoked for years.

The horses, which have the freedom of the range near the Oregon-California state line are "abandoned, starving and neglected constituting a range nuisance," according to the court. The band has trampled grazing land, raided alfalfa fields broken down fences and kicked young livestock to death with their flashing hoofs, stock ranchers say.

The horses will be held in the corral for 10 days so owners of branded animals that have turned wild may claim them. State law requires the rest of the horses be sold to the highest bidder at auction. Some will go to rodeos.

DIRIGIBLE IS FIRED UPON BY HIDDEN SNIPER

SUNNYVALE, Cal. May 16.—Two attempts by a mysterious rifleman to shoot down the United States army dirigible TC-13 resulted Friday in a move by military authorities to learn the sniper's identity and motive.

Major Clarence B. Lobar commandant of Moffett Field where the airship is stationed disclosed the attacks had been made as the craft soared over the mountain area east of here Jan. 1 and May 4. Several bullets tore through the gasbag fabric.

Those aboard felt the impact of the bullets. An inspection showed several holes through which helium the costly inflating gas was escaping.

Lobar said the craft would have burned in midair if the bullets had struck the gasoline tanks.

The TC 13 is a non-rigid dirigible with a gas capacity of 360000 cubic feet. It carries a crew of nine men and sometimes has as many as 15 persons aboard.

DOG GUARDS BODY STRICKEN MASTER

THREE HILLS May 18.—Guarded by his dog the body of John Dickinson prominent business man of this town was found on his farm Wednesday victim of a sudden seizure.

The body was discovered by a neighbor who was obliged to bring Mrs. Dickinson to the scene before the dog would allow anyone to touch his master's body. The widow and a young son John survive.

WOMAN'S NEEDLE IS LIGHTNING ROD

PICTON, Ont. May 12.—A needle served as a lightning rod yesterday when a bolt came down the chimney of the home of Mrs. Craight Platt and struck the bit of steel from her fingers as she sat quietly sewing. She experienced a little shock, a fact she attributed to the rubber thimble she was wearing.

HUGE CAKE HAS 104-CANDLE POWER

LORNE VALLEY, P.E.I. May 12.—A huge cake lit with 104 candles was cut yesterday by "Aunty Mary" McSwain, oldest living woman in Prince Edward Island as she celebrated her 104th birthday. Aunty Mary came from Scotland to Prince Edward Island when she was eight years old.

MYSTERY VEILS BOY'S SHOOTING

LANGLEY PRAIRIE B.C. May 16—Police today were investigating the shooting of 15-year-old Jack Lepard shot in the back while on his way to school yesterday.

Believed to be suffering from a stomach ailment when he collapsed on the highway a short distance from the schoolhouse the youth was taken to the hospital at New Westminister, where an examination revealed the bullet wound.

A .32 calibre bullet was recovered from the boy's stomach.

Police believe the lad may have been struck by a spent bullet fired by some person using various objects in the nearby bush for target practice.

HUSKY DOCTOR IS NEEDED FOR ALBERTA WILDS

LONDON, Ont. May 16.—Wanted: one husky doctor, able to drive through a blizzard without a compass or perform operations on the spot under the most adverse conditions.

These are the qualifications set out by Dr. Margaret Strange-Saxage of Dixonville, Alta. a graduate of the University of Western Ontario who has written to London friends in search of a doctor to help tend 4000 homesteaders in the district.

The applicant must also be able to laugh at the mosquitoes, Dr. Strange-Savage noted as an afterthough.

FIFTY-YEAR-OLD LOCOMOTIVE FOR FILM PRODUCTION

REVELSTOKE, B.C. May 16.—Number 374 the first engine to pull a passenger train into Vancouver over Canadian Pacific lines 50 years ago and which has been undergoing repairs in Winnipeg is now en route here, it was announced Friday.

The old engine will be used in the Gaumont-British Corporation production "The Great Divide" which is to be filmed here next month. It will later go to Vancouver where it will be used in connection with the celebration of the golden jubilee in that city.

No Time For Agreement

"How did the Smith wedding come off?"

"Fine until the minister asked the bride if she would obey her husband."

"What happened then?"

"She replied "Do you think I'm silly?" And the groom who was in a sort of a daze replied "I do.""

OLIVER PATIENT SAID MURDERED BY WARD-MATE

Victim of an alleged attack by a fellow inmate, W. R. Stewart aged about 60 was murdered as he slept in his bed at the Provincial institute at Oliver about 12:30 a.m. Saturday.

Battered about the head and face with a steel bed post the man was found by attendants about a half an hour after the attack. He died within an hour.

At the inquest in Oliver under Dr. E. A. Braithwaite Saturday afternoon a coroner's jury named the murderer as George Allen, another inmate.

The verdict added: "We absolve the attendants of any blame.

At the inquest it was declared the attacker had removed the steel post from his own bed substituting a wooden one and hiding the steel weapon. A patient in a nearby bed in the ward a 20-year old man, testifying but not under oath said that the attacker struck the sleeper five times. The victim's head and face were crushed.

Allen, testifying said that he remembered getting out of bed but did not remember hitting his fellow patient.

Attendants inspected the ward every half hour it was stated. No alarm had been raised by patients in the ward.

Dr. J. W. McAllister, superintendent of the institution notified Dr. Braithwaite of the fatality and Dr. Braithwaite notified the R.C.M.P. A jury was summoned and the inquest started at 2:00 p.m.

Dr. Braithwaite saw the body and identified it. He also investigated the bed in which the murdered man lay and saw that one post of the bed had been torn away and a wooden prop had been put there in place of it.

The steel weapon had been thrown through a screen outside an open wash-room window and was found on the grass. Tracks were followed from the death bed to the wash-room.

Both victim and attacker were confined in Ponoka mental hospital before being transferred to Oliver, 10 miles north of Edmonton. Allen was known as a quiet patient and had never before caused any trouble. He was immediately removed to ward three where three attendants stood guard.

Inquest evidence will be reviewed by the attorney-general's department. It is unlikely that any charge will be laid against the slayer as he is a mental case.

Two astronomers were discussing the limitations of space. Said one:

"There is no limit to space!"

"No limit at all?"

"Well, practically none."

"Ah" said the second quietly, "thats the way I like to hear you talk—conservatively."

"TUNNEL EYES" SEE STRAIGHT

SALT LAKE CITY, — "Tunnel eyes" and "cat's eyes" are normal human afflictions, Utah optometrists have been told by Dr. H. L. Fung of Los Angeles. Persons with "tunnel eyes" can only see straight ahead, and those with "cat's eyes" see better at night.

U.S. IS SILENT ON WAR DEBT

WASHINGTON, May 16.—President Roosevelt and State Department officials were silent today on war debts but it was believed they would be willing to discuss European proposals about payment.

European war debts to the United States total $12,670087391 of which $10409706092 is in default. France's debt totals $4041152328 and Britain's $4950505301.

PEOPLE 'GO CRAZY' TWO PER DAY

REGINA, May 16.—According to figures compiled by provincial mental institutions, Saskatchewan residents are going "crazy" at the rate of two a day, Hon. J. M. Uhrich minister of health said here. During April 56 persons were admitted to mental hospitals.

THE KING MEETS SCOUTS OF 50 COUNTIES

1,000 Boy Scouts from 50 counties of England Scotland and Wales gathered at Windsor Castle for the third National Scout Service and were addressed by King Edward. It was the first Scout function attended by his Majesty since his accession to the throne.

A MIXED SEASON—

Probably not within the memory of the oldest old-timer has a season occurred which has been so mixed and muddled as the present one. While many farmers did get their crops threshed last fall, there were quite a few who did not and still others who were able only to partially thresh their crops. The percentage of unthreshed grain last fall in this district was probably between 25 and 35 per cent. This spring opened up rather late and to make matters worse a succession of wet spells of either rain or snow has delayed the completion of threshing until, in quite a number of cases, the finish of last year's work and the beginning of this year's work clashed. It is now May 21st, and while no doubt some of the grain left over has been threshed during the few fine days available, there is still 1935 threshing to do. Insofar as a dead line can be set at all for the planting of wheat, May 15th is that date, but actually the setting of a date is more of a guide than a hard and fast rule. There are men in this district who have planted wheat as late as May 28th and a good crop resulted, also oats planted well into June yielded well. While of course, there must be a date deadline somewhere as regards planting, a successful crop depends more upon the kind of season than the actual date planted. With two or three weeks difference in the time of planting, wheat fields in this district have been known to be ready for the binder within one day of each other.

For some time past as regards farming operations, nature has been none too kind. What with an early and long winter, and intermittent moisture throughout the spring season, it would almost seem that the law of averages pressages a good growing season. Here's hoping it does.

As if it were necessary to be in the fashion of a mixed and muddled season, the quality and yield from grain threshed this spring has been bewildering in its variety. From some quarters we learn that grain so poor that elevators could not buy it was threshed. From others we learn that there was not much difference between fall and spring threshed grain. Some feel that they gained by spring threshing, others that they would have been just as far ahead if they had burned it, the cost of threshing eating up the amount received for the grain. In many fields rabbits and mice played havoc with the sheaves throughout the winter. We all sincerely hope that when the last sheaf goes through the machine it will mark the end of a topsy-turvy season, such as will not return for many, many years.

EVERYBODY PAYS TAXES—

HOW MANY folks know how much they contribute toward the cost of government? It is a safe bet that few, if any, can give the right answer. But it is certain that everybody does pay taxes, directly or indirectly.

If every commodity purchased, and every bill received for anything, could bear on its face a note stating the amount of the total charge representing taxes, paid at one point or another in the process of production and distribution, it would not take long for the general run of people, who imagine that taxes are paid only by the rich, to realize that they are carrying a tax burden even heavier in proportion to their means.

Taxes have a direct bearing on wages. The income of every employee depends basically on the earning power of the business that employs him, and on the ability of the employer to pay adequate real wages. "Real" wages are not measurable in dollars, but in the commodities which the current dollar will buy. When the prices of food, clothing, rent and the other necessities of life go up by reason of increased taxes, the effect is a reduction in the real wages of workers. The wage-earner pays taxes not alone in the prices of the things he buys, but in the reduced power of his employer to pay him higher wages.

One of the big motor car companies reports that its taxes last year were 21 per cent of its payroll. A large railroad system figures that this year's taxes will come to 22 per cent of its payroll. Of course, somebody has to pay for the cost of government, local, county, state and national, but whether it is necessary to pay such a high price for government is a live question which more and more people are asking.

The realization that taxes come out of everybody's pockets, in higher prices and lower wages, is spreading. When every man comes to a full understanding that neither he nor anybody else escapes taxation, he is going to begin to find out just where the tax money goes, who spends it and for what.—Exchange.

"If we realize that the ultimate good of all is more advantageous than the temporary good that may accrue to one nation or to one individual, we will be able to meet questions that arise and adjust them in a sane and reasonable manner."—Mrs. Franklin D. Roosevelt.

You may be whatever you resolve to be. Determine to be something. "I cannot" never accomplished anything. "I will try" has wrought wonders. —J. Hawes.

WRANGEL 'DICTATOR' STARVED ESKIMOS—KILLED EXPEDITION MEMBER—SOVIET SAYS

MOSCOW May 18.— So-called "Little Dictator" of Wrangel Island bleak territory of the Soviet Arctic went on trial for his life Sunday on a charge of starving Eskimos and murdering a member of a Polar expedition.

Story of ruthless tactics of an unscrupulous and petty ruler who established a detention camp, and made human beings drag dog sleds and withheld food while natives died of hunger was told by Prosecutor-General A. J. Vyshinsky.

K. D. Semenchuk administrator of the Wrangel Polar station in the winter of 1934-35 is the chief defendant. S. P. Startsev, an assistant of Semenchuk faces charges of complicity.

Most serious crime attributed to Dr. W. R. Wulfson who perished on trip to [illegible] to attend a patient.

Soon after arriving at the island at the head of a wintering party of 16, Semenchuk according to the charges set himself up [illegible] little group and the population of [illegible] Eskimos. The least criticism of his actions was called "conspiracy and rebellion" offenders being confined to a warehouse which was converted into a detention camp.

The indictment said Semenchuk forbade Eskimos to hunt sea animals, thus depriving them of meat.

When the hungry natives asked for food, it is charged the dictator refused although the warehouse was well stocked.

[illegible] SCHEME TO BOOST COAL VALUE IT IS CLAIMED

Proposition by which it is claimed Alberta coal could be processed under a new secret and patented system and sold in huge quantities to eastern Canada and United States markets in many forms was outlined to Premier Aberhart and his cabinet Saturday by Albert Grant of Montreal, head of the Grant Engineering Co. Ltd which holds North American rights to the process.

Mr. Grant an engineer of wide experience, which included a time as adviser to the Soviet government was presented to the cabinet by Percy John Rowe of Edmonton, Social Credit member of the house of commons for Athabaska and head of the federal Social Credit caucus committee engaged in seeking new industries for Alberta.

After the cabinet conference no announcement of details of the scheme was made. Mr. Grant declared however, that he "didn't" ask the government for anything but merely presented the proposals as requested."

Brought to Edmonton from Montreal Mr. Grant will remain in Edmonton during this week and will confer with Hon. C. C. Ross, provincial minister of lands and mines. Mr. Rowe however, left for Ottawa again Saturday night traveling with Premier Aberhart and other provincial cabinet members and will return to Edmonton within two weeks.

Pending completion of his plans here, Mr. Grant would make no statement. It is believed certain however, that he intends to establish at least two plants in Alberta within the next few months for processing of this province's coal. In the meantime, it is stated he is surveying the field.

He already has tested some types of Alberta fuel in relation to his process and has found it highly satisfactory according to engineers. Best coal in the world today from the standpoint of heat production it is stated, is the top-grade Russian coal which has a rating of 73. On the same scale the Alberta coal which has been processed has been given a rating of 104 whereas unprocessed Alberta coal attains only 27 it is claimed.

Canada's imports of coal from the United States and from Wales now are estimated at $70,000000 yearly. Mr. Grant's proposal it is declared envisions replacement of all these imports by Alberta and Nova Scotia coal processed by his method. In addition it is stated he hopes to produce this coal so cheaply, through sale of by-products that he will be able to displace much American coal within the American market itself.

Mr. Grant is declared to have told the Social Credit caucus in Ottawa that if necessary, to meet outside competition he could distribute his processed coal absolutely free and still show a profit on the by products.

Many of these by-products are not commercially feasible, he is reported to have admitted but adding that they could be made so.

Mr. Grant's process is believed to have originated in England and the Duke of Montrose and the British fuel board are reported to be standing behind it now.

Acquiring Knowledge

"Opportunities for acquiring knowledge should be in proportion to one's curiosity for learning."— Phelps Phelps.

GIANT LINER TO BE INSURED FOR SUM OF $24,000000

LONDON May 18.—Great Britain's new super-liner, the Queen Mary will be insured for a record sum of approximately $24,000000 when she sails on her maiden voyage late this month from Southampton to New York.

About $15000000 of the total said to be the largest amount ever covered for an individual hull risk is being placed with Lloyds and marine insurance brokers. The remaining $9000000 will be insured by the British government.

A premium of approximately $300,-000 it is understood will be paid annually on the insurance.

KING SEES GUARD FALL FROM HORSE

LONDON May 18.—Unusual incident occurred Friday as His Majesty the King inspected the Royal Horse Guards in Hyde Park making his first appearance on horseback since his accession.

A horse bearing a trumpeter shied throwing his rider.

The King looked anxiously to see if he was hurt seriously. The riderless horse galloped wildly across the park.

With the iron discipline of the Guards the band went forward. Not a single man's head turned.

The thrown man picked himself up and walked slowly off the parade ground, still carrying his trumpet. He was badly shaken but otherwise uninjured. The riderless horse was caught.

A.M.A. ISSUE 100,000 STRIP MAPS OF ALBERTA HIGHWAYS

Hot off the presses, 100000 new strip maps which have been prepared by the Alberta Motor Association are now being distributed to all official appointments of the A.M.A.

These new maps, brought up to date in every particular from government records showing work done up to the end of 1935 are available at hotels garages and also at branch offices of the Motor Association.

A wealth of valuable information for the tourist is contained in a set of these maps. Routes to follow to particular holiday spots, places where the fish bite best, popular tourist resorts and regulations concerning tourists and motorists are set out with care and clarity.

This year a big tourist rush to this province is anticipated, making it certain that there will be a heavy demand for the maps and other touring information supplied by the A.M.A.

Interesting Procedure

The compartment was occupied by four men three of whom were reading their morning papers. It was seen however that the fourth was silently moving his lips and waving now and again his hand from his face.

His actions interested one of his companions who proffered his paper to read remarking "How time does drag on long journeys!"

The man replied that he passed the time by telling himself jokes. But when asked why he waved his hand he said "Oh that's when I've heard it before."—Tit-Bits

MILLIONS ARE NOW INVESTED IN ALBERTA LUMBER INDUSTRY

For the past 12 years, Alberta has been slowly but steadily increasing its contribution to Canada's great lumbering industry.

One of the principal sources of output is located in the wide timber area approximately 100 miles west of Edmonton on the main line of the Canadian National railway.

Pioneer lumber men, quick to grasp opportunity have been steadily investing funds, and their total investment in equipment and housing in the lumber area totals now nearly $5,000000.

Trucks, tractors and other modern lumbering equipment have been introduced into the area and continued expansion is anticipated by most of the 20 or more operators in the district. There have been no failures among lumber men of the districts as yet, and none are anticipated.

The lumber area is approximately 120 by 90 miles. It is a territory of virgin spruce and pine timber and no appreciable inroads have been made on the reserves as yet. Most profitable products of the industry railway ties are made of pine and spruce yields raw lumber for Edmonton box factories.

Chiefly recruited from the city 200 men obtain employment each winter in the industry. All supplies are purchased in Edmonton. Provided with board and lodging the average laborer is able to return to the city in the spring with $300 in his pockets.

The more important officials have comfortable lodgings at their command and usually have their families with them all winter. Workers are lodged in camps, approximately 30 to a camp.

Largest development in the district is that owned by Frank Corser, one of the pioneer lumber men of the district. Outright owner of the town of Mackay 90 miles west of Edmonton, with the exception of the post office Mr. Corser is one of the men chiefly responsible for the opening up of the new industry and has an investment of approximately $500,000 in the district.

He uses master trucks to haul logs overland to rail and has been responsible for building many miles of roadway in the vicinity of Mackay.

In summer time, when lumbering is at a standstill Mr. Corser sends a contingent of his men to the Great Bear Lake district where he is engaged in road-building operations.

Practically every stick of lumber cut in the district passes through Edmonton and as the industry grows traffic will increase.

Go west, young men interested in lumbering.

Thirty-Six Million in One Hand

Eight cheques totalling in value no less a sum than $36,755,-630 changed hands on May 1 when the Canadian Pacific Railway paid off the balance in principal and interest due of the sixty million dollar loan contracted in 1932, and guaranteed by the Dominion Government at that time.

It will be remembered that in June of that year the Canadian Pacific had to raise the sixty millions to meet maturing obligations. The money markets of the world were then feeling the full effect of the financial crisis and were closed with the result that it was not possible for a Canadian institution to borrow so large a sum on advantageous terms. The Canadian banks therefore agreed to combine in making this loan, but as an added measure of security to the banks, the Dominion Government agreed to guarantee re-payment of the loan both as to principal and interest. The loan was to mature in five years, or might be paid off by the Canadian Pacific prior thereto on notice to be given to the banks. It has been paid off in full in less than three years, and the obligation of the Government to guarantee payment came to an end automatically the moment the cheques issued today were presented. Furthermore, since all interest and other charges have been paid by the Company, the entire transaction has not cost the Dominion Government one cent. The loan originally carried an interest rate of five per cent., but later this was reduced to four and a half per cent. New loans raised by the Company to pay this off were made at a still lower rate of interest.

GIRL OF 9 REINCARNATED SETS ALL INDIA TALKING; REMEMBERS PREVIOUS LIFE

DELHIGH India May 15.—Scientists, psychologists and medical men and philosphers have formed a committee to investigate what is described to be a real case of reincarnation—the case of Shanti Devi, who has set all India talking.

Shanti Devi is a girl of nine. For six years she has been telling her parents that she remembered many facts about what she called "a previous life." Many times she expressed a desire to visit Mutra, where she said her real husband lived as a cloth-merchant.

So persistent were her demands to "go home" that finally her parents mentioned the matter to some friends who knew Muttra. To their great surprise many of the geographical and historical facts mentioned by the girl proved to be correct.

The relatives of the man named by Shanti Devi as her husband then began inquiries. After she had recognized an unknown visitor as the younger cousin of her husband, they decided that the time had come for the husband himself to visit Delhi.

Not a word was said to the girl about this visit and when one day a stranger knocked at her door, the girl immediately embraced him, crying "My husband has come back to me." The girl also recognized one of the three children — accompanying the husband—as her own. She said he was born to her in her "first life."

A searching cross-examination demonstrated the accuracy of many of her assertions about her "first life"—in particular the assertion that she had been "first born" in 1902 and given the name of Ludgi, that her son was born in 1925 and that she died (as Lugdi) on October 24, 1925 at Agra.

These happenings attracted wide attention. After a public meeting of 10,000 Delhi citizens including many reputable public men a sub-committee was appointed to investigate.

It was decided that the real test would be to take the girl to Muttra, after it had been proved that as Shanti Devi she had never left Delhi.

On arrival at Muttra station she not only recognized amidst a large crowd her husband's brother, mother and cousins from the carriage window but addressed them in a colloquial phrase which is unknown to Delhi but common in Muttra.

Shanti was then blindfolded and placed in a carriage. The driver was told to go only where he was directed by the girl. She correctly indicated the route and even related incidents about the buildings and temples on the way.

The journey ended in a narrow lane, and stepping on to the doorstep of a house in the middle row cried, cried. "Here is my home." adding as an old man came out, "Here is my father-in-law."

Shanti Devi does not in any way resemble Lugdi in appearance. But her voice character and mannerisms are exactly the same as those of Lugdi.

This similarity has gone a long way towards convincing the husband that Shanti Devi is really his old wife reincarnated and he is now considering whether he should not take her back as his wife and as the mother of his ten year-old son.

Before doing so however it is probable that he will await the verdict of the scientific committee which is examining the case.

103, SHE LEADS BIRTHDAY DANCE

WINNIPEG, May 16.—Mrs. Nancy Poitras, who claims to be Manitoba's oldest woman, celebrated her 103rd birthday Friday by leading the dance at a party attended by 100 grandchildren, three great grandchildren and two great-great grandchildren at the family home.

Mrs. Poitras entered gaily into the festivities, leaning on the arm of her 61-year-old son only surviving member of 10 children.

FOR SALE—Early Ohio potatoes, 35 cents per bushel. Apply A. F. Schultz, Tofield. Phone 410.

PRAIRIE PROVINCES FIVE-YEAR CENSUS, JUNE 1st, 1936

When the Government Enumerator Calls.....

THE CANADIAN GOVERNMENT INVITES THE WILLING CO-OPERATION OF EVERY CITIZEN

COMMENCING June 1st, the usual five-year census of the three Prairie Provinces will be undertaken. The object of this census is to gather statistics by means of which your Government can function more intelligently, more effectively and more economically in the interests of all citizens of the country

No Government ever yet succeeded or gave its best without a thorough knowledge of its country and its people. That is why we ask your utmost co-operation in the census of the Prairie Provinces which commences on June 1st this year. When the Government Enumerator calls at your door, receive him courteously. Give him all the information for which he asks. Remember, he is the agent of good administration and is in *your service*. Help him to complete his work with all possible despatch. *On the accuracy and completeness of your replies to his questions depends the best interest of yourself and your Government.*

ALL INFORMATION IS HELD STRICTLY CONFIDENTIAL
You can place absolute trust in the official enumerator who calls on you. *All information you provide will be held in the strictest confidence.* It is compulsory by law to answer the questions put by the enumerator. But you are living up to the spirit of good citizenship as well as *to the letter of* the law by giving information *readily, completely and sincerely.*

DOMINION BUREAU OF STATISTICS

Issued by Authority of
The Honourable W. D. EULER, M.P.
Minister
DEPARTMENT OF TRADE AND COMMERCE

AN ECONOMIC UNIT

An economic unit can be one of any number of things. A sovereign state, province, municipality, town, village or even private enterprise as expressed in any particular business. No economic unit revolves absolutely within its own orbit, but it is becoming increasingly fashionable for economic units to, as far as possible, stay within their own orbits. It is called being on a self sustaining basis.

The Tofield District is an economic unit. Within it are facilities for trade, education, religion. Rural residents can find in Tofield stores most of the things they desire for everyday existence, no matter whether they are things to eat, wear, or use.

Included within the district is your local paper, published weekly, which like a wheel within wheels, is an economic unit itself. It strives to serve those people within the district and its fortunes are solely dependent upon those people. Mostly unassuming, yet burning its own light unshielded, it tells of things social or commercial, it is the publicity medium of the Tofield district economic unit, and as such, strives to merit the support of both readers and advertisers. If you are not a subscriber, we invite you to become one, the cost is small. If you are not an advertiser and have wares to sell, plan to become one, it is good business. If you live here, as far as possible deal here, the ultimate result will be beneficial to you.

The Tofield Mercury

HENRY FORD RIDES 'BIKE' FOR HEALTH

DETROIT May 18.—Henry Ford the man who has built more than 24000000 automobiles rides a bicycle.

The motor manufacturer who said he would ignore his 73rd birthday this summer explained Sunday his cycling is for exercise rather than a means of transportation as it was before he built his first experimental horseless carriage—largely of bicycle parts—43 years ago.

$5000 PRIZE PEACE ESSAY BASED ON INTERNATIONAL BOY SCOUT FRIENDLINESS

The essay on "World Peace" which won for a Scout, O. W. Matthews III of Portland Ore. the $5000 college scholarship offered by Eddie Cantor the comedian was based upon the writer's personal experience. He was a member of the American Scout contingent at the International Scout Jamboree of 1933 at Godollo Hungary and based his essay upon observation of the mutual friendliness and goodwill shown there by boys of many nationalities.

DR. WALLACE ACCEPTS QUEEN'S POST

KINGSTON, Ont. May 19.— Dr. R. C. Wallace of the University of Alberta has been appointed principal of Queen's university to succeed Dr. W. Hamilton Fyfe who accepted the principalship of Aberdeen university, it was announced Tuesday. Dr. Wallace will assume his duties September 1.

As Premier Aberhart, who also is minister of education is in the east it was impossible to ascertain what action will be taken by the government. The naming of a successor to Dr. Wallace is in the hands of the government and not the board of governors of the university.

Dr. Wallace is now in eastern Canada, having left here last Friday night immediately following convocation of the University of Alberta. He is expected to return in about two weeks.

Before leaving Dr. Wallace declined to give any information when asked if it was likely that he would accept the presidency of Queen's.

No hint of the name of a successor to Dr. Wallace was forthcoming in university or government circles.

One of Canada's foremost educationists, Dr. Wallace became president of the University of Alberta in 1928. He was the second person to fill the post, succeeding Dr. H. M. Tory.

During recent years and especially this year Dr. Wallace has been signally honored by other Canadian universities and now is the holder of honorary degrees of L.L.D. from several of these institutions.

Robert Charles Wallace, M.A.; B Sc.; Ph.D.; LL.D.; was born at Orkney, Scotland, on June 15 1881.

He is a graduate of Edinburgh university, Goettingen university and St. Andrew's university.

..In September 1910, he came to Canada and for the next two years was lecturer in geology and minerology at the University of Manitoba.

From 1912 to 1928 Dr. Wallace was professor of geology and minerology at the university of Manitoba. Dr. Wallace also held the position of commissioner of northern Manitoba from 1918 to 1921 and in 1927 was named commissioner of mines for the province.

Besides his university activities, Dr. Wallace also held high office in various Canadian organizations. He was president of the Canadian Institute of Mining and Metallurgy in 1924-25 and the following year headed the Manitoba Educational association. In 1911 he was made a Fellow of the Geological society London, England and in 1921 a Fellow of the Royal Society of Canada. He was president of the Association of Canadian Clubs in 1930-31 and also was president of the Men's Canadian club in Edmonton for a year.

Dr. Wallace is regarded as a man who has the knack of getting things done. He is considered in mining circles as the one who opened up the great Flin Flon mining area in northern Manitoba.

Some have regarded Dr. Wallace as a paradox. He always gets what he wants but he never fights for it.

As a geologist and head of the Alberta university, Dr. Wallace has traveled much of this province to gain first-hand information of the country. Some years ago he made an extended trip into the south country, visiting the Peace River district and other parts of the north.

Other universities are known to have fight to head their institutions in recent years. When it was rumored in 1934 that he might be named head of the University of Manitoba business interests in Edmonton made strong representations to the need of his remaining at his post in this province.

IONIC LODGE HOLD SUCCESSFUL BRIDGE

On Monday night last the Ionic Lodge, Order of the Eastern Star staged a successful bridge drive at the lodge hall. The honors were won by: Ladies' 1st Mrs. (Dr.) Law; Ladies' 2nd Mrs. Abbott; Ladies' 3rd Mrs. Burnett. Gent's 1st Oliver Letourneau; Gent's 2nd —; Gent's 3rd Mr. Cowell.

THE RED WOLF OF THE FOREST

The most determined efforts to keep Canada as clear as possible of forest fires in 1936 have been instituted in all parts of the Dominion. Adequate supplies of fire pumps; canoes; railway speeders; have equipped the fire ranger forces and all is being made ready for the two unknown events; what the weather will be like and what the Public will do. The latter element represents the 91 per cent cause of all forest fires. Men with lighted matches and tobacco; settlers clearing their land; campers and their cooking fires—such innocent-looking human actions annually create a deadly harvest of ruined forests; dried up waterways and homeless families.

Nearly five thousand rangers on the 'line of fire' across Canada are appealing to the public to join hands with them as protectors of the forest and streams during the present year. In many districts this friendly union of the rangers and those who travel in the woods for work or pleasure has succeeded in virtually outlawing the fire fiend and has kept the woods green and growing without a single blemish, for many years past.

Secretary--Treasurer.

CENSUS OF THE PRAIRIE PROVINCES

The quinquennial census of the three Prairie Provinces,—Manitoba Saskatchewan and Alberta—will be taken on Monday June 1. The Dominion Bureau of Statistics point out that it is specially important at the present time that a complete and accurate inventory be obtained

There are twelve inquiries which deal with the occupation, industry the industrial status, unemployment, employment and earnings of the gainfully occupied population. It is hoped that every question will be answered fully and it should be noted that there need be no fear that information given will be available to anyone The utmost secrecy is preserved and in no circumstances will any information supplied by individuals be used as a basis for taxation or for any other purpose. All officials and clerks are bound by an oath of secrecy

In addition to the questions dealing with occupation, industry and status certain inquiries relating to unemployment, employment and earnings will be addressed to all persons reported as wage or salaried workers. Persons not at work on June 1 will further report the reason and the number of weeks since last employed Those with jobs will be asked whether employed on full or part time basis or on relief work and the number of weeks worked during the last twelve months Every wage earner will be expected to state the total amount of his earnings during the past twelve months

Not only will the Census give a comprehensive picture of the occupational scene on June 1 but it will describe its more permanent features as well The Census will tell for every community what its working members were doing for a living on June 1 and also what they usually do Such information is useful in formulating a policy of re-employment and placing

Much interest and concern exists today as to the number of unemployed in the country, distinct from those in receipt of relief. Unemployment in depressed industries as well as in the various grades of occupation will be fully understood from the facts gathered at the Census The light the Census will throw on the duration of unemployment in the Prairie Propinces as well as the extent of part time employment will be very useful in framing remedial measures to meet the situation

It is recognized today that young people represent a special problem Young persons who have now come into the labor market as competitors for available jobs will receive special attention It is proposed to record them separately from the unemployed who have followed an occupation at some time prior to the census and to find out how many have been trained to fill a number of clerical, technical and professional occupations.

FOOD FALLACIES

The American Public Health Association Year Book, 1935-36, contains the report of the Committee of Nutritional Problems. Under the heading of food fallacies and nutritional quackery is found some useful information which is here digested to point out to readers some of the commonly held mistaken ideas concerning foods.

There is an erroneous idea commonly held that nearly every disease and ailment can be cured by some system of dieting. The successful preying on the public by faddists and quacks in this respect has assumed alarming proportions.

One of the most common and extensively proclaimed nutritional fallacies is that proteins and starches are incompatible and that they should be separated into distinct meals. One can look in vain through the writings of authorities in textbooks and journals for any scientific experimental data in support of this idea.

Investigators and authorities in the field of nutrition are practically unanimous in the opinion that there is no incompatibility between starches and proteins in the diet.

"Acidosis" is a term that is frequently used by the purveyors of food fallacies in the exploitation of their books, literature and dietetic systems. Nearly all diseases that afflict mankind are enumerated by them as the result of "acidosis" caused by eating "acid foods".

Acidosis is usually a condition attending certain diseases such as diabetes or kidney disfunction, involving a faulty metabolism of the body. The Committee on Foods of the American Medical Association believe that as the term "acidosis" is so little understood its use in public advertising is misleading and is, consequently, disapproved.

There is no evidence to show that a preponderantly acid diet is injurious. The body reaction remains practically unaltered even when a wide range of amount of acid or base is ingested.

The commonly so-called "acid" fruits such as oranges, tomatoes and grapefruit contain certain weak organic acids which are easily oxidized in the body. They really serve as available alkali to the body.

The statement that white meat is less harmful than dark meat has no basis in fact. The white of egg is much less digestible when raw than when cooked.

Many reducing menus are erroneously based on the elimination from the diet of individual foods such as potatoes, rice cereals and butter. It is not the kind of food which should be restricted but rather the quantity.

Beware of food fallacies.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

IS MILK FATTENING? HERE IS THE ANSWER

A study of milk consumption recently conducted in a [illegible] population centre on this continent reveals the fact that diversity of [illegible] exists regarding the "fattening" nature of milk. Of the two thousand adults interviewed sixty-one per cent of whom were women and [illegible] per cent men [illegible] expressed the belief that milk is a fattening food and [illegible] it helped to reduce weight. In both cases the percentage was about the same for milk drinkers and non-milk drinkers.

It may seem [illegible] that both opinions are correct, but such is the case. When milk is taken either at or between meals, [illegible] the amount of foods [illegible] individual at constant weight, it is natural that it will have a tendency to increase weight. On the other hand because milk [illegible] value compared with many foods, it is an important factor [illegible] for reducing abnormal weight [illegible] requisite in every [illegible] one for reducing [illegible] maintaining normal weight [illegible] of foods which [illegible] building and repair [illegible] supplies more nutrients to the body than any other single food and should be given a prominent place in meals planned to [illegible] weight. For the [illegible] an excellent food [illegible] weight [illegible] adds not only calories [illegible] minerals and vitamines [illegible] easier to use extra amounts of milk than most other foods and [illegible] place beverages lacking in nutritive value, and can be taken between meals and at bed-time without interfering with the regular meals. Then, too, milk is palatable and [illegible] well with other foods.

Milk is a food which everyone needs—whether young or old, short or tall, fat or thin. Used as the foundation of the daily meals [illegible] Milk Utilization Service, Dairy and Cold Storage Branch, Dominion Department of Agriculture, points [illegible] this healthful food contributes to the fuel or energy requirements of the body. What is more important it furnishes bone, tooth and tissue building materials together with those indispensable [illegible] factors—vitamines—all of [illegible] essential to the attainment of health growth and strength.

UNIFORM QUALITY PRIME BACON FACTOR

There were several outstanding features in the 1935 hog market, states the "Seventh Annual Market Review" [illegible] issued by the Live Stock Branch, Dominion Department of Agriculture. Not the least of these features was an average price, somewhat higher than [illegible] despite a lower average price [illegible] at the British market during part of the year. This situation [illegible] developed out of strong competition for the visible supply of hogs and, from the producer's point of view, made a satisfactory market. The trade made commitments to the [illegible] market in excess of [illegible] the previous year, apparently [illegible] when the market was somewhat out of line with profitable [illegible].

With regard to Canada's place in the British bacon market, the Dominion regained her position in 1934 as [illegible] in volume of supply to that market. This position was further consolidated in 1935 through [illegible] shipments in a smaller total [illegible] into the United Kingdom from all sources. In respect [illegible] supplies Canada also held [illegible] place and here again offered a larger share in a smaller total im[illegible] than during the previous year. Denmark continued to secure by far the largest share of the British import bacon trade and during the year the Irish Free State made a substantial gain in volume of product sold. Foreign countries' supplies showed the effects of further restriction in their [illegible] allowance.

Unfortunately Canada's price position in the British bacon trade was not improved and her bacon showed a lower average price than the similar product of any other country. This situation has been variously explained from time to time, but it might be well to state here says the Review that while the top qualities of Canadian bacon are as good as, and possibly at times better than the [illegible] of other bacon imported [illegible] quite variable and [illegible] unfavourably in that respect with foreign bacon. Uniformity in quality is the most potent factor in the making of prices for bacon [illegible] that Canada is shipping a volume second only to that of Denmark. This indicates the importance of the work which is being undertaken to develop further uniformity in the type and quality of the live hog finish for market and also to unify packing house practice in the matter of processing and marketing.

PRIZE WINNING ESSAY

Editor's Note: The following is a prize winning essay on "Some of the Major Problems of Grain Production." The essay was written by Frank H. Larcombe of Minburn, Alta., and was entered in a competition sponsored by the Grain Trade. As it contains some useful information to farmers of this part of Alberta we are publishing it in full with the exception of the opening paragraph.

One of the major problems that will be always with us is that of weed control. It may differ somewhat in different parts of the Province but no one escapes, and to clean and keep clean our land is a constant source of worry and work. Yes, and hard study; for the practical solution of this problem must be worked out by the individual farmer according to the needs and conditions of his land. However there are several systems of weed control that are worthy of consideration and the general use of summer-fallow will always be practiced to some extent. We may try rotation and other methods and they will help, but the farmer with a large acreage is of necessity, forced to summer-fallow a percentage of land each year not only to destroy the weeds but to insure him of getting in his crop in season, and in good condition. With this system comes the danger of drifting with the loss of crops and the depletion of the fertility of the soil and as this condition so often follows black summer-fallow, it is necessary for every farmer on the prairies to follow some system of protection or face certain loss. I think our system will be of use here and help to solve for others, as it has for us, these major problems of weed control and drifting, and at the same time complete the work efficiently and economically in both labor and costs.

In this as in all systems of weed control, it is necessary to get the seed already in the ground to germinate, and as the seed must be close to the surface to grow it is necessary to work up the land often to bring them to a point where germination will take place. For this we use a good fall disking with a light, flexible harrow. In the case of land not fall-disked a stroke in the early Spring will be effective. This will give the weeds an early start. We advise first ploughing as soon as a good crop of weeds have started, or as soon as seeding is completed. This ploughing is done with a one-way disk, and the land should not be cut more than three inches deep. Make a good job of this stroke and follow with the flexible harrow, or other light harrow that will not gather trash. It will be found that a lot of trash and stubble is left on top of the land after the one-way disk. This helps to some extent to preserve moisture and prevent drifting of light soils, giving the weeds better germination. The next stroke is given early in July or when weeds are again showing up. (Do not let weed growth or wild oats get too high. This machine will do a 100 per cent job if weeds are destroyed young but will not cover tall growth and a rain will start growth again.) This plowing should be five inches deep or as deep as you wish the land worked. (Do not think a one-way disk cannot plow deep. It can.) We find it advisable to cross-plough the second stroke; that is, if you have worked East and West, give the field the second stroke North and South. This is not essential but a good practice where large fields are worked, for it assures that all parts of the land are covered. Use the light harrow only, if necessary after the second stroke. If the land is reasonably level leave it until the weeds have again germinated. Practically every year when we have used this method the second stroke of the one-way disk has been effective and we have followed with the drill and harrow later. However if the weeds should be too high and thick, a light cultivation could be given before the drill this constituting the last stroke for the season and being used to destroy the young weeds and to sow the cover crop. We use oats but wheat or barley is effective and if sown at one bushel per acre for oats or one half bushel for wheat it will be found plenty. Usually we cover every other run of the drill with a block sowing twelve inches apart, but this is not essential. It is a little easier to regulate the seed by this method, is quite effective and gives thicker growth in the row. The use of a cover crop does not seem to take away the benefits of summer-fallow. The old idea that it does is not justified by the results we have obtained. In fact, the crop has been better each year this method has been followed. The small amount taken from the soil is more than compensated for by the protection afforded the land.

It is good policy to turn the stock on the land as soon as growth is heavy enough for food. There is no doubt that the use of stock is a great help. It packs the land and helps to conserve moisture. We find that the cover crop can be well pastured without damaging the growth, or destroying the effectiveness of the cover, as the roots and stems hold the soil the following spring. It was the Spring work that proved hard for us the first year this method was tried. The desire to kill the weeds and put the land in good shape for the drill was too much for us. The result was a light cultivation was given before drilling. This destroyed the cover and loosened enough surface soil to start drifting so that the labor of the year before was lost. Do not work summer-fallowed land in the Spring if it is likely to drift. Drill with as little disturbance of the surface as possible and this will assure you a successful start for your crop.

So far I have spoken of the general run of weeds that cover the prairie Provinces. With wild oats the method should be somewhat changed. As this menace is rapidly spreading over the whole west, special mention should be made of this problem, for the loss to to farmers has increased year by year, until wild oats cause one of the heaviest losses to Western grain production and it is found impossible to destroy this particular weed in one year, no matter what system we employ. The best results we have had are obtained by taking a crop of green feed the previous year to summer-fallow. Care should be taken to see that none mature and seed. We have found that it is best to follow the binder with the one-way disk. This should be done with a tractor. Cut the furrow three inches deep and you will find the bull wheel of the binder will run in the furrow. There will be little trouble experienced if the disk is near the same width as the binder, but it should not be wider. By this method the sheaves will be thrown clear of the stubble and time will be saved. There will be no need of disking in the fall unless the crop has been cut very early. Follow this procedure with the method of summer-fallow already outlined and you will have a perfect job.

The second system we have used to advantage has been to put green feed on the summer-fallow. Cut it early, following the binder as in the Fall. This should be done when wild oats appear in your crop. The idea that we cannot afford to lose a crop on Summer-fallow is a mistake. We cannot afford to sow a crop of wild oats. A stack of green feed is always useful and it will pay in the long run. Never forget wild oats take longer to germinate than some other weeds, and as already mentioned are never killed in one season no matter what system you try. They can be kept down to some extent by barley or other early crops but not entirely killed. Keep fighting the menace of wild oats and you will be successful for if you do not they will destroy you. Wild oats take a very heavy toll in this part of Alberta. I think they constitute our greatest source of loss and expense. We must destroy them and the cheapest and easiest methods I know are those outlined. In this method of summer-fallow we find that most of the major problems in regard to seeding, drifting and weed control have been covered. Also the conservation of moisture has been discussed to quite an extent. It remains only to consider the quickest and cheapest way to produce a good crop and do it right. The farmer must study economy at all times if he will keep a balance on the right side of his ledger and is fortunate if he can do it then. The practical farmer knows that poor work never pays but necessity will sometimes force a man to hurry over a job that has to be done in a certain time.

We think this major problem has been solved for us with the advent of the one-way disk. This machine has done more than any other to make it possible for a farmer to cover his land quickly and well, at slight cost in power compared with the Moldboard plow. We use and recommend this implement for practically all work where the plow was used on both summer-fallow and Spring plowing. This disk can be procured with or without the seeder attachment and is very useful in either style. For oats we have found the combined seeder and plow does good work but I like my wheat land plowed deeper than wheat should be seeded so we generally follow the one-way disk with the drill. This lessens drifting danger and is far quicker than the old style plow. It also cuts our seeding expenses to a minimum and saves the usual Spring rush, especially in a wet or late season. We have found in all our operations for, the destruction of wild oats, couch grass and other weeds, the prevention of drifting, the conservation of moisture, economy in time, labor and costs the one-way disk with seeding attachment has done much to make it possible for the farmer to come out on top. It gives him a chance to overcome these major problems with renewed hope and courage to carry on to success.

HAILE ON WAY TO NEW HOME

LONDON, May 23. —Emperor Haile Selassie of Ethiopia will board the British cruiser Capetown at Haifa this afternoon en route to London, the foreign office announced today.

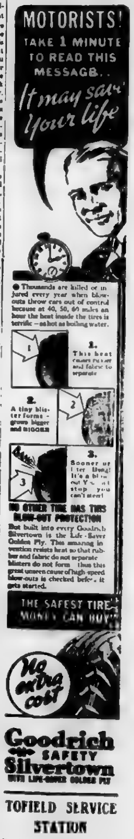
Selassie submitted the proposal to visit London and received approval from the government, it was learned officially. The length of his visit was not disclosed.

The emperor is to travel to Gibraltar on the cruiser and will make the rest of the trip by regular passenger steamer.

CHILD SIPS POISON, MOUTH IS [illegible]

Putting a bottle of poison to his mouth while his parents were busy moving into their suite in the Devonshire block, 10018 112 st., Edmonton, Monday, Harold Wayne Clenner, 18-months-old son of Mr. and Mrs. Harold G. Clenner, suffered severe mouth burns. The baby was rushed to the General hospital.

The poison had not gone down the child's throat. The child had been given cough medicine shortly before, which was in a similar bottle.



MOTORISTS! TAKE 1 MINUTE TO READ THIS MESSAGE..
It may save your life

● Thousands are killed or injured every year when blow-outs throw cars out of control because at 40, 50, 60 miles an hour the heat inside the tires is terrific—as hot as boiling water.

1. This heat causes rubber and fabric to separate
2. A tiny blister forms—grows bigger and BIGGER
3. Sooner or later, Bang! It's a blow-out! You can't stop you can't steer!

NO OTHER TIRE HAS THIS BLOW-OUT PROTECTION
But built into every Goodrich Silvertown is the Life-Saver Golden Ply. This amazing invention resists heat so that rubber and fabric do not separate—blisters do not form—thus this great unseen cause of high-speed blow-outs is checked before it gets started.

THE SAFEST TIRE MONEY CAN BUY!
No extra cost

TOWN GOSSIP—

NOT FOR many years has such energetic effort been put forth in connection with the Public Works Committee of the council. Draining excess water away seems to be their main line of attack and it appears to be a very successful one. Main street has been ditched on both sides, well crowned in the centre, and, with the occasional drag and perhaps a coating of gravel, it should give good service for the one season at least. But Walter Bellamy, who is boss of the work has even given some attention to the back alleys. Anyway, the alley immediately west of main street has been ditched with plows and graded. And when they were plowing, what a variety of articles they turned up. Tin cans, bottles, stove lids, sundry automobile parts—almost everything but money. We have not heard of them digging up a can of gold or silver—and they pass right at the rear of the bank premises too!

When Bert Calvert sold out to Mr. Hummel, he had everything pretty well slicked up inside. But a new man and a new shop just naturally mean improvement, so Mr. Hummel got busy and put up an awning. This is, no doubt, the first time this building has been so honored, and while the window isn't large, the awning makes it much more comfortable for patrons undergoing tonsorial rejuvenization. The mechanism is not nearly as complicated as it looks. You pull a rope and up she goes, you play out the rope and down she comes. A one hundred per cent improvement with simplicity the key note.

A glance at the calendar shows June only a day or so ahead. It would almost seem to be time for the initial thinking regarding Tofield Sports Day. Last year's sports day was quite a success, but the committee slipped a little financially. However a surplus took care of what deficit there was and this year's sports day committee (whoever they may prove to be) will not have to assume any debts.

We do not suppose all the Tofield district people will be attending the Vancouver celebrations this summer. At least enough of them will no doubt remain in the district on July 1st to make a celebration day here a success. That is if it doesn't rain. Therefore, perhaps a sports day meeting better be held in the near future.

Our rather sketchy and comparitively recent history of the post office brings to bat champions of more accuracy and greater detail. We really thought that everything would have been figured out right for this issue, but the record will have to be held over until next issue. We were, last week, generally correct as far back as we went, but evidently did not go back far enough.

Anyway the new post office is away to a good start. We have had splendid weather since it moved over! The fixtures are now all installed and what with varnishing, painting, etc. everything looks spic and span. Behind the scenes the postmaster has laid things out to bring about the maximum of service with the minimum of confusion.

To Dr. Law goes the honor of mailing the first letter in the new building. On Saturday evening, while the fixtures were being put in place, somebody, according to the postmaster, shouted "where shall I put this letter?" It was put through the hole in the wall and fell on the lobby floor inside. The person mailing the letter was later remembered as Dr. Law. The Mercury mailed the first piece through the letter box in the lobby. Gaining admission Sunday evening the editor took the opportunity of mailing a letter. It contained one dime for the T. Eaton Co., and was due on some seeds purchased and which were unobtainable locally. We hope the seeds grow!

There is one thing that the depression has done as far as this paper is concerned. That is to make us realize that from the soil, through the farmer, comes practically all our wealth— and that for a decade more the same conditions will prevail. Of course we knew it well enough in predepression years, but within the past few days we have been reminded of this belief. Nothing very startling—just evidences of well-to-do expenditures, that when traced back, their roots were found in the soil. The farming group is by far the most important group in this province. Without them the rest of us would find no opportunity here. But with importance and power goes responsibility based upon full and intelligent realization of that power. Sometimes we wonder if that realization is as full and complete as it should be. Anyway it would do no harm to give it thought.

While it is quite true that agriculture is topdog in Alberta today, and likely to be so for a decade yet, readers should know that the mining industry is coming on apace and as a wealth producer may at some time or other surpass agriculture.

CERTIFICATE PLAN NOW DEPENDING ON OTTAWA ACT

Plans of the Alberta government to issue certificates in lieu of cash wages to workers on highway construction are largely dependent now on the conference between Premier King and Premier Aberhart which started Tuesday in Ottawa Acting premier E. C. Manning said in Edmonton.

"There can be nothing definite until we see the outcome of the talks in Ottawa" the acting premier said as he returned from a week-end in Calgary. "But" he added "we hope to get the certificates plan started by June 1 if all goes well."

He confirmed the statement of Hon. Lucien Maynard, minister without portfolio who at St. Paul Sunday gave details of the government's proposals on certificates. Mr. Maynard declared that this plan was the first step in establishment of Social Credit.

Discussing possibility of merchants refusing to accept certificates —they cannot be forced by law to accept them—he cited the case of a merchant in Vermilion who refused to accept post-dated cheques under the Fallow scheme a few years ago. This merchant said Mr. Maynard almost went bankrupt and even after he started to take the cheques never regained his business.

Mr Maynard said he expects the greatest boom Alberta ever saw when the certificate scheme gets under way but that the certificates must be kept circulating within the province and the government not called upon to redeem too many of them. He was confident that manufacturing plants can be built up for practically everything required within the province.

Referring to the promised dividends he said the government was finding out that the people of the province do not want the dividends. What they do want is work he said. They would get this under his public works scheme.

He said that when the boom was on there would be so many goods produced in the province and placed on the store shelves that it would be necessary to issue then a dividend to the people to provide them with the necessary purchasing power to consume all the extra goods. Until this time came however the dividend would be paid to aged and crippled people who are not able to participate in the "great works" that would be going on.

POLICE START CAR CHECK-UP
